—*(1.)*—

FINANCE.

Session

31 *January* —— 29 *July* 1856.

VOL. XXXVIII.

1856.

ACCOUNTS AND PAPERS:

1856.

TWENTY-SIX VOLUMES:—CONTENTS OF THE

FIRST VOLUME.

N.B.—*THE* Figures *at the* beginning of the line, *correspond with the* N° *at the foot of each* Paper; *and the* Figures *at the* end of the line, *refer to the* MS. Paging *of the Volumes arranged for The House of Commons.*

FINANCE:

Finance Accounts: I.—VIII.:

✓ 252. Finance Accounts of the United Kingdom of *Great Britain* and *Ireland*, for the Financial Year 1855–56, ending 31st March 1856 - - - - p. 1

Exchequer:

✓ 189. Account of all Monies received, during the Year ended 31 March 1856, to the Account of Her Majesty's Exchequer, at the Bank of *England* and of *Ireland*, under the respective Heads of Public Revenue; the Amount of all Royal Orders and Treasury Warrants received, and of the Credits and Transfers made by the Comptroller-General of the Exchequer; the Payments by the Bank of *England*; and the Balance remaining to the Account of the Exchequer at each Bank, on 31 March 1856 (per Act 4 Will. 4, c. 15, and 17 & 18 Vict. c. 94), 105

Exchequer Bills:

✓ 135. Account of all Exchequer Bills raised, or authorised to be raised, charged on the Aids or Supplies of 1856, unprovided for - - - - - - 115

✓ 171. Return of the Amount of Exchequer Bills Changed, and the Amount of Exchequer Bills paid in Money, in the Months of March and June in the Years 1852, 1853, 1854, and 1855, and in the Month of March 1856; and the Amount of Exchequer Bills now Outstanding - - - - - - - 117

Public Income and Expenditure:

✓ 1. Account of the Public Income and Expenditure for the Year ended the 30th day of September 1855, together with the Balances in the Exchequer at the Commencement and at the Termination of the Year, and the Amount of Funded or Unfunded Debt created or redeemed in the said Year: And, like Account for the Year ended the 31st day of December 1855 - - - - - 119

✓ 142. Account of the Public Income and Expenditure in the Year ended the 31st day of March 1856, together with the Balances in the Exchequer at the Commencement and at the Termination of the Year, and the Amount of Funded or Unfunded Debt created or redeemed in the said Year - - - - 125

✓ 348. Account of the Gross Public Income and Expenditure for the Year ended the 30th day of June 1856, together with the Balance in the Exchequer at the Commencement and at the Termination of the Year, and the Amount of Funded or Unfunded Debt created or redeemed in the said Year - - - - 129

✓ 382. Account of the Public Income and Expenditure of the United Kingdom, in the Years ending the 31st day of March 1855 and 1856, distinguishing the actual Payments for the Expenses incurred in the Collection and Management of the Revenue, &c. (in continuation of Parl. Paper, No. 453, of Sess. 1855) - 133

Public Debt:

✓ 30. Account of all Additions which have been made to the Annual Charge of the Public Debt, by the Interest of any Loan that hath been made, or Annuities created, in the last Ten Years (1847 to 1856); presented in pursuance of an Act 27 Geo. 3, c. 13, s. 72; and also showing how the Charge incurred in respect of the same has been provided for - - - - - - - - 147

(*continued*)

National Debt:

√ 169. Account of the Gross Amount of all Bank Annuities and Long Annuities transferred, and Money paid to the Commissioners for the Reduction of the National Debt, &c., and Expenses incurred - - - - - - - p. 151

√ 184. Return showing the Amount of Capital of the National Debt, which did not pay the Income Tax for the Year ending April 1855, stating the Number of Accounts on which Exemption was Claimed - - - - - - - - 155

√ 416. Return of the Amount of National Debt existing on the 5th day of April, since the Year 1854; specifying the Description of Stock, the Interest payable on each Description, the Reduction or Increase of Interest payable each Year, with the Cause of such Reduction or Increase, and showing the Amount of Stock created or redeemed in each Year: And, of the Amount of Stock cancelled each Year in Exchange for Terminable Annuities since their Creation: specifying the Amount of Terminable Annuities in existence in each Year ending the 5th day of January since their Creation up to the Year 1853, and on the 5th day of April in all subsequent Years up to April 1856, inclusive - 157

Accounts, Public:

√ 215. Statement of the Accounts in the Audit Office, showing to what Date Examined or finally Audited; and the Reason for the Delay, if any, in the Audit of Accounts in Arrear (in continuation of Parl. Paper of Session 1849) - - - 161

Naval and Military Accounts:

√ 160. Copies of Reports and Treasury Minutes relating to the Audit of Naval and Military Accounts - - - - - - - - - - 203

Bank of England:

√ 11. Annual Accounts of Exchequer Bills, &c. purchased; Balances of Sums issued for Dividends; Account of Sums received and expended by the Commissioners for the Reduction of the National Debt; and Applications for Advances to the Government - - - - - - - - - - - 325

Bank Notes:

√ 37. Copies of the Correspondence between the Chancellor of the Exchequer and the Governor and Deputy Governor of the Bank of *England*, on the subject of issuing additional Bank Notes within the limit of the Act 7 & 8 Vict. c. 32: And, of the Order in Council authorizing the Issue in question - - 329

√ 137. Copy of Treasury Minute, dated the 18th day of March 1856, respecting the Payment to the Public of the Net Profits of the additional Issue of Bank Notes under Her Majesty's Order in Council, dated the 7th day of December 1855 - - - - - - - - - - - - 335

Banks of Issue:

√ 118. Return of any Banks, being Banks of Issue, previously to the passing of the Act 7 & 8 Vict. c. 32, which have ceased to issue their own Notes, and of the Amount of Circulation of such Banks respectively, made up to the present Date - - - - - - - - - - - - - - 339

Bibles, &c.:

√ 289. Return of the Monies paid or allowed during the Years 1854 and 1855 respectively, for Drawback of Duty on Paper used for Printing Bibles, Testaments, and Prayer Books of the Churches established in *England* and *Scotland* - 341

British Museum:

√ 147. Accounts of the Income and Expenditure of the *British* Museum, for the Financial Year ended 31st March 1856; of the Estimated Charges and Expenses for the Year ending 31st March 1857; of the Sum necessary to discharge the same; and of the Number of Persons admitted to visit the Museum from Christmas 1849 to Christmas 1855; together with a Statement of the Progress made in the Arrangement of the Collections, and an Account of Objects added to them, in the Year 1855 - - - - - - - - - - - 343

Bullion (Bank of England):

✓ 26. Return of the Amount of Bullion Purchased and Sold by the Bank of *England*, in each Month of the Year 1855; also, the Excess of Payments to, or of Receipts from the Public, of *British* Gold Coin; and also, the Amount received from the Mint during the same Period—(in continuation of Parliamentary Paper, No. 48, of Session 1855) - - - - - - - p. 363

✓ 410. Account of the Notes, Securities, Bullion, &c. of the Bank of *England*, as published Weekly in the Gazette, according to the Act 7 & 8 Vict. c 32, &c. (in continuation of Parliamentary Paper, No. 173, of Session 1854-5) - - 365

Civil List Pensions:

✓ 327. List of all Pensions granted between the 20th day of June 1855 and the 20th day of June 1856, and charged upon the Civil List - - - - 385

Coinage:

✓ 34. Account of the Sums advanced in each Year from the Consolidated Fund for the Purchase of Bullion for Coinage, and of the Sums paid in each Year to the Account of Her Majesty's Exchequer at the Bank of *England*, in Repayment thereof (pursuant to Act 7 Will. 4, c. 9, s. 4) - - - - - 387

✓ 365. Account in detail (in the same Form as the Account contained in the Parliamentary Paper, No. 46, of last Session), of all Gold, Silver and Copper Monies of the Realm, coined at the Mint, for each Year from the 1st day of January 1846 to the 31st day of December 1855; and also showing in one Tabular Statement, the Total Amount of the Gold, Silver and Copper Coinage in each Year, the real Cost or Value of the Metal, and the Amount represented by the Coin - 389

Commissions of Inquiry:

✓ 415. Return of the Number of Commissions of Inquiry appointed since the Year 1830; distinguishing each, and if expired, the Date thereof, and the Expense of each, &c. to the present period, in the same form as Parliamentary Paper, No. 720, of Session 1850 - - - - - - - - - - 395

Duchy of Cornwall:

✓ 3. Account of the Receipts and Disbursements of the Duchy of *Cornwall*, in the Year ending 31st December 1855 - - - - - - - - 415

Duchy of Lancaster:

✓ 74. Account of the Receipts and Disbursements of the Duchy of *Lancaster*, for the Year ending Michaelmas 1855, and continued to the 21st day of December following; showing the Amount of Revenue which became due, the Monies received and paid within the Year, and the Arrears and Balance at the end of the preceding and current Years:—Also, a separate Account of the Capital of the said Duchy, for the same Period - - - - - - - 421

Fees on Baronetcies, &c.:

✓ 87. Return of all Fees chargeable upon Baronetcies, Orders of the Bath, or other Honourable Distinctions conferred by Her Majesty in reward of Distinguished Services; and of any Expenses incident to such Creations or Distinctions, 451

Fire Insurance:

✓ 201. Account of Sums paid into the Stamp Office in *Great Britain* and *Ireland*, on Insurance from Fire, for Quarters ending 25 March, 24 June, 29 September and 25 December 1855; distinguishing Allowance to each Office for collecting the same:—Also, Return of Insurance of Farming Stock for the same Period:—Also, of the Gross Receipts for Insurance for Years 1850, 1851, 1852, 1853, 1854, 1855 - - - - - - - - - - - - 455

Greek Loan:

✓ 32. Account of Monies paid out of the Consolidated Fund, under the Acts 2 & 3 Will. 4, c. 121, and 6 & 7 Will. 4, c. 94, for Interest and Sinking Fund on that part of the *Greek* Loan which is guaranteed by this Country under the authority of the said Acts, and of the Amount repaid by the *Greek* Government on account of the same - - - - - - - - - - - - 465

Hereditary Pensions Redemption:

√ 250. Account showing the Particulars of the Hereditary Pensions which have been redeemed in the Year ending the 31st day of March 1856 by an Issue of £.213,177. 1. 2.; the Principle on which such Redemption Money was calculated:—And, Copies of any Minutes by which the Issue of Public Money has been directed for the Redemption of Hereditary Pensions - p. 467

Horses and Carriages:

√ 314. Return of the Number of Horses and Carriages paying Taxes in each County in *England* for 1854 - - - - - - - - - - - 473

Income Tax:

√ 313. Return showing the Number of Persons charged to the Income Tax for the Years ended the 5th day of April 1854 and 1855, under Schedule (D.); distinguishing the Number charged in each of the following Classes, viz., under £. 100 a Year; £. 100 and under £. 150 a Year; £. 150 a Year and under £. 200; £. 200 and under £. 300; £. 300 and under £. 400; £. 400 and under £. 500; £. 500 and under £. 600; £. 600 and under £. 700; £. 700 and under £. 800; £. 800 and under £. 900; £. 900 and under £. 1,000; £. 1,000 and under £. 2,000; £. 2,000 and under £. 3,000; £. 3,000 and under £. 4,000; £. 4,000 and under £. 5,000; £. 5,000 and under £. 10,000; £. 10,000 and under £. 50,000; £. 50,000 and upwards; and the Amounts of Tax received from each Class:—Similar Return under Schedule (E.), to £. 5,000 a Year and upwards:—Return showing the Net Amount of Property and Income Tax for the same Years, classed under the several Schedules (in continuation of Parliamentary Paper, No. 482, of Session 1855):—And similar Return for *Ireland* - - - - - - 475

Income Tax, &c. (London):

√ 358. Return of the Names of Persons employed in the Assessment and Collection of Income Tax, and Land and Assessed Taxes, in the City of *London*, during the Year ending the 5th day of April 1856, the Capacity in which employed, Rate of Poundage, Amount of Salaries or Allowances received, and whether employed in other Duties or not; and of the Total Amount of Income Tax, Land Tax and Assessed Taxes in the same Period (in continuation of Parl. Paper, No. 528, of Sess. 1854–55) - - - - - - - - - - 483

Increase and Diminution (Public Offices):

√ 111. Abstract of Accounts of every Increase and Diminution which has taken place within the Year 1855, in the Number of Persons employed in all Public Offices or Departments; pursuant to Act 4 & 5 Will. 4, c. 24 - - - 487

Legacy, &c. Duties:

√ 417. Return of Capital on which Legacy Duty has been paid, and Amount of Revenue received, in the United Kingdom, for Stamp Duty on Legacies, &c., in the Years 1854 and 1855; and the Amount of Duty received since 1797 (in continuation of Parliamentary Paper, No. 234, of Session 1855) - - - 491

Loan Societies:

√ 200. Abstract of Accounts of Loan Societies in *England* and *Wales*, to 31st December 1855, by *John Tidd Pratt*, Esq., the Barrister appointed to certify the Rules of Savings Banks - - - - - - - - - - - - 495

National Gallery:

√ [2106.] Copies of Papers on the subject of a Site for a New National Gallery - 507

£. 100 £.	5,000,000		£.	5,000,000

It is provided by the said Act, that a sum of £. 250,000 should be charged on the Consolidated Fund, and be applied by the Commissioners for the Reduction of the National Debt for the redemption of £. 5,555,416. 13. 4., the Capital created by the said Loan.

The first payment is to be made in the financial year, commencing on the 1st April, which shall first happen 12 months after the ratification of a definitive Treaty of Peace with Russia (1 April 1858).

The charge for management of this Loan (£. 2,500) was paid by an issue out of the Consolidated Fund, under the provisions of the 18th clause of the Act 19 Vict. c. 6.

FUNDING £. 3,000,000 of Exchequer Bills, 19 Vict. c. 5.

Each Subscriber in the books opened at the Bank of England towards funding Exchequer Bills, charged on the Aids or Supplies, dated in December 1854, and March, June and August 1855, was entitled, for £. 100 Principal Money contained in such Exchequer Bills so subscribed, to £. 111. 2. 2. Three per Cent. Consolidated Annuities, the Interest to commence from 5th January 1856.

Each Subscriber was also allowed, instead of depositing Exchequer Bills at the Bank of England, to pay money in lieu thereof, upon payment of 5 *s.* per centum, and he was allowed the same amount of stock for his £. 100. 5. as those that subscribed Exchequer Bills. The Capital created was £. 3,333,250.

PUBLIC DEBT.

AN ACCOUNT of all ADDITIONS which have been made to the ANNUAL CHARGE of the PUBLIC DEBT by the Interest of any Loan that hath been made, or Annuities created, in the last Ten Years (1847 to 1856); presented in pursuance of an Act 27 Geo. III. c. 13, s. 72; and also showing how the Charge incurred in respect of the same has been provided for.

In the Year 1847:

BY virtue of an Act, 10 Vict., c. 9, the sum of 8,000,000*l.* was borrowed for the service of the year 1847, upon the following terms, viz.:

	£.	*s.*	*d.*
The Contributors were entitled, for every 89*l.* 10*s.* contributed, to 100*l.* Capital Stock Three Pounds per centum Consolidated Annuities, amounting to - - - - - - - -	8,938,547	9	8

	£.	*s.*	*d.*
And the Annual Charge in respect of the said 8,938,547*l.* 9*s.* 8*d.* Three Pounds per centum Consolidated Annuities, including 2,681*l.* 11*s.* 3*d.* for Management, at 300*l.* per million, is - -	270,837	19	8

(The above Charge is authorised to be defrayed out of the Consolidated Fund.)

In the Year 1848:

BY virtue of an Act, 11 & 12 Vict., c. 125, the sum of 2,000,000*l.* sterling, for the service of the year 1848, was authorised to be raised, either by the issue of Exchequer Bills, or by the creation of Three Pounds per centum Consolidated or Three Pounds per centum Reduced Annuities.

	£.	*s.*	*d.*
The Amount of Capital thereby created in Three Pounds per centum Consolidated Annuities, is - - - - - - - -	2,288,434	18	-

	£.	*s.*	*d.*
And the Annual Charge in respect of the said Capital of 2,288,434*l.* 18*s.* Three Pounds per centum Consolidated Annuities, including 686*l.* 10*s.* 7*d.* for Management, at 300*l.* per million, is -	69,339	11	6

(The above Charge is authorised to be defrayed out of the Consolidated Fund.)

In

In the Year 1853:

BY virtue of an Act, 9 Geo. 4, c. 92, ss. 50 & 51, the Commissioners for the Reduction of the National Debt, having applied the sum of 382,060*l.* 14*s.* in the purchase of Exchequer Bills, and the Interest thereon, between the 5th July and 10th October 1853, and certified the said purchase to the Treasury on the 20th July 1853, became entitled to an amount of Stock for the same, to be placed to their account at the Bank of England, according to the conditions of the above-mentioned Act.

	£.	*s.*	*d.*
The Amount of Capital thereby created in Three Pounds per centum Reduced Annuities, according to the quarterly average prices of Three Pounds per centum Annuities, bought with the Moneys commonly called the Sinking Fund, during the same period, is - - -	383,098	5	1

	£.	*s.*	*d.*
And the Annual Charge created in respect of the said Capital of 383,098*l.* 5*s.* 1*d.* Three Pounds per centum Reduced Annuities, including 114*l.* 18*s.* 7*d.* for Management, at 300*l.* per million, is -	11,607	17	6

(The above Charge is authorised to be defrayed out of the Consolidated Fund.)

BY virtue of an Act, 9 Geo. 4, c. 92, ss. 50 & 51, the Commissioners for the Reduction of the National Debt, having applied the sum of 873,012*l.* 1*s.* 11*d.* in the purchase of Exchequer Bills, and the Interest thereon, between the 10th October 1853 and 5th January 1854, and certified the said purchase to the Treasury on the 11th October 1853, became entitled to an amount of Stock for the same, to be placed to their account at the Bank of England, according to the conditions of the above-mentioned Act.

	£.	*s.*	*d.*
The Amount of Capital thereby created in the Three Pounds per centum Consolidated Annuities, according to the quarterly average prices of Three Pounds per centum Annuities, bought with the Monies commonly called the Sinking Fund, during the same period of time, is	891,662	14	1

	£.	*s.*	*d.*
And the Annual Charge created in 1853 in respect of the said Capital of 891,662*l.* 14*s.* 1*d.* Three Pounds per centum Consolidated Annuities, including 267*l.* 9*s.* 11*d.* for Management, at 300*l.* per million, is -	27,017	7	6

(The above Charge is authorised to be defrayed out of the Consolidated Fund.)

BY

BY virtue of an Act, 16 & 17 Vict., c. 23, s. 37, the Lords Commissioners of Her Majesty's Treasury are authorised, between 5 April 1853 and 5 April 1854, to cause any number of Exchequer Bonds to be made out for the purposes of the said Act, and also to apply the proceeds of such Exchequer Bonds in exchanging such Bonds for Exchequer Bills.

	£.	s.	d.
The Amount of Exchequer Bonds thereby created in exchange for Exchequer Bills, and bearing date 9 June 1853, was - - -	408,900	–	–

	£.	s.	d.
And the Annual Charge in respect of the said Bonds for 408,900*l.*, bearing Interest at the rate of 2*l.* 15*s.* per centum per annum up to the 1st September 1864, inclusive (and thenceforth at the rate of 2*l.* 10*s.* per centum per annum, until and including the 1st day of September 1894), is - - - - - - - - -	11,244	15	–

(The above Charge is authorised to be defrayed out of the Consolidated Fund.)

In the Year 1855:

BY virtue of an Act, 18 Vict., c. 18, the sum of 16,000,000*l.* was authorised to be raised for the service of the year 1855, upon the following terms, viz.:

The Contributors were entitled for every 100*l.* contributed—

	£.	s.	d.
To 100*l.* Capital Stock in Three Pounds per centum Consolidated Annuities, with Interest from 6 January 1855, amounting to -	16,000,000	–	–
And to an Annuity of 14*s.* 6*d.* for a term of Thirty Years, commencing 6 April 1855, amounting, per annum, to - - - -	116,000	–	–

	£.	s.	d.
The Annual Charge in respect of the said Capital of 16,000,000*l.* Three Pounds per centum Consolidated Annuities, including 4,800*l.* for Management, at 300*l.* per million, is - - - -	484,800	–	–
And in respect of the said Annuity of 14*s.* 6*d.* for Thirty Years, including 870*l.* for Management - - - - - -	116,870	–	–
£.	601,670	–	–

(The above Charge is authorised to be defrayed out of the Consolidated Fund.)

Whitehall, Treasury Chambers,
11 February 1856.

JAMES WILSON.

PUBLIC DEBT.

AN ACCOUNT of all ADDITIONS which have been made to the ANNUAL CHARGE of the PUBLIC DEBT by the Interest of any Loan that hath been made, or Annuities created, in the last Ten Years; pursuant to Act 27 Geo. 3, c. 13.

Ordered, by The House of Commons, *to be Printed,*
13 *February* 1856.

30. *Under* 1 *oz.*

NATIONAL DEBT.

1.—AN ACCOUNT of the Gross Amount of all Sums Received and Paid by the Commissioners for the Reduction of the National Debt on account of Banks for Savings and Friendly Societies in *Great Britain* and *Ireland*, from their Commencement at 6th August 1817 to the 20th November 1855 inclusive.—*Also,* AN ACCOUNT of all Expenses incurred by the said Commissioners for Salaries of Clerks, or other Incidental Expenses, during the preceding Year. Pursuant to 9 Geo. IV. c. 92, s. 48.

2.—AN ACCOUNT of the Gross Amount of all Bank Annuities and Long Annuities, and any other Annuities for Terms of Years transferred, and of all Sums of Money paid to the Commissioners for the Reduction of the National Debt; and the Gross Amount of Annuities for Lives and for Terms of Years which have been granted for the same, under the Provisions of the Acts 10 Geo. IV. c. 24, 3 Will. IV. c. 14, and 15 & 16 Vict. c. 45, within the Year ending 5th January 1856.

3.—AN ACCOUNT of the Gross Amount of all Monies received and paid by the Commissioners for the Reduction of the National Debt on account of "The Fund for the Military Savings Banks," pursuant to Act 8 & 9 Vict. c. 27, s. 5, from 19th September 1845 to 5th January 1856 inclusive.

(PRESENTED PURSUANT TO ACT OF PARLIAMENT.)

Ordered, by The House of Commons, *to be Printed,*
21 *April* 1856.

— 1. —

AN ACCOUNT of the GROSS AMOUNT of all SUMS received and paid by the COMMISSIONERS for the REDUCTION of the NATIONAL DEBT on Account of BANKS for SAVINGS and FRIENDLY SOCIETIES in *Great Britain* and *Ireland*, from their Commencement at 6th August 1817 to the 20th November 1855 inclusive; prepared under the following Heads, pursuant to 9 Geo. N.B.—The Accounts subsequent to 31 M

Two Senior Examiners of the 2d Class, Four Junior Examiners, Three Assistant Examiners, &c.—*continued.*

Date ed ce.	Accounts in Office.		Reasons for Delay, if any, in the Audit of Accounts in Arrear.
	To what Date Examined.	To what Date Finally Audited.	
1847	31 December 1847	- - -	- - A very great arrear took place in the delivery of the accounts of the Commissioners of Public Works in Ireland; some of them extended over a period of 16 years, and many being delivered almost simultaneously, a large accumulation of accounts for examination was thereby created. They have been audited with the exception of those here specified. These accounts are waiting for answers to the queries on them; except the accounts of "Loans Receivers" and "Grants in Aid," the queries on which are being prepared.
"	Charge Part 31 December 1847	- - -	
"	31 December 1847	- - -	
"	" "	- - -	
"	" "	- - -	
1855	31 March 1851	- - -	- - In these accounts are consolidated all the services under the Commissioners of Public Works in Ireland; the accounts of which were formerly rendered separately.
"	31 December 1850	31 Dec. 1847	- - Want of assistance. The accounts of the port for 1848, 1849, and 1850, are being prepared for audit.
1853	" "	" 1849	
1856	31 January 1856	31 Mar. 1855	
1855	31 March 1855	" "	
1856	29 February 1856	" 1854	- - The audit of the account for 1854–55 is delayed until a document called for has been received.
1855	30 September 1855	" 1855	
1856	31 October "	30 April 1853	- - The accounts for 1853–54 and 1854–55 will be brought to audit on receipt of certain documents wanting.
1855	30 April "	" 1854	
1855	31 December "	31 Mar. 1855	
1856	" 1852	31 Dec. 1850	- - Want of assistance. The account for 1851 is being prepared for audit.
"	29 February 1856	31 Mar. 1855	
-	- - - -	- - -	- - An account of this service for the period from 1 October 1847 to 30 September 1848 has been received, which has been examined and queries sent. The accountants have however declined to answer the queries, or to render further accounts, on the ground that the Lords of the Treasury were of opinion that accounts were not required. A report has been made to their Lordships on the subject.

xaminers, Two Juniors, Three Assistants, and Two Extra Clerks; in all 11.

epartment. Prior to Midsummer 1854, the Department consisted of only Eight Examiners, and for the last ent have been Employed on the Store Accounts.

REPORTS AND TREASURY MINUTES RELATING TO THE AUDIT OF NAVAL AN MILITARY ACCOUNTS.

	DATE.
Treasury Minute, appointing a Committee, consisting of Mr. Larpent (Audit Board), Mr. Brooksbank (Treasury), and Mr. Croomes (War Office), to inquire into the System of Account and Audit at the War Office, with a view to ascertain whether it would be advisable that the Army Accounts should be submitted to the same System of Record and Appropriation Audit as the Naval Accounts	4 February 1840
Report of the Committee, recommending that the War Office Accounts should be kept upon the principle of Double Entry, and that the Annual Account for Parliament should be examined, as to the Appropriation of the Grants, by the Audit Board	21 July - 1840
Treasury Minute, directing the Suggestions of the Committee as to the mode of keeping the War Office Accounts to be carried into effect, and appointing Mr. Anderson to assist in the application of the Double-Entry System to those Accounts	27 November 1840
Observations of Sir Henry Parnell on the Report on Army Accounts	- - - -
Queries on Public Accounts by Sir Henry Parnell; with Mr. Anderson's Answers	- - - -
Mr. Anderson's Report on the War Office System of Account	24 January 1841
Treasury Minute, relieving Mr. Larpent and Mr. Croomes from the duties of the Committee, and appointing Sir William Herries (of the Audit Board), Mr. Thomas (of the Ordnance), and Mr. Anderson (of the Pay Office), to proceed with the Inquiry of the Committee in conjunction with Mr. Brooksbank; and directing the Committee to extend its inquiries to the Ordnance, with a view to the adoption of arrangements similar to those in operation in regard to the Naval Accounts, and in progress of adoption at the War Office	3 December 1841
Fourth Report of the Committee, proposing that the Estimates of the Ordnance Department should be remodelled, and classed in conformity with the arrangement adopted in the Army and Navy Estimates; and suggesting that uniformity in the principle of estimating for the Annual Charges of the Army, Navy, and Ordnance Departments should be established	7 March - 1844
Treasury Minute, referring the Recommendations contained in the Fourth Report of the Committee for the consideration of the several Departments to which they related	26 March - 1844
Treasury Minute, directing the Committee to report upon the question of auditing the Accounts of the Appropriation of the Grants for Naval and Military Services prepared for Parliament	29 March - 1844
Sixth Report of the Committee, replying to the Observations made by the several Departments on the Recommendations contained in the Committee's Fourth Report, and suggesting the mode in which the Accounts for Parliament and the Treasury should be prepared and audited	6 December 1845
Statement prepared by the Audit Office Examiners of Naval Accounts, explaining the mode of audit of the Admiralty Annual Account of Naval Expenditure	16 July - 1845
Treasury Minute, directing the Army, Navy and Ordnance Departments to adopt one uniform principle of estimating for the Moneys required for the Annual Service of those Departments, and to apply the same in strict conformity with the Votes of Parliament; and laying down specific regulations as to the formation of the Estimates, the exceeding of Grants, the preparation and audit of the Accounts for the Treasury and Parliament, and the Surrender of unappropriated Balances; also directing the Committee to submit a draft of Clauses to be introduced into the next Appropriation Act, to accomplish the object in view	13 January 1846
Treasury Minute, giving more particular instructions as regards commencing and proceeding with Works and Repairs	17 February 1846
Seventh Report of the Committee, proposing Draft Clauses for the consideration and approval of their Lordships	25 June - 1846
8 & 9 Vict. c. 92: An Act to provide for the Preparation, Audit and Presentation to Parliament of Annual Accounts of the Receipt and Expenditure of the Naval and Military Departments	26 August - 1846
Clause XXIV. of the Appropriation Act of 1846, 9 & 10 Vict. c. 116, authorising the Treasury, under certain circumstances, to alter the proportionate amounts comprised in the aggregate sum granted for Naval, Army or Ordnance Services, which Clause has been re-enacted without alteration in subsequent Appropriation Acts	- - - -
Treasury Minute, furnishing to the several Departments concerned the instructions required to give full effect to the preceding Enactments	8 September 1846
Ditto, regarding the mode of providing for Unforeseen and Emergent Expenditure	30 October 1846
Ditto, directing Incidental Receipts ("Appropriations in Aid") to be paid into the Exchequer	2 May - 1848
Ditto, directing the adoption of an uniform principle in the appropriation of the Grants for Extraordinary Military Expenditure	24 February 1852

REPORTS AND TREASURY MINUTES RELATING TO THE AUDIT OF THE NAVAL AND MILITARY ACCOUNTS.

TREASURY MINUTE, dated 4th February 1840.

A final settlement of the question respecting the examination and audit of the Army Accounts desired.

THE Chancellor of the Exchequer states to the Board, that the Secretary at Var has expressed to him an earnest desire that the question respecting the xamination and audit of the account for the expenditure of the Army grants, omprised in the Estimates which it is his province to submit to Parliament, hould be reconsidered by this Board, with a view of coming to some final ettlement on the subject. The Chancellor of the Exchequer expresses his ntire concurrence in the wishes of the Secretary at War.

Committee appointed, and question stated.

My Lords have before them the whole of the correspondence on the subject, nd the Report of the Commissioners appointed to inquire into the Civil Departments of the Army. My Lords observe that the Commissioners did not nter into the subject of the audit and control of the Army accounts; and it ppears to my Lords expedient to appoint a committee of three persons to nvestigate and report *whether the present system of audit at the War Office be r be not such as to afford sufficient security to the public interests*, and *whether hat system would be rendered more efficacious by the adoption of checks, similar o those lately introduced at the Admiralty.*

My Lords are pleased, in concurrence with the Secretary at War, to nominate he chairman of the Board of Audit, Mr. Brooksbank, chief clerk in this office, nd Mr. Croomes, of the War Office, as a committee for these objects.

Transmit copy of this Minute to Mr. Sulivan, Mr. Larpent and Mr. Brooksbank.

Write to the Lords of the Admiralty, the Paymaster-general and the Commissioners for Auditing the Public Accounts, acquainting them with the appointment of the said committee, and requesting that they will authorise such eturns, statements and information respecting the system of account in their espective departments, as may be applied for by the committee, to be furnished vithout delay.

REPORT of the Committee appointed by the preceding Minute, consisting of Messrs. *Larpent*, *Brooksbank* and *Croomes*; 21 July 1840.

Object of the appointment of the Committee.

IN pursuance of the directions contained in your Lordships' Minute, dated th February 1840, whereby we were appointed a committee to investigate and eport whether the present system of examining and auditing at the War Office he expenditure of the Army grants comprised in the estimates submitted by he Secretary at War to Parliament, be or be not such as to afford sufficient ecurity to the public interests; and whether that system would be rendered nore efficacious by the adoption of checks similar to those lately introduced at he Admiralty. We have the honour to submit to your Lordships the following Report:—

Observations:
1st. On the examination and audit of Public Accounts in general; and,
2d. On the existing practice of the Departments concerned in the present inquiry.

Previously to our proceeding to the consideration of the particular questions pon which we are called upon to give an opinion, we beg leave to offer some bservations in respect to the mode of examination and audit of public accounts n general, and the existing practice and state of the different departments concerned in the present inquiry, which appear to us to be necessary, with a view f arriving at a proper decision on the above-mentioned questions.

An independent audit desirable as a general rule;

There seems to be but little doubt that, as a general rule, it is desirable, whenever conveniently practicable, that the public accounts should not be finally assed in the accountant's own department, and by officers under his own mmediate control, but rather that they should be audited, and more or less ontrolled by an authority independent of the accountant, to whose expenditure hey relate; and in most cases, particularly as regards the minor public accountants, we apprehend that there are seldom sufficiently satisfactory grounds for eparting from this rule, and certainly not in those cases in which the accountant s not under distinct departmental control, and is the officer immediately responsible for the correctness and propriety of the expenditure.

but inapplicable to public departments in which services of great magnitude, and at the same time of great detail, are conducted.

This principle had formerly been considered applicable even to the account of all the great public departments; but the inconvenient practical effects of the system were fully pointed out in the Tenth Report of the Committee o Public Accounts of 1783,* and from that time the Pay Office Acts, and the Act constituting the Audit Board, have left the control with the great public de partments only, and the cash accounts with the auditors.

With respect, therefore, to certain services of great magnitude, and at th same time of great detail, and which are carried on by large public department in which separate branches of the office are appointed for the performance the several duties of the service; where the cash accountants immediatel responsible as such, are to exercise no discretion in the payments they make where the directing and controlling departments are distinct; where the head of the department are responsible to Parliament for the expenditure; and i which the controlling branch of the office is required to bring under the con sideration of their superiors all cases of unusual, unauthorised, and apparentl improper expenditure; in these services, the principle laid down by the Com

mitte

---

* The passage referred to in the Tenth Report of the Commissioners appointed to examin take, and state the Public Accounts of the Kingdom, presented to His Majesty and Parliament in 1783, is as follows:

The business of the Auditor of the Imprest, to be collected from his commission, is, to aud the accounts of most of the Receivers, and of all the officers and persons entrusted with the exper diture of the public revenue. Possibly this office might formerly have been able to accomplis this duty; but such has been the increase of the revenue within these few years, that the accoun are grown to a number, magnitude and extent, greatly beyond what could have been foresee The accounts, which at this day remain for the audit of the Exchequer, are seventy-four millions— the issues of 21 years—for the navy service; fifty-eight millions—the issues of 18 years—for th army service near thirty-nine millions issued to sub-accountants; together, one hundred an seventy-one millions; the receipts and issues of all the provisions for the support of the lan forces in America and the West Indies during the late war: all these accounts must be passe The public have a right and good cause to demand it. If, according to the present constitution the Exchequer, they can be passed nowhere but in the office of the auditor, that constitutio should be altered. Such of the accounts as may appear the most proper to be removed, should transferred from his office to such other offices as may, from their peculiar circumstances, and th relation they bear to the subject-matter of the accounts, be presumed to be the best qualified f the examination of them.

Wherever an office is instituted, for the purpose of examining and controlling accounts previo to their examination by the auditors, and that office is so formed as to answer the use intende and the officers do their duty, it seems to us to render any subsequent examination superfluous, an an unnecessary expense to the public. Upon this principle, we suggested the exemption of th accounts of the Treasurer of the Navy from the jurisdiction of the Auditor. The same princip leads us to relieve him from the accounts of the army. Parts of these accounts, and those ver considerable,—the execution of the contracts, and the expenditure of the extraordinaries,—accordin to the present usage, pass the Office of the Controller of the Army Accounts previous to the examination by the Auditor. As far as appears to us, the examinations by the Controller ar sufficient, and consequently those of the Auditor may be dispensed with. If the Office of the Con troller is so constituted, that these species of accounts may safely rest upon his examination (an the Treasury rely so much upon it, that they direct payments upon his reports without waiting f the confirmation of the Auditor), he must be equally qualified to pass the rest of the acconnts the army: the latter are not more difficult than the former; nor does it require greater talents examine the one and the other.

Though the business of the Controller is at present confined to these particular branches, yet seems to have been originally intended for a more extensive employment. By his commission, the second year of Queen Anne, he is created Controller of all accounts relating to the forces; an by the last instructions,—for the conduct of the office,—dated 28th of April 1704, he is to keep a Account of all Monies issued to the Paymaster-general of the Forces, and to take care he charged therewith.

The time seems to be come when the state of the business in the office of the Auditor renders necessary to carry into execution the intention of Queen Anne in the institution of this office, an to extend its duty to all the accounts of the army. The two offices of Controller and Paymaste general are so unconnected and independent of each other, that the first may be with safety place as a check upon the other. One entire species of public expenditure will be the employment of o office; which, though but one species of expenditure, is yet, from the number and variety of i branches, and from the long arrears suffered to be incurred, fully sufficient to engage the continua labour of any one office for a time not easily to be defined. Should the Treasury be dissatisfie with the report of the Controller upon any particular account or article, or require further info mation, it will continue to be, as it is now, in their power to refer to the Auditor for his examinatio and opinion.

For these reasons we are of opinion that the auditing the accounts of the Paymaster-general the Forces should be transferred from the Office of the Auditors of the Imprest to that of the Con troller of the Accounts of the Army; that the Pay Office of the Army should complete suc accounts of the Paymaster-general of the Forces as have been already delivered into the office the Auditor, and that the Auditor should proceed without delay to finish and pass such accounts and that all army accounts, subsequent to those already delivered into the Office of the Auditor and all future accounts of Paymasters-general of the Forces, should be sent to the Office of th Controller of the Accounts of the Army, and be examined and audited by him, and inrolled in th Office of the King's Remembrancer in the Exchequer.

ittee of 1783 has been adopted, and seems to be advisable, since the adantage to be gained by a detailed examination of all the vouchers, and audit f the accounts in a separate department, must be necessarily attended with so nuch additional expense and delay, as to make such an arrangement one by no neans beneficial to the public, unless indeed it could be found practicable immeiately on the receipt of the vouchers to carry on the examination of the indeendent department within the executive department, where alone the informaion upon which a correct judgment of the propriety of the expense incurred s to be found; but this would be attended with much difficulty.

Delay and expense of a separate audit.

From various obvious causes, the examination of the accounts of a great ublic department by another office altogether distinct, must require more lerks, and be attended with more delay and expense than when carried on in he executive department, even on the supposition that there was no double xamination, that of the executive department being dispensed with.

Efficient working of the Admiralty, Ordnance and War Office system of audit.

The Lords of the Admiralty, for instance, the Board of Ordnance, or the Secretary at War, so soon as any improper expenditure or irregularity is disovered, can, in most cases, stop the improper payment or irregularity immeliately, and even where some previous explanations are requisite, they can, the noment such explanations are received, come to a decision thereon, give their rders accordingly, and see those orders executed, the explanations called for eing likewise obtained with the least possible delay, as the parties to give them re under their own orders.

Independent auditors want practical knowledge and power to enforce their decisions.

An independent Audit Office, on the contrary, can scarcely, under any circumtances, continue to be constantly so well acquainted with the practical details f the service, and the necessity for any item of expenditure, as to justify them n giving an immediate decision without calling for information, and they have ot the immediate means of reference to the different branches of the service n the executive department.

And even when the requisite explanations have been received, and the indeendent auditors have arrived at a decision upon the question, they have no neans of their own to enforce the decision; they can only give notice of their ntention to surcharge; they cannot stop the improper expenditure; the head f the executive department may not concur with the auditors in opinion; the ccountant may appeal, or he may not be himself the party by whom, in justice, he sum improperly received ought to be repaid; and even should the Lords of he Treasury finally decide in favour of the surcharge, the Audit Office have no neans of their own of enforcing the same; so that frequently, after much delay nd correspondence, recourse must be at last had to the head of the executive lepartment, even though he may be still adverse to the surcharge; and the esult may then be a divided responsibility, the head of the department, who akes the estimates, being called upon to act contrary to his own judgment.

An independent audit is subject to delay, and obstructs business.

An independent Audit Office must also be necessarily more in arrear in the xamination of accounts than an audit department expressly instituted for the purpose of examining and controlling the accounts within the executive office, since the former cannot commence their work so soon, and there is, as above stated, much more time spent by them in obtaining information than in the executive department, which must, on the other hand, be impeded in its current business by the constant inquiries of the auditors; and although the same causes of delay and increased work exist in all cases where there is in the executive department no examining department, and where the Audit Office is consequently distinct from the executive department, the importance of an early and final decision is in general in those cases which are necessarily entrusted to the auditors not of any very urgent importance, and the benefit of an independent audit of the accounts of these departments more than counterbalances the disadvantages with which such independent audit is attended.

Illustration of the advantage of a departmental audit.

As a striking illustration of the advantages of an immediate departmental or local audit, or at least what may be considered as such, we may mention the London Custom-house. Entries for duties perhaps amount to 800 or 900 in a morning, all the errors, if any, in which are set right within the week by the local controlling department; whereas an independent Audit Office, even if by constant practice it could become sufficiently informed on the subject, could scarcely, by any arrangement, be enabled to detect any errors until after such a lapse of time as would render the setting them right, if not often impracticable, yet in many cases attended with difficulties, and pressing hard upon the parties concerned; the same advantage results, in a greater or less degree, with respect to every great service, by having within the executive department a local controlling branch expressly appointed for the purpose.

Control vested in Admiralty.

In the Naval service, all the duties are carried on in, and all the responsibility rests in one and the same department, the independent Boards being no longer in existence which formerly occasioned much unnecessary delay and expense, and impeded the public service almost as much as if there had been independent departments, as is now the case in the Army service. In the Navy, the controlling and discretionary power, after the estimates have been once approved by the Lords of the Treasury, is almost wholly vested in the department itself, which is responsible to Parliament for the expenditure.

The only independent audit of the Admiralty accounts is the examination of the Paymaster-general's account of Naval payments by the Audit Office, and that is a mere cash audit so far as concerns the Paymaster-general, for the purpose of ascertaining that he has an authority for the payment in each case, and that he pays the proper amount to the right party; no control whatever as to details is exercised; the Admiralty order is conclusive, and its propriety is not to be questioned.

Limits of the naval appropriation audit.

Neither can the Audit Office check upon the Naval Parliamentary Account, under the late Act of Parliament, be considered in any manner as an audit or examination of the payments, as the vouchers are not even examined with respect to arithmetical correctness or to the propriety of the expenditure, but solely with a view of ascertaining the description of expenditure in each case, and the amount, and that it is entered in the account under the proper head of the Appropriation Act, by tracing it through the Admiralty books from the vouchers to that account, in order that the Audit Office may certify accordingly. It is indeed provided for by the Act that the propriety of the orders of the Admiralty is not to be questioned.

Imperfections of that audit.

We must, however, observe, that the apparent object of the Act, namely, to enable Parliament to see how far the actual expenditure for the variety of services, wages, provisions, stores, works, &c. entrusted to the Lords Commissioners of the Admiralty agree with the Votes, is by no means attained in a satisfactory manner. The expenditure is not the precise amount of payments made in the year in question, with an estimate of outstanding demands, but includes all payments made previously to the end of the October following the end of the year, which the Admiralty consider as belonging to the year, and which is sometimes so much a matter of arbitrary discretion as almost to enable the Admiralty to show at pleasure either an excess or a saving. Neither is it a complete account of the service for the year, as it does not show the whole naval expenditure belonging to the year, since there is no estimate of outstanding demands against the department, either at the commencement or at the close of the account, nor any general estimate of the amount or value of the naval stores in hand; so that in a case in which the Audit Office might certify to Parliament an account, showing a saving on the whole expenditure of the year, as compared with the Appropriation Act, and when perhaps, on that ground, a part of such supposed saving is reserved for future expenditure, it is quite possible that the real state of the case may be, that taking into consideration the state of the debts and stores at the beginning and end of the year, there may have been an excess of expenditure, the apparent saving having arisen from the increase of debts, and the diminution of the stock of stores; and even with reference to the apparently simple question, whether there has been, or has not been, an excess on any particular head of the estimates which may arise in the Navy service, as their Lordships draw on account of the Naval service generally, the check seems to be imperfect, and must apparently remain so as long as it is the practice of Parliament to include several distinct items of the estimates under the same head in the Appropriation Act, to which Act the certificate of the Audit Office is confined; as for instance, under the head of "New Works" are included specific grants for several distinct works, and although the expenditure for each of these works may not be at all in accordance with the sums stated upon the estimate as required for each, and with the obvious intention of Parliament, the auditor can only certify to the saving or excess upon the aggregate grant for all new works, as shown by the Appropriation Act. That the House is not made acquainted by the certificate of the auditors of what would in reality, though not in form, be a misappropriation of their funds, is evidenced by the fact that when the Audit Office observed on an excess in respect to one item in such an estimate, they were informed, and apparently

ıarently correctly informed, that they were exceeding their authority, and
·y withdrew their objection.

Inconveniences caused by the division of Army Services between different departments.

With respect to the Army service the case is very different; the service
carried on by several distinct and entirely independent departments, and
some cases even the same branch of the service is estimated for, con-
cted, and directed by different departments,—the Secretary of State, the
cretary at War, the Board of Ordnance, the Lords of the Admiralty, the
rds of the Treasury, the Commissioners of Chelsea Hospital, and to a certain
tent, the Paymaster-general, the Judge Advocate-general, and the Audit
fice, are all more or less concerned in the management or control of some
rtion or other of the Army service and expenditure, independently of the
ecutive duties confided to the Commander-in-Chief. Provisions and stores
partly in Treasury Commissariat Estimates, partly in the Navy, partly in the
my, and partly in the Ordnance Estimates, and there is no one public account
owing the cost of provisions for the army, neither could it well be made out
m the whole of the accounts. So with respect to the accommodation of
icers and men in quarters: the service is partly Barrack, and under the
dnance, partly Treasury in respect of hired houses, and partly Secretary at
ar in respect to money allowances; the tendency of which arrangement is,
at as every department of Government is naturally desirous of reducing its
n Estimates, whenever, from want of public quarters, money allowances
stead are issued, the Ordnance by omitting to build or repair quarters or
rracks when necessary, would not only save the charge of repairs, &c., but
row the whole expense upon another department; and not only so, but
quently a larger amount of charge is caused to the public than is necessary,
ice as individual officers cannot procure the precise accommodation they
quire and are entitled to by the Regulations, those allowances must be
iculated in some degree to meet the extra expense caused by each officer
ving to provide for himself, and the officer must often be indemnified for the
nainder of his term when suddenly removed; whereas, if the building, hiring
d repairing quarters, and the charge of money allowances were all in one
partment, it would, on the contrary, be the obvious interest of such depart-
ent to repair, or build, or hire, or give money allowances as might be found
st advisable with reference to the state of the service in each case. We
prehend also that in such case the accounts could be more satisfactorily
ecked, as at present some doubt may be entertained whether the Ordnance
uld know of an officer having a quarter and an allowance also; and the
idit Office and the Secretary at War, who examine the service and cash
arges respectively, must trust wholly to a written certificate of there being no
arter for the party, as they have no knowledge of how the quarters are
cupied. So we may take the head of Transport of Troops; the Admiralty
e one Vote for transport of officers and troops from Great Britain to and from
e Colonies, and a second Vote for short passages; but when the Audit Office
ll upon the Admiralty to repay an expense of transport from one colony to
other as a short passage, it was found that the second Vote above-mentioned,
plied only to British coasting passages, and not to those from colony to colony,
from one foreign station to another within the same command. These latter
arges had, until 1836, been paid by the Treasury out of Extraordinaries, but
ey are now included in the Army Estimates, and are paid and controlled by
Secretary at War. The Admiralty, however, pays for these short passages,
n Queen's ships. The whole cost of military transport should, in our opinion,
included in one estimate.*

Our

The incongruities described in this paragraph were in a great degree remedied by the Treasury
nutes dated the 8th February and 8th July 1842 [Parl. Paper, No. 104, Sess. 1844], whereby
, money allowances (when not a commutation for quarters or issues in kind) and contingencies
e assigned to the War Office; building, repairing or hiring quarters, and the issue of lodging-
ney, to the Ordnance; and provisions, forage, fuel and light, and other issues in kind, and any
wances in commutation of such issues, to the Commissariat Estimates. It was also directed by
Treasury Minute dated the 26th March 1844 (page 65 of this Collection), that the expense of
whole of that portion of the clothing of the army which is provided by the direct agency of the
cers of the public, should appear in the Ordnance Estimate. The recommendation, that the
ole cost of military transport should be included in one estimate, was shortly after carried into
ct by the Treasury, as will be seen from the following extract from a Treasury Minute, dated
December 1844, the arrangements described in which are still in force: "Upon the whole their
rdships much doubt whether an increase of public business would not be the consequence of
ring the present plan of proceeding in this matter, which in other respects appears to be the
t simple and convenient, and is most in accordance with the principles on which the depart-
mental

Delay in the audit of the accounts arising from the same cause.

Our official experience would enable us to point out many other inconveniences and incongruities arising out of this division of the Army service, involving extensive correspondence upon very unimportant matters between the Lords of the Treasury and the Board of Ordnance, the Lords of the Admiralty, the Secretary at War and the Audit Board, when the whole question under discussion is not whether an expense has been properly incurred, but by which of the several departments it should be paid. In all such cases the Audit Office examiners are constantly interrupted in the performance of their proper duties as auditors, and of course the audit of the public accounts must be proportionably delayed, merely that it may be ascertained what department is to have credit for, or be charged with, a particular sum, a matter in which the public have, in fact, no material interest at stake, and which would be unnecessary if the military expenditure were, like the naval expenditure, included in one estimate, and subjected to the control of one department only.

Unforeseen expenditure abroad; how defrayed, and accounts how examined.

Whenever from unforeseen circumstances, hostilities, hurricanes, &c., any considerable foreign military expenditure is, from absolute necessity, incurred, the whole of such unforeseen expenditure is, in the first instance, necessarily payable out of the military chest; and this expense not having been previously estimated for by any department, and no fund being entrusted to the Army Department to meet these unexpected contingencies, the advance cannot, as in case of ordinary Army or Ordnance expenses, be transferred at home. The advance remains, therefore, a charge upon the Extraordinaries of the army, although, in fact, there is now no such fund, and the audit and control of the expenditure, not only in respect to provisions, a service with which the Lords of the Treasury and auditors are conversant, but in respect of military stores, purchase of ammunition and arms, building barracks, and the pay and allowances of military and volunteer corps, all become regularly under the immediate control of the Treasury, and the examination of the accounts, unless otherwise specially provided for in each case, devolves upon the Audit Office; so that the examination of building accounts, and pay of troops, in a case where there is most probability of irregularity, is necessarily much less immediate and efficient than in the case of ordinary War Office and Barrack and Ordnance expenditure.

Instances cited; imperfect examination of such expenditure.

The Caffre war, and the sudden outbreak in Canada, may be cited as instances, and although arrangements may be finally made by the Lords of the Treasury with the War Office and Board of Ordnance for their examining the vouchers for a large portion of the extra expenditure, there is no provision for the pay lists being sent home forthwith, as in other cases, and it has not been practicable that the accounts of this description should be examined as expeditiously or as efficiently as they would have been if they had been the regular accounts, and the duty of examining them had been the duty of the military departments concerned. Even at this time a large part of the charge for military allowances and expenditure has not been at all examined in this country.[†]

The only satisfactory remedy would be the consolidation of all military services under one department;

It is not easy, according to the present system, to devise a satisfactory remedy for this inconvenience, but if there were only one department for the military, as in the navy, the case would be very different; the whole of the expenditure, whether

---

mental Estimates are now regulated, viz., that the Board of Admiralty should estimate for all expenses connected with the passages of officers and other persons attached to the army, between this country and a foreign station, between one foreign station and another, and between port and port by sea within the same foreign command; that the passage should be provided, or the regulated allowance be paid, when an officer proceeds from this country, upon an application from the controlling department to the Board of Admiralty; and that the adjustment of accounts with that Board in respect to passages provided and passage allowances paid abroad, and also in respect to payments or deductions for messing under the Royal warrant and the instructions founded thereon, should be made by each department respectively, in order that it may be satisfactorily established that the public are liable to the charge for the passage, and that the right sum has been paid or deducted for messing, as the case may be." The proceedings upon this part of the subject were completed by the Treasury Minute, dated the 3d January 1845, which directed that the expense of the conveyance of provisions and other stores for army service in sea-going vessels, from one foreign station to another, and from port to port, within the same foreign command, should be provided for in the Naval Estimate, and that the advances should be recovered by the department for which the service was performed.

[†] Regulations were after this issued, providing that extraordinary expenditure should be conducted by and accounted for to the department to which analogous ordinary services belonged, and that the Treasury should obtain, through the Commissariat officers who advanced the money, early and full information, both in regard to the past expenditure, and to that which might yet be expected. *See* Commissariat Regulations, page 189 to 192, respecting emergent Ordnance services in the colonies; and the Treasury Minute, dated the 27th March 1849, and the additional articles of the Commissariat Regulations from page 183 to 188, relative to unforeseen and unprovided expenditure caused by internal rebellion, or the unexpected breaking out of war.

whether ordinary or extraordinary, would be equally military, and the department would be equally responsible for it, and have to make provision accordingly. It would become their duty to call for, and to examine and check the accounts; whether previously provided for in their estimates or not, they would have to report it to the House as an excess in the proper year. The generals who ordered any part would be equally under their orders with the engineer officers, and they would be induced, for their own credit, to issue the best possible instructions providing for such unforeseen events, and for the expenditure and accounts relating thereto, and for the early transmission of the accounts, pay lists, &c.

as in the Navy.

The case of the Navy service, under similar circumstances, may be mentioned. No one would ever propose that an unforeseen and unestimated naval expenditure, such as the fitting out of additional ships of war, &c., should, on the ground merely of its not having been estimated for, become subject to the control of the Treasury and the Audit Office, and there seems to be no sound distinction between the cases, so as to justify a different practice in the two services, more especially as there is now no such fund as Army Extraordinaries.

While the departmental system is continued, all services of a like nature should be estimated for by the same department.

It is of great importance that the individual who presents the estimates should be himself officially responsible for the care and attention with which the probable expenditure is anticipated, and for the economy which is to be exercised in the disposal of the funds granted. So long, therefore, as the departmental system in army expenditure is continued in this country, it is desirable to lessen the inconvenience as much as possible of dividing the military expenses, so as to leave the direct responsibility for all services of a like nature, whether at home or abroad, upon the same individual.

Functions of the Secretary at War.

The Secretary at War is the officer especially entrusted to prepare and submit, first to the Treasury for approval, and afterwards to Parliament, the estimates for the ordinary services of the army, and he has the duty of checking the details of the military expenditure. By the Act of 1783 he was first distinctly constituted the comptroller of all the charges for the ordinary services of the army included in the estimate submitted by him to Parliament, and he was required to examine the accounts of all persons to whom money was imprested by his warrants for carrying on the military service; and although this Act was repealed by the 45th Geo. 3, c. 58, this latter Act directs an examination of all the agents' accounts to be made "by the Secretary at War, or by such other person or persons as his Majesty shall authorise" to examine them, and the examination has, in fact, ever since been vested in the Secretary at War. In the execution of this duty he is governed by regulations originally framed by him, with the concurrence of the military authorities, submitted to, and approved by the Lords Commissioners of Her Majesty's Treasury. He does not consider himself at liberty to depart from the letter, or from the obvious spirit and intention of these approved regulations, without the special sanction of the Treasury; and if he finds that in practice those regulations either press severely upon the interests of the officer or the soldier, or are unfair to the public, he recommends an alteration of the regulations, and having obtained the consent of their Lordships to such alteration, he procures the sign manual for his future guidance and authority in their administration. By this means the control of the Treasury is preserved over the whole military expenditure.

His relations with the Treasury.

Transfer of extraordinary charges to the control of the Secretary at War.

Within the last 50 years many charges, even for the home service, were considered to be extraordinaries of the army, and were under the control of the Comptrollers of Army Accounts. At various periods these charges have been brought under distinct regulations, and have been transferred from the extraordinaries of the army, and from the control of the Comptrollers of Army Accounts, to the ordinaries of the army, and to the control of the Secretary at War.

In 1835 the Treasury directed that all the charges then remaining on the Army Extraordinaries, which although contingent upon certain circumstances of service, are yet so much governed by fixed regulations, or by long established usage, as to be capable of previous estimate, and of consequent appropriation by Parliament, should also be included in the ordinary Army Estimate.

Military allowances abroad; how estimated for and examined.

With respect to the examination of the army accounts, we may observe that the accounts of pay, both at home and abroad, and of all military allowances and expenses at home, have been under the sole control and subject to to the sole audit of the Secretary at War; the military allowances abroad, on the contrary, have only recently been included in the estimates of the Secretary at War; they were previously estimated for by the Lords of the Treasury, and though entirely a military branch of the service, were under the control and management of the Lords of the Treasury; the cash accounts of the Commissaries by whom they were paid being examined at the Audit Office, and the store accounts by the Comptrollers of Army Accounts, whilst the latter were also the Treasury advisers so far as the control of expenditure was concerned. For in consequence of the want of military information, naturally to be expected at the Treasury, and at the Audit Office, the establishment of the Controllers of Army Accounts had become indispensable for the proper management of the service, in order that the Treasury might have the advice of experienced military officers. The result however was, that the accounts of this branch of military expenditure, were examined more or less, in three departments, partly in the Treasury Commissariat Department, partly in the Audit Office, and principally in the Office of the Comptrollers; much of the regular routine detail business of the executive department, namely, the Treasury, being thus carried on through the means, and troublesome machinery of reports from other departments and Board Minutes of the Lords of the Treasury. To remedy in part this inconvenience, and for other reasons, such as to place the cash and store accounts of the Commissariat under the examination of the same department, as well as for the sake of economy, the Comptroller's Office was abolished, and their duties imposed on the Audit Office, the Treasury however retaining a part of the late Comptroller's officers to enable them, as it was supposed would be the case, to carry on much more of the routine business and control in their own department, it being however understood that the auditors were to have a special department for the immediate inspection of the vouchers for this part of the military expenditure, as to which they were thenceforth to act as comptrollers.

Three departments still concerned in the examination of these allowances.

Not long after this, however, the Secretary at War was allowed to take the estimate for military allowances abroad; and, of course, as he then considered himself responsible for the expenditure, he made various inquiries at the Audit Office, as to all the regulations and matters connected with that expenditure, and soon commenced giving orders in various instances. The Lords Commissioners of the Treasury have not, however, consented to give him the same control over the foreign expenditure which he has so long exercised over the similar expenditure at home; so that there are now again three departments concerned in examining the vouchers and controlling the charges for this service, the Treasury Commissariat Department, the Audit Office and the Secretary at War; and as the executive department at the Treasury does not retain any copy, or see in the first instance the Commissariat Accounts, and can therefore only know of any improper charges by reports, either specially made to them by their Commissariat officers, or from the Commissioners of Audit, that department seems to be even more than before dependent upon other departments for its means of conducting the business; whereas it appears to be obviously advisable that every department undertaking the conduct of a service should have the means within itself of performing it properly. A more material inconvenience, however, arising from the present arrangement is, that it occasionally happens that the Lords of the Treasury give orders on the reports of the auditors, without informing the Secretary at War; that the Secretary at War (who considers himself responsible to Parliament for the expenditure included in his estimates, and examines the accounts furnished to him, so as to satisfy himself that the service has been performed and that the expenditure has been properly incurred, and is warranted by the regulations), sometimes gives orders without informing either the Lords of the Treasury or the Audit Office; and sometimes that the Treasury, with reference to any report of the Commissioners, gives orders without informing either the Secretary at War or the Audit Office.

Inconveniences of this arrangement.

Contradictory orders and decisions must result from this divided responsibility, and the present practice seems to be more objectionable than the one preceding it, as the three parties concerned are not so completely under one control as the former were. Neither can we consider it to be expedient that every trifling question of detailed expenditure, such as perhaps the difference between the amount of a black servant's allowance, and the daily value of a ration, should be considered

considered and discussed by three public departments, and at length be decided by detailed Treasury Minutes. Unless very urgent reasons should be found to the contrary, we cannot but think that a system should be acted upon more in conformity with what we consider to be the true principles upon which the auditing and controlling public expenditure should be established; viz., simplicity, expedition, economy, uniformity of practice, efficient check, individual responsibility, and consequently the keeping of all accounts connected with the same service in one and the same department.

Although not distinctly called upon by our instructions to enter into this general view of the Military and Naval systems, these preliminary statements and observations explaining the differences which exist in the management and control of these two great services, have appeared to us to be material, as influencing our judgments in the consideration of the points more particularly referred to us.

Question stated: 1st. Whether the examination can be satisfactory without an independent check; and, 2d. Whether a Parliamentary check should not be established.

These points appear to be, first, whether the examination, audit and control of the expenditure of the whole of the Army Ordinaries in the department of the Secretary at War, is now, or could by any proposed alteration be made satisfactory without any check or control as to minor details by any other independent office; and secondly, if so, whether nevertheless it might not be expedient to introduce into the War Office accounts some Parliamentary check similar to the one established as to the Naval expenditure, by Act of Parliament.

The present audit of the War Office accounts satisfactory.

With reference to the first point, we have attended at the War Office, and examined the books, accounts, pay lists, &c., and inquired into the mode of proceeding in the examination and the present state of the accounts, a written statement of which we also called for, and have annexed to this Report; and while the system is duly carried into execution, as at present it appears to be, we consider it to be one calculated to insure an economical, expeditious, and sufficiently efficient audit and check on the accounts, so far as the public interests are concerned. The mode of keeping the accounts is so contrived as to reduce the labour to the examiner without risk to the public, both with respect to the paymasters' and the agents' accounts; and the mode of pointing out, in writing, objections arising on the examination, and deciding on them, is very similar to that adopted in the Audit Office. The principal difference between the modes of examining the accounts in the War and Audit Offices is, that which naturally results from the difference between the services examined in the two offices.

Explanation of the War Office system of accounts, and of the differences between it and the Audit Office system.

The accounts examined in the War Office include the fixed pay of every officer and soldier in the army, as well as all the fixed regimental and individual allowances, both at home and abroad, and all occasional contingent disbursements of the army at home.

In conformity with long established regulation, the accounts rendered to the War Office are considered to be wholly the accounts of the public with the colonel, through his agent, in respect to one portion of the regimental expenditure, and of the public with the paymasters, in respect of the remaining portion of the regimental expenditure, and of the expenditure of the recruiting districts; and although the sub-accountants to these functionaries are required to keep regular accounts in a prescribed form, they do not, except specially required, transmit them to the War Office, so that the direct pecuniary transactions between the public and every individual officer and soldier are not investigated there. Thus the examination is confined to the ascertaining that no more is paid by the public than the whole amount shown to be due to the officers and men, no inquiry being made, except in special cases, or when any dispute may arise, whether each officer and man has been duly settled with by the agents and paymasters respectively. Whereas, in most cases, the Audit Office considers it necessary to go into proof of payment to the several parties concerned. It is, however, here proper to observe, that the forms of accounts rendered to the War Office are so detailed as to show clearly the precise situation of every officer and soldier during the whole period of the charge made for him, and that office is therefore enabled to detect any instance of a charge not justified by the situation of the individual, or the actual payment of which may be doubtful; and although the payment to each soldier is not vouched by his signature, it appears to be sufficiently proved by the certificate of the captain of the company to which he belongs, that the proper amount has been received from the paymaster by the officer commanding the company, and by him duly paid to the men.

The

The interests of the soldier are sufficiently provided for by his being obliged to keep about his person an account book, calculated to show at all times the actual state of his accounts, the captain of his company being responsible for its accuracy, and the commanding officer that it is kept with regularity. The captain is further bound to keep the account of every man in a day-book and ledger, in which the man, by his signature, acknowledges its correctness, and is also obliged to render monthly to the commanding officer an acquittance-roll, certified by himself, and vouched by the signature of every man of his company.

There is also the further security, that the general officer, at his half-yearly inspection, is bound to attend to, and inquire into, the complaint of any soldier, and to report confidentially to the general commanding-in-chief, that the soldier's account-books and the company's books are kept with accuracy and regularity, are signed by the men, and vouched by the captains of companies.

Under this system the agents, paymasters and captains of companies are respectively held responsible to the public for the due appropriation of the full amount charged in the respective accounts; and it would appear therefore wholly unnecessary to require in the public accounts the signature of every individual for his pay and fixed allowances, which, if required, and properly examined, would cause not only increased labour in their examination, but would produce a great complication of account, without any useful result.

By these arrangements the pay lists are kept in a concise and simple form, the number of days only being required to be inserted against the name of each man, followed by one computation of money only on the total number of days for each rank; the statement of a separate sum due to each man, and the consequent numerous castings and computations being thereby avoided; but all payments, not being pay or fixed allowances, are vouched by the receipt of the party.

Another difference of minor importance is, that when men are transferred from the payment of one accountant to that of another, the certificate of the accountant as to the time to which the men have been paid by him is considered sufficient in the examination of the regimental pay lists, without, as is generally the case at the Audit Office, an actual comparison of the two accounts in which pay is charged.

It has, however, by this Audit Office comparison but very rarely happened that an erroneous certificate has been detected; and with respect to the rations in the store accounts, the Audit Office act generally on the same principle as the War Office; therefore, considering the improbability of the detection of erroneous certificates in the case of military paymasters, we do not think it necessary to recommend any alteration in the War Office practice in this respect, and upon the whole, as we have already stated, we consider that the mode of examining and checking the War Office accounts is satisfactory.

An independent check on the detailed examination of the military allowances abroad by the Secretary-at-War not required

The next question is, whether, nevertheless, with a view to control, any further examination by another department is necessary. It must be remembered that there is not, even at present, any independent check in respect to arithmetical correctness of the vouchers for the military allowances abroad, the examination at the Audit Office of these vouchers being now confined to the propriety of expenditure, and never having extended to military pay; and when it is considered that the whole of the pay of the army has been long since confided to the Secretary at War, and also the military allowances on the home service, and that the amount of the military allowances abroad is comparatively trifling, we do not consider that the additional probability of the detection of improper allowances by the Audit Office, or by the Treasury Commissariat Department, is of sufficient importance to overbalance the obvious inconvenenice and increased expense of the present arrangements with respect to the late extraordinaries or military allowances abroad.

No alteration involving increase of expenditure should be made without the sanction of the Treasury.

Nevertheless, as there is not at present a perfect similarity between the Army and Navy services, and in other respects the Secretary at War is not placed on the same footing as the Admiralty Board, the military establishments being under Her Majesty's sign manual, and the Secretary at War being only authorised to see them duly acted upon, and as it may, therefore, be considered advisable to retain some check on the part of the Treasury in respect to the amount of military allowances, we beg leave to propose, that although the Secretary at War should, under the regulations previously sanctioned by the Treasury,

Treasury, have the power of authorising the payment of all military allowances, and examine the accounts rendered for the same, and if he should see it, should have the payment for military allowances abroad included in his own pay lists, instead of the Commissariat accounts, by which the examination of the accounts would be apparently much facilitated in his department, yet hat there should, nevertheless, be a clear understanding that no general or mportant alteration whereby increased allowances are given, or increased expense caused to the public, should be made by the Secretary at War, without receiving your Lordships' sanction for the same.

We further submit, that the War Office books should be so kept, under heads o be fixed by your Lordships, in concurrence with the Secretary at War, as, amongst other things, to show the whole annual amount expended for each class of military allowances, so that your Lordships might have the means of satisfying yourselves that no unsanctioned alterations had been made, of comparing the amount in each year with those of the preceding years, and of calling for explanations in any case where an increase of importance appeared, the cause of which did not likewise appear by the accounts.

The annual accounts should be so classified as to show whether the preceding rule has been acted upon.

There now remains only for consideration the question whether it would be advisable to establish in the Secretary at War's Department a check similar to hat now in force in the Naval service.

Parliamentary check on War Office accounts.

Upon this point we may first observe, that if the War Office books should in future be kept so as to show the several heads of expenditure in respect to which the check is required, there does not appear to be any difficulty or inconvenience likely to arise out of an arrangement for having a certified account presented to Parliament much more detailed and satisfactory than that now presented for the Naval service. The expenditure included in the Army Estimates, consisting almost wholly of pay and fixed allowances payable and paid as soon as they become due, and of expenses also payable as soon as practicable after the expense has been incurred, such an account will show the precise amount of payments made within or on account of the year, and will be a eal service account compared with the grants made for the probable expenses of the year.

A certified account may be submitted to Parliament more detailed and satisfactory than the naval account.

It would be desirable that the account for the year expired on the previous 31st March should be prepared, if practicable, before the Estimates for the ensuing year are discussed, although from the distance of some of the colonies t may, in that case, be necessary to show some funds advanced to accountants as imprests only not finally accounted for, but which in a month or two would be accounted for and finally audited.

This account sno be presented before the estimates of the next year but one.

The question will be the expense attending the measures, and whether from he nature of the army expenditure the object to be attained is worth that expense. It is probable that three or four clerks would be required at the War Office for the purpose of keeping the accounts in a systematic form, upon he principle of double entry, so that every payment may be posted to its proper head, and an annual balance-sheet prepared, showing the whole of the payments for army expenditure placed against the several heads under which t shall be settled by the Treasury and the Secretary at War that the payments hall be arranged. We are inclined to think that this would be a measure advisable for the purpose we have already suggested, and for other reasons, even should it not be thought necessary to establish an Audit Office check. Should that further check be thought advisable, the increased expense arising out of it would be, that of one, or probably two, discreet, attentive, confidential and fairly remunerated clerks, who must attend at the War Office, and having access at reasonable hours to all the War Office books, the Agents and Paymasters' accounts, must ascertain that all the charges are duly classed under he proper heads in the books, and finally in the annual account.

Three or four clerks would be required to keep the War Office books by double entry.

Such a measure would be advisable even without the Audit Office check.

One or two clerks would be necessary for the Parliamentary audit.

The military expenditure being nearly all paid as it becomes due, there cannot be so much discretion, as in the case of the Navy, with respect to the ime when a sum becomes payable, or the year to which it appertains, so that even without any estimate of the debts at the beginning and end of each year, he military accounts would be more satisfactory than that of the Navy, and most probably an estimate could be easily made, very nearly correct, of the debts at the end of each year.

Military more regular than naval expenditure.

No head of "New Works."

There is no great head of "New Works" in the War Office accounts, as in the case of the Navy, so that the above-mentioned objection in the service in respect to the different items of the Estimates being included in one head of the Appropriation Act, would not apply. Nor is there any great War Office store account to give rise to the objection of the want of a store or stock account at the end of each year. Neither is it to be kept out of view, that in the case of the Navy, where the check is established, there is apparently no practical difficulty in the Lords of the Admiralty drawing, of their own authority, on any head of service, sums beyond the amounts mentioned in the Appropriation Act, which we apprehend could not even now be done by the Secretary at War.

No store account.

No facility of exceeding the grants as in the navy.

A certified army account would therefore show, much more satisfactorily than in the case of the Navy, the difference between the Estimates and the expenditure.

The Audit Office or Parliamentary check less required in the Army than the Navy.

The above-mentioned points of difference in the nature of the two services leave no assignable motive for mis-statement, and tend to render the Audit Office check of less importance in the Military than in the Naval service, as it would be scarcely possible for the War Office, if left unchecked, and if so disposed, to make up an account of expenditure materially differing from the state of the payments, and thus to deceive Parliament by placing sums of any considerable amount under improper heads of service.

A certified army account ought, however, to be prepared.

Having duly considered all the above-mentioned circumstances, we do not think that the trifling expense which would be caused by the alteration in the War Office books ought to be held as a sufficient objection to the measure of a certified account, which would place the two services upon the same footing.

A proper classification of heads of service should be adopted.

We have only further to state, that in fixing the heads under which the army accounts should be kept, with a view to an annual account, care must be taken to make them such as that both Parliament and the Lords of the Treasury should have such necessary information as may be found conveniently practicable in respect to the charge on each description of pay, whether ordinary or extraordinary, or good-conduct pay, and also to each separate description of military allowance and expense.

Treasury Minute, dated the 27th November 1840.

Report of the Committee.

Read the Report of the Committee appointed by their Lordships' Minute, dated the 4th February 1840, to investigate and report whether the present system of audit at the War Office be or be not such as to afford sufficient security to the public interests, and whether that system would be rendered more efficacious by the adoption of checks similar to those lately introduced at the Admiralty.

Memorandum of Sir H. Parnell.

Read also a Memorandum with which Sir H. Parnell has favoured my Lords on the subject of this Report.

Circumstances under which the Committee was appointed.

My Lords observe that for some years past they have made it their object to transfer various items of military expenditure formerly included in the annual vote for army extraordinaries to the estimates of the departments to which they properly belonged; and that among the heads of expenditure which were so transferred to the War Office Estimates were the staff pay and allowances and the regimental allowances issued to military officers abroad. This expenditure had been previously administered under the immediate superintendence of the Lords of the Treasury, assisted by the advice of the Controllers of Army Accounts, and was subsequently audited by the Commissioners for the Audit of the Public Accounts at Somerset-house; but when the Secretary at War became charged with the duty of submitting the necessary annual estimate to Parliament for this expenditure, he pressed upon the attention of my Lords the propriety of his being likewise entrusted with the control and the sole audit of it, so as to put it upon the same footing with the rest of the expenditure included in his estimates. In reply to this demand, the Treasury admitted that there was no distinction to be made as to the principle upon which this particular class of expenditure, both at home and abroad, should be controlled and audited; but their Lordships required to be satisfied that the mode of audit

audit in use at the War Office furnished every proper security against unauthorised expenditure of the public money, before they consented to the final ransfer to that office of the audit of a branch of the public accounts over which their Lordships had hitherto possessed a complete control. These were the circumstances under which a Committee was appointed, composed of Mr. Larpent, the Chairman of the Board of Commissioners for Auditing the Public Accounts, Mr. Brooksbank, of the Treasury, and Mr. Croomes, of the War Office, for the purpose of inquiring into and reporting on the War Office system of audit.

Duties of the Secretary at War in relation to the Treasury.

The Secretary at War lays before Parliament the Estimates for the great bulk of the military expenditure, administers the funds so obtained, and audits the accounts, subject to rules laid down in warrants under the sign manual, which are not submitted for the approbation of the Sovereign until they have obtained the previous sanction of the Lords of the Treasury. No alteration can be made in the rates of pay and allowances, or in any of the regulations under which the military expenditure is conducted, without the authority of the Treasury; and every case which it may be deemed proper to make an exception to existing regulations must be reported for the decision of the Treasury.

The War Office audit is efficient as regards the details of the expenditure;

The Committee saw nothing to object to in the details of the mode of auditing the military accounts in use in the War Office. The system pursued there appears to unite simplicity and efficiency in a high degree, and the accounts are audited as they come in without any arrear. The control exercised by the Secretary at War over his subordinate officers is therefore as complete as it could be desired to be.

but it places no check on the Secretary at War in his interpretation of the rules under which he acts.

The War Office system of audit is nevertheless open to this serious objection, that the same officer authorises the disbursements and checks the accounts; and although he is bound to exercise these functions in accordance with the rules which have received the previous sanction of the Lords of the Treasury, yet as he is subject to no check in the construction of them, there is nothing to prevent the Secretary at War from putting upon those rules a construction contrary to the intention with which they were originally framed. Before, therefore, the War Office system of audit can be considered to furnish a satisfactory security against any unauthorised expenditure of the public money such a check must be established as will either prevent the Secretary at War from practically deviating from the regulations; or if he should do so, will make it known to the Treasury. This cannot of course be effected by an audit under the Secretary at War. It can only be accomplished by an independent audit.

Sir H. Parnell's definition of a perfect system of audit.

The remarks of Sir H. Parnell on this subject are particularly deserving of attention. He very justly observes, that *the most perfect system of audit is that which unites the familiar acquaintance with details and the promptitude of a local audit, with the efficient control of an independent audit.*

Measures recommended by the Committee.

The Committee propose the adoption of the following measures, which they conceive would furnish the requisite security.

1st. The accounts to be kept in a systematic manner, under fixed heads.

They propose, in the first place, that the War Office accounts should be kept in a systematic form, on the principle of double entry, under heads to be fixed by the Treasury, in concurrence with the Secretary at War.

2. An annual account to be rendered to the Treasury, in sufficient detail to check unsanctioned alterations.

They then recommend that an annual account should be furnished to the Lords of the Treasury, showing the sums expended under each of the heads in respect to which check is required; so that, to use the words of the Report, "their Lordships might have the means of satisfying themselves that no unsanctioned alterations had been made, of comparing the amount in each year with those of the preceding years, and of calling for explanations in any case where an increase of importance appeared, the cause of which did not likewise appear from the accounts."

3d. An annual balance-sheet to be submitted to Parliament; and,

They next proceed to suggest that an annual balance-sheet should be prepared and laid before Parliament, showing the whole of the army expenditure placed against the several heads under which it shall be settled by the Treasury and the Secretary at War that the payments shall be arranged. They observe that this account will be much more detailed and satisfactory than the corresponding annual account which is at present laid before Parliament by the Admiralty; and that, as the expenditure included in the Army Estimates consists almost wholly of pay and fixed allowances, payable and paid as soon as they become due, such account will show the precise amount of payments made, or to be made within, or on account of the year, and will be a real service account as compared with the grants for the probable expenses for the year.

4th. An independent appropriation audit to be established over the War Office accounts, similar to that in use in the navy.

Lastly, the Committee propose to extend to the War Office accounts the check which is already in force in respect to the naval accounts, of having the accounts examined by one or more of the clerks of the Commissioners of Audit, with a view to ascertain that every payment is posted to its proper head, and that no payments are made under heads not authorised by Parliament, and also to certify the accounts to be annually laid before the Treasury and Parliament. It is observed, that the check thus afforded would be more complete in the case of the army than in that of the navy accounts, owing to the greater simplicity of the army accounts, and to the circumstance of the transactions of each year being more clearly distinguishable, and to their being brought to a close at an earlier period after the termination of the year, in the army expenditure, than is the case in that of the navy.

These measures approved; and provided they are fully adopted, the audit of the foreign allowances may be transferred to the War Office.

Under all the circumstances, my Lords are disposed to concur in opinion with the Committee that the measures proposed by them are likely to be attended with advantage; and, provided those measures are fully and satisfactorily carried into effect, my Lords will consent to transfer to the Secretary at War the control and the audit in detail of the staff pay, and of the staff and regimental allowances abroad, which have hitherto been audited at Somerset-house. The 1st of April next will probably be the most convenient period for the transfer of those duties to the Secretary at War.

The form of the annual estimate to be revised with reference to the heads to be fixed on for the accounts.

The revision of the War Office books must, my Lords observe, be conducted with a direct reference to the heads which may be fixed on for the annual accounts to be laid before the Treasury and Parliament, and to the details of the War Office Estimate; and it will also be proper to consider whether the form in which the estimate is prepared may not be improved so as to make it more completely harmonise with the accounts, and furnish the means of a more accurate review of the different items of military expenditure.

The annual account should show whether the rules sanctioned by the Treasury have been adhered to *in reference to the whole of the War Office expenditure.*

It is to be observed that the control of the Treasury extends not only to the military allowances abroad, which have lately been transferred to the Secretary at War's Estimates, *but to all the other items of military expenditure*; and it will therefore be proper that the whole of the annual account to be furnished by the War Office to the Treasury should be drawn in such a way as will enable their Lordships to ascertain, as far as possible, whether the established rules under which the military expenditure is conducted have in any case been departed from without authority.

Whether one form of account will suffice for the Treasury and Parliament; and whether the same heads of account will not apply to,
1st. The estimate.
2d. The account-books; and,
3d. The final accounts.

It is deserving of consideration, whether one form of account will not suffice for the Treasury and for Parliament, the object in both cases being nearly the same; and whether the same heads of account may not be adopted in the Estimate, the War Office books, and the annual accounts, in order that there may be one consistent chain of connexion, from the estimate, through all the War Office books, to the final annual account.

Whether additional clerks will be required at the War Office to keep the books in a systematic form.

The Committee state that it is probable that three or four additional clerks would be required at the War Office, for the purpose of keeping the books on a systematic form, on the principle of double entry. Sir H. Parnell, on the contrary, observes as follows:—"I am somewhat surprised that the Committee should have entertained the notion that the establishing the double-entry system in the War Office would be attended with an increased expense. In appearance, the introducing of new duties, and the keeping of new books, naturally may lead to the conclusion that new expenses must be incurred; but experience has fully proved that, in all instances where the double-entry system has been substituted for any other system of accounts, it has always been attended with a large reduction in the expense of account keeping. This has been the case in my office; the quantity of clerks' work has been very much diminished, and the establishment considerably reduced. The attention I have bestowed on the difference of expense of keeping accounts between the old office system and the double-entry system, leads me to think that, with proper management of the change from one system to the other, a saving could be made of at least one-fourth of the expense now incurred in keeping the whole of the public accounts."

A person acquainted both with the theory

Sir H. Parnell, however, observes that, although the business of keeping books of accounts by the double-entry system is extremely easy, when once the books

ooks are properly arranged, the application of the principles of the system to xtensive and complicated money transactions, so as to secure the full benefit of and particularly the arrangement of the number and forms of the subsidiary ooks, is a process which requires the most complete knowledge, not only of the ractice, but also of the science of the system; and he recommends that a erson possessed of these qualifications should be appointed to aid in the introuction of the system at the War Office, and to assist in working it until the equisite experience shall have been obtained. Sir H. Parnell predicts that nless this course is followed, the attempt to establish the system in the War ffice will prove a failure.

and practice of the system must be employed to introduce it;

In order that as much uniformity may be established in the accounts of the ublic offices as the difference in the nature of the services will admit, the erson who may be selected to assist in the introduction of the double-entry ystem into the War Office ought, my Lords observe, to be well acquainted ith the nature of the accounts in use in the Admiralty and the Paymasterененral's Office, to which the double-entry principle has for some time past been pplied.

And, with a view to uniformity, he should be acquainted with the Admiralty and Pay Office system.

My Lords will hereafter cause a communication to be made to the Secretary War on the subject of the instructions it will be proper to furnish to the ommissioners of Audit, with a view to their carrying into effect the recomendation of the Committee for establishing an independent, although limited udit of the War Office accounts.

Extension of the independent appropriation audit to the War Office.

In the meantime my Lords will expect to receive from the Secretary at War opies of the instructions which he proposes to issue to his subordinate officers, nd the forms of the accounts which he proposes should be kept for the purpose accomplishing the transfer to his department of the duty of paying and ccounting for the staff pay, and staff and regimental allowances abroad, and y Lords will then cause the necessary instructions to be issued to the Commisriat officers abroad, and to the Commissioners of Audit.

Transfer of the examination of the foreign allowances to the War Office.

It is the wish of my Lords that the Commissariat officers should, as bankers, ve every practicable facility to the officers of the Secretary at War, by effecting ayments for them at out stations, but it must be distinctly understood that the esponsibility of the Commissariat officers will be confined to issuing, upon a equisition from whomever the Secretary at War may authorise for that purpose, e sums necessary for the payment of the staff pay, and of the allowances both aff and regimental. The officers of the Commissariat will therefore cease to ake any representations to officers commanding, in respect to charges for such rvices which may appear to them to be inconsistent with the regulations; but ey will continue to submit any observations to the Treasury which may seem them to be called for on the requisitions they receive, which should be accomanied, as they have hitherto been, by detailed estimates of the sums to be isbursed, and my Lords will, if the occasion should require it, communicate ith the Secretary at War on the subject.

The Commissariat officers to give all the assistance they can, as bankers, in making the payments.

The Committee explain at some length their reasons for considering the udit Office check upon the naval accounts as not sufficiently satisfactory. My ords direct that a copy of the remarks of the Committee on this subject, be ent to the Lords Commissioners of the Admiralty, and that they be requested consider whether the defects remarked by the Committee, in the annual ccount presented to Parliament, are capable of being either wholly or partially emedied.

Imperfections of the naval appropriation audit.

The account which goes by the name of "Army Extraordinaries," is alluded in different parts of the Report; and, as a good deal of misconception revails upon the subject, my Lords deem it right to take this opportunity of xplaining the real state of the case.

Army Extraordinaries.

A large annual vote was formerly taken by the Treasury for the extraordinary xpenses of the army; and under this head the staff allowances abroad, expenses or the recruiting service in India, salaries of the clergy in the North American olonies, and a variety of other items were included. During the years of peace has been practicable to regulate and submit to annual estimate the greater art of these charges. They have accordingly of late years been gradually ransferred to the estimates of the departments to which they properly belonged, nd no vote has been taken for army extraordinaries since 1832, with the xception of the votes directed to the specific purposes of meeting the extrardinary expenditure caused by the Caffre war, and the late insurrections in

Annual vote no longer taken.

Canada. The fund which is properly available for defraying army extraordinaries has now no regular source of supply, except the profit on the bills drawn upon the Treasury by the Commissariat officers who are charged with the duty of raising the necessary funds for the military chests. It has also now no necessary or periodical charge upon it.

But extraordinary expenditure will sometimes occur.

Cases, however, may be expected to occur from time to time in which, owing to the sudden breaking out of hostilities, hurricanes, or other unforeseen causes, it may be necessary to incur expenses for military purposes which it is impossible to estimate with any degree of accuracy beforehand. The sums required for this purpose are advanced in the first instance from the military chests; and although the expenditure may not much differ in regard to its details from that which ordinarily comes under the control of the military departments, yet, as it is not provided for in their estimates, it is considered to belong to the special department of the Lords of the Treasury, and would, in regular course, be audited by the Commissioners of Audit at Somerset-house. The extra military expenditure arising from the Caffre war and the insurrections in Canada was of this nature; but owing to the Commissioners of Audit feeling themselves incompetent to enter with advantage into the ordinary details of the military and ordnance services, the greater portion of the accounts relating to this expenditure was referred for examination to the Secretary at War and the Board of Ordnance. The Committee remark, that this service would have been more expeditiously and efficiently performed if the military departments, to the agency of which it became ultimately necessary to have recourse, had been vested with the direct control and responsibility of this expenditure, and the pay lists and other accounts had been sent home to those departments, as in other cases.

Small unprovided items may be included in the next estimates.

Upon this my Lords observe, that small unforeseen items of military expenditure, such as may be expected occasionally to occur even in time of peace, may, after they have been approved by the Treasury, be included in the next estimates of the department to which the service may appear to belong, with a view to the repayment of the sum which has been advanced from the military chest.

But special votes of credit should be taken on great occasions, of which an account should be rendered to Parliament.

But when cases occur like the Caffre war, the state of military preparation consequent on the insurrection in Canada, or the China expedition, in which, although it may be certainly known beforehand that it will be necessary to incur a considerable expense, yet it is impossible to form anything like an accurate estimate of the probable amount of that expense, my Lords are of opinion that the constitutional course is for the Treasury to lay before Parliament the best estimate that can be made, and to apply for a vote of credit to meet the probable demands. Parliament, then, on the responsibility of the finance department, before which all the estimates come, gives a vote of credit for this particular service; and the next year an account ought to be laid before Parliament of the manner in which the sum voted in the preceding year has been applied. In this way the money is raised within the year for the expenses of the year on an estimate, and an account is rendered to Parliament of the manner in which it has been expended. This is a vote for legitimate army extraordinaries, and the mode of dealing with it is similar to that in practice in respect to civil contingencies, which is found to work well. The only difference is, that military contingencies of this sort are not capable of so accurate an estimate as the expenses which go by the name of civil contingencies.

The estimate should be submitted, and the amount should be apportioned by the Treasury;

It appears to my Lords that the estimate should be made and the vote should be taken in such cases by the Treasury, as the organ of the Government. The propriety of applying to Parliament for such a vote, and the amount to be asked for, may depend upon information of a confidential nature, which each separate department cannot be supposed to possess. It may also be impossible to determine beforehand in what proportion the fund ought to be divided between the different military departments, to make no mention of the civil expenses which it is generally necessary to incur on such occasions; and the Commissariat accounts of the past expenditure, which are rendered to the Treasury, furnish the best means of forming an estimate, which, however, must, from the nature of things, be a loose one.

which should authorise particular expenses to be charged on this vote.

The power of authorising particular expenses to be charged on this fund must, in like manner, rest with the Treasury, which is, of course, in communication with the Foreign Office, and the Secretary of State for War and the Colonies, and with the military and naval authorities, if necessary.

The

Check and audit, as to details.

The check and audit as to details is quite another thing. Taking, as an stance, the volunteers in Canada; the sanction of such an expense must rest ith the Government, speaking through the Treasury; but whether the xpense has been proper or not as to details, will require the examination of veral departments; the Ordnance as to military defences, clothing and arms; e War Office as to pay and allowances; the Commissariat as to victualling. hus, when the accounts come fully to be audited, the military departments may ive very valuable assistance; whereas, if they had had the examination and udit in the first instance, their rules would have been inapplicable to such a rvice, and they would have been obliged to apply after all to the Treasury.*

Army Extraordinaries as a banking fund.

There is, however, another application of the term "Army Extraordinaries" hich requires notice. As the sums raised to meet the votes of Parliament for arrying on the public service abroad are paid into the Exchequer in England, me means must be had recourse to for making the necessary transfers to the laces where payments have to be made. This is effected by the operations of e military chests, which are under the charge of the officers of the Commisriat. The funds for the supply of the military chests are provided partly by bills rawn by the Commissariat officers upon the Treasury, partly by specie transitted from England, and partly from local receipts arising from customs' uties payable to the Crown, from the sale of condemned slave vessels, and om other sources. The sums thus obtained are employed by the Comissariat officers, either in the shape of advances to accountants of other epartments, or in that of direct payments, in carrying on the various services road, civil as well as military; and when the accounts of these disburseents are received at home, they are sent to the departments to which they spectively belong, which repay them by transferring to the credit of the roper account in the books of the Paymaster-general a corresponding amount t of the sum which has been voted by Parliament for the service of each articular department.

To be called the Commissariat Chest Fund.

The fund, which is thus kept in a constant state of circulation between the aymaster-general's account and the military chests abroad, was called the Army Extraordinary Fund," from the large annual vote under that name, hich was placed completely at the disposal of the Treasury, and which the her departments were always disposed to draw on to make up their own eficiencies, and get themselves discharged of sums which had not been cluded in their estimates. That annual vote has long ceased to be taken, but e continued use of the name perpetuates the impression that there is still ch a fund at the disposal of the Treasury, and with it the disposition to throw pon the Treasury expenses which, if they are incurred at all, ought to be cluded in the departmental estimates. It therefore appears to be desirable to ive this account a new name, suited to the altered state of things; and, all ings considered, my Lords are of opinion that the term "Commissariat Chest ccount" would be the most proper appellation which could be given to it. y Lords are accordingly pleased to direct that instructions be issued to the ommissioners of Audit, to the Paymaster-general, and the Commissariat fficers abroad, to relinquish the use of the term "Army Extraordinaries," as pplied to the advances from and repayments to the military chests, and to esignate them simply as advances from the "Commissariat Chest," or repayents to that chest.

The arrangements in force at the Admiralty, and resolved upon for the War Office, should be extended to the Ordnance.

My Lords observe, that the questions which have now been discussed and put a train of settlement as far as the War Office is concerned, remain still ndecided in respect to the Ordnance Department; and it likewise appears to em to be desirable, on general grounds, to take this opportunity of condering whether the improvements in the mode of keeping and rendering the counts which have been introduced into the Admiralty, and are now about to e extended to the War Office, may not be applied with the same advantage the Ordnance.

Mr. Anderson to introduce the system at the War Office.

Transmit a copy of this Minute to the Secretary at War, and inform him that y Lords have selected Mr. Anderson, of the Paymaster-general's Department, assist, under his orders, in the application of the double-entry system to the ar Office accounts.

Inform Sir H. Parnell accordingly, and state that access will be given Mr.

---

* *See* the Note at page 6.

Mr. Anderson to any papers connected with the subject on the records of th Treasury which he may desire to see. Also observe, that my Lords trust tha Mr. Anderson may be spared for a time for this important duty without seriousl interfering with the current business of the Paymaster-general's office.

The Ordrance requested to name an officer to be added to the Committee, with a view to its inquiries being extended to that department.

Transmit a copy to the Secretary to the Ordnance, to be submitted to th Master-general and Board, and state that, as it is desirable that my Lord should have the means of considering whether any similar arrangements ma with advantage be introduced into the mode of keeping and auditing th accounts of the Ordnance Department, their Lordships have no doubt that th Master-general and Board will concur with them as to the propriety of th inquiries of the Committee being extended to the Ordnance Department; an my Lords accordingly suggest that the Master-general and Board shoul nominate an officer well acquainted with the details of the Ordnance business to be added by the Committee.

The Committee thanked for their assistance.

Transmit a copy of this Minute to the Committee, conveying to them th thanks of my Lords for their valuable labours, and state that a further communication will be made to them in case their services should be required for th purpose of conducting a similar inquiry into the Ordnance system of audit an account.

Observations of Sir *Henry Parnell* on the Report on Army Accounts.

Preliminary arrangements required for the successful introduction of the double-entry system of book-keeping at the War Office.

I am happy to learn from the Report on Army Accounts, that it recommend the introduction of the double-entry system of book-keeping at the Wa Office.

It is of great importance to bear in mind, that the most difficult portion o the task of introducing this system consists in arranging the number and form of the subsidiary books, in which are to be recorded the original entries of al transactions; and in making a proper condensation of details, so as to avoid repetition and the overloading of the principal books, such as the journal and ledger. These subsidiary books, in fact, form the foundation of a double-entry plan of accounts; and the success of any attempt to introduce it will depend upon the manner in which these books are selected, and the forms of them arranged. But this is a business which cannot be adequately accomplished without employing a person who has had not only long experience as an accountant, conversant with the practice of the double-entry system, but who is also possessed of a thoroughly scientific knowledge of the principles of the system, and of the proper steps to be taken for adapting these principles to accounts that are of great magnitude, and at the same time very complicated in their character; and therefore I would advise the Treasury to appoint a person, qualified as a scientific accountant, first, to fix the heads of the accounts to be kept; secondly, to select and classify the subsidiary books, and arrange the forms of them; and thirdly, to settle and arrange another kind of subsidiary books, to be used for the purpose of abstracting and condensing the details, so as to relieve the journal and ledger.

But more than this will remain to be done by the Treasury; for after the books shall have been arranged, there will be no security that they will be kept in a proper manner at the War Office, in consequence, as it may be assumed, of there not being any clerks there who have been accustomed to the operations of the double-entry system. The keeping of the new books should, in the first instance, be placed in the hands of a regular accountant, to be assisted by some of the clerks of the War Office, until a sufficient number of them shall have been trained to keep them; and this accountant should be under the control of the person whom it is proposed to have appointed by the Treasury for arranging the books.

The experience I have had in my office in establishing the double-entry system makes me feel somewhat confident that the opinions I am now expressing are well founded; and leads me to foretel that if the course I have pointed out is not followed, the attempt of the Treasury to establish it in the War Office will prove a failure; but, on the contrary, if the business of selecting the new books for the War Office, and of making the elementary arrangements for the management of the details, is intrusted to persons who have a perfect knowledge of the double-entry system, then the success of the attempt will become a matter of certainty.

Although

Although the business of keeping books of accounts by the double-entry system is extremely easy, when once the books are properly arranged, the adaptation of the principles of the double-entry system to extensive and complicated money transactions, so as to secure the full benefit of the system, is a process that requires the most complete knowledge, not only of the practice, but of the science of the system. In point of fact, among the great number of persons who have acquired the reputation of being very good double-entry accountants, there are very few who possess the peculiar skill which is indispensably necessary for so dividing, classifying and arranging a multitude of transactions, as to frame a complete system of accounts. If the manner in which the adaptation of the double-entry system to the accounts of my office and to those of the Admiralty has been effected is examined into, it will be seen that a great degree of science and skill is requisite to bring accounts of such magnitude into a simple and perfect state.

The first adaptation of this system to extensive and complicated money transactions requires rare qualifications.

As it may now be expected that the double-entry system will be introduced into the Ordnance and the other public departments, the person who may be selected by the Treasury to arrange the books of the War Office would be able at the same time to arrange the books of the other departments; and, with the aid of an accountant in each of them, to establish the double-entry system in them. This person should be placed at the head of a branch in the Treasury, for managing the business of establishing the double-entry system of accounts; and after it shall have been established, he should be kept constantly employed in inspecting the books of the several departments, in order to prevent any departure from the plans originally laid down; for unless this constant inspection takes place, there can be no doubt that it will be impossible to maintain the system on a principle of perfect uniformity; new schemes will be invented and adopted in different departments, and a general relapse into the old systems will very likely, in no long period of time, take place.

The person employed for this purpose should be placed at the head of a branch in the Treasury to inspect and maintain the system,

After the double-entry system shall have been established in the departments, this Treasury accountant should be employed in keeping a journal and ledger, to be made up from the accounts of the various departments, for the purpose of preparing in each year the general accounts of the public income and expenditure, to be laid before Parliament, in the place of the present annual accounts.

and to keep a journal and ledger for consolidating the departmental accounts and laying them before Parliament, in place of the present annual accounts.

I am somewhat surprised that the Committee should have entertained a notion, that the establishing of the double-entry system in the War Office would be attended with an increased expense. In appearance, the introducing of new duties, and the keeping of new books, naturally may lead to the conclusion that new expenses must be incurred; but experience has fully proved, that in all instances where the double-entry system has been substituted for any other system of accounts, it has always been attended with a large reduction in the expense of account keeping. This has been the case in my office; the quantity of clerks' work has been very much diminished, and the establishment considerably reduced. The attention I have bestowed on the difference of expense of keeping accounts between the old office systems and the double-entry system leads me to think that, with proper management of the change from one system to the other, a saving could be made of at least one-fourth of the expense now incurred in keeping the whole of the public accounts.

The expense of keeping the accounts would be diminished by the adoption of the double-entry system.

The observations of the Commissioners on the Navy balance-sheet induce me to suggest, that if this balance-sheet is to be made the model for the balance-sheet of the War Office and of the other departments, as I think it ought to be, it is advisable to revise it and render it as perfect as possible. I have not, at present, leisure to enter upon the particular alterations which might be usefully made; but it has occurred to me at various times, on examining it, that there was room for improvement.

The Naval balance sheet should be revised before it is made a model for other departments.

In all that the Report says regarding the present system of managing the Army services by several distinct and entirely independent departments, I most fully agree. Nothing can be more at variance with those principles for conducting the public services which are so correctly set forth in the Report. This system necessarily produces divided responsibility, occasions much unnecessary delay and expense, and in various ways impedes the public service. The recommendation of the Report cannot be too soon adopted, which proposes that "the Military expenditure should be, like the Naval expenditure, included in one estimate, and subjected to the control of one department;" adding, very truly, that "the whole expenditure, whether ordinary or extraordinary, would be

Evils of divided responsibility.

equally military, and the department would be equally responsible for it, and make provision accordingly." But although the Report has accurately exposed the evils of the existing system of independent authorities, it has not traced out the results which would be attained by placing the whole of the military expenditure in one estimate. Some of these results, perhaps, are sufficiently obvious to have rendered it unnecessary to specify them; but it would have been satisfactory to have seen in the Report a more detailed and specific explanation of the opinions of the Commissioners, regarding the extraordinaries generally.

The "Extraordinaries" at home and abroad, including the operations of the Military Chests, have not yet been subjected to a proper system of account.

The state of the account of the extraordinaries, as connected with my office, has led me to pay attention to them; and I feel persuaded that there is no part of the management of the public accounts which more immediately requires reformation. There exists no set of books that contains, in a regular and proper form, the operations of the military chests abroad; and there is no such thing made up as a collected summary account of all the transactions of the extraordinaries at home and abroad. The account annually laid before Parliament by the Audit Board is a mere abstract of the Commissaries' receipts and disbursements, and it gives no information whatever as to the real state of the account of extraordinaries.

The double-entry system is the only engine by means of which this complicated branch of the public accounts can be brought under efficient regulation; and if a practical accountant were appointed by the Treasury, as I have already suggested, for establishing the double-entry system in the departments, it would probably become a part of his business to regulate the accounts of the extraordinaries.

Sir H. Parnell's queries on the steps proper to be taken for establishing the double-entry system, and Mr. Anderson's answers. *See* page 22.

I have annexed to these observations some queries regarding the steps proper to be taken for establishing the double-entry system of accounts, with answers to them by the accountant of this office. These answers contain a very full explanation of the importance of making a skilful selection of the subsidiary books. Mr. Anderson's long experience in dealing with official accounts, and the assistance he has afforded in adapting the double-entry system to public accounts, entitle the remarks and suggestions he has made in his answers to my queries to great weight.

Revision of the estimates on one uniform principle, the basis of a proper system of account and audit.

The observations contained in the Report on the evils of independent departments and divided responsibility, as to the military service, serve to point out the necessity of a revision of the Army Estimates. In point of fact, the estimates of all the services ought to be revised and framed on one uniform principle. The defects of them are the real source of all the difficulties attending the proper keeping of the public accounts, the controlling the expenditure by the votes, and the auditing of the accounts; and until the estimates of each department are prepared under proper general heads, and well arranged under smaller divisions, according to the rules and principles on which the estimates of the expenditure of France are arranged, our financial system will continue to be, however much it may be mended, in an imperfect state.

Audit should be local but independent.

With respect to that part of the Report which relates to the audit of the War Office accounts, I find that it is the opinion of the Commissioners that the system of audit at Somerset-house cannot be applied to the accounts of the sub accountants of the Army, Navy and Ordnance; and that a local audit in each of those departments is sufficient for the protection of the public interests. I quite agree in this; but the local audit ought to be an effectual, independent audit; not such an examination of the accounts as now takes place in the War Office, Admiralty and Ordnance, by clerks accountable to the heads of those departments; but by clerks independent of them, and acting under the control of an independent authority.

Three plans of audit: 1st. Local.
2d. Independent.
3d. Local and Independent.

There are at present three plans of audit in operation in the public offices. The first (which, for the sake of brevity, I call a local audit) is conducted in the departments in which the expenditure itself is authorised; of this class are the plans in operation in the War Office, Admiralty and Ordnance offices. The second is the independent audit, as conducted by the Audit Board at Somerset-house. The third is conducted on a very limited scale, and combines the properties of the other two modes; that is, it is both a local and an independent audit. To this class belongs the audit of the Greenwich out-pensions at Tower-hill, and also the audit of the accounts of my pay clerks at Chatham, Sheerness, Portsmouth and Plymouth.

The

Advantages and disadvantages—
1st. Of a local; and,

The advantages of the first mode of audit, as exercised in the War Office, Admiralty, and Ordnance offices, are, great facilities and expedition in passing accounts, founded on a practical knowledge of details, which could not well be acquired out of the departments themselves, and which enable them to exercise a most efficient control over the sub-accountants of the departments; but there is here a great defect in principle, which is not fully met by the observations in the Report; and that is, that all these departments audit their own accounts, and that consequently they will never object to items of expenditure, however extravagant, which they have themselves authorised; and although these offices exercise the most efficient control over their sub-accountants, they are themselves free from any control whatever. This absence of responsibility is highly objectionable.

2d. Of an independent audit.

The advantages of the second mode of audit consist in its being carried on by an independent Board; and consequently there is, or ought to be, every control which the public interests can require; but it is admitted by the Report that there are some very extensive and important accounts—the Army, Navy and Ordnance, for instance—embracing the largest portion of the public expenditure, which the Audit Board does not, and, constituted as it now is, cannot control.

Carried on, as this audit is, in a detached office, it must necessarily engender difficulties and delay in passing accounts; the officers, being compelled to part with their vouchers and their original authorities, must retain copies; all objections must be urged and replied to in writing; hence voluminous correspondence, duplicate records, waste of time and labour, and consequently a tardy examination. Neither does the Audit Board possess the authority necessary to give them a proper control.

A local audit, conducted by an independent authority, combines the advantages of the other two, without their defects.

The third mode of audit, while it combines the advantages of the other two, is free from the defects which I have urged against the present local audit by the departments themselves, and from those which attach to the establisnment at Somerset-house. It is a local audit, but conducted by an independent authority; it possesses the advantages of access to original books and authorities; it secures all the benefits of expedition, with perfect control; and it possesses the additional advantage, that it constantly keeps pace with the payments. Independently of the accounts of my office at Tower-hill, and those of the several port establishments, the accounts of which are examined and passed before the close of each day, the audit of the Admiralty accounts, as to actual disbursements and appropriation according to votes, is conducted upon the same principle, a local audit by an independent authority.

A real control over the accounts of the several departments should be vested more directly in the Treasury itself.

If the double-entry system of accounts be established in a successful and uniform manner in all the departments, it will give much additional security against error and fraud; and it will be a question to be well considered whether the duties of the Board of Audit might not then be very considerably modified, and a real control over the accounts of the several departments vested more directly in the Treasury itself. The attempt to make the Audit Board a control over the Treasury, which was a principal object in establishing it, has proved a complete failure; and from the nature of things it could not be otherwise. The circumstance of the great delay that takes place in examining and passing accounts according to the forms of the Audit Office, the want of means in that office to give effect to its decisions, and the powers possessed by the Treasury over its proceedings, all contribute to make such a change as I have suggested well worthy of consideration.

If the Treasury were, as I propose, in the first place to exercise a complete and continual control over the keeping of the accounts of all the departments; and secondly, to carry on a complete and continual audit of the receipts and payments of all departments and all public accountants, then that degree of Treasury control would be established, which, by the constitution, the Treasury ought at all times to have possessed,—the exceeding of grants, the allowance of expenditure unauthorised by Parliament, and many other evils incidental to the present system, would be fully provided against.

Points to which these observations have been directed.

The observations I have here made on the Report on Army Accounts have for their object to show:—

1st. The necessity of the Treasury having within itself an efficient control, by officers of its own, conversant with the double-entry system of accounts, over the accounts of all the departments.

2d. The expediency of the Treasury having within itself, by officers of its own, the auditing of the accounts of all the public departments and of all public accountants.

3d. The reformation of the existing account of extraordinaries.

4th. The new modelling of the estimates of all the public services.

22 August 1840. (signed) *H. Parnell.*

QUERIES on Public Accounts by Sir *Henry Parnell*, with Mr. *Anderson*'s Answers.

15 August 1840.

Whether different modes of arrangement of the account books will not be required for different offices.

Query 1. State whether the particular kinds of business and of money transactions in the public offices will not require different modes of arrangement of the accounts to be kept, and of the books to be opened, on introducing the double-entry system?

Also, whether the making of such an arrangement of the accounts and books will not be a matter of considerable nicety and difficulty; and one that will require on the part of the person or persons who may be employed to make it, a very accurate and extensive knowledge, both of the theory and practice of the double-entry system?

A skilful adaptation of the subsidiary books to the nature of the business is an indispensable condition of success.

Answer. In adapting the system of book-keeping by double entry to the accounts of the several departments of the public service, one of the main points to be attended to, both for the proper conduct of the business of the several offices, and for the success and permanency of the plan, will be the selection and classification of the subsidiary books; it must be evident that the principal books, such as the ledger and journal, in a system of accounts could not, in any extensive establishment, be made to contain every matter of detail; and an attempt to shape them in such a manner would lead to much inconvenient repetition. Too much care cannot therefore be bestowed in the first stage of introducing the system into an office, in the preparation of the subsidiary books, in which are to be recorded the original entries in detail of the transactions of each branch of a department entrusted with the receipt or payment of public money. This first step is an indispensable auxiliary, not only to the system of double entry, but also to the proper working of the business of any office. It is particularly important that this point should be well understood, because most of the prejudices of those who are unfavourable to the introduction of the double-entry system rest upon a very superficial study of this part of the system of mercantile books of accounts. They fancy that the system cannot exist without "invoice books," "sales books," "adventure books," and the like, forgetting that the same subsidiary books are scarcely applicable to two different branches of trade. The subsidiary books of a broker are different from those of a wine merchant, and these again differ from those of a general trader, every merchant adapting them to his own particular wants. Again, a mistaken notion exists that there is great uniformity in the mode of conducting business among merchants, and great analogy in the elements of their accounts; and that consequently the system of double entry is more applicable to them than to the accounts of Government, which are supposed to differ so materially in different departments as to defy the application of one principle to the whole of the public service. A careful inquiry into the two sets of accounts will, however, establish precisely the reverse; for it is impossible to find greater varieties of accounts and modes of business than those which arise out of the multifarious and intricate operations of commerce.

As we find that every merchant frames his subsidiary books to suit his own particular business, without affecting the general principles of the double-entry system, it is evident that the necessity for the same variety in the detail and subsidiary books can form no just ground for objection against the introduction of the system of double entry into the public offices. So far from its being an objection against it, it is one of the chief recommendations of this system, that, simply by the skilful adaptation of subsidiary books to the nature of the business to be transacted, the principle of double entry can be applied, without the slighest compromise, to any accounts whatever.

o this consideration I attach the greater importance, as these subsidiary
ks will form the foundation of the system in every department. It is im-
sible to give specific instructions as to the number and classification of the
sidiary books, but a few general rules may be enumerated, as essential to be
nded to in conducting this part of the undertaking; they should be framed,
he first place, with reference to the bulk of the details to be recorded, and
he subdivision of business in the department; a second object should be to
ıre, as far as practicable, a classification of services in the division of these
ks; and a third, to frame them in harmony with the principal books.

The subsidiary books should be framed; 1st. With reference to the bulk of the details to be recorded;

st. The bulk of the details of the receipts or payments would render it
essary to spread such details over as many books as might be found con-
ient to expedite the current business of an office; but in subdividing labour
his way, another object should be considered, the prospective details which
ht arise out of a great extension of business; it would not therefore be
edient to load each subsidiary book with as much detail as it would bear in
e of peace. I refer, of course, to the accounts of those departments which
ıld be affected by a war: the sub-division of such books should therefore
nade with reference to this point, and also to those to be hereafter noticed.
sub-division of business in an office should also influence the number of
sidiary books. It is desirable in books of details to which frequent references
made, to frame them so that different branches of an office shall not clash
1 one another; for instance, in the account branch of the Admiralty, there
ıe division for full pay, another for stores, a third for pilotage and distressed
nen, a fourth for imprests, and so on; and for each of these there are
responding detail books; similar divisions of business exist in some shape
other in almost every department, and it is important to study the conve-
ice of an office in this respect, so that the current business and the system
l work well together. I conclude, of course, that all the books of accounts
ıld be kept in one division, under the immediate control of the book-keeper,
not scattered over various branches of a department without connexion or
formity. If these points are properly attended to, the offices will discover,
r the system shall have been in full operation some time, that the books will
e become so useful to them, and that the system will so assist the accounting
iness of a department, that all may be expected to feel a common interest in
ining it.

2dly. With reference to a classification of services, so as to avoid all useless repetition; and

dly. Classification of services in the earliest stages of an account should be
rted to, if it can conveniently be accomplished, in all departments of exten-
detail; the repetition of details is one of the objections which has frequently
n urged against the adoption of the double-entry system; it will be found,
vever, that this is not a fault inherent in the system, but that it is attributable,
re it exists, to the want of sufficient knowledge of the theory and practice
he double-entry system, on the part of the persons employed, and as a
essary consequence, to an imperfect classification of the subsidiary books,
an unskilful application of the principles of the system. To work the system
louble entry to advantage, all useless repetition should be avoided; and this
be accomplished frequently to a very great extent, by classifying the items
n account in the first step of the business, that is to say, by appropriating one
sidiary book to one particular service, so that the monthly totals only of that
ice are carried to the journal and ledger.

'or instance, in the Paymaster-general's office, the payments are made during
h day, to claimants indiscriminately; if these payments were entered in the
ail or subsidiary books, without reference to a classification of services, it
ıld be necessary, in order to obtain the daily or monthly amount paid for
1 service, to go through the labour of copying these details a second time into
ks classed according to services; this double work is avoided by classing the
ments at once under their proper heads in the several subsidiary books;
se heads are totalled at the end of the month, and the totals only are carried
he journal and ledger. Again, in the Admiralty, where the sub-divisions of
r heads of service are very minute, advantage is taken of this mode of
sification, to avoid, in every practicable case, the repetition of details; their
-pay register alone, which contains annually about 11,000 payments, is trans-
ed to the principal books in twelve monthly sums. These examples show
much the success or failure of a system may depend upon the elementary
ıngements for the management of the details.

3dly. In harmony with the principal books to which their results are carried.

3dly. To frame the subsidiary books in harmony with the principal books to which their results are carried, requires attention to other points than those which I have already noticed. The preceding observations have reference principally to those subsidiary books which in merchants' accounts would be called "waste books" or "day books;" but there are other books, subsidiary to the journal and ledger, which require to be briefly referred to. In a department where the details of the accounts are not extensive, it might be practicable to carry the items weekly or monthly to the journal, and there condense them in the proper form for posting in the ledger; but in accounts of any extent, it will be found necessary to relieve the principal books by establishing auxiliary ones for condensing such details. Subsidiary books of this description must be in proportion to the relief which the principal books require, and they depend chiefly upon the number and extent of the ledger accounts; as these may vary in every department, it may be sufficient to state, that in Government accounts they would be of two descriptions; the one embracing service accounts, the other personal; the first are in the nature of abstracts, in which the receipts or payments are collected under given heads, and the weekly or monthly results of each are carried to the principal books; the second require a more detailed description.

When the personal accounts of the ledger are inconveniently numerous, a portion of them may be detached, and one or more auxiliary ledgers used for the details; and these auxiliary ledgers may then be kept by another clerk; but in detaching personal accounts in this way from the principal ledger, care must be taken not to infringe an important principle of the double-entry system which requires that the ledger shall set forth the balances of the personal accounts; and therefore, when the individual balances of any detached section of accounts are in subsidiary ledgers, the principal ledger should exhibit such balances in aggregate; and as there must be a perfect accordance between the gross amount of the balances of the *subsidiary* ledger, and the balance of the general accounts by which they are represented in the *principal* ledger, it follows that all the postings in each should be kept under the controlling check of the journal; otherwise there will be endless difficulty in agreeing the balance of the general accounts in one book with the totals of the individual balances taken from the others. In selecting particular classes of accounts to be kept in subsidiary ledgers, so as to render the principal one more manageable, the line of distinction should be very clearly drawn, and if there should be a numerous class of minor accounts, it would be better to select that class for the subsidiary book than detach the more important accounts. There is another point in connexion with the subsidiary books which will require some little judgment to carry out properly, and that is, the period when their results should be transferred to the principal books: in most departments I think a monthly posting will be found sufficient; but it may be desirable in some cash departments, and in departments of receipt, to have a daily posting, at least for a portion of their transactions; but for these the daily results, under general heads, will in most instances be sufficient, while the bulk of the accounts will only require to be posted monthly. It will require some judgment, as well as practical knowledge of double entry, to settle these entries properly in the first instance; but when once done, the whole system will work with almost mechanical regularity.

The most difficult portion of the task consists in the proper assortment and condensation of the details in auxiliary books, after which the system becomes one of simple routine.

I have now detailed all that it appears to me important to explain with reference to the different classes of subsidiary books, and to assist in laying the foundation of the system of book-keeping in each department. I have dwelt on this part of the subject at length, because I am satisfied, from the experience I have had, that in concentrating the accounts of an extensive department into one set of double-entry books, the most difficult portion of the task will be found to consist in the proper assortment and condensation of the details, and the arranging of the number and the forms of the auxiliary books; these once settled, but few difficulties are left to be overcome; the method of posting the principal books is soon learnt by practice; and the whole system, after a time, becomes one of very simple routine.

In the absence of persons in the public offices who are acquainted with the double-entry system, what measures should be taken to secure the success of the undertaking.

Query 2. State whether, from your acquaintance with the several public offices, you believe there is any reason to doubt the opinion which commonly prevails, that there is no person in any of them (except where the system has been established) who possesses a very accurate and extensive knowledge both of the theory and practice of the double-entry system?

If

If this be the state of the case, how would you propose that proper persons hould be supplied for getting rid of the existing books of accounts, and substiuting the double-entry system, and maintaining it on one uniform principle n their stead; and what are the measures, in your opinion, which the Treasury hould take, in order to secure the complete and early success of a determinaion (if come to in that quarter) to have all the public accounts kept on the ystem of double entry?

Answer. There is a strong opinion in many quarters, that the chief obstacle o the introduction of the double-entry system lies in the want of proper perons in each department for keeping the books; and that the clerks on the everal establishments do not possess sufficient practical knowledge of the system o give a hope of their carrying it out with success: an equally strong opinion prevails, that there is a disposition to offer unfair opposition to its introduction; and these opinions appear to derive confirmation from the fact, that among the attempts made to establish the system some have proved unsuccessful, and the failure has been supposed to have arisen from these causes. I am quite prepared to admit that strong prejudices against the system do exist; but I should attach by far too much importance to them were I to apprehend that they could oppose any formidable obstacle to the introduction of the double-entry system n any department, if the Treasury were to make a serious attempt to establish t, and adopt the proper measures for that purpose.

Qualified persons should be employed to superintend the introduction of the plan in particular offices, who should select proper persons from among the body of the clerks, to work the principal books under their directions.

With respect to the want of practical knowledge of double entry, it is very rue that it can hardly be expected to be met with in a department where the ystem itself has no existence, but I will explain presently how this objection may be met. The disposition to offer a factious opposition to the measure, which is supposed to exist in most of the departments, even if the suspicion be well founded, may, I think, be easily overcome. I am, therefore, of opinion, hat the attempt to introduce the system *without* the aid of book-keepers from he city would be successful; or, in other words, that there is ample talent in each office; and sufficient public zeal, to carry forward the plan with complete uccess, without deranging the existing establishments by introducing a new class of persons into the service. There are many objections to the appointment of mercantile accountants or book-keepers for the express purpose of ntroducing the double-entry system. In the first place, however numerous men of mere detail may be, it will be very difficult indeed, even in the city, to obtain persons of those general and enlarged views of the *principles* of double entry who will be necessary for the purpose. In the second place, they will be much more at a loss how to carry out the system, being utterly ignorant of the practical details of official business, than official men would be without a practical knowledge of double entry; and thirdly, the offices would consider such appointments as reflecting upon their zeal and competency, and might be expected to withhold their assistance from, if they did not openly resist, those whom they would naturally consider as having been instrumental in injuring their official prospects. Upon the whole, therefore, I am disposed to look upon the chances of success as considerably in favour of the attempt with official men; because I believe the double-entry part of the undertaking to be by far the easiest; the chief difficulties being connected with the details of official transactions, which nine strangers out of ten from the city would be quite unequal to cope with. I do not mean, however, to say that it is simply necessary for the Treasury to issue a minute to the several offices directing them to keep their accounts by double entry, for I am sure the offices cannot do it properly without assistance; and moreover, if they could, it is desirable that it should be carried out upon some uniform plan; for want of uniformity is one of the greatest defects of the existing accounts, which it is proposed to remedy by the introduction of the plan of double entry on a uniform system. After giving much consideration to the subject, it appears to me that the Treasury might employ two or more persons to superintend the introduction of the plan in two or more offices at the same time, such parties to take each a separate office, and give their whole time to the undertaking; they might meet occasionally in committee to compare notes, consider difficulties, and shape their course so as to secure the utmost uniformity in their proceedings. These parties might be entrusted with the selection of proper persons in each department, from among the body of clerks, to work the principal books under their directions. At the expiration of the period of probation which the Treasury might think proper to allow the system, it should be distinctly held out that the clerk who had acquired in each department the greatest proficiency in the system, and who had exerted himself the most zealously in the prosecution of the work, should take charge of the books and be promoted; the prospect of reward should also be held out to others who, in working the subordinate parts of the system, might show more than ordinary zeal in promoting the success of the undertaking. The same course might be repeated in every department till the system was fully carried out in all.

I conceive that great advantages would be derived from carrying out the system on this plan:—

1st. Instead of offending existing prejudices, they would be gradually softened down by placing confidence in the zeal and ability of those now employed on the accounts of the kingdom, and by holding out promotion as the certain reward of success.

2dly. The plan would be carried out at the smallest possible cost; for it would be far less expensive to add a little to existing salaries than grant new ones.

And, lastly, by establishing one universal system throughout the public service, and selecting in each department intelligent persons to work it, the inevitable result will be, if all work in unison, and emulation is fostered, that in the course of a few years the best accountants in the kingdom will be found in the public service.

Whether constant inspection and superintendence will be necessary to prevent a relapse into old methods.

Query 3. After the double-entry system shall have been established in an office, will not a constant inspection and superintendence be necessary to be kept up, in order to prevent its relapsing into the old methods of keeping official accounts?

No general system could be maintained on a footing of uniformity without it; and with it constant progress is to be expected by comparing the practice of different offices, and extending the improvements of one office to another.

Answer. The system of double entry having once been established, and the number and form of the subsidiary and principal books consequently fixed, it would appear impossible that the offices could ever relapse into the old methods of keeping accounts; but the subject of revision and inspection is one upon which all parties who have turned their attention to it are pretty well agreed. It is admitted that no general system could be maintained upon a footing of uniformity without it: additions, transfers or changes of duty connected with the accounts, are constantly occurring in the public service: new departments spring up, and old ones are modified, so as to render new regulations necessary. And, moreover, it is necessary to guard against alterations in the system, when once established; against any unnecessary multiplication of books intended to make parties independent of the system for information; against laxity in the mode of keeping them: against incompetency in those who may be entrusted with them; and against the tendency which exists to make fanciful improvements. There is no other way of averting these evils than by the Treasury retaining a control over the whole system of public accountancy, by appointing officers of their own as inspectors; but this will be found to be rather a difficult as well as a delicate question; for the heads of every office will combine to maintain their independence of the Treasury.

The question of inspection requires, therefore, to be handled very tenderly. The inspector might be required to report irregularities to the heads of each department, and to call in the authority of the Treasury only in cases where his representations to the head of a department had failed to produce a remedy. Periodical reports on the state of the accounts of every department in the kingdom should be prepared for the information of the Treasury by their inspectors.

But the maintenance of the system upon one uniform basis, is not the only advantage which inspection would lead to; the opportunities which an inspector would have of considering many varieties of accounts, and of extending the improvements of one office to another, could not fail to exert a very beneficial influence over the general system.

Mr. ANDERSON'S REPORT on the WAR OFFICE ACCOUNTS.

24 January 1841.

Having attended at the War Office in obedience to the directions contained in the Minute of your Lordships, dated the 20th November 1840, and having acquired the information necessary to enable me to submit the preliminary arrangements which it may be necessary to adopt in furtherance of the objects contemplated by that Minute, I now beg to submit the following Report:—

I have classed my remarks under three heads:—

The First contains a description of the War Office system of Accounts, according to the existing practice.

The Second contains a proposed plan for carrying into effect your Lordship's directions with respect to the establishment of a complete set of books, according to the Italian method of double entry.

The Third points out the facilities which the establishment of the proposed system will afford for improving the management of the pecuniary transactions of the Army department, and for effecting an important saving of expense to the public, combined with increased efficiency to the financial regulations of the Army.

1st.—*Description of the War Office System of Accounts, according to the existing practice.*

Stages through which the public money issues.

Before I proceed to describe the books in which the War Office accounts are entered, and to show where the record commences, and where it ends, it will be proper to trace the grants of Parliament, step by step, from the vote of the House of Commons to the final disbursement of the money to the public creditor, for it is only by following the moneys through the various stages in which they are presented for record that an opinion can be formed as to the adequacy or otherwise of the existing books.

Royal Order.

Treasury Warrants.

Paymaster-general's monthly estimate of weekly payments; and his daily applications.

The supply for Army Services having been granted to the Crown, a Royal Order, either for the whole or a portion of the grants, is obtained, to authorize the Exchequer to issue, from time to time, to the Paymaster-general, on special warrants from the Treasury, the sums which may be required to pay Army Services. The Paymaster-general is required, before the close of every month, to send to the Treasury a memorial, or estimate, of the probable amount of his payments in each week of the ensuing month; and daily applications are also made by him for the proportion of that monthly estimate wanted for immediate use; it is upon these daily applications from the Paymaster-general that the Treasury grants the warrant upon the Exchequer for the credit required.

Annual Queen's warrant to Paymaster-general for Army effective services.

Secretary at War's warrants to the Paymaster-general.

Annual "Establishments" for Non-effective and staff services.

The money having thus passed from the Exchequer to the account of the Paymaster-general, the duty of the Secretary at War commences. Before the Paymaster-general can constitutionally pay a warrant granted by the Secretary at War out of any of the votes for Army Effective Services, it is necessary that he should receive an annual warrant signed by the Queen, and countersigned by three Lords of the Treasury, authorizing him to comply with such orders within the limits of the respective votes. Under this authority the effective services of the Army, with the exception of some staff services, are paid by the Paymaster-general upon special orders (called warrants), signed by the Secretary at War. The non-effective services of the Army, and the staff services before excepted, are paid on general annual orders called "Establishments," to which are pefixed warrants signed by the Queen and countersigned by three Lords of the Treasury. *The payments of the Paymaster-general for Non-effective Services are final; those for Effective Army Services are almost exclusively imprests or advances.*

Warrants for Regimental Payments.

To illustrate the progress of the advances for Effective Services, I will select the

the most numerous class of warrants as an example, *viz.*—the advances necessary for the payment of a regiment.

Warrant payable to the Colonel who is nominally responsible;

The colonel is nominally the party to whom the supplies are first issued, and he is the person actually answerable for the proper application of the funds until they reach the hands of the respective paymasters; and though he never practically concerns himself in the application of them, the warrant is always made payable to him. The persons actually concerned in the distribution of the funds are the Army agent, appointed by the colonel, and the regimental paymaster (a recognized public officer, giving direct security to the Secretary at War), who is compelled by the regulations to draw upon the agent for all the sums that he requires.

but the funds are actually distributed by the Army Agent and the Paymaster.

Such is the machinery; the working of it is conducted as follows:—

The Paymaster sends a monthly estimate, and an abstract of it for the Agent;

The paymaster of a regiment sends to the War Office every month an estimate, accompanied by an abstract for the use of the agent, showing the sums he will require for the pay of the troops, or other services payable by him during the ensuing month. In this estimate he includes the pay of officers, which is payable partly by the agent and partly by himself. Upon this monthly estimate the Secretary at War grants a warrant or order on the Paymaster-general, in favour of the colonel of the regiment, for the full sum required for the ensuing month, and the abstract of the paymaster's estimate is sent to the agent of the regiment. On the first day of the month for which the advance is granted, the Paymaster-general pays the amount of the warrant to the regimental agent.

upon which an order is given on the Paymaster-general in favour of the Colonel of the Regiment.

The Colonel's agent then makes the payments partly himself and partly through a Regimental Paymaster.

The funds having thus passed from the hands of the Paymaster-general into those of the agent, the latter pays them away, partly in final payments for pay of officers, and partly in advances to the regimental paymaster, for the pay of officers and for the regimental services within his department.

This portion of the funds having thus reached the hands of the paymaster, is from time to time, with the assistance of the captains of companies, paid away to the men, &c.

Successive steps required to complete the evidence of the due appropriation of the Army grants.

It will be seen from this narrative of the progress of the money, that, in order to preserve a connected record of the course of the Army grants, it is indispensable that the following progressive steps be noted in their proper order, and under the proper accounts in the books:—

1st. *The Exchequer* must be charged with the full amount of the grant of Parliament for Army Services, and be relieved from time to time by the amount of the issues to the Paymaster-general.

2d. *The Paymaster-general* must be charged with these Exchequer issues, and be relieved by the amount of his final payments and of his advances to the colonels.

3d. *The Colonels*, as the responsible parties, must be charged with the amount of these advances, and be credited for the amount of their final payments, and of their advances to the paymasters.

4th. *The Paymasters* must be charged with such advances, and have credit for their final payments; and—

5th. *The Votes* must be charged with these and all other final payments.

Present books of account.

If the record of any one of these changes in the position of the Army funds be omitted in the books of account, and the connexion between the grants of Parliament and the final expenditure of the money be anywhere broken, the chain of evidence will be incomplete, and the system of account consequently imperfect; and here it is that the present system of the War Office must be considered defective. To prove this, I will briefly state where the present record commences, and where it ends.

The first step now made towards recording the distribution of the grants is the entry of the Secretary at War's warrant for a payment. The warrants issued by him are nearly all Imprests, and are entered in two books called "Cash

"Cash Books." These Cash Books (or more properly "Registers,") are arranged in the form of debtor and creditor. On the debtor side are entered the warrants in the order of their dates and numbers, with a short description of the service. On the creditor side the letters to the Paymaster-general, authorizing him to receive sums from public departments or private individuals, are entered, and appropriate columns are provided for the entry of the particulars of each receipt, and the dates of authority and actual settlement: there is, of course, no necessity for ever striking a balance between these debits and credits. The first of these Cash Books is appropriated to the vote for Land Forces. On its debtor side are entered the warrants for advances or services payable out of the vote; and on the creditor side, the orders to the Paymaster-general authorizing the receipt of sums, which when received, are to be carried to the credit of that vote. In the second cash book there are five debtor and creditor sections for the registry of similar warrants and orders relating to the five votes for "Staff Officers," "Public Departments," "Royal Military Asylum," "Volunteer Corps," and "Militia."

In addition to these two cash books there are five ledgers. *The First* contains the accounts of the agents of regiments on the British and India Establishments. *The Second* comprehends the various accounts of the general agents, and miscellaneous accounts connected with the vote for Land Forces. *The Third* contains the personal accounts relating to Staff Services, Vote, No. 2; the sub-accountants for the payment of the salaries and expenses of the several civil departments of the Army, Vote, No. 3; and lastly, the sub-accountants for the Royal Military Asylum, Vote, No. 5. *The Fourth* ledger contains the several accounts of the Commandants of Yeomanry; and *the Fifth* those of Colonels of Militia. These ledgers are in debtor and creditor form; on the debtor side of each account opened in them are entered the warrants registered in the two cash books already noticed; the credits in some of them consist of the payments of the parties, and are posted in the form usually adopted in single entry; in others, however, they are widely different. There are columns and spaces in the two ledgers for land forces, for the entry of the paymasters' monthly estimates, and for the entry of the totals of their quarterly expenditure: spaces are also assigned for noting the issues from the Commissariat Chests abroad for pay of officers and for pay of men, also of sums deducted in the regimental pay lists; there are also spaces provided for recording particulars as to the settlement of the agents' annual accounts. These ledgers serve to regulate the monthly issues, by rectifying the sums issued on estimates, by the moneys proved by the accounts as they come in, to have been expended for the same period; they are also, I believe, convenient in many other respects to the office; but much of the information they contain ought to be detached from them, and many facts which a ledger kept upon a systematic plan would embrace, are altogether excluded.

Having detailed all that the existing books contain, I will now briefly notice what they omit.

Defects of the present accounts.

They omit all record of the Army funds at the Exchequer; they omit entirely the account of the Paymaster-general; they omit also all the personal accounts of regimental paymasters, of acting paymasters of depôts and detachments, and of district paymasters. They contain no general record of the sums due either to or by the department, nor are any service accounts recorded in the ledgers; consequently they do not furnish the means of preparing from them any detailed account of finally audited expenditure, as compared with the items of the estimates. The system, therefore, furnishes neither a balance sheet of the debts and credits of the department, nor what in accounts is termed a profit and loss sheet; that is, the sheet which exhibits the details of its income and expenditure. It will not then excite surprise when I affirm, that if the Secretary at War were called upon to produce a balanced detailed statement of audited income and expenditure, accounting for the millions which are placed at his disposal, it would be impracticable, with the existing books, to answer such a call with a proper degree of accuracy.

The deficiency of a ledger, exhibiting the detailed heads of the income and expenditure, must unavoidably be felt whenever it becomes necessary to answer any call made by Parliament for detailed expenditure, or to prepare detailed statements to aid in framing the estimates of the ensuing year. Such calls cannot be answered, as in the Admiralty, by a mere reference to the books, where the

the expenditure of every head of service is annually put on record; the information can only be obtained by requiring the several examining branches of the office to extract on loose sheets of paper, from the several pay lists and accounts examined by them, the various items of expenditure required. Again, if a question should arise as to the state of a paymaster's account, it should be answered by a simple reference to a ledger; but in the War Office there is no ledger in which the debits and credits of the paymasters are recorded; consequently it becomes necessary to refer to detached accounts; but it must not be inferred, that the imprests to the paymaster are unchecked; the agent's quarterly accounts supply the means of examining such charges.

The Secretary at War, and not the Paymaster-general is the accountant to Parliament for the application of the Army grants.

It should, however, be explained, that the War Office has been considered more an office of control and audit than one of account, and that within a comparatively recent period, even the regimental accounts were kept in the ledgers of the Paymaster-general, who was looked upon by the War Office not as the banker only, but as the accountant for all army expenditure. But this view of the connexion between the War Office and the Pay Office is an erroneous one; the Paymaster-general is simply the banker of the War Office, and he occupies nearly the same position that a banker does to a private gentleman or merchant. If the War Office gave bills upon the Paymaster-general under all the detailed heads of expenditure, and defrayed all their services by final payments, then an accurate account of its expenditure might be kept at the Pay Office; but while the greater portion of its warrants are necessarily given to agents and sub-accountants, who make the detailed payments, the War Office accounts in the Paymaster-general's books can exhibit little more than such an outline as a gentleman's or merchant's pass book would exhibit if, instead of paying his tradesmen by distinct cheques, he were pleased to draw his cheques in favour of his steward for the payment of his bills.

The regimental accounts are now kept at the War Office, and the Secretary at War has become the sole accountant responsible to the Government and to Parliament for the application of the Army grants; and the 600 persons employed in making payments for the army, are but so many sub-accountants acting for him, under his sole authority and control, and the responsibility of their admitted disbursements ultimately centres in him.

The system of the War Office is certainly not one of single entry, inasmuch as it omits a large portion of the personal accounts in the ledger; still less is it a system of double entry, which would regularly place on record, not only all the personal accounts, but also all the detailed heads of income and expenditure. It is a system that has been framed solely with the view of recording so much as would enable that department, at the least possible cost to the public, to keep a proper check upon those who are accountable to it for the expenditure of the public money; it aims at nothing more, and was never designed to place the Secretary at War in the position of an accountant, who was responsible in his turn to the Government and to Parliament for the execution of an important public trust.

In the observations which I have felt it my duty to make upon those parts of the existing system of accounts, which appear to me to be open to improvement, I wish to be understood as referring chiefly to the want of regularity of record, and I trust that they will not lead to the inference that I mean to question the efficacy of the checks established for the protection of the public, for I am bound to acknowledge the many excellent regulations of an office which deservedly ranks as one of the most efficient under the Crown.

2dly.—*Proposed Plan for carrying into effect your Lordship's directions with respect to the establishment of a complete set of Books in the War Office, according to the Italian method of Double Entry.*

Probable number of separate accounts and entries to be dealt with.

Before I submit for consideration the plan and construction of the books, by means of which it is proposed to carry into effect the directions contained in your Lordships' Minute of the 27th November last, it may be desirable to give some idea of the extent of the transactions to be recorded.

The number of personal accounts to be opened in the ledgers, after making allowances for double accounts when the colonel, agent or paymaster of a regiment

ment is changed, or when a regiment is removed to or from Ireland or India, will not fall far short of 700; they may be classed as follows:—

Accounts of agents of regiments and accounts of general agents	170
Ditto - paymasters of regiments and districts	170
Ditto - acting paymasters of depôts and detachments	70
Ditto - staff services	20
Ditto - commandants of yeomanry	50
Ditto - colonels of militia	130
Ditto - agents for remittances of soldiers belonging to regiments in India	20
Ditto - hospitals, public departments, commissariat chests, Exchequer, Paymaster-general, and various miscellaneous accounts	70
Total	700

The number of heads of receipt and expenditure will amount to about 170, making a gross total of about 870 personal and service accounts. The number of imprests upon warrants issued in the year will be rather more than 6,000; and the imprests to regimental and district paymasters through the several agents, and through the Commissariat Chests abroad, will not be probably less than 14,000 annually. But the heaviest portion of duty consequent on the adoption of the new system of accounts will arise in dealing with the quarterly accounts of the paymasters; in these are contained the principal items of the Army expenditure, which must be classified under very minute heads. As the cash books and ledgers now in use do not contain an analysis of this portion of the accounts, which will be by far the most laborious and the most difficult part of the proposed system, I have endeavoured to ascertain the number of entries to be made, by referring to the accounts themselves, and I cannot estimate them at less than 50,000 annually. It is evident, from the variety of heads of service, and the number of accounts from which the items must be extracted, that the usual auxiliaries of the system, namely, abstract books and auxiliary ledgers, must be employed to condense the accounts before they are transferred to the journal and ledger.

Books required to record the pecuniary transactions of the War Office.

The books which appear to me to be required for the purpose of recording the complete pecuniary transactions of the War Office, are the following:—

1st.—A WARRANT BOOK.

This book will be required for the registry of all orders for payment drawn on the Paymaster-general. It is proposed to frame it upon the model of the debit side of the existing "cash books," and to preserve the divisions according to votes. The warrants belonging to each vote may be divided under two general heads, namely, "Imprests," and "Final Payments;" the former may be posted in detail to the debit of the parties in whose favour they may be granted, and the latter to the debit of the services for which issued. The whole may be credited to an account of "Warrants Payable," being an account similar to that of "Bills Payable" in the Admiralty books. The letters to the Paymaster-general authorizing the receipt of special sums, which form the credit side of the existing "Cash Books," should appear in a separate book, as they have no connexion with the warrants issued.

2d.—An ABSTRACT of PAYMASTERS' ACCOUNTS.

In this book heads may be opened for every class of receipts and payments which may be likely to occur in the Paymasters' quarterly accounts. When an account shall have been finally examined, the totals of the several classes of receipts and payments may be abstracted in this book, under their proper heads; and, at the end of the month, the several heads may be totalled, and the monthly results passed to the journal and ledger; the receipts being debited against the paymasters, and credited to the several heads of receipt, &c.; and the payments being debited against the several subdivisions of the votes, and credited to the respective paymasters.

3d. An

3d.—An ABSTRACT of AGENTS and MISCELLANEOUS ACCOUNTS.

The various heads under which the agents make their payments and advances may be opened in this book; and it may be used also for the purpose of abstracting all the miscellaneous accounts, such as Staff, Yeomanry, Militia, &c., as these will not be of sufficient extent to require a third abstract book. On the accounts being examined and passed, they may be abstracted in this book under their proper heads, as already described with respect to the quarterly accounts of paymasters; and in like manner, monthly journal entries may be made, debiting the several accountants with their receipts (exclusive of warrants already debited), and crediting the various heads to which they relate; and debiting their payments to the several subdivisions of the votes, and crediting the same to the parties.

4th.—JOURNAL.

As it is proposed to divide the principal ledger into two volumes, it will be convenient to have separate columns in the journal, corresponding with the divisions of the ledger, so as to facilitate the balancing of the books. To simplify the posting, the debit and credit sums should appear on opposite sides of a page; the debit and credit totals should be carried forward, so as to check the amount of the postings in the ledger. There is little to describe in the form of the journal; the important functions of this book will be notice hereafter.—(*See* Appendix.)

5th.—AUXILIARY LEDGER.

It has been already stated that the personal accounts to be opened in the ledger will amount to 700; but as this number is inconveniently large, it is proposed to take advantage of an obvious distinction in the classification of services, and relieve the principal ledger of 200 personal accounts at once, by the aid of an auxiliary ledger, in which the separate personal accounts for staff expenditure, and those for yeomanry, cavalry and militia, will be opened; and to represent them in the first part of the principal ledger by three general accounts, called "Staff Accounts," "Yeomanry Accounts," and "Militia Accounts." These three accounts will contain in aggregate sums all that the three corresponding divisions of the auxiliary ledger will contain in detail.

As the accounts in this ledger will be composed of but few debits and credits, it is proposed to divide each folio into three, and to make the ledger last three years; this practice is now adopted with the yeomanry and militia ledgers; and it will be desirable to follow it, as it will save the labour of opening a new ledger every year for these accounts. This ledger should be kept under the control of the journal, to insure a perfect accordance with the results carried to the principal ledger.

PRINCIPAL LEDGER.

To avoid the inconvenience of too bulky a volume, the principal ledger may be divided into two parts; but the folios should be consecutively numbered throughout, to facilitate the references to and from the journal.

6th.—Part I.

The first section of the principal ledger will contain the whole of the personal accounts of the department; a separate account will be opened herein for every person who may have army moneys imprested to him, with the exception of the classes provided for in the "Auxiliary Ledger;" and these will appear in the principal ledger, under the three general accounts already noticed. Accounts will be opened for the Exchequer, the Paymaster-general, the Commissariat Chests abroad, other departments of Government, agents, paymasters, and in fact, for every person who may be a debtor or creditor in account with the department.

7th.—Part II.

The second section will be exclusively confined to the several heads of receipt and expenditure, or in other words, to the accounts of "Army Supplies" for different years, and their numerous subdivisions. The several heads may be opened according to the classification of the estimates to be agreed upon; and separate

separate columns may be provided for the expenditure belonging to different years. The final payments made by warrants may appear in the ledger in detail, as no intermediate abstract book is proposed for them; but the transactions of the sub-accountants may appear only in monthly sums, as the two abstract books will contain the separate sums posted from each account; but every sum posted in the ledger should show a page or number referring to the details.

Outline of the leading periodical entries in the journal in the Appendix.

As the journal is the only book in which a connected history of the pecuniary transactions of a department can be given, an outline of the leading periodical entries which it may be requisite to make in the War Office journal, has been thrown into the Appendix to this Report. I have a double object in view in adding these details; the first is to give a more comprehensive sketch of the construction of the proposed accounts than a barren description of the books to be kept can possibly convey; the second is, that such details shall serve as a practical illustration of the use of the journal.

Preliminary steps required to lay the foundation of an account commencing with the ensuing financial year.

I have thus completed a brief sketch of the machinery, by the aid of which I propose to bring the army accounts under the system of double-entry; but there are yet numerous explanations necessary to show how it must be brought into operation at the outset. To supply this deficiency on the one hand and to obviate the inconvenenience on the other, of overloading a simple statement of general principles with the detail of their practical application, I have thrown into the Appendix an account of the preliminary steps which I conceive it will be necessary to take to lay the foundation of an account, commencing with the ensuing financial year.

Your Lordships may probably be disposed to consider that I have entered more into particulars than was required to fill up the general outline of the plan proposed to be established; but the object I have had in view has been to show so much of the practical working of the system as would afford an opportunity of improving an portion of the machinery which might appear cumbersome or defective, before it is actually set in motion. In the plan proposed, I have kept in view the necessity of recording in the first year's books ample details, even at the risk of repetition; and I entertain no doubt, that when the system shall have been brought into full practical operation, some judicious modifications may be suggested. But I have thought it better not to incur the risk of impairing the efficiency of the system by any speculative experiment for shortening the labour of establishing it, but to leave such alterations as may appear expedient, to be proved by the result of actual experience.

Period to be allowed for winding up the preceding year's account.

The only point remaining to be noticed is the period which shall be allowed after the close of the year, for bringing in all arrears belonging to the year, so as to establish a fixed date for closing every year's account. The last account of the Army votes in the Paymaster-general's books, which can be considered as finally closed, is that for the year 1829, there being still on the books a balance retained for the year 1830. Sums upon account, have been given up for subsequent years, as saving on the grants, but a balance has been in each case retained to defray arrears. The time fixed for closing the Navy accounts, by the Act 2 Will. 4, c. 40, is eight months after the close of the year; and making due allowance for the greater details of the imprest accounts of the Army, which require more time for their examination, it does not appear necessary to allow more than twelve months for the final winding-up of the preceding year's account; so that there will never be more than two years' accounts open at the same time. This arrangement will very much simplify both the accounts of the War Office, and those of the Paymaster-general's Office.

3dly.—*Proposed Improvements in the Management of the pecuniary Transactions of the Army Department.*

Other practical improvements which ought to be introduced in connection with an improved system of accounts.

In the preceding division of this Report, I have detailed all that it appears to me important to state with respect to the establishment of an improved set of books for the army accounts; I proceed now to detail the practical improvements in the management of the pecuniary transactions of the War Office, which the remodelling of the system of accounts seems to furnish the proper opportunity, as well as the means of introducing. Many imperfect regulations have

have sprung up owing to the absence of an efficient plan of accounts; and as the adoption of them in the proposed arrangements, would impede the satisfactory working of the new system, it is desirable to employ the facilities which that system will afford for correcting such imperfections, and thereby derive from the establishment of the proposed plans, the full benefits which they are calculated to secure.

War Office system of payments different from that of other departments.

As the system adopted by the War Office in conducting the extensive payments under its control, differs from that of every other branch of the public service (with one partial exception), and as it appears to entail a considerable annual expense upon the public, without any corresponding advantage, I must beg to enter on the subject at some length, that your Lordships may form a judgment upon the facts themselves. I will first briefly describe the system of payment adopted by other departments in their transactions with the Paymaster-general's Office.

In other departments the claimants receive orders on the Paymaster-general.

For all payments for effective services in London or its vicinity, whether final payments or imprests, the claimants receive orders on the Paymaster-general, which are paid to them on presentation at the Pay-office; if the parties are at a distance from London, they draw either upon their own department or upon the Paymaster-general, and such drafts are in either case, accepted payable on the Paymaster-general's account at the Bank of England. Commissaries abroad, for instance, draw directly upon the Treasury, and their bills are accepted by the Treasury in the manner described, and lists are furnished to the Paymaster-general to enable him to meet such bills as they fall due.

In the War Office system intermediate agents are employed to make the payments and control the accounts.

The War Office practice is, however, widely different. Intermediate accountants called "Agents" are employed to make the requisite advances to the regimental and district paymasters, and to make other payments, which might, with at least equal facility, be conducted by the Paymaster-general, from whom the agents obtain the necessary supplies to enable them to execute these duties. They also perform duties legitimately belonging to the Secretary at War, by controlling the issue of money to the paymasters, who are his own sub-accountants, whilst the documents which enable them to exercise that control, are supplied to them by the War Office.

There are two descriptions of agents, namely, the general agents for Great Britain and Ireland, and the regimental agents.

The "general agents" are public accountants appointed by the Secretary at War.

The general agents are public accountants, appointed by the Secretary at War, and are paid fixed salaries by the public. The general agent for Great Britain acts, however, in some cases as regimental agent, under powers of attorney from the colonels of regiments. The duties of the general agents, although they are of a more mixed character than those of regimental agents, are not so essentially different from those to be detailed in the sequel, as to require a separate description here.

The regimental agents are appointed by the colonels of regiments, but are paid by the public.

The regimental agents are appointed by the colonels of regiments, and they are considered as acting for them; but they are paid by the public.

The public duties of a regimental agent may be described as follows:—

Public duties of a regimental agent.

He receives from the Paymaster-general on the 1st of every month, the advance required to meet the expenditure of the regiment during the month; he pays some of the officers himself, and he supplies the paymaster of the regiment, if at home, with the funds required from time to time to pay the remainder of the officers, the men, and other charges for the regiment; and he is responsible for keeping a check on the paymaster, to prevent his drawing more than the limited amount specified in the monthly estimates transmitted to the Secretary at War. When soldiers serving abroad, remit sums through the Paymaster's quarterly accounts for the benefit of their relatives at home, and when sums are remitted from the regiment to pay tradesmen's bills, it is the duty of the agent to transmit the money to the parties entitled; and also to remit the balances of effects and credits of men who die in the service, to their representatives, under specific authorities from the War Office. He likewise receives the prize money due to soldiers, and remits the same to them. He is liable in a few cases to make advances to soldiers left sick in London, or passing through it, to enable them to join their regiments and to make arrangements for the passage of soldiers and their families to the places of their destination. He prepares, of course, all the accounts arising out of these duties.

These duties could be more efficiently and economically performed by the War Office and the Paymaster-general's Office.

ter a careful consideration of the various points which the public duties of gent involve, I have no hesitation in stating that the War Office and the aster-general's Office, could perform these duties more efficiently and omically than the agents. I will endeavour to explain, in detail, the steps hich it appears to me that so desirable an end might be attained.

The supply of funds to Paymasters.

e first and principal duty of the agents is to supply money to the pay- ers. If there be one portion of the agents' duties which can be more ently and economically performed by the public than another, it is that g out of their money transactions with the paymasters; the latter now monthly estimates of their expected wants to the War Office; they send abstracts of them for the use of the agents; upon these estimates, the tary at War directs, by his warrants on the Paymaster-general, that the um required for the whole month be issued to the agent of each regiment vance; and if the regiment be in Ireland, the sum is issued about ten days e the commencement of the month. These monthly advances are rarely r 160,000 *l.*; so that notwithstanding all the laudable endeavours of the Office to lessen the balances in the hands of their accountants, it is ssible to avoid, under the exisiting system, leaving large balances in the s of the army agents, and the public lose the benefit of using the money h is not required for immediate public purposes. The transfer of this por- of the agents' duties may be effected by the following simple arrangement.

How this duty would be performed by the Paymaster-general at home.

e Paymaster might continue to send to the War Office his monthly detailed ate, discontinuing the abstract for the use of the agent. Instead of draw- as he now does, upon the agent, he might draw bills (under regulations to early defined) approved by the Commanding Officer, upon the Secretary at , transmitting, with his letter of advice, a statement of his balance in hand, e Secretary at War should judge it expedient to require it. The War Office, the detailed estimate of the Paymaster before them, the letter of advice, such further specifications of his wants as they might require, would be competent to exercise a proper control over the paymasters than the agents are. The paymasters' bills, after examination and approval at the War e, might be accepted payable on the Paymaster-general's account at the of England; the Paymaster-general might be furnished with lists of such ptances, similar to those which the Treasury and Admiralty now supply, able him to make the necessary arrangements for the payment of the bills; egimental paymaster would charge himself with such bills in his quarterly unts, and the bills so charged would be compared with the statement of ebits in the War Office ledger. The whole of this arrangement is so simple, so completely in accordance with general practice, that no doubt can be rtained of its practicability.

Abroad it is performed, not by the agents, but by the Commissariat officers.

should be further stated, that although the supplying of money to the masters is the principal part of the public duties of the agents, they can only orm this duty while the regiment is at home; if the service companies of a ment are stationed abroad, then the agent can no longer perform this por- of his duties; and the paymaster of the regiment is compelled then to in his advances from a public officer; namely, the Commissary, who is in the Paymaster-general of the station. It is needless to add, that what is done abroad, can be done at home.

Payment of officers.

he next point to be considered in the agent's duties, is the pay of officers. duty is now performed partly by the agent and partly by the regimental master; but the agent alone renders the account of these payments; the master deducts, therefore, from the aggregate amount of the bills he has n on the agent, the claims paid by him for pay of officers, and charges self only with the difference in his "General State." It would certainly be sable to continue to the officers the option of drawing their pay, either from paymaster, or through the medium of their agents, in regard to regiments depôts at home; and this might easily be accomplished without compro- ng the principle laid down, that the public duties now performed by the nts should be transferred to the offices to which they properly belong. The master might at the close of every month prepare a list of the officers who ht be desirous of placing their pay in the hands of their agents; he might equired to insert against each officer's name the sum due, and having certi- on the list the total sum payable, the same might be transmitted to the nt, that the latter might present it at the War Office, and obtain a warrant for the amount on the Paymaster-general. This warrant might be charged an imprest against the paymaster, who might be required to take credit in pay list for the whole pay of the regiment or depôt, officers as well as m The paymaster would, of course, include the full amount of the pay of offi in his monthly estimates, and this imprest might be considered as an adva upon account. By this arrangement, the private account between the offi and the agent would remain undisturbed, and the public account of the p master, clear and comprehensive as it now is, would be rendered still more by the introduction of the charge for officers' pay.

Effects and credits of deceased soldiers.

The third point of the duties executed by the agents has reference to the p ments arising out of the remittances and balances of effects and credits of decea men before described. These items now appear as receipts in the paymast quarterly accounts, and the only question to be considered is the payment them to the proper claimants. The Government has undoubtedly in this resp facilities superior to any possessed by the agents or by any other private es blishment. The various collectors of the revenue spread over every part of United Kingdom are so many public agents conveniently established to assist carrying out the following arrangement. A claimant might be required, as present, to prefer his claim to the War Office, where it would undergo exami tion before the authority for payment was issued; when admitted, a remitta bill, in duplicate, similar to that now used by the Paymaster-general for p ments of half-pay, pensions, &c., might be issued, one being sent to the collec required to make the payment, and the counterpart being transmitted to claimant, who, on presenting it to the collector, would receive the amou These bills would be remitted by the collectors of the revenue to the reve boards in London, who would periodically (every quarter) claim repayment the total amount from the War Office; a warrant for the amount of each qu terly claim might then be issued on the Paymaster-general.

The allotments of seamen, for the support of their families or relatives, paid in every part of the kingdom through the medium of the collectors of revenue; and the efficiency of the system, as applied to this numerous class naval payments, may be appealed to as a sufficient guarantee for the success working of the plan proposed for the payment of soldiers' remittances.

Prize-money.

With respect to the payment of prize-money to soldiers, there would be li difficulty in making arrangements similar to those just described; but this d would appear to belong entirely to Chelsea Hospital.

Minor public duties of agents.

The minor public duties of an agent, such as the preparation of claims discharged soldiers who may not have been settled with prior to their dischar advances to soldiers in London to enable them to join their regiments, and passages of soldiers and their families, are matters of simple routine which mi readily be performed by the district paymaster in London, or they might, wi out the slightest difficulty, be otherwise arranged by the War Office.

I have endeavoured to show how easily the transition from the one system the other might be accomplished; but I cannot dismiss the subject with urging a few additional reasons in favour of the measure.

The colonels of regiments should be relieved from pecuniary responsibility.

It would be an important object to relieve the colonels of regiments from great pecuniary responsibility. Since the period when this responsibility first placed upon the colonel, his position with respect to the accounts of regiment has been materially altered; he was in a great degree responsi through his agent, for the regimental expenditure, and at that period it perhaps indispensable that he should have a deputy, paid by the public, transact the pecuniary details for which he was held accountable. When, ho ever, the Government appointed regimental paymasters, and made them s accountants directly responsible to the Secretary at War for the greater port of the regimental payments, it would appear that the responsibility of colonel, and the consequent employment of the agents on public duties, sho have ceased.

The present arrangement increases the risk of loss to the public, the colonel and the officers.

The present arrangement is one which, so far from adding to the pu security, increases the risk of loss to all parties—to the public, to the colonel, to the officers. The failure of an agent generally involves all three in considera difficulty and in loss, and the settlement of accounts, on such occasions, ent almost endless trouble on the War Office.

By the regulations the colonel is held responsible, not only for the pub money, but, by a stretch of authority, he is made liable for the regimen

fun

s, which are not *public* money; he is likewise held responsible for any nvenience which the public service may experience in consequence of the re of an agent. No impossibility is involved in the supposition of the re of an agent holding many regiments, and the inability of one or more nels to meet with their private fortunes the consequent public and private ands upon them; but it would be very difficult to describe the widely nding confusion that would necessarily result. Should no adequate reason ound for imposing on the colonels a responsibility in pecuniary matters over ch they have no control, your Lordships will doubtless consider a proposi-, which would at once remove that burden from the colonels, as deserving ninute inquiry and attention; especially if it can be shown that it would, at same time, be productive of many public benefits.

The discontinuance of the public duties of agents would greatly simplify the War Office accounts;

n the first place, the discontinuance of the public duties of agents would very h simplify the War Office accounts.

refer not only to the new books, in which the whole of the accounts of this nsive branch of the public service will be centralized, but also to the returns accounts on which they will be founded. It has been already stated that the master's quarterly cash account would be rendered more complete by the oduction of the charge for pay of officers: to prevent double charges under head, the regimental paymaster is not allowed to take credit among his r disbursements for that portion of the pay of officers which is paid by him; he is compelled to adjust his balance, by deducting such payments from his ipts, which payments are adopted by the agent, as if he had actually made n; and the latter receives from the paymaster an account and vouchers in ort of them. Thus, the paymaster, who is a sub-accountant to the Secre- at War, is also a sub-accountant to the regimental agent, so far as regards pay of officers. One agent renders the complete account for the pay of ers, unless the depôt of a regiment be stationed in Ireland, in which case e are two broken accounts for that service; but it is the pay list of the pay- ter which contains the information extracted from the muster rolls, upon ch the agent's charge is examined

lthough the object sought to be attained by these complicated arrangements, ely, security against double charges, is a very proper one, it must, at the e time be admitted, that these cross charges of the agent against the pay- ter, and the paymaster against the agent, and the practice resorted to of uding payments from the accounts of a public accountant by deductions from receipts, only tend to distort facts and perplex the accounts.

t is an object very properly held in view at the War Office, to combine in one ount the whole expenditure of each regiment; and to effect this through the lium of the accounts of the agent, the regulations require him to insert in his lic accounts both receipts and payments, for which neither he nor the colonel be held responsible; for instance, he charges himself with the sums advanced he paymaster of a regiment abroad by the commissariat officer on the station; he adopts in his accounts the whole of the regimental paymaster's dis- sements, though he is not in any respect liable for these items. The institu- of a well-regulated ledger in the War Office will supersede the necessity for h questionable contrivances, as the adoption by one accountant of the trans- ons of another, which, to say the least of them, are opposed to every sound ciple of account as well as of audit.

and would add to the security of the public money by reducing the number of accountants, and getting rid of 700 annual accounts.

he proposed transfer of the duties of the agents would simplify the accounts reducing the number of accountants. In all the consolidations of departments of public business which successive Governments have undertaken in moden es, their efforts have uniformly been directed to the reduction of the number ccountants holding public balances; not only with the view to centralize and plify the public accounts, but also to add to the security of the public money. consolidated office of the Paymaster-general is the most recent example of successful extension of this important principle, and the result in this ance has been, the abolition of the offices of Treasurer of the Navy, Treasurer the Ordnance, Vice-Treasurer in Ireland, Deputy Treasurer of Chelsea spital, Ordnance Treasurer in Dublin, and sundry cashiers in the Army aad vy Pay Offices, all of whom were public accountants holding balances. The lition of these offices has very much simplified the accounts, and has led to onsiderable annual saving of expense, combined with additional security to public money and increased efficiency to the public service. Similar public

benefits may be expected to result from the adoption of the changes herein
posed, and nearly 700 accounts annually would be got rid of.

The objectionable extent to which, independent of its general principle, agency is carried.

I have still to notice a perplexity which arises in the accounts, from
really objectionable extent, independent of its general principle, to which age
is carried. The Irish agents are considered as having a vested interest in
regiments stationed in Ireland ; and consequently, when a regiment is remo
to that part of the United Kingdom, the colonel is compelled to appoint an ag
in Ireland, and the English agent must necessarily close his account ; the
master of the regiment must also close his at the same time, and open a
account commencing from the time when the Irish agent commences his dut
In cases where the service companies of a regiment are abroad, and the de
remains in Ireland, two agents are employed, and an unnecessary complicat
of accounts is the result. On the removal of a regiment or depôt from Irela
the accounts are again closed by the agent and the paymaster, and the Engl
agent resumes his duties ; but if a regiment be removed from England to Sc
land, or to the most distant station abroad, the English agent continues
functions without interruption. There may have been reasons formerly, wh
the regimental accounts were audited in Dublin, and when there was a Vi
Treasurer there, who made all the advances, for the employment of separ
agents for Ireland ; but the audit of the accounts has long since been tra
ferred to the War Office, and the duties of the Vice-Treasurer have, since
beginning of 1837, devolved on the Paymaster-general ; so that there can
now be the least necessity for encumbering the system with this additio
impediment.

The control of the War Office over its sub-accountants, would be strengthened by the abolition of the intervention of agents ;

2dly.—The control of the War Office over its sub-accountants would
strengthened by abolishing the intervention of agents.

It has been already stated, in a preceding part of this Report, that the age
are required to keep a check upon the paymasters throughout the month,
prevent them from drawing more than the amount of their estimates. T
control of the Secretary at War in this matter, would obviously be m
effectual than that of the agents, because he has better sources of informat
upon every subject bearing on the accounts than the agent can possibly hav
his position of authority, too, gives him a moral control over his sub-accountan
which the agents cannot be expected to possess. The agents have certainl
direct personal interest in keeping the regimental paymaster as short of fu
as possible ; but it must be clearly understood that it is the agent, and not
public, who derives the greatest benefit from keeping down the paymaste
balances, for the agent retains the custody and has the sole use of the surp
money during the month. It is not meant in any way to question the zeal
disinterestedness with which the agents have performed their public duti
but it must nevertheless be admitted, that an intermixture of public and priva
pursuits has not hitherto, on principle, been recognised as strictly reconcilea
with the true interests of the public.

and a considerable reduction of expense would be effected.

3dly.—The transfer of the public functions of the agents would lead to
considerable reduction of expense to the public.

The consideration of the subject has hitherto been pressed upon your Lo
ships' attention, wholly on the higher ground of public improvement ; but t
economy it would lead to is too important a feature of the measure to be ov
looked. There would be an increase in the number of payments to be made
the Paymaster-general's Office ; but the machinery of that office is so well calc
lated to provide for an extension of its present numerous payments, that t
accession to the number of bills, which would arise out of the proposed chan
would not be inconveniently felt ; and my own experience in the duties of th
department enables me to state, with the utmost confidence, that it cou
undertake all the duties that would devolve upon it in consequence of the p
posed change, without any additional expense to the public. There wou
necessarily be an increase of duty in the account branch of the War Offic
there would be bills to accept and record, and more current duty to attend
than at present ; but, on the other hand, the whole system of accounts wou
be simplified. In the examining branches of the War Office there would be
increase of duty arising out of the soldiers' remittances, the balances of effe
and credits and other matters managed in detail by the agents ; but in estimati
that increase of duty, it should be borne in mind, that the War Office has
present to conduct a great part of the preliminary inquiries and corresponden
connect

nnected with the settlement of these claims; and that it has further to amine the agents' accounts after payment, to investigate and satisfy itself not ly of the fact of payment, but also that it has been made to the proper imant. Making, therefore, a proper allowance for the time which such instigations, before and after payment, now require, it does not appear probable at there would be any very considerable increase of duty in the War Office. would be prudent, however, to make ample provision at the outset for all ntingencies; and it appears to me that a sum of 3,000 *l.*, added to the present arge for the salaries of the War Office, would amply suffice

It remains for me to point out to your Lordships the items of the probable ving to the public from the adoption of the plan submitted. The public pay agency as follows:—

	Per Annum. £.	s.	d.
1. Agency, per establishment - - - -	34,006	7	5
2. Charge for general agents, Great Britain and Ireland	1,631	6	–
3. Allowances for stationery - - - - -	1,500	–	–
	37,137	13	5
educt—			
Additional charge to be provided for:—			
For the Paymaster-general's Office - - - -	Nil.		
For the War Office - - - - - -	3,000	–	–
Probable net Saving per Annum - -	£. 34,137	13	5

It should be observed that the charge for agency depends upon the establishent voted on the Estimates; so that if that establishment were to be increased one-half, there would be a corresponding increase of one-half in the charge agency; whilst the increased charge for clerks in the War Office, to perm the duties for which increased agency would be paid, would be comratively trifling.

The charge for agency depends upon the establishment voted, which is greatly increased in time of war.

To this saving, moreover, should be added the interest on the surplus balances public money which now remain in the hands of the agents, and which would reafter be used by the public.

The interest on the surplus balances in the hands of the agents would also be saved.

Not having the means of arriving at the amount of the average surplus balances iich the agents hold at different periods of the month, I cannot state what the obable amount of this saving would be; but a rough calculation may be formed om the following statement of the monthly advances made to them, viz.—

	About
For the subsistence of regiments in Ireland, issued to the agents by the Paymaster-general, *ten* days before the commencement of the month - - - - -	£. 45,000
For the recruiting service, issued to the general agent, *two* days before the commencement of the month -	15,000
For the subsistence of regiments in England, issued to the agents on the 1st of every month - - - -	100,000
	£. 160,000

As it might be arranged that the paymasters should draw on the Secretary at ar every 10 days, a large surplus balance would necessarily remain in hand. may be added, that in order to meet the paymasters' drafts, it would not be cessary to increase the Paymaster-general's surplus balance in the slighest gree.

In advocating the expediency of transferring the public duties of the army ents to the departments of the Secretary at War and the Paymaster-general, beg to assure your Lordships of my conviction that I have not put forth any sh or visionary scheme, nor suggested an experiment of which the successful sue can be doubtful. The proposal involves nothing more than an extension

The proposed arrangements are in full operation in other equally extensive branches of the service, such as the or modification of regulations actually in full operation in other equally extensive branches of the public service.

Commissariat,

Your Lordships do not employ agents, at a considerable cost to the public, to accept the numerous bills drawn by the commissaries, to control their balances, and to perform other executive duties belonging to the Treasury; these duties are very judiciously left to the more searching and efficient control of the Treasury itself.

and Admiralty.

The Admiralty do not employ agents to watch over any of the operations connected with the naval expenditure, or to hold large balances in trust, to be doled out to their sub-accountants as required. All the sub-accountants of that Board, amounting to nearly six hundred in number, are directly controlled by their Accountant-general. It may possibly be advanced, that there are peculiarities in the War Office accounts which justify a variation from the practice of other departments; but I need only refer to the facility with which duties, similar to those now performed for the public by the army agents, are managed by the Admiralty, as affording the most ample confirmation of all that I have advanced as to the practicability of transferring the public duties of the army agents to the public departments to which they relate. The divisional paymasters of marines are like so many paymasters of regiments; yet they draw their money direct from the Paymaster-general, and account directly to the Admiralty; they are not required to prepare duplicate estimates and accounts for the use of agents; nor is there any difficulty in settling the remittances or allotments, the balances of effects and credits of marines, nor any matter of detail without the intervention of an agent.

The private relations between the agents and the officers and regiments would be left undisturbed.

In closing this subject, I wish particularly to add, that none of my observations are intended to advocate the least restriction upon the employment of agents by the officers, or even by the regiments, for their private regimental funds, if they think proper. The plan I have proposed to enable the agents to continue to draw the pay of officers, will show that I have not lost sight of the importance of leaving undisturbed the existing relations between them.

Five imprest accounts for the payment of the civil establishments of the army should be discontinued.

I would now beg leave to refer to another regulation of the War Office, which is at variance with the practice of the other departments connected with the Paymaster-general, namely, the employmsnt of sub-accountants in London to pay the quarterly salaries of the civil establishments of the army. The plan adopted is as follows:—The Secretary at War grants a warrant on the Paymaster-general for the full amount required to pay the salaries in each of the public departments of the army, except Chelsea Hospital, and the parties receiving such warrants are constituted so many paymasters for the payment of the salaries, which they conduct by issuing cheques on their private bankers. A different course, and a more correct one, is adopted by the Admiralty, the Board of Ordnance, and Chelsea Hospital; quarterly lists are sent to the Paymaster-general containing the name of each claimant, and the sum due to him, and payment is made by the Paymaster-general on production of a stamped receipt. Sub-accountants in those departments are employed only to pay the small contingencies of office which could not conveniently be paid by the Paymaster-general. It is true that the sums advanced to the sub-accountants referred to for the payment of salaries, do not remain long in the hands of their private bankers; but however short the period, there is still a risk of loss to the public from the possible stoppage of a bank before the money is drawn out. The transfer of this duty to the Paymaster-general would therefore add to the security of the public money, and would lead to a saving of labour in the War Office and other departments; moreover, it would get rid of five imprest accounts. For the War Office salaries, the imprest is granted to the chief clerk of the department; the proposed transfer would, therefore, enable a person filling a most important office to devote the whole of his valuable time to public duties of greater importance.

Importance of establishing uniformity in the mode of defraying the public expenditure.

I cannot conclude this Report without again adverting to the importance of establishing uniformity in the mode of defraying the public expenditure, as the first step towards securing uniformity in the accounts. The most improved system of accounts can only faithfully register the facts which are presented for record; but it cannot reduce to order and simplicity a system of business perplexed in its details, or founded on erroneous principles. The true basis of real improvement in the system of account of every department, would be the

establishment

establishment of uniformity in the mode of conducting the pecuniary affairs entrusted to their management; for so long as conflicting principles are allowed to prevail, whatever amendments may be made in their separate systems, the facility of combination will be still wanting, and the attainment of a centralized account be as remote as ever.

[The Appendix contained an explanation of the preliminary steps for the establishment of the new system of accounts, and a set of filled up forms showing its practical application; besides the following three Papers.]

INQUIRIES CONNECTED WITH THE SYSTEM OF ARMY AGENCY SINCE 1797.

Prior to the establishment of regimental paymasters, which took place in pursuance of two War Office circulars, dated 18th November, and 6th December, 1797, the agents were the sole accountants for the regimental expenditure; the captains of companies paid the men and various other regimental charges, and their responsibility was considerable; but the agents alone accounted to the War Office for the aggregate disbursements on account of the regiments. This system was found to be so objectionable, and so many complaints were made by the captains of companies from their arrears of pay being withheld until the agents accounts for the regiment were passed, that the Government at last appointed regimental paymasters, relieved them from all military duties, and made them *directly accountable to the Secretary at War*.

A few months after this change took place, the Finance Committee of 1797 made a report on the Army Expenditure (dated 26th June 1798), and among other subjects Agency was referred to; but the Committee do not appear to have investigated the matter very deeply, for their remarks on the subject are all contained in the concluding page of their 35th Report.

They state, that being desirous of communicating to the House as full information as they could collect on the subject, they had examined Mr. Lewis, the Under Secretary at War, and Mr. Greenwood, the Agent; and in the Appendix to their Report they give the questions put to Mr. Lewis and Mr. Greenwood, and their answers (six in number).

"Mr. Lewis states, in answer to one of the questions, that the late regulations which have "made regimental paymasters entirely servants of the public, have certainly a tendency to "lessen both the business and responsibility of the agents, but to what extent cannot be judged "in so early a period of their operation."

Mr. Lewis is asked if any saving of money paid by the public for agency can be made without detriment to the public service. He replies,—

"It appears indispensably necessary, as well in the case of Militia and Fencibles as of His "Majesty's other Forces at home and abroad, that there should be some intermediate "channel of communication between the several corps and the public offices, and that the "persons employed for that purpose should be resident in the metropolis; if, therefore, "regimental agents, as now established, were to be discontinued in corps, either at home or "abroad, some other department must be constituted in their stead."

He adds, however, that "a system of agency more economical than the present might "certainly be adopted, and in some respects with great advantage to the public service."

The Committee, after quoting these two paragraphs from Mr. Lewis's evidence, conclude their report as follows:—

"Having obtained this explanation, they think it only necessary to observe, that, in their "judgment, the House will have a right to expect the attention of the Executive Government "to this subject, as it appears that a saving in this branch may be made, and that not only "without detriment, but even accompanied with great advantage to the public service."

Here the matter rested until June 1800, when the Lords of the Treasury directed a letter to be addressed to Mr. Windham, then Secretary at War, desiring to be informed whether any proceedings had been had in his department respecting a change in the regimental agency.

Mr. Windham, in his reply, notices Mr. Lewis's evidence before the Finance Committee in 1798, and observes, that Mr. Lewis did not assert that the change might be made without detriment to the public service, but that, on the contrary, he used the qualifying words "in some respects;" and that Mr. Lewis immediately proceeded to notice the difficulties opposed to such plan by adding, "but whatsoever plan might be proposed with these views, it "would have required much ability and very mature deliberation to form it so as not to hazard "any material detriment to the public service, in some part or other, and to carry it into "execution without doing injustice to many respectable individuals engaged in regimental "agency as a profession, and without occasioning a serious interruption to the current business "of the several offices of Government connected with the army."

After these observations on Mr. Lewis's evidence, Mr. Windham adds his own opinion in the following words:—

"After a lapse of two years, I have no reason to view these difficulties in a less formidable "light than they then appeared in; and I am led to confess my conviction that no attempt "can

"can be made in my department to abolish the present system of regimental agency, *at* "*least during the war*, with safety to the public service."

At the expiration of eight years the subject was revived by the Commissioners of Military Inquiry, and in their Sixth Report, dated June 1808, they entered fully into the subject of agency.

After referring to the proceedings before the Finance Committee in 1798, and to Mr. Windham's letter to the Treasury in 1800, the Commissioners state that they had called on Mr. Lewis (who had then retired from the public service), to state to them any suggestions that might have occurred to him on the subject, as no particular system had been pointed out in his evidence in 1798. Mr. Lewis states, in reply, that it occurred to him that if the whole agency of the army were transferred to a public department, created solely for that purpose, a considerable saving out of the 80,000*l.* paid for agency would be effected; that the money would not be called for till actually wanted for the public service; that the balances could at all times be ascertained, and that the arrangement would be more conducive to the speedy and correct execution of the business than under the existing system: but he added, that the "task of effecting a change in the system of army agency was one of extreme difficulty, even "for the best abilities," and that he had not ceased to consider the difficulties to be apprehended in any attempt to abolish army agency, especially in time of war: and he stated, moreover, that Mr. Tayler, who was then Chief Examiner of Army Accounts in the War Office, had a full share in preparing the answer to the Finance Committee in 1798, in which Mr. Lewis gave an opinion on the subject of army agency. The Commissioners state that Mr. Tayler had then retired from the public service, and that he was not in a state of health to allow of their learning from himself the grounds of his opinion.

The Commissioners, therefore, examined Mr. Merry, who succeeded Mr. Taylor, as Chief Examiner, in the War Office.

Mr. Merry stated, that to the best of his judgment, the functions of regimental agents, so far as they were connected with the public accounts, might be dispensed with, and an arrangement might be substituted that would be productive of considerable saving to the public, especially in time of war, and would be attended with other advantages.

On being desired to state what he would recommend in lieu of the existing system of regimental agency, he gave in the outline of an arrangement, which may be briefly described.

He proposed that an Agency Board, consisting of three Commissioners, a Secretary, and a competent establishment of Clerks, should be established, and that the money required for regimental services should be imprested to them, and that they should have the distribution of it to the paymasters;—that the latter would thus be placed under the superintendence of a public department in respect of their drafts;—that the colonels of regiments would be relieved from all responsibility for the public accounts;—that the very serious and embarrassing difficulties that existed at that moment, arising from the insolvency of agents, and from the neglect or refusal of agents, or of the representatives of colonels to act upon Clearing Warrants, would be prevented; and that complete control being centered in the Secretary at War, the audit of the accounts would be more satisfactory.

The Commissioners having called upon Mr. Lewis for an opinion on Mr. Merry's plan, that gentleman is represented by the Commissioners as favouring the expectation of its producing a considerable saving of expense.

Sir James Pulteney, Secretary at War, and Mr. Moor, Deputy Secretary at War, were also examined on the subject, and they are represented as stating that they conceive that a General Army Agency would ultimately prove advantageous, as far as regards economy and the public despatch of business; but they are also sensible of the inconveniences which must arise to the several individual officers, if they were deprived of the accommodation afforded them by their agents.

The Commissioners, however, dissent entirely from the opinions expressed by Sir James Pulteney, Mr. Moor, Mr. Lewis, Mr. Tayler, and Mr. Merry, as regards the advantage of a General Agency, and they give their reasons as follows:—

That from the experience they have had of the inefficiency of every attempt which has from time to time been made in the War Office, with a view of making the establishment equal to the discharge of its duties, they hesitate in placing much reliance on any previous estimate made of the exent of any public establishment for transacting business connected with accounts, and that they consider that the expense of the proposed Board would be found considerably to exceed what Mr. Merry contemplated.

They state, moreover, that, supposing a saving of 10,000*l.* or 15,000*l.* a year might be made, that the same object might be attained by reducing the rate allowed for agency, which would be a safer and easier mode of consulting the public interest than that of making the proposed change, especially in the middle of a war.

The Commissioners then proceed to notice whether the transfer of the agency to a public department would add to the security of the public money. Messrs. Greenwood and Cox delivered in a statement showing that they were in advance for the public in a balance of no less than 196,908*l.* 14*s.* 9*d.* Finding that this statement was altogether disputed at the War Office, and as the ascertainment of this point affected very materially the importance of any plan suggested for the purpose of lessening the risk of public money remaining in private hands, the Commissioners investigated the circumstances which led to such inconsistent representations. They state, however, that their inquiries, although they occupied a large portion of their time, did not enable them to give any decided opinion on the subject.

The Commissioners next refer to what Mr. Merry urges as to the tendency of his plan to accelerate the general business connected with the regimental expenditure, and the final settlement of the accounts belonging to it; and they state that they cannot discover how, by the mere change of the accountant parties, the accounts could be much simplified; and that, moreover, the plan was defective in security.

The Commissioners dispose of the remaining points put forth by Mr. Merry, by stating, that they do not appear to them to be materially connected with the establishment of a Board of Agency, and that they may be provided for without much difficulty, whatever may be the mode in which regimental agency may be conducted.

Having arrived at the conviction that Mr. Merry's plan was one which it was not expedient to adopt, the Commissioners state that they have been favoured with a paper, drawn up by the Duke of York, who was then Commander-in-Chief, containing a full opinion upon the system of regimental agency and the regimental accounts. That it appears from this paper that His Royal Highness is decidedly against any plan of General Agency, whether conducted by a public board or otherwise, as being wholly inconsistent with the general principles of the military finance of this country.

This paper was not published, but a paper containing "Information from the Commander-"in-Chief respecting Army Agency," is stated to be included among the documents relating to the Tenth Report of the Committee on Public Expenditure, No. 603.

The opinions of General Sir David Dundas and General the Hon. Wm. Harcourt are also quoted in support of the expediency of retaining the existing system of agency.

The Commissioners of Inquiry conclude their consideration of this subject by stating, that much weight is due to the observations of the Duke of York and Sir David Dundas; viz., that the public do not appear to have actually sustained any loss by the insolvency of agents: the only inconveniences with which they are acquainted are those which arose from the failure of Messrs. Ross and Ogilvie;* but that they are still ignorant as to the causes and consequences of that failure, and that they do not consider themselves authorized to determine whether it arose from any defect in the system of agency, or from the delays which took place in the War Office in the settlement of the accounts of that house. On the whole they do not consider it expedient to recommend the adoption of Mr. Merry's proposal for a Board.

In the month of August 1807, the Lords of the Treasury communicated to the Comptrollers of Army Accounts the outline of Mr. Merry's arrangement, with directions that they should report their opinion, whether, without interfering with other branches of Army Agency, the regular monthly subsistence of the Army could be arranged in some mode by which the possible risk to which the public money was exposed might be avoided; and by which, with less expense of management to the public, the distribution of the subsistence to all the parties entitled to receive the same, might be insured, with equal regularity and despatch, and with equal convenience to the parties themselves, as were experienced under the existing system.

The Comptrollers gave their decided opinion that a mode for the issue of the subsistence, and *every established military allowance* might be adopted, which would insure equal regularity and despatch; and they suggested, moreover, that such part of the subsistence and allowances as are drawn from the agents by the regimental paymasters, might be issued, by permitting those officers to draw upon the Paymaster General of the Forces, their drafts to be accepted, payable at the Bank, *without the intervention of any agent or other department.*

The Commissioners of Inquiry, in noticing these opinions of the Comptrollers of Army Accounts, do not deny that the proposed arrangement would meet the two objects referred for their consideration by the Treasury, viz., the diminution of the risk of the public money, and of the expense of distributing the subsistence; but they state that the arrangement would interfere with the regular and speedy settlement of the accounts of the Paymaster General.

The Commissioners of Military Inquiry follow up the subject by recommending that the regimental paymasters shall be made sub-accountants of the agents, instead of the Secretary at War; and among other suggestions, they go the extraordinary length of proposing,—

"That all communications on financial subjects between the office of the Secretary at War "and the paymasters shall pass through the agents for the different Regiments."

No further inquiries appear to have taken place till June 1811, when the Committee on Public Expenditure made their Tenth Report. It does not appear that this Committee actually inquired into the subject of Army Agency: but this did not prevent their expressing an opinion in favour of the step recommended by the Commissioners of Military Inquiry; namely, that the regimental paymaster should be made a sub-accountant of the agent; they even went further, and took it for granted, without inquiry, that the paymaster was the *deputy* of the agent.

After referring to the opinions of the Duke of York, as expressed in the paper already referred to, the Committee state:—

"It would be vain to expect a clear, short, and unembarrassed account, in any instance "where the principal accountant has not an absolute and undisputed control over his sub-"accountants;" and further,—

"This principle at once strikes at the mode at present practised by the War Office, in "corresponding with the regimental paymaster without the intervention of the agent."

"The first measure, therefore, towards obviating this inconvenience, would be to place the "paymaster of a regiment under the special control of the agent, whose deputy, in point of "fact, he is, and whose deputy, he ought rigidly to be considered, in point of practice."

If this Committee had inquired at all into the circumstances which led to the appointment of regimental paymasters, and had read the instructions prepared for the guidance of those officers, they would have discovered that the paymasters were, for very obvious reasons, made independent of the agents and colonels, and that they were required to obey no authority but that of the Secretary at War and the established regulations; and further, that they were expressly forbidden to receive orders from any other person, not excepting their own colonels, touching the manner of making up their pay lists and accounts, and that the system of Military Finance introduced in 1797 purposely altered the relation which previously existed between the agents and the persons who made up the accounts at the Regiments.

---

* This firm failed in 1804, and the debt due of £. to the public is still unsettled.

The publication of this Tenth Report of the Committee on Public Expenditure took place on the 26th June 1811. On the 16th September 1811, the Lords of the Treasury transmitted that Report to the Secretary at War, desiring him to furnish their Lordships with any observations which might occur to him, in regard to such part of the Report as related to the expenditure and examination of the accounts in his department.

On the 7th January 1812, Lord Palmerston, then Secretary at War, replied to the reference made to him by the Treasury. In his remarks upon the recommendation of the Committee respecting the control of the agents over the paymasters, his Lordship states, that the Committee had formed an entirely erroneous opinion of the actual relative situations of the regimental agent and paymaster, and had grounded upon it a recommendation which would only be expedient, if the principles from which it was drawn had been well founded.

After forcibly pointing out the numerous objections which existed to restoring the control of the agents, his Lordship states:—

" I have felt the greater confidence in stating to their Lordships the objections which I " entertain to the proposition of the Committee, because the suggestion is not altogether new, " or now for the first time made; and because I find that one of my predecessors in office " (Mr. Yorke), in a correspondence of some length which took place on this subject, between " him and the Commander-in-Chief (Duke of York), expressed the same opinions which I " have felt it my duty to submit to your Lordships' consideration."

Since 1812, it does not appear that the subject of army agency has been officially inquired into, except as to a revision of the rates paid for agency. The Finance Committee of 1817 appear to have overlooked it. The Finance Committee of 1828 intended to have made it a branch of their inquiries, as various returns were called for connected with the subject; but the labours of that Committee were brought to a close before any Report connected with the Army expenditure was prepared.

In 1831, some representation as to the abolition of Army agency (but which does not appear to be on record in the Paymaster-General's Office) is stated to have been made to Lord John Russell, then Paymaster General, by Mr. Yeats, a clerk in his office; but I cannot find that it was ever put forth in a formal official shape, nor that any proceedings were taken to inquire into the practicability of carrying out Mr. Yeats's views.

In the same year, Sir Henry Parnell, then Secretary at War, drew up a report, in which the transfer of the duties of the Army agents to the offices of the Secretary at War, and the Paymaster-General was recommended; but his retirement from office prevented the fulfilment of his intention of bringing the subject under the consideration of the Government.

The Report of the Commissioners appointed to consider the practicability of consolidating the Civil Departments of the Army, in 1833, did not refer to the subject of Army agency.

From 1831 to 1840 nothing appears to have been suggested; and the preceding report closes the history of the attempts made to reform the system of Army agency during a period of 43 years.

As connected with the subject under review, it may be useful to refer to the measures which preceded the extinction of *volunteer agency*.

Previously to 1803, the commandants of volunteer corps appointed their own agents, in the same manner as colonels of regiments now do; these agents received the monies due to the different corps from the Pay Office, and were allowed by Government 2½ per cent. upon the amount of the pay and the clothing, together with a charge of postage and stationery. The expense attending this system amounted to about 34,000*l.* a year.

In June 1803, separate agents were discontinued, and a general agent was appointed by Government to perform the duties previously executed by the private agents of the commandants; an immediate saving of more than 30,000*l.* a year was the result of this change; and it was stated before the Commissioners of Military Inquiry, in 1808, " that the agency of " the volunteers was conducted much better, and with more convenience in regard both to " the War Office and to the Commandants themselves, under a general agent, than under " the direction of separate agents."

In 1817 an Act was passed (57 Geo. 3, c. 41), abolishing the office of Agent General of Volunteers and Local Militia, and transferring the duties to the Secretary at War and the Paymaster General.

In 1815, when the militia was re-embodied, the Government did not allow the colonels to appoint separate agents as formerly, but it placed the whole force under the general agent, who was then, and is still, a servant of the public.

It is a remarkable fact, that not one of the Parliamentary Reports quoted contains a defence of the principle of Army agency; not a single argument is adduced to show what public benefit is derived from the employment of regimental agents. The Commissioners of Military Inquiry entered fully into the defects of Mr. Merry's plan of a board of agency, but they were silent as to the merits of the system which Mr. Merry attacked;

attacked; this gentleman's plan partook largely of the defects of the times, namely, a mania for the creation of new offices; and when the inefficient state of the old departments at that time, the arrears with which they were overwhelmed, and the confusion and intricacy which existed in their accounts, are taken into consideration, it is not surprising that the Commissioners of Military Inquiry should have resisted the proposal for abolishing agency in one shape, only to see it revived in another. The observations made by Mr. Lewis, Deputy Secretary at War, before the Finance Committee of 1798, "that it appeared indispensably necessary that there should be some intermediate channel of communication between the several corps and the public offices," proves the confined and erroneous notions which public officers entertained in those days of the principles on which public business should be conducted; and this unwillingness to see his office invaded by the minutiæ of business, would appear to have led Mr. Merry, in his scheme of agency reform, to delegate to a subordinate Board, the superintendence of details which could only be properly controlled in the office of the Secretary at War.

The objections which existed in those days to the transfer of the duties of the Army agents no longer remain. The War Office is in a high state of efficiency, both as to its officers and its regulations, and no arrear is ever likely to arise in its accounts, so long as an adequate establishment is maintained for performing the current duties. The Pay Office is fully equal to its part of the duties; and the objection urged by the Commissioners of Military Inquiry, that the transfer of the payment of the Paymaster's bills, as suggested by the Comptrollers of Army Accounts, would embarrass the Paymaster-general's accounts, cannot be repeated now. Finally, a state of peace removes another objection advanced by the Commissioners of Inquiry. The present time may therefore be considered as favourable as any which is likely to occur for carrying into effect the important alterations which have been suggested.

W. G. Anderson.

PROPOSED HEADS OF EXPENDITURE FOR THE WAR OFFICE LEDGER.

EFFECTIVE SERVICES.

VOTE NO. 1.—LAND FORCES.

PAY - - - - -	Pay—Officers of Cavalry. " Men and boys, ditto. " Officers of Infantry. " Men and boys, ditto. Additional pay for length of service—Officers of Cavalry. " " Men and boys, ditto. " " Officers of Infantry. " " Men and boys, ditto. Good conduct pay (including expense of badges). Beer money. Allowances to commanding officers. Allowances to acting staff officers and non-commissioned officers of depôts. Pay of officers supernumerary to Horse and Foot Guards, and compensation to officers of Horse Guards for reduction of pay of their present rank. Military labourers. Subsistence of men in confinement.
ANNUAL ALLOWANCES -	Non-effective allowances to field officers. Contingent allowances to captains, including extra allowances to captains of Rifle Corps. Allowances to riding masters. Allowances to farriery.
AGENCY - - - - -	Agency, as borne on establishment. Allowances to agents for postage and stationery. Ditto - to agents of Foot Guards for making up accounts. Salary and allowances to the general agent.—See *Recruiting.*
CLOTHING - - -	Clothing, as on establishment. Clothing allowances for augmentations. Ditto - - - for supernumeraries. Cost of clothing provided by the public for certain corps. Cost of patterns, and marking great coats. Winter clothing in North America.

PROVISIONS AND FORAGE -	Cost of provisions to troops abroad (*to be diminished by amount of stoppages*). Allowances in aid of regimental mess. Table allowances for officers on guard at St. James's and Dublin Castle. Special and temporary personal allowances to officers at St. Helena, on account of the high price of provisions. Money allowances to field and staff officers of Infantry at home, in lieu of forage. Forage supplied in kind abroad. Money allowances to officers abroad in lieu of forage.
ALLOWANCES FOR LODGING, FUEL AND LIGHT, FOR TROOPS NOT IN BARRACKS, OR NOT SUPPLIED IN KIND.	Allowances in lieu of fuel and light, for detachments at home, not supplied in kind. Fuel and light supplied abroad. Money allowances in lieu of fuel and light abroad. Lodging money of officers and men, when not accommodated in barracks, or not provided with billets at home. Lodging money for men, quartered on the inhabitants in Scotland. Lodging money of men permitted as an indulgence to find their own lodgings,, when the corps is in barracks. Lodging money of officers and men abroad. Stabling for the cavalry. Allowances for men in stationary quarters.
HOSPITAL EXPENSES, MEDICINES, AND TREATMENT OF THE SICK - - -	Charges of general hospitals at home and abroad. Ditto of regimental hospitals at home and abroad. Cost of medicines and surgical instruments. Carriage of medicines and surgical instruments. Allowance to private medical practitioners, and medical bills. Cost of horse medicines (*to be diminished by stoppages from contribution out of farriery allowance*). (*Stoppages from soldiers, and receipts from other parties, in hospital, to be taken in aid of the general charge for the above heads*).
DIVINE SERVICE - -	Allowance to officiating clergymen for performing divine service at home. Ditto - - to - - ditto for performing divine service abroad. (*The above heads will include pew-rents and special allowances, small payments to chapel clerks, also clerical attendance on sick*). Cost of religious books.
MOVEMENT OF TROOPS -	Hire of carriages on marches. Allowances to officers on a march by route. Marching money for men (including allowance for hot meal in England). Expenses of removals by railway or canal, and charges for ferries. Travelling expenses of officers (*not on court martials or recruiting duty*). Passages of officers and men from one port to another in the United Kingdom. Passages of officers and men from one foreign station to another, or from one port to another, within the same command. Conveyance of wives-and children not allowed to embark with soldiers ordered on service abroad.
ADMINISTRATION OF MARTIAL LAW - - -	Cost of law proceedings. Allowances to Acting Deputy Judge Advocates, members and witnessses at courts martial, including travelling expenses of officers upon this duty. Apprehension, subsistence, and escort of deserters. Charge of provost prisons, barrack cells, &c., including the pay and allowances of the provost marshal, or other officer, or non-commissioned officer in charge. Subsistence and necessaries for soldiers sentenced to transportation.

LIBRARIES

ibraries and Schools -	Purchase of books for libraries at home and abroad, and allowances to librarians. Allowances to regimental schools.
arrisons and Establishments - - - -	Chatham Garrison. Invalid Depôt, Chatham. Provisional battalion. Maidstone riding establishment. Depôts of regiments in India. Portsmouth establishment. Superintendent of sword exercise, pay and expenses. Inspector of regimental colours. Medical Museum, Chatham.
ecruiting - - -	Expenses of recruiting departments in London. Salaries and expenses of the general agent for recruiting. Recruiting districts, pay and allowances, clothing, postage, and expenses of staff officers and non-commmissioned officers of. Allowances and expenses of superintending officers (*their pay is charged regimentally*). Levy money of recruits, including Cavalry equipments. Purchase of horses, including incidental expenses. Travelling expenses of officers on recruiting service. Marching allowance to recruits, escorts, &c. Medical attendance on recruiting parties and recruits. Travelling allowances to rejected recruits.
ischarges and Family Allowances - - -	Allowances to discharged soldiers and their families, to take them home (including detention pay), and to widows and children of deceased soldiers and maintenance of orphans. Gratuities to discharged men, including cost of silver medals.
iscellaneous - -	Regimental postage and stationery, and hire of guard and store rooms. Losses of baggage and of necessaries, and compensation for officers' horses shot for the glanders. Field allowances to officers encamped. Hire of ground for exercise. Military publications and gazettes furnished to general officers abroad. Allowances to officers of Foot Guards for loss of rent of canteen, St. James's. Charge of savings banks (interest and expenses). Allowances to certain soldiers of Cavalry, compensation for boots, spurs, &c.

Vote No. 2.—Staff Services.

eneral and Medical Staff at Home - -	Pay of home staff. Forage allowances. Lodging allowances. Postage and stationery. Travelling expenses. Pay of clerks. Office rent. Fuel and candle allowances. Miscellaneous expenses. Additional pay of chaplains and medical officers at home.

Expenses of the Garrison of the Tower.

eneral and Medical Staff Abroad - -	Pay of staff abroad. Pay of clerks, boatmen, &c., staff abroad. Provisions - - - ditto. Forage - - - - ditto. Fuel and light - - ditto. Money allowances and contingent expenses, ditto. Additional pay of chaplains and medical officers, ditto.

Vote No. 3.—Public Departments.

Pay, salaries, allowances, and contingencies of Commander-in-Chief's Office.
Ditto - - ditto - - - Adjutant-general's Office.
Ditto - - ditto - - - Quartermaster-general's Office.
Salaries and contingencies of the War Office.
Ditto - - ditto - - Judge Advocate-general's Office.

Vote No. 4.—Pay, Salaries, Allowances, and Contingencies of the Royal Military College.

Vote No. 5.—Royal Military Asylum, and Hibernian Military School.

Royal Military Asylum.
Hibernian Military School.

Vote No. 6.—Volunteer Corps.

Pay and allowances of Adjutants and Serjeants-major.
Contingent and clothing allowances.
Expense of corps when assembled for exercise and permanent duty, including pay, of inspecting Field Officers.

NON-EFFECTIVE SERVICES.

Vote No. 7.—Rewards for Distinguished Services.

Vote No. 8.—Pay of General Officers.

Vote No. 9.—Retired Full Pay.

Vote No. 10.—Half-Pay and Military Allowances.

Vote No. 11.—Foreign Half-Pay.—Foreign Pensions.—Widows of Foreign Officers.—Children of Foreign Officers.

Vote No. 12.—Widows' Pensions.

Vote No. 13.—Compassionate List.—Royal Bounty.—Pensions for Wounds.

Vote No. 14.—Chelsea Hospital.—Kilmainham Hospital.

Vote No. 15.—Superannuation Allowances.

MILITIA.

Pay, &c.—Effective Services	Pay of staff and non-commissioned officers.
	Medical attendance, &c.
	Clothing.
	Contingent allowance.
	Lodging and fuel.
	Agency.

Reduced Officers of Disembodied Militia.
Ditto - - Local Militia.
Out Pensions.

TREASURY MINUTE, dated 3 December 1841.

MY Lords read their Minute, dated the 27th November 1840, in which they ggested to the Master-general and Board of Ordnance, that as it was desirable at their Lordships should have the means of considering whether improvements ight with advantage be introduced into the mode of keeping and auditing the counts of the Ordnance Department, similar to those which had been directed be adopted at the War Office, the labours of the Committee of War Office quiry should be extended to the Ordnance Department, and that the Master- neral and Board should nominate an officer well acquainted with the details the Ordnance business to be added to the Committee.

Communication directed by the Minute of 27 Nov. 1840, to be made to the Ordnance.

My Lords likewise read the reply of the Board of Ordnance, dated the h March last, recommending Mr. Thomas, the chief clerk in the office of the erk of the Ordnance at the Tower, as the officer to be added to the Committee the part of that department, and offering some remarks on the subject of the rdnance system of account and audit.

Reply of the Ordnance, and addition of Mr. Thomas to the Committee.

The arrangements adopted at the War Office, on the authority of their Lord- ips' minute, dated the 27th November 1840, the expediency of extending hich to the Ordnance Department will form the subject of the inquiries of the ommittee, were as follows:

Improvements made at the War Office, which it is proposed to extend to the Ordnance.

1st. The transfer to the Secretary at War of the control and audit of the staff pay and allowances and the regimental allowances issued to military officers serving abroad, according to such regulations as have been or shall be from time to time sanctioned by the Board of Treasury, which items were formerly borne on the vote for Army Extraordinaries, and were transferred to the Secretary at War's Estimates in .

2dly. That a detailed annual account should be furnished to the Treasury, showing the excess or saving under each head contained in the War Office Estimates.

3dly. That an annual balance sheet should be laid before Parliament, showing the excess or saving on each separate vote, on the model of the Admiralty balance sheet; and

4thly. That the accounts should be examined and certified by the Commissioners of Audit in the same manner as the Admiralty accounts.

My Lords will be prepared to sanction the transfer to the Board of Ordnance f the control and audit of the allowances drawn by the Ordnance officers serving broad, which are of a nature similar to those, the transfer of which to the ecretary at War has already sanctioned, when they shall be satisfied that imilar security will be afforded for the existence of an efficient check and audit f these allowances, and for the prevention of any unauthorized expenditure of ne public money in connection with them, either by a direct deviation from the ules established under the sanction of the Treasury Board, or by such onstruction being placed upon them as may be contrary to the intentions with hich they were framed.

The Treasury will sanction the transfer of the control and audit of their foreign allowances to the Ordnance, when similar securities have been established.

With this view the attention of the Committee will, in the first instance, be irected to the system of audit in use in the Ordnance Department, and they ill make such recommendations for its improvement as the experience of other epartments, or the peculiar circumstances of the Ordnance service, may suggest. Iy Lords particularly desire that they will bear in mind that no audit, however earching and complete in other respects, can be considered to furnish that heck over the public expenditure, which it is the sole object of an audit to rovide, if any considerable interval is suffered to elapse between the period hen the expenditure is incurred and the period when the accounts are finally assed, or a demand is made for sums disallowed.

The attention of the Committee will, therefore, be directed to the improvement of the system of audit in the Ordnance, remembering that no audit can be effectual which is unduly delayed.

It is argued in the letter from the secretary to the Board of Ordnance, dated he 5th of March last, that the Board of Ordnance is so constituted as to furnish hat separate and independent check over the accounts, which it was one of the bjects of the Act 2 Will. 4, c. 40, to establish over the naval accounts, and hich was extended to the War Office accounts by their Lordships' Minute, ated the 27th of November 1840.

An independent audit necessary.

My

This is not attained by the audit conducted by the Surveyor-general of the Ordnance;

My Lords, however, think it right to observe, that as each department o Government is responsible to the Treasury and to Parliament for the prope application of the annual grants of Parliament, obtained upon the understandin that the Board of Treasury have approved of the charges contained in th estimates, no audit of the accounts of such expenditure, which is confine entirely to officers of that department, whatever may be the relation in whic the different branches of the department stand towards each other, can be s satisfactory to the Treasury and to Parliament, as the additional external an independent check which Parliament has established for the naval expenditure and which it is deemed fitting by the Board of Treasury should be extended t the other great departments of expenditure. They must likewise remark, tha the audit conducted by the Surveyor-general of the Ordnance has for its objec the proper examination of the details of the expenditure which may have bee incurred and defrayed under the authority of the Board of Ordnance itself; bu it does not meet the object of the proposed audit, which is to secure a stric appropriation of the monies granted by Parliament to the purposes for whic they have been voted, or, in the words of the Board of Ordnance, to secure correct "classification of final payments to the years and votes of Parliamentar Estimates, and the prevention of any excess under these votes." An item o expenditure, after having been satisfactorily audited by the Surveyor-general o the Ordnance as regards the responsibility of the sub-accountant, might yet b for a service unauthorized by Parliament; and if no additional check existed it might be charged in the books against the account of a wrong year, or b placed against a wrong vote, and thus be defrayed by means of funds whic were placed by Parliament at the disposal of the department for quite a differen purpose.

nor by the agency of the Paymaster-general.

It is also observed in the letter from the Secretary to the Ordnance, that th abovementioned object is equally attained at present by the Paymaster-general' office, and is therefore not deserving the additional expense which must b incurred by stationing one or more Audit Office clerks at the Ordnance Office as is done at the Admiralty; but in using this argument, the Master-genera and Board do not appear to have adverted to the circumstance that, althoug the Paymaster-general is able to report to the Treasury an excess of expenditur on any of the Ordnance votes according to the classification of the order sent to him by the Board of Ordnance, he has no means whatever of satisfyin himself that the services for which he is required to make disbursements hav been authorized by Parliament, and that they properly belong to the votes o the year's account, to which the payments are charged by the directions of th Board of Ordnance.

Revision of the annual estimate, of the books of account, and of the annual accounts to be rendered to the Treasury and Parliament.

The next point to which the Committee will have to direct their attention will be the nature of the accounts kept in the Ordnance Department, and th revision of the annual estimate, and of the books of account, so as readily t furnish the means of laying before the Treasury and Parliament periodica statements of past expenditure, similar to those which have been required from the War Office. These documents ought to be so arranged with reference t each other, that each item may be at once traceable from the estimate whic forms the foundation of the system, through the different books, into the detaile accounts to be laid before the Treasury, after which it would become consolidate with the other items belonging to the same vote, and would be submitted t Parliament in the balance sheet of the year's expenditure, showing the exces or saving upon each separate vote.

Importance of an account of past expenditure, showing, vote by vote, and item by item, the manner in which the grants of Parliament have been applied.

It is stated in the letter from the Secretary to the Ordnance, that the system of account by double entry has been in use in the Ordnance Department fo upwards of 10 years.

My Lords have no reason to doubt that the Ordnance Accounts have bee correctly kept according to this system; but however useful this improve method of keeping the accounts may be in the internal administration of th department, it cannot furnish that information, out of the department, whic is indispensable to the exercise of a proper control over its proceedings, unti the accounts are embodied in abstracts of the nature of those which it i proposed should be annually prepared. My Lords attach great importance t the satisfactory accomplishment of this object, as they feel convinced that n real responsibility can be exacted for the due appropriation of the grants o Parliament until, in addition to the usual estimate of the expenditure of th

comin

coming year, an account shall be rendered of past expenditure to as late a date as circumstances will admit of its being made up, showing vote by vote, and item by item, the manner in which the grants of Parliament have been applied; the balance, if any, being made a saving, and to be so returned to Parliament. This object has been already accomplished in the case of the Admiralty, and is in progress at the War Office; and when the same arrangements shall have been extended to the Ordnance Department, there will be nothing left to be desired, either as regards strictness or uniformity in the manner in which the great departments of naval and military expenditure will account for the sums granted to them by Parliament for carrying on their respective branches of the service.

The long delay in closing the annual accounts, the principal obstacle to the establishment of a satisfactory system of account in the Ordnance.

My Lords have reason to suppose, from correspondence which has lately passed with the Board of Ordnance, that the long delay which at present takes place in making up and closing their annual accounts, constitutes the principal obstacle to the establishment of a satisfactory system of account in the Ordnance Department. The accounts of that department were not long since still unsettled so far back as 1836-7. The cause of this delay, which renders the accounts, when furnished, of no avail for any practical purpose, and the proper means of remedying it, will form one of the most important points for the consideration of the Committee.

Sir W. Herries substituted for Mr. Larpent in the Committee.

As the state of Mr. Larpent's health will not admit of his continuing to officiate as chairman to the Committee in addition to his duties at the Audit Board, my Lords are pleased to appoint Sir W. Herries to be a member of the Committee in the place of Mr. Larpent.

Mr. Croomes relieved from being a Member of the Committee;

They are likewise pleased to relieve Mr. Croomes from further attendance as a member of the Committee, as it is understood that his services cannot be conveniently spared at the War Office; but my Lords feel assured that any information, either documentary or verbal, which the Committee may require with respect to the system pursued at the War Office, on any points to which their inquiries may be directed, will be readily furnished upon application to Sir H. Hardinge.

and Mr. Thomas and Mr. Anderson appointed Members.

My Lords are also pleased to appoint Mr. S. Thomas, chief clerk in the office of the clerk to the Ordnance, and Mr. W. G. Anderson, accountant in the office of the Paymaster-general, to be members of the Committee.

Transmit a copy of this Minute to the Committee for their information and guidance; and copy of Ordnance letter of the 5th March last.

Any other papers which they may require connected with the subject of their inquiry, will be furnished to them on their applying for them.

Transmit a copy to the Secretary to the Ordnance, for the information of the Master-general and Board, with reference to his letter dated the 5th March last.

Transmit a copy of the Minute to the Secretary-at-War, and request that he will give directions for the Committee being furnished with any information which they may require respecting the system pursued at the War Office, on points analogous to those which will form the subject of their inquiry.

FOURTH REPORT of the Committee of Inquiry into the System of Account and Audit in the Ordnance Department, composed of Sir *William Herries*, Mr. *Brooksbank*, Mr. *Thomas*, and Mr. *Anderson*.

Treasury Chambers, 7 March 1844.

.—HAVING in our Reports noted in the margin disposed, to the best of our judgment, of the particular question relating to certain outstanding claims of the Commissariat Chest upon the Ordnance Department, which appeared to us to require our more immediate attention, and to be made the subject of special report to your Lordships, we now proceed to lay before your Lordships the result of our principal inquiry.

No. 1.
31 Dec. 1842.
No. 2.
27 Feb. 1843.
No. 3.
4 Nov. 1843.

Causes of delay.

.—Previously, however, to doing so, we deem it necessary, in reference to the length of time which has apparently been consumed by us in the performance of our task, to state, that during the period between our appointment (in December 1841) and the termination of the Parliamentary Session of the ensuing year, the very frequent occurrence of an unusual pressure of business in one or other of the public departments to which the members of the Committee severally belong, rendered all our endeavours unavailable to effect a meeting with the prospect of carrying on any continuous and satisfactory proceedings. The customary summer vacation succeeded, and it was not until the month of October 1842 that we were able to assemble for any really useful purpose; and subsequently, indeed, to that time, the absolute necessity of attending closely to our several ordinary vocations, the delays arising in the collection of statements, returns, and other various documents connected with our inquiry, and many other causes, have concurred to prevent our meeting so frequently as we could have desired. We may add, that the nature of the investigation in which we have been employed has necessarily obliged us to enter into the examination of numerous very minute details; and we trust that all these circumstances will be considered by your Lordships as accounting satisfactorily for the apparent tardiness of our proceedings.

Object of appointment of Committee.

3.—To resume the subject of this Report. In your Lordships' Minute of the 3d December 1841, it is stated to be a primary object of the appointment of this Committee to obtain for your Lordships the means of considering whether improvements might with advantage be introduced into the mode of keeping and auditing the accounts of the Ordnance Department, similar to those which had been directed to be adopted in the War Office, and with a like view, viz., to transfer to the estimates, and to subject to the audit and control of the Board of Ordnance, certain charges formerly borne on the vote for army extraordinaries, and immediately controlled by your Lordships. The general tenor, however, of that minute pointed to an inquiry of a more extensive nature; and the intentions of your Lordships in this respect were still more clearly indicated by your subsequent reference to us, at different times, of papers and correspondence relating to a great variety of matters, the consideration of which necessarily involved an investigation into the entire financial system of the Ordnance Department. For which reasons, we considered that we should best fulfil your Lordships' wishes by pursuing the line of general inquiry which we had chalked out for ourselves irrespectively, in the first instance, of the questions discussed in your Lordships' Minute of 8th July 1842, upon which questions, as they have all been since settled by your Lordships, it has become unnecessary that we should trouble your Lordships with any remarks.

Heads of inquiry.

4.—In submitting to your Lordships such observations as have suggested themselves to us in the course of our inquiry, we deem it advisable, instead of following exactly the order in which it was conducted, to adopt that in which it would seem to be most proper that the management of its pecuniary concerns by a great public department should be viewed, namely,—

1. The preparation of the estimates of its expenditure for Parliament.
2. The mode of keeping account; and,
3. The mode of rendering account of that expenditure for examination and audit, and also for Parliament.

Preparation of estimates.

5.—And we may here remark, that the various matters to which the papers and correspondence referred to us by your Lordships (as already adverted to) relate, will, we conceive, readily range themselves for consideration under one or other of these heads. We deem it advisable to confine our present Report to that first mentioned; and the more so, because we are desirous, previously to entering upon the consideration of the Ordnance Estimates, to solicit your Lordships' attention to certain important points connected with the subject of estimates generally, in the consideration of which we shall be compelled unavoidably to occupy your Lordships' time with many details.

Diversity of principle.

6.—The first of these points is, the diversity of principle which obtains in the three great Departments of Army, Navy and Ordnance, in estimating for and carrying to account the various items of their expenditure, with reference to the Appropriation Act.

Terms of the grants.

7.—The Appropriation Act grants the sums to all these departments "to defray the charge for the year," except in the case of six of the naval votes, where the grants are directed to be applied to the "sums which shall come in course of payment during the year," whilst the charges in the several estimates are stated and brought to account as follows:—

In

In the case of the Army,

Pay and allowances.

8.—All pay and allowances, and non-effective services authorised by the Secretary-at-War, are, when paid, carried to the service of the year for which they are due.

Chelsea pensioners.

9.—Payments for Chelsea pensions are carried to the service of the year in which the payments are made; but these pensions being paid in advance, the proportion of sums due in the year, but paid in the next year, is small as compared with the gross vote, being confined principally to payments made abroad and in the colonies, which are repaid by the agent for Chelsea pensions at a subsequent date, and are placed to the service of the year in which that repayment takes place.

Provisions, forage and fuel.

0.—Payments for provisions, forage and fuel, supplied for troops in the colonies by the Commissariat have, during the time that these services have been borne on the Army Estimates, been carried to the service of the year in which the issues were made from the Commissariat stores. As the War Office might be said to purchase these supplies from the Commissariat, the date of delivery determined the year's service to which the payment was carried. Medicines follow the same rule.

In the case of the Navy,

Wages of the fleet.

1.—The peculiar nature of the sea service, and the present system of paying the wages of the fleet, render it impossible to adopt any other principle of charging such payments against the vote than that which is followed, namely, to consider the payments made at home and abroad for this service within the year, or in the words of the Appropriation Act, "the sums which come in course of payment during the year," as the expenditure chargeable against the grants of the year.

Provisions and stores, freight, and non-effective allowances.

2.—Payments for supplies for the Navy, such as provisions and victualling stores, timber and other naval stores, clothing and bedding, medical stores, &c.; payments for freight of convict ships, conveyance of troops, as well as those for half-pay, military and civil pensions and allowances, are, in like manner, charged against the respective votes for those services, on the principle of considering the payments made in the year as expenditure belonging to the year.

Salaries and wages.

3.—Payments for the salaries and wages of the several civil establishments of the Navy are, however, charged to the year for which the sums are due, without restriction as to the date of actual payment. It should, however, be stated, that the salaries being payable on the last day of the quarter, and the wages at the yards being paid weekly, the payments in the year embrace nearly all the payments belonging to the year.

Works and buildings.

4.—With respect to works and repairs of buildings, the charges against the votes for the year are neither regulated by the dates of payment, nor by the date of the execution of the works; the payments are charged against the sums voted for the particular work, without restriction as to time.

In the case of the Ordnance,

Pay and allowances.

5.—Charges for pay and allowances, civil and military, are estimated for, and carried to account as belonging to the year for which they are due. The same rule is followed with respect to payments for non-effective services.

Stores.

6.—Payments for supplies of Ordnance stores are charged against the vote, without restriction as to date of purchase, delivery or payment; the amount of the vote appears to be the only limitation.

Commissariat supplies at home.

7.—With respect to Commissariat supplies at home, provided for in the Ordnance Estimates, the charges against the year have been restricted to payments for supplies delivered within the year.

Works and repairs.

8.—With respect to works and repairs, an important change from the practice formerly pursued took place in framing the Ordnance Estimates for 1843–44. Up to that year it had been customary to ask Parliament to vote the full amount of the estimate for that service, whether the works could be executed and paid for in the year of the estimate or not; thus it happened that the vote for Ordnance works and repairs, like that for similar services in the Naval Department, was not viewed in the same light as other annual grants; and the Ordnance Department considered itself at liberty to expend the full sums granted

granted for each work, without any of those restrictions, as to the date of the execution of the service, or the date of payment, which had been considered binding with reference to other votes in the same estimates. In the year 1843-44, however, a deduction of 150,000 *l.* was made from the gross estimate for Ordnance works and repairs, on account of those works which might not be completed and paid for within the year.

Diversity of principle in providing for pay, salaries and wages, non-effective allowances, stores and supplies, works and repairs, in the three Departments.

19.—This is doubtless an improvement upon the former practice, but we consider that this part of the estimate is still capable of being framed with much greater accuracy, and we shall, in a subsequent part of this Report, describe the changes which it appears to us to be desirable to make under this head of service, in the estimates both of the Ordnance and the Navy.

20.—Your Lordships will perceive, from the foregoing statement, that military pay, both of the Army and Ordnance, is charged according to the sums due in the year,—that naval pay is charged according to the sums actually paid in the year.

21.—That civil salaries and wages are charged on one uniform principle in the three departments, that is, with reference to the sums due in the year.

22.—That half-pay and other non-effective services are charged by the Army and Ordnance with reference to the sums due in the year, and by the Navy with reference to the sums paid in the year.

23.—That purchases of stores and supplies are, in the Navy, charged to the year in which they are paid for, while, in the Ordnance, if the payments have reference to Commissariat supplies, they are charged to the year in which the supplies are delivered; but the charges on account of Ordnance stores are not regulated according to either of the foregoing principles, the year's service not being determined either by the time of the delivery of the articles, or by the time of payment.

24.—That expenditure for works and repairs is not considered by the Naval department as belonging to the service of the year in which the work is executed, nor to that in which it is paid for, but to the year in which the expenditure was estimated for (a rule, however, which is not applied to the building and repair of ships). We have just now adverted to the change from the same system which has recently been introduced into the Ordnance Estimates.

This variety of principle a defect.

25.—This variety of principle in the preparation of their estimates and in the application of their grants by these three great public departments, appears to us to be a defect in our system of public accounts which requires correction; and should this opinion meet with the concurrence of your Lordships, it will be for your Lordships to decide what is the right principle upon which the estimates of the military and naval expenditure to be laid before Parliament should be computed, and the accounts of that expenditure kept; whether the sums actually payable within the year, or the debts to be contracted in the year, are to be the amounts for which provision is to be made in the annual estimates.

Grants not required to be disbursed until after the expiration of the year, objectionable.

26.—We have given much consideration to this subject in all its bearings, and are of opinion that great objections exist to the practice of obtaining from Parliament grants of money not required to be disbursed until after the expiration of the year for which they are voted. We have already directed your Lordships' attention to the inconsistencies in the Navy and Ordnance Estimates, which have arisen out of the attempt to frame a portion of those estimates on that principle. We have shown also the extent to which that principle has been carried in the case of "works and repairs," with respect to which it has been the practice to insert in the estimates sums which have not been expended till three or four years after the expiration of the year for which they were granted. The same practice has existed with regard to "Ordnance stores:" purchases made and paid for in one year having been charged against the votes for the current, and for three or four preceding years. Owing to this system, the Ordnance grants for the year 1836-37 were not finally disposed of till January 1842. We consider such a course to be altogether inconsistent with the design of an annual estimate.

Weakens the control of Parliament.

27.—The practice of providing in the estimates of the year for sums payable in the next or in succeeding years tends, moreover, to weaken the control of Parliament over the public expenditure, by placing funds at the disposal of a department, which, not being required for its own immediate expenses, may be employed for purposes not contemplated by Parliament. Thus the Ordnance Department is enabled to make advances for other branches of the public service. By such

means,

neans, also, the Army grants have provided the large advances required for ecruiting and other services chargeable to the East India Company, and for he bills drawn for the service of the Commissariat chests abroad. It was on hese and other similar grounds that the Commissioners of Public Accounts, in 1784, in their 12th Report; the Committee of Finance, in 1797, in their 21st Report; and the Commissioners of Military Inquiry, in 1811, in their 14th Report, condemned the mode in which the Ordnance Estimates were framed, as eing "fundamentally defective." The following are the words used by the Committee of Finance of 1797:—"The most correct mode of voting sums for Ordnance use, so far as Parliament is concerned, would obviously be to vote on stimate for the next year the sums which are estimated to be likely to be paid within the next year, and not the debts likely to be incurred in it, as is now lone."

Opposite principles on which the Estimates are prepared and the accounts kept, at variance with the most important financial statements of the country.

.—Another ground of objection to the opposite principles on which these estimates have been prepared, and the accounts of expenditure kept, is, that they are at variance with that which prevails in the formation of the most important financial statements of the country. The accounts of the annual income of the kingdom are founded on the actual receipts in the year; the account of the annual expenditure for the public debt is an account of actual payments in the year. Many other services are regulated in the same manner; not to mention the most considerable items of the Naval expenditure which have been submitted to Parliament on this principle since the year 1833-34; and it does not seem reasonable that a different principle should be applied to other heads of expenditure forming part of the same great account. The mode of accounting for the whole should, in our opinion, be uniform; we therefore beg leave to recommend that the estimates of the Military and Naval departments should in future provide only for those expenses which are to be paid in the year. This is, we conceive, the most correct mode of forming an estimate, and the only one, indeed, susceptible of general application. It is in accordance with the principle adopted by the Committee of the House of Commons, appointed in 1822 to consider of the best mode of simplifying the accounts annually laid before Parliament. The balance-sheet recommended by that Committee, and which has been ever since annually laid before Parliameut, is simply a classified account current of the actual receipt and expenditure into and from the Exchequer within a definite period of time. The account is closed on the last day of each quarter, those days being the 5th of January, the 5th of April, the 5th of July, and the 10th of October; and we cannot more forcibly illustrate our suggestions than by stating, that, in addition to those for the public dividends, to which we have already adverted, the charges for salaries, pensions, and in short for all the permanent public expenditure borne on the Consolidated Fund (except a few small items paid out of the growing produce), though they become due on those quarter-days, are necessarily excluded from the quarters so made up, and are not brought to account until they are paid in the succeeding quarter.

Further reasons for advocating the principle of providing for payments within the year.

.—But it is not on the ground of justness of principle alone that we strongly advocate the practice of confining estimates to the sums for which provision must be made to meet the demands on the Exchequer during the year, but because the adoption of that course would simplify the accounts of the departments, which are based upon the estimates, and would improve the machinery of their books. Their annual accounts would be closed at an earlier date, and their balance sheets for the Treasury and Parliament would be more easily and expeditiously prepared. The accounts, which under the present system are kept open for payments considered as belonging to prior years, would be greatly reduced, if not altogether dispensed with; a remark which applies more especially to the Ordnance expenditure, the votes for which have been kept open for many years, both in the books of the Ordnance and in those of the Paymaster-general, adding very much to the complexity of the accounts in both departments.

How this principle can be economically applied to the Army, Navy, and Ordnance.

.—It remains to be shown how this principle of estimating and accounting for payments within the year can be conveniently applied to the expenditure of the Army, Navy, and Ordnance departments.

.— 1st. The military pay of the Army and Ordnance being paid in advance, the payments in the year and those for the year would be very nearly, if not entirely, the same.

32.— 2d. The pay of the Navy is already voted for the sums which may come in course of payment during the year, and would therefore be subject to no change.

33.— 3d. Sums due for the year on account of civil salaries, pay, wages, &c. are nearly all paid within the year. Those cases in which the payment of salaries for the March quarter is allowed to stand over till the beginning of April, could, as we conceive, be easily regulated, so as, if necessary, to be brought entirely within the payments of the year; but they might with greater convenience be thrown forward to the next year.

34.— 4th· Non-effective services are paid quarterly. The payments for the last quarter of the financial year, ending 31st March, are not made until the month of April, or later, and would therefore be considered as belonging to the expenditure of the year in which they might be paid. This course has been sanctioned by Parliament for Naval non-effective services since 1833–34, and no difficulty would arise in applying the same principle to the Army and Ordnance.

35.— 5th. As a system of prompt payment now prevails for articles supplied to the Army, Navy, and Ordnance, the sums ordered for payment within the year would embrace nearly all the deliveries in the year.

36.— 6th. According to the same principle, the payments for works and repairs of buildings should comprehend nearly all the works and repairs executed within the year, which would meet the recommendation of the Finance Committees of 1818 and 1819, that the estimates for the year should provide for the sum to be laid out during the year. We conceive that no serious difficulty could arise in framing the estimates for works and repairs of buildings, on the principle of providing only for those works which are to be executed and paid for during the year. If the professional persons charged with the preparation of the detailed estimates on which the sums inserted for each work in the general estimate are founded, are enjoined to specify with greater accuracy the proportion of each to be performed during the year, and the sum which such proportion of the work will cost, we believe that the great discrepancy which has hitherto existed between the amount of the general vote for works and repairs and the proportion of the vote applied during the year will cease; and that any differences which may arise between the grants and the payments in the year for this head of service will be caused by those casualtses over which the departments can have no control.

37.—The principle which we recommend of making provision, in the estimates for "Works," for the sums to be paid during the year, is in accordance with the opinions expressed by almost every Committee of the House of Commons that has reported on the Naval and Military Estimates during the last 50 years; and we need hardly add, that the practice of inserting in the estimates for the year sums for particular works, which are an adequate provision for them for two or more years (of which repeated instances can be shown), is opposed to the principle of annual grants.

38.— 7th. Large sums are paid by the Navy for the hire of steam-vessels, &c. for the Packet Service, on the first day of the quarter following that for which they are due. These would follow the same rule as salaries, pensions and other quarterly payments.

39.—These seven divisions embrace, as we believe, nearly every variety of Naval and Military expenditure; and we have shown that no impediment exists, in respect of any one item, to the application of the uniform principle of framing the estimates of the year, upon a calculation of the sums likely to be actually allowed and ordered for payment within the year.

40.—A question may arise whether, supposing all the grants to be limited to payments within the year, at home and abroad, and to be closed at the end of the year (viz. the 31st of March), the several departments would be provided by Parliament with sufficient funds for carrying on the public service to the close of the year; and with the means ready for their use on the 1st of April, for commencing the service of the new year.

Funds for carrying on services for other departments.

41.—We apprehend no inconvenience could now be felt on that account, provided the Army and Ordnance Departments were supplied with funds for carrying on those

those services which are defrayed by them in the first instance, and which are repaid to them at a subsequent date, as explained hereafter.

2.—Previously to 1832, the financial year, as it is termed, or the year for which Parliament made provision for the public services annually voted, was from the 1st of January to the 31st of December; and as Parliament seldom assembled till after the expiration of the year, the grants necessarily provided for the expenditure belonging to the year, and could not be limited to the payments which should occur within the year, for the public service might otherwise have been interrupted; and even as it was, an irregularity was unavoidable in issuing for such Army services as were paid in advance, before the services could be voted by Parliament for the new year. To correct this irregularity, an alteration was made in the financial year in 1832, by then voting the services for five quarters, from January 1832 to the 31st of March 1833. Since which time the annual services in supply have been granted by Parliament from the 1st of April to the 31st of March.

3.—As the usual time for the meeting of Parliament is the latter end of January or the beginning of February, sufficient time is thereby afforded for considering and voting such estimates as may be required before the 31st of March; or, in case of any more urgent and protracted discussions intervening, Parliament would readily (as it has occasionally done) prevent embarrassment in the public service, by granting a sum for any service, either on account, or for six months only.

4.—With respect to those funds which the Secretary at War requires, to enable him to make the necessary advances for recruiting on account of regiments in India, the charges for which are not repaid by the Company till the lapse of two or three years after the advances have been made, and to those required by the Board of Ordnance, to enable them to pay for services executed for other departments of Government, for which they are reimbursed at some future period, we certainly consider that our recommendations, if carried into effect, will deprive them of those means of making such advances which the existing arrangements have hitherto given to them. But we are far from considering this result an objection to the principles we have recommended; for if, in the first case, it be admitted that the East India Company is not liable to make the advances required for the recruiting for the Queen's troops employed in India, out of its own revenues, a direct provision from Parliament, in the shape of a vote of credit, would be far preferable to the temporary use of moneys appropriated by Act of Parliament to other purposes; and we think that, in the second case, the Board of Ordnance should be provided with the means of paying for any services which they may be required to execute for other departments, without employing their own grants for that purpose.

5.—We need scarcely observe, that should your Lordships, upon due consideration of our recommendations, decide that the Estimates of the Navy, Army and Ordnance are to be framed upon the uniform principle of calculation of the payments likely to be made within the year, it will be necessary that the terms of the Appropriation Act should be altered accordingly.

Appropriation of extra receipts.

6.—There is another question connected with the general subject of Estimates, which (though of minor importance in comparison with that which we have just now discussed) it is in our opinion very desirable that your Lordships should decide. It relates to the manner of appropriating the moneys received by departments from other sources than the Exchequer; such as—by the Army, from sales of cast horses; from unclaimed effects of deceased soldiers; purchases of their discharges by soldiers, &c. &c.:—by the Navy, from the sales of old ships and old stores; repayments from other departments for supplies furnished, or services performed, &c.:—by the Ordnance, from sales of old stores, rents of canteens, barrack damages, sale of maps, &c. &c.

Different modes of this appropriation.

7.—All these departments have hitherto been in the practice of stating such receipts to Parliament in diminution of their estimates; but in different modes:—

8.— In the Army Estimates, the sums thus appropriated are principally the expected receipts of the prospective financial year ending in March.

9.— In the Navy Estimates, they are invariably the actual receipts of the past year ending in December.

0.— In the Ordnance Estimates they have been almost exclusively confined, as in those of the Army, to the assumed receipts of the prospective financial year; and it has been a practice of that department to apply the aggregate amount of these expected receipts, and occasionally of unexpended balances of grants, in diminution of the votes for works and repairs.

51.—It is to be observed, that the naval practice was first enjoined by an Act of Parliament passed for the better regulation of pensions, the Navy having been previously in the habit of paying pensions from the fund created by the sale of old stores; but though that Act has since been repealed, in consequence of the introduction of another relating to pensions (in which, however, all mention of old stores was omitted), the Navy have continued the practice of appropriating the actual receipts of the past year in diminution of the votes.

52.—Of the two modes above described, we think little doubt can, on consideration, be entertained, that the practice pursued by the Navy is the simplest and the best. The abatements on the Navy Estimates being for sums actually realized, become *bonâ fide* appropriations in aid of the grants; and the effect is the same as if these receipts were paid into the Exchequer, and votes were passed for the gross amounts in the Estimates; whereas many objections may be urged against the practice of appropriating estimated receipts in aid of the votes. Amongst others, it may happen* that the expected receipts are not forthcoming to meet a certain expenditure, thus rendering it necessary to borrow from other votes to make good the deficiency; and again credits may be realized beyond the amounts estimated, and a larger sum may thus be applied to a voted service than was contemplated by Parliament.

53.—It would appear from a letter addressed by the late Lord Congleton (then Sir Henry Parnell, and Paymaster-general), to the Treasury, on the 20th of February 1839†, that he considered both modes to be objectionable, and strongly advocated the plan of requiring departments to pay periodically into the Exchequer, the amount, not only of unexpended balances, but of all receipts, such as these now in question; which plan, he contended, "would place the public expenditure more completely under the control of Parliament, and would take away from departments the power of establishing conflicting principles in so important a matter as that of voting their estimates."

54.—After a careful consideration of this question, whether the receipts of the past year should be appropriated by a department in diminution of its estimates, or be paid (as recommended by Sir Henry Parnell) into the Exchequer, we incline to the opinion that the first-mentioned course is, upon the whole, to be preferred. These monies are collected by the sub-accountants of the War Office, Admiralty and Ordnance in all parts of the world where we have naval and military stations, and they are applied on the spot in payment of the current services of the respective departments. As the demands on the Exchequer for current services are diminished by the amount of such local receipts, the same object is attained by this simple arrangement as if these receipts were remitted to the Exchequer, as recommended by Sir Henry Parnell, and the full amount required for the payment of current services were issued therefrom. It will be seen, however, from our preceding remarks, that we fully concur in the opinion expressed in the Paymaster-general's letter of the 20th of February 1839, to which we have already referred, that the want of uniformity in the principle upon which these receipts are appropriated on the annual estimates, is a defect which should be remedied.

55.—We understand that it is the intention of the Board of Ordnance to credit, in their estimates for the ensuing year, 1844-5, only such sums as they have actually realized. Should this prove to be the case, we have only to recommend, in pursuance of the opinion expressed above, that the Secretary at War should be required by your Lordships to conform in future to the same practice in regard to this species of revenue.

Division of Ordnance Estimates into "Ordinary," and "Extraordinaries."

56.—We proceed to the particular consideration of the Ordnance Estimates, in the present formation of which two leading divisions are recognized,—"Ordinary" and "Extraordinaries."

57.—The division "Ordinary" includes that portion of the pay and allowances of the ıe Ordnance military corps which is authorized by Royal Warrant, and also ıe salaries of the Ordnance Office, and other civil establishments. The stimate of this division for the current yeer, 1843–4, amounts to the sum of 17,572 *l.*

---

* *See* Letter from Board of Ordnance to the Treasury, of 26th March 1841, Bundle 7 of Papers.

† *See* Papers, Bundle 5.

—The division "Extraordinaries," amounting on the estimates for the same ear to the sum of 983,925 *l.*, includes a great variety of services: salaries, ages, contingencies, stores, works, military and civil expenditure. In short, ems properly coming under every effective vote of the Ordnance Estimates.

—Three votes "Unprovided," "Superannuated," and "Commissariat Supplies," mounting together, on the Estimates for 1843–4, to the sum of 362,645 *l.*, are assed by themselves, as not belonging either to "Ordinary" or "Extra- rdinaries."

—The origin of the distinction in the Ordnance Estimates between ordinary nd extraordinary expenses, is very remote. An account given in the Appendix the Twenty-first Report of the Committee of Finance, in 1797, shows that it xisted in the year 1770. Neither the object originally contemplated by that ivision of the expenditure, nor the reason for preserving it in the Estimates of ıe present time, appears very intelligible.

—In the Twelfth Report of the Commissioners of Public Accounts, in 1784, ıe "Ordinary" is described as comprehending the permanent establishments, nd certain usual services; and the "Extraordinaries" are stated to consist of ıms that will probably be wanted in certain garrisons, either in Great Britain r elsewhere, or for casual services; and Mr. Nettleship, in his evidence before ıe Finance Committee (Twenty-first Report) of 1797, describes the "Or- inary" as comprehending the provision for the ordinary establishments, civil nd military, which are of a permanent nature; and the "Extraordinaries," as ıcluding every service known beforehand of a temporary and contingent ature.

—The reasons for submitting an extraordinary estimate to Parliament in time of ar, when extraordinary expenditure may be required to be incurred for a ıdden armament, for a large augmentation of warlike stores, or for other ex- enses incident to a state of active hostilities, are sufficiently intelligible. In ıese cases a necessity might occasionally exist (owing to the difficulty of ividing the sum required under the usual heads of the estimate) for separating ıe votes called for by such emergencies from those passed for the ordinary xigencies of the service; but it is only in such cases that it appears to us dvisable to depart from the established classification of the estimates. In the resent Ordnance Estimates, the services classed as "Extraordinaries" are chiefly xpenses of regular annual recurrence, and seem to belong strictly to the ordi- ary service of the department.

—For some years after the return of peace, extraordinary estimates existed, as our Lordships are aware, both for the Army and the Navy. The Army Extra- rdinaries were voted on separate estimates, and included many services which ad no connexion with the Army expenditure. The extraordinary estimate of ıe Navy formed part of the general estimates of that branch of the service; it mbraced the building and large repairs of the fleet, and works connected with ıe extension or improvement of the naval arsenals. Both these extraordinary stimates were discontinued about 12 years ago.

Inconveniences of this division.

—The chief defects in the classification of the Ordnance Estimates appear to us o arise from the attempt to draw a distinction between those services which are onsidered "Ordinary," and those which are supposed to belong to "Extraor- inaries;" for the desire to preserve this distinction occasions the separation of xpenses belonging to the same head of service under different votes, and to uch an extent as to be incompatible, as appears to us, with a simple and well- efined classification of the expenditure.

—We beg leave to point out some of the inconsistencies which it tends to per- etuate.

—The regular pay and increased pay of the Ordnance Military Corps, part of ıe allowances in addition to pay, part of the clothing, part of the expenses for ostage, and other military contingencies, are classed under one vote as "Ordi- ary;" while command pay, and other allowances in addition to pay, a further art of the clothing, expenses for postage and other military contingencies, are lassed under other votes as "Extraordinaries."

—The salaries of the civil establishments are shown under one vote as "Ordi- nary,"

nary," whilst some of the incidental expenses of those establishments are included as "Extraordinaries" under another vote, described as Barrack Masters' Expenditure," or "Storekeepers' Expenditure;" and some under a third vote, described as "Civil Contingencies."

68.—Part of the expenses for supplies to barracks is provided for under the vote for "Stores;" another part under the vote for "Commissariat Supplies;" and a further part under the vote for Barrack-masters' Expenditure."

69.—The expense of the department of the Inspector-general of Fortifications is scattered over several votes. The surveyor and clerks appear under the vote for "Civil Establishments;" the Inspector-general, and the officers and committee employed under him appear under the vote for "Military Pay of Royal Engineers;" the extra pay of such officers, and their allowances for house-rent, lodging-money, servants and forage, appear under the vote for "Military Contingencies;" and lastly, the item of "Civil Contingencies" embraces the contingent expenses of the office.

70.—These examples will suffice perhaps to show the propriety of abolishing the distinction between "Ordinaries" and "Extraordinaries" in the future estimates of the Ordnance department.

Objectionable heads of "Housekeepers' Expenditure," "Barrack Masters' Expenditure," and "Civil and Military Contingencies."

71.—These estimates contain also, under Votes 5 and 6, three general heads, embracing expenditure of so mixed a character that we consider it desirable to call your Lordships' special attention to them. These heads are Storekeepers' Expenditure," "Barrack-masters' Expenditure," and "Civil and Military Contingencies." The sums voted annually under these vague and undefined heads of service amount to nearly 400,000*l*. The services they embrace are various, and they relate to many heads of the estimates. The separation of these expenses, which are very numerous, will no doubt entail some trouble at first on the Ordnance Department; but as such items confuse rather than explain the estimates, we consider that the distribution of them under the various votes to which they properly belong is indispensable to a correct classification of the Ordnance Estimates.

Best mode of remedying the imperfect classification of the Ordnance Estimates.

72.—In considering the best mode of remedying what we believe to be an imperfect classification of the Ordnance Estimates, we have kept in view the improvements which have been introduced into the Army and Navy Estimates, on which considerable pains have been bestowed of late years.

73.—We have endeavoured also to frame, as far as practicable, a classification similar to that adopted by the War-office and Admiralty, for this appears to us a very essential point to be attended to in making any change in these estimates. The Commissioners of Public Accounts in 1784 very justly observe (in their Twelfth Report), that "uniformity in the course and modes of transacting the business of the public ought to be introduced and preserved, as far as practicable, in similar offices; it causes the intercourse between offices connected to be carried on with greater ease and expedition, and facilitates the means of acquiring official knowledge to those persons who pass through the different departments of the state to the higher stations of administration; and thus, when a regulation is clearly of general utility, it should be extended to every office, the constitution and objects of which will admit of the application."

74.—To no part of the business of the public are these observations more applicable than to the accounts and estimates of the Naval and Military Departments; and the first step towards establishing the desired uniformity is clearly to assimilate their estimates, and the mode of voting their supplies.

Necessity of a reconstruction of the Ordnance accounts.

75.—We are aware that the change proposed in the following sketch of an amended estimate will render an entire reconstruction of the Ordnance accounts necessary; but we look upon this inconvenience as a minor consideration compared with the importance of submitting the Ordnance expenses to Parliament in a clear, intelligible form. It should be borne in mind that the form of the estimate determines the form in which all accounts of actual expenditure must be kept, with a view to show the appropriation of the annual grants; a defective classification of the estimates cannot therefore exist without affecting the whole arrangement of the accounts.

76.—We proceed now to consider, in detail, the heads under which we conceive that the Ordnance expenditure should be submitted to Parliament.

77.—We would suggest, in the first place, that in conformity with the practice which has long existed in voting the Navy Estimates, and which was adopted last year in voting those for the Army, the number of men to be employed in the e military branch of the Ordnance in the following year should be voted by e House before any money vote is taken. The number of men to be employed the Navy and Marines in the ensuing year, and to be provided for in the avy Estimates of the year, is fixed by a special Order in Council; and before e charges in the Navy Estimates are voted, that number is confirmed by a ecial vote of the House of Commons. The number of men to be employed in e ensuing year in that portion of the standing army which is provided for in e estimates prepared by the Secretary at War, has always been distinctly set rth in the first clause of the Mutiny Act; and that number is also now voted the same manner as the number of men for the Navy, before any money is anted for the expenses included in those estimates. But, with respect to the rdnance Military Corps, we cannot find that the number of men to be employed the year has ever formed the subject of a distinct vote, as in the case of the rmy and Navy; nor that it has ever been included in the number of men set rth in the Mutiny Act, as that to which the standing army is to be limited; d although the grant of the money for the payment of the Ordnance Military orps, does in effect sanction the employment of that portion of the military rce, we submit that it will be more regular that the number of men provided r in the Ordnance Estimates should, as in the case of those provided for in the rmy Estimates, be set forth in the Mutiny Act; and be also distinctly voted Committee of Supply, according to the practice adopted in moving both the rmy and Navy Estimates.

Classification of Estimates.

—We propose that the Money Votes should be classed in the Estimates in the llowing order:

1.—*Ordnance Military Corps.*

Ordnance Military Corps.

—Under this vote we propose to include the pay, allowances in addition to pay, othing (including great-coats for the Ordnance branch of the service), recruitg, and other contingencies of the Ordnance Military Corps. These items are ow spread over Votes 2, 3 and 6.

—The item of clothing should be confined to the supplies required for Ordance use. As the War Office Estimates contain all the clothing for the Line, cept the great-coats, and as those estimates already make provision for the othing supplied by the Ordnance to certain Colonial Corps, we consider that would be more regular that the sums required for great-coats for the Line ould be provided for in future in the Army Estimates: the supplies of greatoats from the Ordnance stores could then be settled as a matter of account etween the two departments, in the same manner as the supplies of other othing for Colonial Corps are now furnished by the Ordnance.

—As to the form in which the various subdivisions of this vote should be preented in the estimates, we cannot do better than refer to Paper A. in the Army stimates of the year 1843-44, pp. 3 to 10, and recommend that the same rrangement be adopted under this vote, so far as the same form can be made pplicable.

—To the vote should be added an explanatory paper detailing the numbers, anks and rates of pay of the several corps. We consider that it would be atisfactory also to add a paper explanatory of the item "Extra Pay to Engieers," showing, as far as practicable, the services for which the extra pay is rawn.

2.—*Commissariat and Barrack Supplies for H. M. Land Forces in the United Kingdom.*

Commissariat and Barrack Supplies for Her Majesty's Land Forces in the United Kingdom.

—Under this head we propose to provide for bread and meat; forage, fuel and ight; and paillasse straw, at present voted under No. 10 of the Ordnance Estinates; also for bedding, bedsteads, and other barrack furniture and stores, ncluded under Vote 7; money allowances in lieu of forage, included under ote 6; and, finally, the purchase and repair of barrack furniture and stores, ow included under "Barrack-masters' Expenditure," Vote 5.

3.—*Ordnance Office.*

Ordnance Office.

—In the present estimates the expenses of the Ordnance Office are included in he same vote as those for the out-stations at home and abroad. We propose that

that the "Ordnance Office" should form a distinct vote, in conformity with the arrangement adopted in the Army and Navy Estimates. The vote should include, in addition to the salaries now provided for under Vote 1, the postage, coals and candles, travelling expenses, allowances for house-rent, and the other incidental expenses included under the civil division of Vote 6; also certain expenses relating to the office of Inspector-general of Fortifications, included under the military division of the same vote; and, finally, the small contingent expenses included under Vote 10—Commissariat Supplies.

85.—We cannot dismiss this vote without directing attention to a practice which has been prevalent in the Ordnance, and which we cannot but consider as open to grave objections.

86.—It has been usual to charge a per-centage on the cost of the supplies provided by them for other departments of Government, for public companies, &c. Instead of the gross receipts for such supplies being credited as appropriations in aid, the per-centage charged on them has been carried in diminution of the salaries of the Ordnance-office; thus the sums provided for the salaries on the Estimates under Vote 1 have been considerably less than the sums actually paid, the deficit in the vote being made up by this per-centage on the receipts for stores supplied to other departments of Government, public companies, &c. The proceeds of this per-centage having hitherto been excluded from the appropriations in aid, a portion of the salaries of the Ordnance-office has, in consequence been paid without the sanction of a vote of Parliament. The amount of expense thus excluded from the Estimates has, perhaps, rarely exceeded 5,000 *l.* or 6,000 *l.* a year, and in the Estimates for 1844–45 it has fallen to 2,560 *l.*; but it is to the dangerous tendency of the principle that we object. We understand, however, that it is the intention of the Board of Ordnance to discontinue this practice in future estimates.

4.—*Establishments at Home and Abroad.*

Establishments at Home and Abroad.

87.—This vote should include the salaries, rents, rates, and taxes, and incidental expenses of the several Ordnance establishments, the expenses of each establishment being distinctly shown, as under Votes 6 and 7 of the Navy Estimates. These expenses are at present provided for under Votes 1, 5 and 6. The salaries of clerks of works, foremen of works, and other salaried officers, now included under the vote for "Works," should, as it appears to us, be provided for under the vote for establishments. Although it would seem that these officers are not permanently attached to particular establishments, they might be shown together at the end of this vote as a class connected with the establishments generally. The salaries of these officers amount to nearly 40,000 *l.* a year, and that amount is at present shown in the Estimates in two sums only, Neither the numbers belonging to each class, nor the salaries which they are in receipt of, are set forth. We recommend that this information should be given in the Estimates in future.

5.—*Wages of Artificers and Labourers at Establishments at Home and Abroad.*

Wages of artificers and labourers at Establishments at Home and Abroad.

88.—The wages of artificers and labourers are nowhere distinctly shown in the present Estimates; they are mixed up, under Vote 5, with the miscellaneous expenditure of storekeepers and barrack-masters. We propose that the form in which similar expenditure is shown in the Navy Estimates, under Votes 8 and 9, should be adopted by the Ordnance.

89.—It is the practice to provide for the wages of certain artificers employed at Woolwich under the head of "Stores;" also for a portion of the establishment at Enfield, and for the viewers, foremen and labourers at the Tower, and at Birmingham, under the same vote. We submit that it will be more regular to provide for these as well as for all other artificers and labourers in the pay of the Board of Ordnance, under the head of "Wages," in the same manner as similar expenses in the Naval department are voted.

The wages for boys should also be classed under this vote.

6.—*Ordnance Stores for Land and Sea Service.*

Ordnance Stores for Land and Sea Service.

90.—The vote for "Stores" in the present Estimates includes also a portion of the clothing for the Line and for Ordnance Corps, and a portion of the expense of barracks and hospital stores; we have already pointed out the heads under ich we propose that these expenses should be classed. The remaining items the vote are purely Ordnance stores; to these we propose to add all expenses a similar character now included under "Storekeepers' Expenditure," te 5.

7.—*Works and Repairs.*

Works and Repairs.

-The form in which this important item of the Estimates is now submitted to rliament, appears to be susceptible of much improvement. Instead of giving list of stations, with sums against them without explanation, a classification the works should be given. In the present Estimates some of the works are scribed in an Appendix, but it will be far more intelligible to give explanations ainst all the items under the vote itself. We propose that two leading visions should be adopted under this vote:—

1st. New Works.
2d. Repairs.

And that each of these divisions should be subdivided under three heads:—

1st. Fortifications.
2d. Barracks.
3d. Civil Buildings.

-The estimate should be submitted in five columns; the first showing the tal estimate for the works; the second, the amount already voted for it; the ird, the gross sum already expended upon it to the date of the latest returns; e fourth, the estimate for completing the work; and the last, the sum to be ted for the payments to be made in the ensuing year. The same form, as r as applicable, should, in our opinion, be adopted in the Naval Estimates, nder the head of New Works.

-The nature of each work or repair should be described, as shown in the Navy stimates under Vote 11. In the case of ordinary repairs to be undertaken and ompleted within the year, all the columns will not be required.

8.—*Scientific Branch.*

Scientific Branch.

—This would be altogether a new head in the Ordnance Estimates. The items hich we should propose to place under it are, all sums required for scientific nstruction, such as for the Royal Military Academy, for the Establishment for nstruction of Sappers and Miners, included under Vote 2; pay of officers, &c., eaching the use of military machines, included under Vote 6; all sums for rdnance surveys; for expenses of the Royal Military Repository for artillery ractice, also included under Vote 6; and generally, all expenses relating to xperiments of a scientific nature, or incurred for scientific purposes.

—We recommend that more details should be given of the large expense for urveys, and that the form which we have suggested under the preceding vote or works in progress should be adopted with respect to surveys; this should e done with a view to show to Parliament the probable cost of every undertaking for which money is asked on account; the sums already voted and xpended for it, and the sum to be laid out during the year.

9.—*Non-effective Services, Military and Civil.*

Non-effective Services, Military and Civil.

—We would suggest that the military division of this vote be framed according o the form given in the Army and Navy Estimates; where the services of the fficers in receipt of "Good-Service Pensions" are detailed on the first grant of he pensions, and where the other classes are divided into ranks, &c.

—With respect to the Civil Superannuations and Allowances, we would merely suggest that the information as to the new pensions granted, which is now given in a separate paper at the end of the Estimates, should be incorporated with the vote, as shown under Vote 16 of the Navy Estimates.

—It may be proper here to bring under your Lordships' notice that a clause is annually introduced into the Appropriation Act, laying down the rules and restrictions to be observed in the application of the sums voted for the half-pay of the Army, and defining the cases in which the enjoyment of the emolumen of civil offices disqualifies an officer of the Army from receiving his half-pay As these rules and restrictions would seem, in most cases, to apply equally t the officers of the Ordnance Military Corps, and also to those of the Navy an Marines, we have thought it right to direct your Lordships' attention to th clause in question, in order that its provisions may, if it be judged expedient be extended to the half-pay of those departments.

Appropriations in Aid.

Appropriations in aid.

99.—Having already brought under the consideration of your Lordships our reasons for recommending that the actual receipts of the past year, in lieu of the prospective receipts of the coming year, should be appropriated by public departments in diminution of their votes, we will merely add here, that we consider that it would be desirable that the Ordnance should adopt the practice of the Army and Naval departments in crediting these receipts under the separate votes to which they relate, instead of deducting the whole from the vote for Ordnance works and repairs. Under this arrangement the old stores would be deducted from the vote for stores; the sums received for education and the proceeds of the sale of maps would be deducted from the scientific branch; the contributions for military protection from the military vote; the receipts from the corn-mill at Waltham Abbey from establishments; and in like manner for other receipts.

100.—While we are on the subject of appropriations in aid, we beg to call your Lordships' attention to the appropriations in aid of Vote 17 of the Navy Estimates. It will be seen that the naval department credits, in diminution of that vote, the amount of stoppages made by the War Office from the pay of troops while embarked on board Her Majesty's ships; but it does not appear that the Ordnance ever pay over to the Navy the amount of similar stoppages from pay of men belonging to Ordnance corps. It is desirable that this should be remedied, otherwise Parliament will continue to vote that expense twice over, once on the Ordnance Estimates, in the shape of pay, and again in the Navy Estimates, under the head of Provisions for Troops.

Form in which Ordnance Estimates should be prepared.

101.—We beg to advert, in conclusion, to the form in which the Estimates should be prepared. In the present Ordnance Estimates the general abstract alone exhibits the comparison with the grants of the preceding year; in the Army and Navy Estimates the comparison runs through the whole Estimate, and the details, as well as the results, are placed in juxtaposition. We recommend that the same form be extended to the Ordnance Estimates.

TREASURY MINUTE, dated 26 March 1844.

The Fourth Report of the Committee

THEIR Lordships have before them the Fourth Report of the Committee appointed by their Minute, dated 3d December 1843, to inquire into the system of account and audit in the Ordnance department.

proposes an improved classification of the Ordnance Estimate, and the adoption of uniform and correct principles in the Army, Navy and Ordnance accounts.

This report is confined to the important subject of the preparation of the annual estimates which form the foundation of the system of account in the Naval and Military departments, and besides proposing an improved classification of the Ordnance estimate, the Committee recommend that this opportunity should be taken of establishing an uniform and correct mode of proceeding on several points on which a diversity of practice has hitherto obtained in the three great departments of the Army, Navy and Ordnance, in estimating for and carrying to account the various items of their expenditure, with reference to the Appropriation Act.

The Master-general and Board requested to give their opinion.

Transmit a copy of the report to the Master-general and Board of Ordnance, and request that they will favour my Lords with their opinion on the various topics discussed in it, as soon as they shall have had time to consider them.

Progress already made in framing the estimate, on the prin-

Observe that an important step has been already taken towards the establishment in the Ordnance estimates of the principle of providing only for those expenses

expenses which are to be paid within the year by the deduction of 150,000 *l.* which was made in the year 1843–44 from the gross estimate for Ordnance works and repairs, on account of those works which might not be completed and paid for within the year; and their Lordships trust that it will be found practicable to apply this principle to all the different heads of expenditure in the Ordnance as well as in the Army and Navy Estimates.

ciple of providing for the expense payable within the year.

Their Lordships are happy to learn from Mr. Byham's letter, dated 28 February 1844, that the plan of crediting in aid of the annual grants, the sums actually realised during the year preceding the estimate, instead of the sum expected to be realised in the year for which the estimate is voted, has been brought into operation in the Ordnance department, so that the credits which appear in the Ordnance Estimates for 1844–45 are such as have actually been realised prior to the formation of the estimate, and will be brought to account in the books of the Ordnance and Paymaster-general, as applicable to 1844–45.

The plan of crediting in aid of the grants the sums realised during the past year has been adopted in the Ordnance;

Uniformity has thus been established on this material point in the practice of the Naval, Ordnance and Commissariat departments, and the Secretary at War will be requested to adopt the same course in future in the preparation of the Army Estimates.

and uniformity will be established on this point in all the Naval and Military departments.

The Master-general and Board will observe that the Committee have suggested, at page 10 of their report, that the sums required for great-coats for the Line should be provided in future in the Army instead of the Ordnance Estimates. Their Lordships are, however, of opinion that the estimates of the public expenditure ought, in every practicable case, to be prepared and laid before Parliament by the department which performs the service and defrays the expense; and it appears to them to be deserving of consideration whether, instead of adopting the course recommended by the Committee, it would not be desirable that the cost of the clothing for colonial corps should be transferred from the War Office to the Ordnance Estimates, by which arrangement the expense of the whole of that part of the clothing of the army, which is provided by the direct agency of the officers of the public, would appear in the estimates of the Ordnance department, which already performs and is responsible for this service; while the "clothing allowance," which is applied to the purposes for which it is granted by the regimental agents, under the direction of the colonel, who draws from it a portion of his official emoluments, would continue to be borne on the estimates of the Secretary at War.

The expense of the whole of that portion of the clothing of the Army which is provided by the direct agency of the officers of the public, should appear in the Ordnance Estimate.

Transmit a copy of the report to the Secretary at War, and request him to furnish my Lords with his opinion on those parts of it which have a reference to his department.

The Secretary at War asked for his opinion.

Observe that their Lordships trust that it will be found practicable to apply to all the different heads of expenditure in the War Office, as well as in the Ordnance and Navy Estimates, the important principle of providing only for those expenses which are to be paid within the year.

The principle of providing for the expenses paid within the year to be applied to all the heads of expenditure in the War Office estimate;

The other principle recommended by the Committee, of crediting in aid of the annual grants the sums actually realised during the year preceding the estimate, instead of the sums expected to be realised in the year for which the estimate is voted, has been already brought into full operation in the Naval, Ordnance and Commissariat departments, and their Lordships request that the same course may be adopted in future in the preparation of the Army Estimates.

as well as the principle of crediting in aid of the grants the sums actually realised during the past year.

As regards the question of the particular estimate in which the expense of great-coats and clothing for colonial corps should be included, write to the Secretary at War to the same effect as to the Master-general and Board of Ordnance.

Clothing to be dealt with as above.

The only remaining point noticed in the report, in which the department of the Secretary at War is directly concerned, is the recommendation at page 9, that the number of men to be employed in the Ordnance military corps should be set forth in the Mutiny Act, upon which their Lordships request to be favoured with the opinion of the Secretary at War.

Whether the number of men employed in the Ordnance corps should be set forth in the Mutiny Act.

Transmit a copy of the report to the Secretary of the Admiralty, and request that he will move the Lords Commissioners to favour my Lords with their opinion upon those parts of it in which the Naval department is concerned.

The Lords of the Admiralty asked for their opinion as regards the Naval department.

Desire that he will call the particular attention of the Lords Commissioners to the recommendation of the Committee that the Navy, Army and Ordnance Estimates should in future provide only for those expenses which are to be

The principle of providing for sums paid within the year to be extended to all the Navy votes from the six to which it has been already applied.

paid within the year (the details of which are discussed from page 2 to 6 of the report); and express their Lordships' hope that it will be found practicable to apply this principle to the remaining heads of expenditure in the Navy Estimates, as well as to the six votes, where the grants are already directed to be applied to the "sums which shall come in course of payment during the year."

Uniformity of practice proposed to be established on this point.

Their Lordships have caused a similar communication to be made to the Secretary at War and the Master-general and Board of Ordnance, with a view to uniformity of practice being established on this important point in the preparation of all the annual estimates.

Revised form of estimate for "New Works."

Desire also that he will submit for the special consideration of the Lords Commissioners of the Admiralty the recommendation of the Committee respecting the form of estimate for "New Works," as explained at page 12 of their report.

The same form to be adopted at the Ordnance, whereby the practice of keeping open the annual accounts and reserving balances will be put an end to.

The Lords Commissioners will observe that the Committee have proposed that a similar arrangement should be adopted in future in the preparation of the Ordnance Estimates, by which means the objectionable practice of reserving a portion of the balance on the annual balance sheet laid before Parliament, and thereby postponing for an indefinite period the closing of the account of the year's service, will be obviated in both the departments to which large sums of public money are annually granted for works and repairs.

Restrictions on half-pay, and mode of crediting stoppages, on board ship.

The only other parts of the report which have a direct reference to the Naval department are, the proposition at page 12 to extend to the Navy and Marines the restrictions on the application of the sums voted for the half-pay of the army, annually introduced into the Appropriation Act, and the notice at page 13 of the difference between the practice of the War Office and Ordnance in respect to crediting, in aid of Vote 17 of the Navy Estimates, the amount of stoppages from the pay of the troops while embarked on board Her Majesty's ships.

The Committee thanked,

Write to the Committee of Ordnance Inquiry, and convey to them their Lordships' thanks for their able and valuable report.

and informed that a further communication will be made to them when the replies of the Secretary at War, Ordnance and Admiralty are received.

Also transmit a copy of this Minute for their information, and state that my Lords will cause a further communication to be made to them, when they shall have received the replies of the Master-general and Board of Ordnance, the Secretary at War and the Lords Commissioners of the Admiralty, to the references which have been made to them.

Copy to the Paymaster-general, and the Commissioners of Audit.

Transmit a copy of this Minute, and of the Report of the Committee of Ordnance Inquiry, to the Paymaster-general for his information.

Also transmit copies to the Commissioners of Audit for their information.

TREASURY MINUTE, dated 29 March 1844.

Mr. Anderson reports that the improved system of account was in operation at the War Office, and that it had been determined to introduce the independent appropriation audit.

READ again Mr. Anderson's letter, dated 30 September 1843, reporting that the improved system of account directed by their Lordships' Minute, dated 27 November 1840, had been in satisfactory operation since the 1st April 1841, and that the state of the books was such as to afford every facility for conducting the Audit Office examination, which it had been resolved, in concurrence with the Secretary at War, to extend to the War Office expenditure, in accordance with the plan prescribed for the audit of the Navy expenditure by the 30th section of the Act 2 Will. 4, c. 40.

Commissioners of Audit recommend an uniform system for auditing the accounts of Army, Navy and Ordnance.

Also read the report of the Commissioners of Audit, dated the 5th February 1844, on the above-mentioned communication from Mr. Anderson, in which the Commissioners recommend that an uniform system should be established for the audit of the accounts of the three great departments of the Army, Navy and Ordnance.

The subject to be considered as a whole, and the improvements which experience has suggested to be adopted.

Their Lordships concur in opinion with the Commissioners of Audit, that it will be advisable to consider the subject of the audit of the War Office accounts in connexion with the measures which it will shortly become necessary to adopt for the purpose of establishing a similar check over the Ordnance expenditure, and that this opportunity should likewise be taken of clearly defining the nature and extent of the examination to which it will be the duty of the Commissioners of Audit to subject the accounts, and of adopting any improvements which may have been suggested by the experience of the last 12 years, during which the system has been in operation in the Naval department.

As

As the Committee of Inquiry into the system of account and audit in the Ordnance department have under their consideration the mode of rendering an account of the Ordnance expenditure, both as regards the detailed examination and audit conducted within the department, and the more limited revision of the accounts to be conducted by the Commissioners of Audit, according to the system already established in the Naval department, the object of which is to ascertain that each item of expenditure is supported by the usual and regular voucher, and that it is charged against the proper head of service, their Lordships are of opinion that the Committee of Ordnance Inquiry may with advantage be instructed to undertake the more extended investigation recommended by the Commissioners of Audit, the more especially as the attention of the Committee has been already directed to several points of importance on which it is desirable to establish uniformity of system in the mode of keeping the accounts of the Military and Naval departments, and of making the annual report of the result to Parliament.

This more extended investigation to be undertaken by the Committee of Ordnance Inquiry.

The Commissioners of Audit remark that their Lordships will have to determine the principle upon which this Parliamentary check is to be established, " whether with respect to the specific votes on the estimates, or with reference to the Appropriation Act. The audit of the naval accounts has hitherto been held to be governed by the Appropriation Act only, without reference to the votes; a check which the Committee on War Office Accounts describe as imperfect, and as not answering the purpose which was originally contemplated."

Whether the check is to be with reference to the votes or to the heads in the Appropriation Act.

Upon which, considering the importance of this branch of the subject, their Lordships think it necessary to observe, that as the votes in the estimates are embodied in the Appropriation Act, and constitute the heads of expenditure set forth in that Act, with reference to which the annual naval balance sheet is made up and examined by the Commissioners of Audit, the question which will have to be determined appears to be, rather, whether the annual account or balance sheet laid before Parliament of the Admiralty, War Office and Ordnance Receipt and Expenditure shall be rendered with reference only to the general heads or votes specified in the Estimates and Appropriation Act, according to the practice followed by the Admiralty, under the provisions of the Act 2 Will. 4, c. 40, or whether this account shall be so rendered as also to show the saving or excess under each of the subordinate heads into which the votes are divided in the annual estimates, according to the practice observed in the preparation of the War Office and Commissariat balance sheets.

A more correct statement of the question makes it depend upon votes or subordinate heads of votes.

Transmit a copy of this Minute, extract from Mr. Anderson's letter, dated 30th September 1843, and copy of the Report of the Commissioners of Audit, dated 5th February, to the Committee of Inquiry into the system of account and audit in the Ordnance Department; and desire that as soon as the inquiry in which they are engaged shall be sufficiently advanced, they will investigate and report upon the following important points:—

The Committee of Ordnance Inquiry to report

1. The precise mode in which the audit of the naval accounts, prescribed by the Act 2 Will. 4, c. 40, has been carried into effect.

1st. The mode in which the audit of the naval accounts has been conducted.

2. The mode in which the Committee would recommend that this system of audit should be applied to the accounts of the War Office and Ordnance, including any improvement which they may have to suggest in the naval practice, by which uniformity would be established, and admitted defects would be remedied.

2d. The mode in which this system of audit should be applied to all three departments; and,

3. The nature and extent of the establishment which they consider most suitable for the purpose of auditing the accounts of the three departments of the Navy, Ordnance and War Office.

3d. The establishment required to give effect to it.

Transmit a copy of this Minute to the Commissioners of Audit, and state that my Lords will cause a further communication to be made to them, as soon as they shall have received the report which the Committee of Ordnance Inquiry have been directed to furnish on the subject of the adoption of an uniform and well-understood system of auditing the accounts of the Ordnance, War Office and Naval Departments, on the principle prescribed for the Navy by the Act 2 Will. 4, c. 40.

The Commissioners of Audit will be informed when the Report of the Committee of Ordnance Inquiry shall be received.

Also, transmit to the Secretary at War a copy of this Minute, from which he will perceive that my Lords have postponed for the present the consideration of the measures which it will be proper to adopt for the purpose of extending

The Extension of the Navy Appropriation Audit to the War Office postponed for the present.

the system of audit, established in the naval department by the Act 2 Will. 4, c. 40, to the War Office accounts, as recommended by the late Committee of Inquiry into the War Office accounts, dated the 21st July 1840, and approved of by Mr. Macaulay in his letter to the Treasury, dated the 11th August, and by their Lordships in their Minute, dated the 27th November of the same year.

Mr. Hollings and Mr. Hanby, by whose exertions, acting under Mr. Anderson, the improved system of accounts has been established at the War Office, to be rewarded.

Also, transmit an extract of Mr. Anderson's letter, dated 30th September 1843, suggesting that Mr. Hollings, by whose exertions the improved system of account has been successfully established in the War Office, should be confirmed in the situation of book-keeper, and that a gratuity should be allowed to his assistant, Mr. Hanby, and state that my Lords will be ready to consider any recommendation which the Secretary at War may think proper to make for conferring a suitable reward on Mr. Hollings and his assistant, and placing the situation of book-keeper on a footing proportioned to its real importance.

SIXTH REPORT of the Committee of Inquiry into the System of ACCOUNT and AUDIT in the ORDNANCE DEPARTMENT, composed of Sir *William Herries*, Mr. *Brooksbank*, Mr. *Thomas* and Mr. *Anderson*.

My Lords, Treasury Chambers, 6 December 1845.

1.—WE have received Mr. Trevelyan's letters of the 3d and 25th March 1845, inclosing copies of letters from the Secretary of the Admiralty, dated 14th August 1844, and from the Secretary of the Board of Ordnance, dated 20th November 1844, and 27th February 1845, relative to the suggestions contained in our Fourth Report, and requesting that we would favour your Lordships with any observations which we might have to offer on the different points adverted to therein.

2.—We have also received Mr. Trevelyan's letter of the 17th April 1844, enclosing a copy of the Treasury Minute, dated 29th March 1844, together with other papers relating to the intended examination of the War Office and Ordnance annual balance sheets by the Audit Board, and stating it to be your Lordships' desire that we should investigate and report upon the several points referred to in the said Minute.

3.—Before we proceed to refer in detail to the unsettled questions touched upon in the letters from the Admiralty and Ordnance, we think it advisable to recall to your Lordships' attention the directions conveyed in the Treasury Minute of the 26th March 1844, by which the recommendations contained in our Fourth Report were referred to the several departments for consideration; and we beg leave to show how far those recommendations have been complied with.

4.—The attention of the Lords of the Admiralty was called to the following suggestions:—

Points to which the attention of the Admiralty was called.

5.— 1st. That the annual provision for all the naval expenditure should be made upon the principle of voting only the sums expected to be called for during the year for which the Estimates were prepared.

6.— 2d. That the estimate for new works and repairs should be prepared according to the form recommended in our Report above mentioned, and that an explanation of the sums granted for surveys should be given on the Estimates.

7.— 3d. That the restrictions with respect to the sums voted for the half-pay of the Army, annually introduced in the Appropriation Act, should be extended to the Navy.

8.— 4th. That the Naval Department should credit on its Estimates the stoppages made from the pay of men belonging to the Ordnance Corps, in diminution of the vote for provisions for troops embarked on board Her Majesty's ships.

Navy Estimates for 1845–6, provide for the payments to be made during the year.

9.—The Lords of the Admiralty have stated in reply, by letter of their Secretary, of the 14th August 1844, that they were of opinion, in reference to the first point, that in estimating for naval expenditure, it was perfectly practicable to carry our recommendations into effect, except in the case of "New Works and Repairs;" and it must have been satisfactory to your Lordships to perceive that the naval votes, with the single exception stated, have been passed for the year 1845–6, upon one uniform principle of providing only for the services which

which are expected to come in course of payment during the year of the Estimate. We propose in a subsequent part of this Report to submit our observations upon the reasons assigned by the Admiralty for making the exception in regard to the vote for "New Works and Repairs."

Exception as to the vote for New Works and Repairs.

.—With reference to the second point, as to the alteration of the form of the Estimate for Works and Repairs, and the explanation to be given of Coast Surveys, their Lordships replied by their Secretary's letter of the 14th August 1844, that they were fully prepared to meet the recommendations of the Committee; and your Lordships will perceive, on reference to the Navy Estimates for 1855–6, pages 17 and 43, that our recommendations have been satisfactorily adopted.

Form recommended for the Estimate for New Works and for Surveys adopted.

.—The third point, as to extending to the Navy the provisions of the Appropriation Act, in which the regulations to be observed in the application of the vote for the half-pay of the Army are laid down, has been misunderstood. We were aware that there existed Orders in Council, prescribing the cases in which officers of the Navy and Marines, who are in the receipt of the emoluments of civil offices, are restricted from receiving their half-pay. Our object was to draw the attention of your Lordships to the want of uniformity in the manner of imposing those restrictions, and to suggest that the provisions of the clause annually introduced into the Appropriation Act should be extended to the Navy and Ordnance, so as to supersede all other authorities in those Departments.

Clause in the Appropriation Act as to Half-pay.

.—The stoppages to which the fourth point relates, have been this year credited in accordance with our recommendation.

Ordnance Stoppages.

.—Your Lordships will perceive, from the preceding statement, that the most important of our suggestions have been satisfactorily carried out in the Naval Department; and the difficulties connected with the few unsettled questions are such as further explanations will, we trust, entirely remove.

.—The attention of the Board of Ordnance was called, by your Lordships' Minute of the 26th March 1844, to the following recommendations:—

Points to which the attention of the Ordnance was called.

.— 1st. The revision of the classification of the Ordnance Estimates.

.— 2d. That the number of men to be employed in the Ordnance Military Corps should be specially voted.

.— 3d. The preparation of the Ordnance Estimates, on the uniform principle of providing only for the sums expected to be called for during the year for which the Estimate is prepared.

.— 4th. The transfer to the Ordnance Estimates of the provision for the Clothing of Colonial Corps.

.—A reference to the new form of Estimate laid before Parliament for Ordnance Services for the year 1845–6, will show that the alterations which we recommended in the classification of the Ordnance expenses, with a view to establish more uniformity between the Estimates of the three great Departments of the Army, Navy and Ordnance, have, to a considerable extent, been adopted. There are, however, two points to which we think it right to request the attention of your Lordships.

New form of Estimate adopted.

Two exceptions.

.—The first regards the form of the estimate for works and repairs. Annexed to the letter from the Secretary of the Board of Ordnance, dated the 20th November 1844, is one from the Inspector-general of Fortifications, dated the 23d May 1844, in which the reasons for not adopting the form of estimate which we had recommended for "works and repairs" are set forth. The Inspector-general of Fortifications states that the information required in the five columns would render the document very laborious to prepare, and that he sees no advantage in comparing in detail the Estimates of the past year with the proposed vote for the next.

Form of Estimate for Works and Repairs.

.—We beg leave to state, that we differ in opinion from the Inspector-general of Fortifications, with respect to the additional labour which the new form would impose on his department; and the form itself in which we proposed to exhibit the expense of works and repairs, will show that we had no intention of recommending a comparision of the details of the sums inserted for works, with those voted in the preceding year. The mode in which the comparison of the aggregate grants for this service is shown in the Navy Estimates of the year 1845–6 appears to us to be sufficient.

.—It is probable that the Inspector-general of Fortifications has misunderstood the remarks on the subject of works in our Fourth Report, in which we recom-

The smaller Works need not be detailed.

mended that the nature of each work or repair should be described, and has supposed our meaning to be that every trifling work should be detailed in the estimate. We are far from thinking that this would be desirable; we consider that it would be sufficient if all ordinary and incidental repairs were classed under a general head; but we are still of opinion that all new works and extensive repairs, involving the expenditure of large sums, should be fully described in the estimates. And in illustration of our meaning we beg to refer your Lordships to the Ordnance Estimates of the present year 1845–6, pages 49 and 50, in which various large sums are set down without any explanation beyond the name of the station where such works are to be executed; for instance, at Devonport and Keyham Point, a sum of 12,466 *l.* appears; at Guernsey, 8,607 *l.*; at Sheerness, 10,326 *l.*; at Portsmouth, 12,453 *l.*; and at Waltham Abbey, 10,129 *l.*; without any explanation to show whether these sums are required for new works or for repairs, for fortifications or for storehouses; whether they are votes in full of the estimated cost of such works, or only grants on account. Such explanations are given in the Navy Estimates, in which the new form of estimate for works has been adopted; and we must say, that we see no reason why the estimate for Ordnance Works cannot be prepared in the same form, and in accordance with the suggestions submitted in our Report.

Form of Estimate for Ordnance Surveys.

23.—There is another matter connected with the altered form of the Ordnance Estimates to which we are desirous of directing the attention of your Lordships; it has relation to the estimate of the expense of Ordnance Surveys, Vote No. 8, Scientific Branch. In our Fourth Report we recommended that more details of so large an item of expense (for which upwards of 1,200,000 *l.* has been already voted, should be given in the estimates; and we also suggested whether the form of estimate recommended for works in progress might not be applied to the estimate for surveys, our object being that Parliament should know, as far as practicable, the total estimated cost of every undertaking for which money was asked upon account, as well as the sums already granted for it. Annexed to the Report of the Inspector-general of Fortifications before referred to, is a letter from Colonel Coleby, dated the 2d November 1844, from the tenor of which we infer that the Ordnance Department is not prepared with a sufficiently accurate estimate of the probable cost of the surveys in progress, to admit of the preparation of an estimate in the precise form suggested by us. The reasons given by Colonel Coleby may be sufficient to make it advisable to omit, in some cases, the first column of the form submitted in our former Report; but we have evidence in the Ordnance Estimates for the years 1839–40 and 1840–41, that, in regard to the survey of Ireland, that form could be adopted without modification; and that as regards the other surveys, the total estimated cost, and estimate for completing them, is all that need be left blank. We beg to direct the special attention of your Lordships to the Appendix C., given at page 34 of the Ordnance Estimates for 1839–40, in which detailed information as to the various surveys was given to the House of Commons; and we submit that the attention of the Master-general and Board of Ordnance be directed to that document, and that a more satisfactory explanation of the difficulties which stand in the way of carrying out our recommendation than Colonel Coleby's Report supplies, be required from that Department before it is finally set aside.

Vote for the number of men for Ordnance Military Corps.

24.—The second point refers to the suggestion we made in our Fourth Report, that in conformity with the practice which had long existed in voting the Navy Estimates, and which had been more recently adopted in voting the Army Estimates, the number of men to be employed in the military branch of the Ordnance should form the subject of a distinct vote. It does not appear that this suggestion has been adopted; nor is the subject noticed in the letters from the Ordnance Department referred to us by your Lordships' directions.

Ordnance Votes to be taken for the payments to be made during the year.

25.—The third point to which the attention of the Master-general and Board of Ordnance was directed by your Lordships' Minute of the 26th March 1844, namely, that the votes for Ordnance Services should be taken only for the sums expected to be called for during the year for which the estimates were prepared, appears to have been understood by the Ordnance Department as admitting an extension to the 30th November following the termination of the year for which the grants may have been voted. This is a misconception of our meaning. We are aware that a certain period must be allowed after the termination of the year, for bringing to account the expenditure defrayed at Out-stations, at Home and in the Colonies, up to the close of the financial year;

r; but we never intended to suggest that payments made during the eight ıths succeeding the termination of the year could be properly charged back xpenditure belonging to the past year; on the contrary, we maintained t no department should have larger sums placed at its disposal than were essary for the payments during the year, and that it was inconsistent with design of an annual estimate to make provision for services not payable hin the period of the estimate. It appears, however, that, in either case, expenditure for works and repairs, and for surveys, could not, in the nion of the Inspector-general of Fortifications, be accounted for on the ıciple we have recommended. To avoid repetition, we propose to notice subject of Ordnance works at length in our observations on similar objecıs offered by the Admiralty in respect of works and repairs in the Naval ɔartment.

In our Fourth Report we informed your Lordships of the conflicting prin-.es upon which the Ordnance Department had acted in the application of ir grants; and we suggested, as a remedy for the inconsistencies which sted in this as well as in the other departments, that the estimates should prepared, and the votes passed, on the principle of providing only for the ıs which were expected to come in course of payment during the year for ich the estimate was prepared. In the Treasury Minute of the 26th March 14, before referred to, your Lordships expressed a hope, that as the Ordıce Department had already taken an important step towards the establishnt of that principle, in the provision made for works and repairs in the imates for 1843–4 and 1844–5, it would be found practicable to apply o all the different heads of Ordnance expenditure. It does not appear, howr, that the principle has been recognised in the preparation of the Estimates 1845-6; nor do the papers referred to us by your Lordships warrant us in ting that the Master-general and Board have come to any determination to ɔpt it hereafter.

Clothing for Colonial Corps.

The fourth point referred for the consideration of the Board of Ordnance, in ır Lordships' Minute of the 26th March 1844, related to the transfer from Army to the Ordnance Estimates of the provision for the clothing of colonial ps. It will be seen, on reference to page 13 of the Ordnance Estimates for year 1845–6, that your Lordships' instructions on this point have been ried into effect.

Clause in the Appropriation Act as to Half-pay.

Another recommendation of ours to which the attention of the Board of lnance was called by your Lordships was, that the provisions of that clause he Appropriation Act which prescribes the rules to be observed in the appliion of the sum voted for the half-pay of the Army should be extended to the lnance. There is not any reference to this subject in the letters and reports n the Ordnance Department referred to us by your Lordships; we have not, refore, any means of reporting whether any steps have been taken by that artment to give effect to our suggestions on that head.

Points to which the attention of the Secretary at War was called.

The attention of the Secretary at War was called to the following sugges-ıs:—

1st. That the Army Estimates should provide only for those expenses which are to be paid within the year.

2d. That the appropriations credited on the Army Estimates in aid of the votes should be the sums actually realized during the year preceding the estimate, instead of the prospective receipts expected to be realized in the year for which the estimate is voted.

3d. That the number of men to be employed in the Ordnance Military Corps should be set forth in the Mutiny Act.

Not any reply received from the Secretary at War.

We do not find among the papers transmitted to us by your Lordships, any ly from the Secretary at War to your Lordships' reference of the 26th March 4; and as the Army Estimates for 1845–6 have not been prepared on the ıciple of providing only for the charges to be defrayed within the year, and *stimated* instead of *actual* credits have been abated on those estimates, and her, as the number of men belonging to Ordnance military corps has not n introduced into the Mutiny Act for 1845, we apprehend that no decision been come to by the Secretary at War on the several points referred for his sideration.

34.—In the preceding observations we have brought under the notice of y
Lordships all the measures that have been adopted in consequence of t
Treasury Minute of the 26th March 1844, and have stated what are t
recommendations of our Fourth Report that still remain for future discussi
with the departments which they concern. We proceed now to offer so
remarks on the reasons assigned by the Admiralty for not applying to the v
for works and repairs the same principle of appropriation that they act u
in the application of the money granted under every other head of the Na
Estimates.

Principle adopted by the Admiralty in applying the Navy Grants.

35.—The principle adopted by the Admiralty in the application of the su
granted for naval services is, if we understand it correctly, as follows:—

Each vote is applied generally.

Exception as to the vote for works and repairs.

Reserve on the vote for works and repairs for 1843-4.

36.—The Estimate containing the detailed specification of the naval expenses,
classed under 19 general heads; the details under each general head a
intended to explain to the House of Commons the various items of expense f
which the gross sum under each vote is required. Although in voting the tot
sum for each of the 19 heads of the Navy Estimates, the House of Commo
may expect that the votes shall be applied, as nearly as circumstances w
admit, in conformity with the intention expressed on the face of the Estimat
it does not attempt that which in practice could never be carried out, namel
to limit the application of the amount of each general vote, by a speci
restriction in the Appropriation Act, to the exact proportions set down in t
detailed specification of the expenses, as shown under each head of the Es
mates; nor do the Lords of the Admiralty consider that the Appropriati
Act binds them not to expend in any case more than the sums shown under t
detailed items of each general vote. For instance, under the first vote of t
Navy Estimates for 1845-6, there is one sum specially set down for the wag
of seamen, a second for the wages of boys, a third for the wages of marin
afloat, and three other sums for pay and expenses of marines on shore, t
aggregate amounting to 1,328,053*l.* In the expenditure of this sum the Lor
of the Admiralty do not consider that the Appropriation Act binds them n
to exceed any one of the six divisions of the vote, as if they had been six d
ferent votes; but they consider that the general amount of the vote has be
placed at their disposal by Parliament for the pay of the Navy, to be applied
the proportions specified, as nearly as the actual wants of the service w
permit. Again, under Vote No. 13, where the services comprised in the v
are not, as in the preceding case, of an analogous description, but embra
expenses distinct in their nature, such as pilotage of Her Majesty's ships, passa
of distressed merchant seamen, signal stations, and other services, the Lords
the Admiralty appear never to have considered that, because that head of t
Estimates was subdivided, for the sake of explanation, into 13 items, the gene
vote could only be legally applied to the special sums set down in the Estima
for each of those items. The same rule has been adopted with respect to t
other votes for naval services, excepting that for works and repairs; and
regard to this vote we deem it our duty to observe that the practice of t
Admiralty appears to us to be very irregular. A reference to the figu
in the annual accounts of the Navy laid before Parliament will best expl
the course pursued in the application of the grants of Parliament for na
works. In the last naval account laid before the House of Commons (
the year 1843-4) the grant for naval works for that year is set down
234,868*l.*, and the actual expenditure defrayed and charged against that gr
is stated to be 239,212 *l.* Here is a clear excess of expenditure over the to
of the grant for works for that year, amounting to 4,344*l.* If the principle
appropriation, which we have described as being adopted by the Admira
with respect to all other services voted on the Navy Estimates, had been
tended to the vote for works, instead of a surplus available for future payme
on account of the works voted for that year, there would have been a cl
deficiency of 4,344 *l.* Your Lordships will, however, perceive, on reference
the account in question, that although the whole amount of the vote for wo
had been expended, and 4,344*l.* in excess of it, it is made to appear that th
was an unappropriated balance of the vote for 1843-4 for new works, amou
ing to 24,134*l.*, available for future payments; and a balance equal to that s
has been retained by the Admiralty out of the general surplus of the na
grants for 1843-4, to be expended on works in subsequent years, and, in o
humble judgment, without the sanction of a vote of Parliament.

Principle on which the vote for works and repairs is applied.

The only explanation we can give of this mode of proceeding is, that the ds of the Admiralty probably consider that the sum granted annually for ks is not, as it is with respect to all other services, a general grant for all works specified under that particular head of the Estimates, but that it sists of as many special votes as there are items in the general vote; and sequently, that although an excess of expenditure may be incurred under e of the subdivisions of the general vote, such excess does not affect the nces which may be unexpended on other subdivisions of the same vote. view of the case is borne out by the account for 1843–4, to which we have ady referred, and in which it is shown that a balance, amounting to 24,134*l.*, 14 items of the general vote for works remained when that account was ed, and was retained, notwithstanding an excess of expenditure, amounting 8,478*l.*, had arisen on other items of the same vote. But we are unable to lain to your Lordships upon what principle it is that the Lords of the niralty do not consider themselves justified in applying the surplus on some the subdivisions of the vote for works to defray the excess of expenditure other subdivisions of the same vote, while they consider that they can legally such excesses out of the surplus of the votes for wages, provisions, or any er service. The principle adopted by the Admiralty has the effect of kening the control of Parliament, by affording that department an oppority of expending for works and repairs sums which the House of Commons appropriated to other purposes; it tends also to increase unnecessarily the ount of the annual Estimates, by including therein a larger provision for ks than the department requires for the service of the year: it leads, reover, to confusion in the accounts, by keeping open the votes for works repairs for an indefinite number of years, and it impedes the attainment of that formity which it is so desirable to establish in the appropriation of the grants Parliament, and in the preparation of all accounts of public expenditure.

We have entered into this detail of the practice of the Naval Department with pect to the application of the grants of Parliament for naval works, because proposal contained in the letter of the Secretary of the Admiralty, dated the August 1844, to exempt the vote for naval works from the usual restriction o time under which other votes are by law appropriated, appears to us calcued to establish a principle which is fundamentally wrong.

Mode of framing the estimate for works and repairs.

It is stated in the letter from the Secretary of the Admiralty, dated the h August 1844, that with respect to the vote for works and repairs the Navy Estimates, "it has never been the practice of the Naval Detment to ask Parliament for a vote for a larger expenditure for public rks than it was fully expected would be disbursed during the financial r." We are prepared to admit the correctness of this mode of forming Estimate for works and repairs; and it does not appear to us that the ommendations contained in our former Report are at variance with the sting practice of the Admiralty *in the preparation of their Estimates* for this vice. What we submit is, that the sum granted for the expenditure for blic works, "fully expected to be disbursed during the financial year," ght to be applied to the expenditure actually disbursed during such financial r, and ought not to be appropriated in the manner just described It is stated the Admiralty letter, that in carrying on works of an extensive nature, merous circumstances will arise to prevent the possibility of making the enditure of the year tally with the estimate. This we readily admit; but great defect of the present Admiralty practice, in regard to works, appears us to arise from the attempts which are made, contrary to correct principles account, to exhibit an accordance between estimate and expenditure which s not really exist: thus when the expenditure during the year for a parular work falls short of the estimate for that year, the Admiralty practice o continue adding to that expenditure payments made in the succeeding r, until the desired accordance between estimate and expenditure has been duced.

Mode adopted to produce an accordance between the estimates and the expenditure for works and repairs.

Proposal of the Admiralty to omit the limitation of time in future Appropriation Acts, in respect of works.

We have attentively considered the reasons given in the Admiralty letter verted to, in support of the suggestion of the Lords of the Admiralty "to it the limitation of time in future Appropriation Acts, as far as public rks are concerned." The grounds on which this deviation from the general nciple of the existing Appropriation Act is recommended, are, that in works of extensive nature, unforeseen difficulties and delays may arise in making engage-

Reasons for expending less than the vote in the year.

ments with contractors for the performance of the works, and unexpect obstructions in carrying them on ; the impossibility of obtaining materials su posed to be at command, and particularly the state of the weather in the wint season ; these and various other circumstances, which cannot be foreseen wh the Estimates are framed, would appear to render it necessary, in the opinion the Lords of the Admiralty, to reserve such portions of the sums voted f public works as may remain unexpended at the close of the financial ye and to disburse the same afterwards. These are, no doubt, valid reasons offer to Parliament in explanation of a deficient expenditure in the ye as compared with the estimate ; but the naval accounts show that they are n the only contingencies which arise in carrying on public works. In the accou of the naval expenditure for the year 1843-4, to which we have previous referred, the explanation offered by the Admiralty to Parliament, of an *excess* expenditure for works, is as follows :—“ The excess in this vote arises from i having been found necessary to proceed with more despatch (to insure increas safety) in the execution of the undermentioned works than was anticipated wh the Estimates were framed, viz. at Woolwich, the New East Dock, completi Inner Basin, New West Dock, railroad to Masting Shears, clearing mud fro Basin, and at Malta the New Dock and Bakery ; all of which works were, mor over, of the highest importance, and delay would have occasioned serious inco venience and increased expense.

Reasons for expending more than the vote in the year.

41.—We may observe, moreover, that the time which elapses between the pr sentation of the Estimates of the coming year, and the close of the financi year in which the works have been executed, is so short, that there would see to be ample time for ascertaining whether any great fluctuation had then occurre or was likely to occur, and to provide for it in the Estimates of the ensuing yea

Uncertainty of naval expenditure is not confined to works and repairs.

42.—Circumstances may, no doubt, arise after the Estimates of the year have bee voted, to make it necessary to expedite the completion of some works, and retard the progress of others, contrary to the expectations formed at the tin when those Estimates were completed ; and thus a variation may be cause between the sums estimated and expended in the year for the different iten composing the general vote for works ; but it appears to us that the san uncertainty exists in the application of the sums voted for other naval service the votes for the wages of seamen, and for stores, &c., for instance, which ma be affected by the non-arrival of ships from foreign stations expected to be pa wages, the non-delivery of foreign timber and stores, and some of the servic provided for under Vote 13 ; and if it were once admitted that the difficulty equalizing the expenditure of the year for any particular service with th estimate for the same period, formed a valid ground for admitting “the limita tion of time in the Appropriation Act,” it is difficult to say where the lin between the grants for a limited and those for an unlimited period should b drawn. If a variation between the votes and the expenditure in the year shoul occur, the account laid before Parliament should, we consider, acknowledge th fact ; to antedate expenditure for the purpose of concealing such variation appears to us to be contrary to every sound principle of account.

Course to be adopted when votes are deficient.

43.—We therefore take the liberty of submitting to your Lordships our opinio that when a deficiency in the general vote for works is expected to occur, statement of the case should be submitted to your Lordships, in order that yo may determine whether the deficiency shall be made good out of expected su pluses on other votes, or if no such surpluses can be relied on, whether a suppl mental Estimate shall be presented for it ; but when, owing to unexpecte circumstances, a different distribution of the sums composing the vote is alon required, we submit that the Lords of the Admiralty should be authorised t apply the aggregate of the vote for works in such proportions for each work a the exigencies of the public service may dictate. In adopting this course, th necessity of confining the expenditure within the amount of the total estimat for the completion of each particular work, as submitted to Parliament in th first column of the new form of estimate for work should be kept in view. I that form a column has been provided for the purpose of showing to Parliamen from year to year during the progress of each work, the gross sum alread expended upon it, compared with the gross amount of the votes taken o account, so that the fluctuations which may take place between the expenditur and the estimate will thus be annually brought under the notice of Parliament

44.—Should your Lordships approve of these suggestions, the future votes fo

nava

aval works and repairs may be applied to the expenses to be defrayed within he financial year, and thus this remaining defect in the present system of oting the naval services will be removed.*

Votes for Ordnance works.

—Before we close our remarks on the subject of the Parliamentary grants for ·orks, we beg to offer a few observations on the report of the Inspector-general f Fortifications in regard to Ordnance works. We have no special recommenations to make with respect to the mode of estimating for and applying the otes for works executed in the Ordnance Department, as the suggestions we ave submitted in reference to similar services in the Naval Department are qually applicable to the Ordnance. We are desirous, however, to direct the ttention of your Lordships to the reasons given by the Inspector-general of 'ortifications for considering it impracticable to restrict the application of the ote for works to the payments to be made within the financial year.

Reasons offered by the Inspector-general for not applying them to the payments within the year.

—The Inspector-general states that there have been many cases in which the aoney voted by Parliament for new works could not possibly have been xpended within the year, arising from circumstances over which he could have io control; that unavoidable delays arise at foreign stations from the non-.rrival of stores demanded from England for carrying on works, and that half the vorking year has generally expired before the approval of the annual Estimates eaches many of the distant foreign stations. The Inspector-general is of opinion hat these circumstances not only prevent the application of the vote to the dis-)ursements for works during the year, but that they also render it quite imprac-icable for him to state the period, by date, when the account for the grant nay be finally closed.

The vote for works should be applied generally.

—We have already sufficiently discussed the difficulties which the Navy and)rdnance Departments entail on themselves by considering the vote for works n a different light from the votes for other services, and by attempting to follow ıp a special appropriation of the detailed items of that vote, instead of ooking to the appropriation of the gross amount of the vote as in all other cases of the Navy and Ordnance Estimates; and we have endeavoured to show, that f Parliament sanctions, and the departments adopt, the principle of appropriating he vote for stores, as well as those for other services, in such proportions in each case as the wants of the service may dictate, although the proportions may not tally with those shown in the detail of each particular head of the Estimates, there can be no reason why the grants for public works, which are admitted to be subject to greater uncertainties than other services, should not be applied according to the same principle. Until we received from your Lordships Mr. Byham's letter of the 20th November 1844, and its enclosures, we were under the impression that the principle which we have recommended of applying the vote for works to the expenditure defrayed during the financial year had been practically in force in the Ordnance Department for two years; and in our Fourth Report we directed the attention of your Lordships to the important change which took place in this respect in the formation of the Ordnance Estimates for 1843-4, in which a deduction was made from the gross estimate for works "for such portion of the said works and repairs as might not be completed, or for which contractors' claims might not be paid within the year, but for which, if necessary, provision would be required in future estimates." It would appear, however, from the Report of the Inspector-general of Fortifications that the change which was effected in that year in the principle of estimating for Ordnance works, has not led to a corresponding change in the principle of appropriating the vote, and consequently that the money for those services does not appear to be applied consistently with the votes of Parliament.

The principle of "payments within the year" was adopted in the Ordnance Estimates for works for 1843-4.

But the expenditure has not been charged in accordance with that principle.

Delay in the prosecution of Ordnance works till the passing of the vote.

.—We deem it necessary to submit to your Lordships some observations with reference to the statement made by the Inspector-general of Fortifications, that "half of the working year has generally expired before the approval of the annual Estimates reaches many of the foreign stations," because this statement

---

* The principle of providing in the annual Estimates for the payments *within the year*, for works and other services, has been recommended in various Reports to Parliament, viz.:—

In the Twelfth Report of the Commissioners of Public Accounts in 1784, pp. 171 and 173.
In the Twenty-first Report of the Select Committee on Finance in 1797, pp. 16 and 18.
In the Tenth Report of the Committee on Public Expenditure in 1810, p. 163.
In the Fourteenth Report of the Commissioners of Military Inquiry in 1811, pp. 263 to 270.
In the Eighth Report of the Select Committee on Finance in 1818, p. 72.
In the Third Report of the Select Committee on Finance in 1819, p. 100.

ment involves a very important principle. It is proper, however, to state that a reference to the books of the Paymaster-general for the present year has satisfied us, that the principle apparently recognised by the words of the Inspector-general, and in some cases acted upon, is by no means strictly adhered to in the payments for Ordnance works.

Cause of the change in the commencement of the financial year.

49.—It would appear from the Inspector-general's statement to be a rule in the Ordnance Department to delay the execution of the works provided for in their annual estimates, until the vote for them has been obtained, when "the approval of the annual estimates" is communicated to the Ordnance authorities at the different stations. As the Ordnance Estimates are not usually voted till late in the session, a delay of some months arises before the intelligence can reach the distant colonies. The intention of this delay in issuing orders for the performance of the works provided for in the annual estimates is, no doubt, that the public money may not be expended before Parliament has voted it. We do not mean to question the propriety of not applying the public money to any public service whatever without the previous sanction of Parliament. The principle was fully admitted in 1832, when the commencement of the financial year was altered from the 1st of January to the 1st April. The reasons which induced the Government to propose, and Parliament to adopt, that change, were, "that it was more consistent with the privileges of the House of Commons and with the theory of the constitution that the Estimates should be submitted for the ensuing year, previously to the supplies being voted, and before the Government had spent any of the money;" but it was admitted by the Government, in the discussion which took place when the change was proposed to the House of Commons, that "the success of the experiment depended wholly on the Estimates being voted before the 31st of March." Great doubts were, however, expressed at the time, as to the practicability of carrying the plan into effect, and subsequent experience has fully proved that they were well founded. However great the anomaly may be of expending public money before the House of Commons has voted it, we apprehend that the necessity for anticipating the grants is imperative, when Parliament has not provided in time for the annual charges of the naval and military services. Even if it were practicable to apply the rule to the payment of expenses incurred on home stations, it would be impossible to communicate the Parliamentary votes to the distant colonies in sufficient time to prevent the payment of public services in anticipation of the receipt of that authority. The principle may be a very desirable one in theory, but it would evidently lead to endless difficulties in the administration of the naval and military services, if it were attempted to carry it into practice. The departments whose duty it is to foresee the demands of the public service, and to provide for them, cannot avoid entering into engagements involving a prospective expenditure of public money, in anticipation of the annual votes; and the only remedy we can suggest is, not to interrupt the course of the public service, but to expedite the passing of the annual grants.

Special restrictions on the expenditure for works.

50.—We are fully aware that the special restrictions which have been imposed on the Departments in regard to the expenditure for public works, were rendered necessary by the irregularities practised in the appropriation of the moneys voted by Parliament;[*] and to prevent a recurrence of them it may be proper that special checks on such expenditure should still be maintained; but we respectfully submit to your Lordships whether the following regulations, which are founded on the Treasury Minute of the 13th March 1818,[†] printed with

---

[*] *See* Third Report of the Select Committee on Finance, 1817, p. 88.

[†] The Minute in question is as follows:

TREASURY MINUTE, 13 March 1818.

Regulating the mode of proceeding to be observed in matters connected with the Estimates.

The Earl of Liverpool communicates to the Board a memorandum which has been agreed upon by his Lordship, in concert with the Chancellor of the Exchequer, with the First Lord of the Admiralty, and the Master-general of the Ordnance, respectively, for regulating the mode of proceeding and of communication to be observed with respect to their departments in matters connected with the annual Estimates, and such heads of expenditure as are therein referred to.

My Lords read the said memorandum, which is as follows:

"With a view to carry into effect the recommendation of the Finance Committee, in their Fourth and Sixth Reports, 'that no department of large expenditure ought ever to be placed beyond the controlling superintendence of the Board of Treasury,' and to establish an uniform mode of communication by which the Admiralty and the Ordnance (the two great departments specially with the Ninth Report of the Committee of Finance of that year, would not carry such checks as far as they can be practically and beneficially enforced.

.—1st That no *new* works, *new* buildings, or *extensive* repairs should be *commenced* until they have been submitted to Parliament, and a sum voted for them.

Regulations proposed.

---

specially referred to in those Reports), may hereafter bring under the official cognizance of the Treasury—

"1st. Their Estimates for the service of the year proposed to be submitted to Parliament.

"2d. Any extraordinary expenses for new works, which, upon an emergency, may be deemed necessary within the year, although not included in the Estimates; and

"3d. Any proposition for a new salary, or further increase of any existing salary, or for the grant of any gratuity, a pension for good services, or of superannuation, or other allowances (except such as the parties applying for the same may be entitled to under any Act of Parliament or Order of Council now in force or hereafter to be established).

"It is proposed, that the Board of Admiralty should, on or before the 24th of December in each year, officially transmit to the Board of Treasury an estimate in which the expense of all proposed new works in the dockyards or victualling yards, or on account of any new buildings, or of any extensive repairs, where the expense should be estimated at 5,000 *l.* or upwards, should be distinctly stated, and should be accompanied by such observations or remarks as may be deemed important, for the information of the Treasury; and particularly stating, if possible, the period within which the proposed works are likely to be completed, and specifying distinctly the sums already expended upon each work, the sum to be expended within the year, and the sum which will be requisite for the completion of the same; upon the receipt of which estimate, the Board of Treasury should take the same into their consideration, and signify to the Admiralty their concurrence in, or dissent from, the whole, or any part of such estimate; and that the estimate to be submitted to Parliament by the Admiralty, should include only such services as have been approved by the Treasury; and in the event of any unforeseen circumstances arising between the period of voting the Estimates for one year, and that of submitting the Estimates of the year ensuing, which may, in the opinion of the Board of Admiralty, render it absolutely necessary to undertake any works or repairs not before contemplated, and exceeding the above sum of 5,000 *l.*, the circumstance should be represented to the Treasury, and their concurrence obtained for inserting the same in the next Estimate to be submitted to Parliament; and that the Admiralty should not (except under circumstances of indispensable necessity) commence any works whatever, until provision shall have been made by Parliament for defraying the expense; and should any circumstances occur, which in the judgment of the Board of Admiralty, might render the execution of any works for which Parliament had not made provision, absolutely necessary, an estimate of the expense to be incurred for any such work should be transmitted to the Treasury, and the causes which rendered the same necessary should be distinctly represented, and their sanction should be obtained previously to the commencement of the work, as well as their authority for including the same in the Estimates of the ensuing year. With respect to salaries, superannuations, &c. (with the exception already stated), that the Board of Admiralty should in the first instance, and previous to any report to the King in Council, bring under the official cognizance of the Treasury every proposition of this nature, stating the particulars of the case, and the grounds on which they intend recommending the same to his Majesty in Council; and that in every memorial to be submitted to his Majesty for granting any new salary or increase of salary, or pension, or superannuation, the concurrence of the Board of Treasury, and the date of the instrument by which such concurrence was communicated, should be recited.

"The same course of proceeding with respect to estimates and extraordinary works to be observed by the Master-general and Board of Ordnance. And with respect to warrants for granting any new salary, or increase of salary, superannuation, pension, or gratuity, that the same course should be observed as with respect to memorials from the Admiralty to the King in Council, for obtaining the previous concurrence of the Treasury, and reciting that concurrence in any such warrant to be afterwards submitted to his Majesty by the Master-general of the Ordnance.

"In carrying into effect this mode of conducting the official correspondence of the Treasury with the Board of Admiralty, and the Department of the Ordnance, it is to be understood as in no degree interfering with that unrecorded and confidential intercourse which must at all times exist on the part of the First Lord of the Admiralty and the Master-general of the Ordnance, with the First Lord of the Treasury and the Chancellor of the Exchequer, respectively, on all such plans and measures as either the First Lord of the Admiralty or the Master-general of the Ordnance may feel it their duty to bring under the consideration of their colleagues in the Cabinet, with a reference to the service of these two important departments, connected as that service is with the general interests, the foreign policy, and the security and defence of the empire; but in points of detail connected with the Estimates and other arrangements referred to in this minute, it is suggested, as well for the facility of explanation as for the saving of time and unnecessary correspondence, that it might be expedient to provide that the heads of departments under the Admiralty Board, such as the Treasurer, the Comptroller, and the Commissioners of the Navy, and the Commissioners of the Victualling Office; and in the Ordnance, the officers of the Board under the Master-general, should be directed to attend the Board of Treasury, in case that Board should wish for such information as it might appear to them would be more satisfactorily obtained from any of these departments by a verbal communication, than by a written reference to any of the subjects in question."

The Earl of Liverpool also states to the Board, that his Royal Highness the Prince Regent, having approved of the said regulations, it was further agreed between his Lordship and the Chancellor of the Exchequer, and the First Lord of the Admiralty and the Master-general of the Ordnance, that the said memorandum should be recorded in the minutes of the said respective departments, and that directions should be given for the punctual observance thereof.

My Lords are pleased to direct that the said regulations be duly observed in this office.

them. The new form of Estimate for works * contains colums for showing to Parliament all the particulars which the Treasury Minute of the 13th March 1818, requires, except " the period within which the proposed works are likely to be completed," which might be added to the form, if your Lordships should think proper.

52.—2d. Parliament having been informed of the total cost of such works in the preceding year's Estimate, and having approved of the execution of them by voting sums on account, the subsequent fixing of the amounts which may conveniently be allotted, out of the annual revenue, to the different departments, in part, or in full, of the balance of the Estimate unvoted, should, we conceive, rest with the Treasury. †

53.—The Admiralty and Ordnance Departments having obtained the concurrence of the Treasury, to the insertion of such sums in their Estimates, might, in the event of the Estimates not having been voted before the 1st of April, be allowed to proceed with their works, obtaining the sanction of the House of Commons to the Estimates at the earliest period they conveniently could; and the decision of the House would always be ascertained in sufficient time to check an excess of expenditure in the year, should Parliament adopt the unusual course of altering the proportions allotted to such works by the Government.

54.—3d. With respect to the ordinary repairs of buildings, the maintenance of which in a proper state of repair is at all times a measure of wise economy very unlikely to lead to a collision of opinion in Parliament, it does not seem necessary to require more from the departments than that they should obtain the concurrence of the Treasury to the insertion of the requisite sums in their annual Estimates, as directed by the Treasury Minute of the 13th March 1818, before quoted; the execution of such repairs might then be proceeded with in the same way that other current services are. Ships are built, repaired, and fitted out; stores are contracted for and received; freight engaged, and other services conducted, although the votes of Parliament may not have passed before the commencement of the financial year; and there seems to be no sufficient reason why works and repairs, excepting the *new* works, &c. already described, should not follow the same rule.

Annual accounts of expenditure are submitted to Parliament.

55.—In considering these points it is necessary to advert to the fact that the Army and Navy Departments now account to Parliament annually for the expenditure of their grants, which was not formerly the case; and that the Ordnance Department will shortly do so likewise; and a Parliamentary control over the expenditure for works, as well as for other services, is thus exercised, which former regulations did not secure.

Clause in the Appropriation Act as to half-pay.

56.—Before we conclude our observations on the several points touched upon in our Fourth Report which require the further directions of your Lordships, we beg to refer to the suggestion made in that Report, that the provisions of the clause in the annual Appropriation Act defining the rules to be observed in the application

---

* The form suggested is as under:—

Total Estimate for the Work.	Amount already Voted for it.	Gross Sum already Expended upon it.	Vote required for the ensuing Year.	Further Estimate for Completing the Work.

† The Select Committee on Finance of 1817, in their Third Report, p. 89, on the Ordnance Estimates, express their opinion on this point in the following words:—" And they desire to conclude this part of their Report, by expressing again the decided opinion which has already been applied to various parts of this subject, that no department of large expenditure ought ever to be placed beyond the controlling superintendence of the Lords Commissioners of the Treasury. From them every other office should expect, and from them the House will require, not a judgment as to the best mode of constructing, maintaining, or improving the works respectively belonging to each separate branch; but a judicious and economical allotment to every one of them, of such limited sums as can be assigned, with a due regard to the necessary expenses of every other service, and of the necessities, as well as of the resources of the country."

The same Committee, in their Sixth Report on the Navy Estimates, p. 203, after suggesting regulations to the same effect, conclude by stating, " By this arrangement, which will combine the forms which have from the earliest times prevailed in the practice of our Government, with that essential control which your Committee judge it necessary to place in the financial ministers alone, they hope that the results which they have so often recommended may be attained."

lication of the sum voted for the half-pay of officers in the Army should be ·nded to the half-pay of officers in the Navy, Marines, and Ordnance.

Uniform regulation suggested.

Ve found that these rules were prescribed by Act of Parliament for the ıy, by Orders in Council for the Navy, and by office regulations only for the nance; and we again submit whether one uniform regulation should not be blished for the three services. It may be proper to add that the clause rred to oes not apply to officers who may be in the receipt of retired full

Treasury Minute of 29th March 1844. Audit of the balance sheets of the Naval and Military Departments.

Having noticed all the matters adverted to in our Fourth Report which ain unsettled, we pass to the consideration of the subject of auditing the nce sheets of the Naval and Military Departments, referred to us for ort, in pursuance of the directions contained in your Lordships' Minute of 29th March 1844.

This Minute directs us to investigate and report upon the following points:—

st. The precise mode in which the audit of the naval accounts, prescribed he Act 2 Will. 4, c. 40, has been carried into effect.

d. The mode in which we would recommend that this system of audit ıld be applied to the accounts of the War Office and Ordnance, including improvements which we may have to suggest in the naval practice, which uniformity would be established, and admitted defects would be edied.

d. The nature and extent of the establishment which we consider most able for the purpose of auditing the accounts of the three departments of ıy, Navy, and Ordnance.

This audit is a recent regulation.

The audit of the balance sheet of an executive department of the Govern-ıt, with a view to secure the application of the public money in conformity ı the Act of the Legislature which directs its appropriation, is a regulation omparatively modern origin in this country. Hitherto it has been applied ly to the accounts of the Naval Department; prior to 1832, this department not practically subjected to any further Parliamentary control than that ch was exercised on the passing of its annual votes: much discussion took e in the House of Commons on these occasions, and an Appropriation Act , as at present, annually passed, strictly limiting the grants to the proportions ein prescribed for each service; and Parliament, considering that these ırities were sufficient, seem, in effect, to have dispensed with all further ıiry or control. Returns of minor details were occasionally called for; as no general account of the naval expenditure, compared with the votes, ever required, and no other steps were taken to secure a legal appropriation he sums voted, a great want of precision prevailed in the preparation of the mates and in the application of the grants. The attention of Parliament called to this subject by the First Lord of the Admiralty on the 25th ruary 1831.*

Misappropriations in the Naval Department communicated to Parliament in 1831 and 1832.

On moving the Estimates of the Navy for that year, he explained to the ıse of Commons that "Works of great extent in the department of the al service had been begun, completed, and paid for without the knowledge anction of Parliament, or without the subject having been once brought er the notice of the House of Commons; that those works were paid for of the surplus on other votes which were greater than was needed for the poses to which it was intended they should be applied." The following ks were then cited as instances in which the votes of Parliament had been eeded, or in which no vote had been obtained:—

		£.
Weevil - -	Expended without a vote - -	155,534
Cremill - -	Expended beyond the votes - -	225,441
Ascension -	Expended without a vote - -	10,000
Woolwich -	Expended beyond the votes - -	141,443
Leith - -	Expended without a vote - -	7,908

t was further shown that since 1820 the sum of 1,243,100*l.* had been ex-ded for "Sea Wages," beyond the sums voted by Parliament, and that this ess was caused by employing, year after year, a larger force than Parliament had

---

* *Vide* Hansard's Parliamentary Debates, 3d Series, Vol. 2, p. 947.

had sanctioned. To meet these excesses, it was explained that larger sums tha were needed had been voted for naval stores and for army provisions, t excess of grants beyond the expenditure for those services having amounted four years to 1,835,000*l.**

66.—On the 14th February 1832, the First Lord of the Admiralty, on intr ducing the Bill for the Consolidation of the Civil Departments of the Nav again adverted to the unconstitutional practice which had prevailed in t Naval Departments of disregarding the provisions of the Appropriation Act the application of the naval grants, and again detailed some of the cas before referred to, as well as others, in which large sums had been expend without proper sanction. He stated, moreover, that the law officers of t Crown had been consulted on the subject, and that they had declared the pra tice adverted to to be illegal.†

Plan proposed by the First Lord of the Admiralty to prevent the misapplication of the naval grants.

67.—The insufficiency of the regulations for securing the strict application of t votes of Parliament to the services for which they had been granted havi been thus clearly shown, the First Lord of the Admiralty added "that h should imperfectly discharge his duty, after having dwelt so much upon t misappropriation, in defiance of Parliament, of money voted for particul service, if he did not propose to the House a plan to prevent it in future." . . . . "His proposition was, that the Admiral should, on the 30th November, transmit to the Board of Audit the accoun of the Treasurer of the Navy closed up to the 31st March, and that t accounts, together with all vouchers, should undergo an effectual audi and that it should be the duty of the auditors, on the 31st January of eac year, to lay on the table of the House of Commons a report. That t report would embrace a balance sheet, comparing the expenditure with t estimates; that it would show what surplus remained unexpended, and wh had been expended beyond the estimates under each head. That the audito should also state any discoveries of improprieties they might have made, a submit any interrogatories which they might think ought to be put. Th within the period between the 30th November and 31st January, it would n be possible to make a full and effectual audit; but that it would be sufficient enable Parliament, first, to convert what was now a nominal responsibility the officer who brought forward the estimates, into a real responsibility: th the interrogatories, secondly, would enable members to ask questions, and t person who moved the estimates would have to give answers to those question and explain the interrogatories of the auditors."§

Reports on the public accounts of France.

Naval audit established by Act 2 Will. 4, c. 40, s. 30.

68.—Whilst these arrangements were under consideration, the first and secon Reports on the Public Accounts of France were laid before Parliament. Th evidence they afforded of the complete success of the Parliamentary contr established in that country over the application of all legislative credits, aide by the perfect organization of their system of accounts, could not fail t suggest the practicability of applying regulations of a similar tendency to department in which they appeared to be so much needed. In the Act of th 2 Will. 4, c. 40, for the regulation of the Civil Departments of the Nav a clause was therefore introduced, requiring that an account of the nava receipt and expenditure should be annually laid before Parliament, an that it should be audited and certified by an independent authority, the Aud Board.

69.—Before we proceed to remark upon the nature of the audit thus establishe we hope we shall not be thought to trespass unnecessarily upon your Lordship attention, if we submit a short outline, gathered from the reports referred to, the control exercised in France by

The Court of Accounts.

The Court of Accounts in France.

70.—Although the Court of Accounts was not finally established on its prese basis till the year 1827, it had existed, with more limited duties and powe from a very early period of the French monarchy. Its jurisdiction appears have been originally confined to a few branches of the Crown revenues. Fro those it was gradually extended to other departments of the public service, an it may now be said to embrace the superintendence of the entire accounts the income and expenditure of the country.

Th

---

* *Vide* Hansard's Parliamentary Debates, 3d Series, Vol. 10, p. 349.

† Ibid., Vol. 2, p. 953. ‡ Ibid., Vol. 10, p. 359. § Ibid., Vol. 10, p. 360.

-The functions of the Court of Accounts were for a long time limited to the vestigation of the accounts of the agents who received and disbursed the blic money ; its duties resembling those performed by our Audit Office. In 91 they were transferred to a new body, with the object of establishing a gher control ; but the arrangements were imperfect, and led to no satisfactory sult. In 1807, the Court of Accounts was re-established ; but still its control s exercised more on behalf of the Government than of the legislative autho- ies ; and it was not till some years after the Restoration that it was invested th sufficient powers to exert an independent public control.

-The Court of Accounts is a judicial court, to which all parties who have been gaged in the receipt and payment of the public money are required to deliver eir accounts and vouchers, and from which alone they can obtain a release m their responsibility. Its duties extend, moreover, to a revision of the lers for payment issued by the executive departments of the Government, th a view to ascertain that proper vouchers have been obtained, and that orders of payment have been issued in strict conformity with the financial vs.

-In addition to the Court of Accounts, the members of which hold their uations permanently, the King appoints annually a Commission composed of ree members of the Council of State, four members of the Court of Accounts, d three members of the Legislative Chambers. The members of the Com- ssion examine the general character of the annual accounts passed by the urt of Accounts before they are exposed to public discussion ; they trace the sults through the books in which they are recorded, and verify the agreement the totals with the details. The Commission draws up a report to the King, ich is laid before the Chambers to assist them in the revision of the accounts ; that report every misappropriation of the grants is pointed out, and a tabular tement is presented showing the receipts and expenditure of the year, as oved by the decrees of the Court of Accounts.

-From the Reports on the French Accounts, laid before the House of Commons 1831 and 1832, we learn that the whole of the public accounts of France, ether relating to income or expenditure, are kept on one uniform plan ; that processes of preferring, examining, admitting, and paying public claims is same in all departments ; that their forms are framed on one model ; that principle upon which the returns of all the departments are compiled being iform, they are blended without difficulty in the general balance sheet of the nance Department ; that the final account of every department requires the blic ratification of the Court of Accounts as to its correctness ; that the super- endence of that court reaches not only the cash agents who receive and pay ay the public money, but those also who authorise the public disbursements ; d that all the executive departments being required to lay before the Chambers counts showing how they have applied the credits granted to them, the control the Legislature extends over every branch of the public finances.

Present mode of auditing the naval balance sheet.

-Having thus briefly described the functions of the French Court of Accounts, proceed, in compliance with the directions of your Lordships' Minute of 29th March 1844, to show the manner in which the audit of the naval counts established by the Act 2 Will. 4, c. 40, s. 30, has been carried into ecution.

It is conducted at the Admiralty by an Audit Office examiner.

-The audit is conducted by an examiner from the Audit Office, who attends ily at the Admiralty, and examines the entries made in the original account oks kept by the Accountant-general of the Navy. The voluminous details mprised in these accounts, the constant references which are required in the aval Department to the vouchers on which the receipts and payments are unded ; and, moreover, the shortness of the time which elapses between the mpletion of the account, and the presentation of it to Parliament, render it cessary that the examination should keep pace with the daily progress of the count.

He has access to all original vouchers.

-The examiner has access to all original vouchers on which a payment, or a arge against the votes, may be ordered, and to all the books of record in ich such charges may be entered. He traces the annual votes, from the st record of them, through the accounts of all persons employed in disbursing em, until the payments made out of them finally range themselves under the rious heads of service into which the general votes are divided in the dmiralty books.

Annual votes.

Extra receipts.

78.—All extra receipts are in like manner traced from the general accounts
which they first appear to the heads of service to which they properly belon
and it is the examiner's business to take care that no portion of those receipts
carried in reduction of current expenditure, which ought to be carried to t
appropriations in aid of the service of a subsequent year.

Final payments.

Imprests.

79.—In his examination of the vouchers on which payments are ordered to
charged against the votes, he satisfies himself that they are "the usual a
regular vouchers," according to the provisions of the Act of Parliament, a
that they have been recorded in the Admiralty books, under the subdivisio
of the naval votes to which they appertain. If the payments are in the sha
of advances to sub-accountants for future disbursements, he traces them to t
debit of the parties receiving the money, and he takes care, when such deb
against them are subsequently removed, that the payments are placed to t
account of the votes to which they relate, and that "the usual and regul
vouchers" are produced in support of such payments.

Books of record.

80.—The naval payments are first recorded in books classed and prepared for th
entry of all necessary details; all entries in such books are compared with th
original vouchers from which they are made; these details are subsequent
transferred, in a condensed form, to other books: in all such transfers th
examiner verifies the accordance of the aggregate sums with the details whic
they are intended to represent: and finally, the examiner attests the correctne
of every entry in the principal books from which the annual account f
Parliament is prepared.

Irregularities reported to the Audit Board.

81.—He is careful, moreover, to call the attention of the Audit Board to ar
variation from the established principle upon which the account has been pr
pared; whether it be caused by charging a payment to a wrong year, or to
wrong vote, whether the charge be made in anticipation of the proper perio
or delayed beyond it; and he reports to them every defect in the mode
preparing the naval accounts, which he considers to be at variance with th
provisions of the annual Appropriation Acts.

Course of proceeding pursued by the Commissioners of Audit.

82.—If the Commissioners of Audit concur in the objections made by th
examiner, the Admiralty is requested to explain; and if the explanatio
afforded are considered by the Commissioners of Audit to be satisfactory, th
objections are not noticed in the auditor's report to Parliament; but if th
explanations are not furnished, or, being furnished, are not considered satisfactor
the Commissioners of Audit record their objections on the face of the accoun
and lay the same before Parliament.

Difference of opinion between the Admiralty and the Audit Board.

83.—A difference of opinion arose between the Commissioners of Audit and th
Board of Admiralty, when the examination of the naval account was fir
established, as to the extent to which it should be carried. The Admiralt
contended that the Act of Parliament only justified the Audit Board
reporting to Parliament how far the expenses under each general head of th
Appropriation Act had exceeded, or fallen short of the sum voted. Th
Commissioners of Audit, on the other hand, considered that according to th
spirit of the provisions of the Act, they were required to see that the nav
moneys were applied in conformity with the intentions of Parliament; that th
annual Estimates of the Navy, in which were detailed the various services fo
which the money was stated to be required, and upon which the House
Commons was induced to grant the supply, was the only evidence they cou
receive of the intentions of Parliament in granting the money, and that th
Appropriation Act was, in fact, but the legal form in which those estimat
were embodied; and, therefore, that in the consideration of the question, th
two documents could not be separated, one being merely explanatory of th
other.

84.—The Audit Board appears, however, to have yielded, after entering the follov
ing protest on the first annual account laid before Parliament:—

Protest of the Audit Board.

85.—"According to the terms of the Act 2 Will. 4, c. 40, s. 30, the Commissione
for Auditing the Public Accounts have considered themselves restricted
showing the excess and saving of the expenditure, with reference to th
heads of the Appropriation Act only, without noticing any excesses or saving
that may have arisen with reference to the detailed heads of expenditu
described in the Votes and Estimates of the House of Commons, which ar
included in the larger heads of the Appropriation Act. But they feel it
be their duty to state this circumstance, in order that there may be no mi
apprehension on the subject; and because it is obvious, that so long as ar
importa

portant heads of expenditure, which are separately voted by the House, and n which there may be differences of opinion in respect to their relative ounts, are included under one aggregate head in the Appropriation Act, the use of Commons will not have the means of ascertaining correctly, from the ount presented to them by this Board, to what extent their intentions have n adhered to."

We shall reserve any further remarks we may have to make on this subject til we come to the consideration of the mode in which we would recommend t the naval system of audit be applied to the accounts of the Army and dnance Departments.

-We cannot, however, refrain from noticing here a statement which appears the first naval account for 1832-3, laid before Parliament in 1834. It is tained in an extract from a letter, addressed by the Secretary of the Admi-ty on the 17th May 1833, to the Secretary of the Treasury, and printed at ge 3 of the account referred to. It is to the following effect:—That the t 2 Will. 4, c. 40, did not take away from the Naval Department of vernment the power of exceeding any head of expense, on their ministerial ponsibility.

The Admiralty not authorised to exceed the grants of Parliament.

-If the Admiralty meant by this statement that under the Act quoted, or der any other legislative sanction, they were authorised to exceed the votes Parliament, we must take the liberty of stating that we differ from their rdships entirely, as we believe that no such authority has been granted to Admiralty.

-We have thought it right to notice the statement in question, because it pears to us that this erroneous view which the Lords of the Admiralty have en of the powers vested in them by Parliament, may have had its effect producing irregularities which we shall have occasion to refer to hereafter.

-We have added, in an Appendix to this Report, a statement prepared by the aminer employed by the Commissioners of Audit in the revision of the naval counts, in which further details are given, elucidating the course of exami-tion pursued by him in carrying into execution the audit directed by the Act Will. 4, c. 40.

Mode of extending Naval system of audit to the Army and Ordnance.

-The next point on which we are required to report is as to the mode in ich we would recommend that the system of audit established by the Act Will. 4, c. 40, in reference to the naval accounts, should be applied to the counts of the War Office and Ordnance, including any improvements which may have to suggest in the naval practice, by which uniformity would be tablished and admitted defects would be remedied. Under this branch of our quiry it will be proper to examine—

92.—1st. The nature and extent of the authority vested in the Commissioners of Audit by the Act referred to, and the objections recorded by them against it.

93.—2d. The means by which an uniform system of auditing the balance sheets of the Naval and Military Departments may be established.

-We have already referred to the discussions which took place in Parliament the subject of the audit of the naval balance sheet, and we have endeavoured explain what were the intentions of those who introduced the measure.

Provisions of the audit clause of the Act 2 Will. 4, c. 40.

-In the Act 2 Will. 4, c. 40, s. 30, it was provided, that an account of the val receipt and expenditure should be annually prepared by the Admiralty; at this account should be compared with the vouchers by the Audit Board; at a copy of the account, certified by them, should be laid before Parliament; at the variations between the votes and the expenditure, under each head of e Appropriation Act, should be noted; and that any objections made to the count by the auditors which might not have been answered, or which might ve been unsatisfactorily answered, should be reported to Parliament.

-A proviso was added that the Audit Board should not be vested with any scretion as to the allowance or disallowance of any item of expenditure which ight come before them regularly vouched and allowed by the Admiralty.

Extent of the control vested in the Audit Board by that Act.

-The control vested in the Commissioners of Audit by the Act referred to, if r interpretation of the spirit of its provisions be correct, is sufficiently exten-e. They are charged with the supervision of the accounts of the naval penditure of the country, free from any control or influence of even the ghest department of the Government; they have the privilege of putting any interrogatories to the Admiralty, connected with the naval accounts, whic they may think proper; they are left unfettered in their discretion as to wha they shall admit to be satisfactory answers to their questions, and they ar placed in direct communication with Parliament, to which they are at libert to report the smallest misappropriation of the naval grants, and to sugges questions with the view of guiding and assisting its inquiries. The only restric tion under which they are placed by the Act is, that they shall not be investe with the power of disallowing any item of expenditure incurred and allowed b the Admiralty, in support of which the usual and regular vouchers shall hav been produced; and this restriction appears to be the necessary consequence their unconnected position in the public service.

The Audit Board could not exercise a discretion as to the allowance of expenditure incurred by the Admiralty.

98.—To enable the Commissioners of Audit to exercise a discretion as to the allow ance or disallowance of any expenditure incurred by the Board of Admiralty, would be indispensably necessary to give them a knowledge of all the acts the naval administration, that they might be made acquainted with the motiv and object of every expense before it was incurred; without this knowledge would be impossible for them to judge of the propriety of incurring it. Bu we believe that it will be readily admitted that the difficulties connected wit the proper exercise of such a wide discretionary power, even if limited to th Naval Department alone, would be insuperable; and even if those difficultie could be overcome, the principle of investing a subordinate Board, not respon sible for the acts of Government, with a power to disallow expenditure arisin out of those acts, appears to us too objectionable to be entertained. The Ac 2 Will. 4, c. 40, provided therefore, and in our opinion very wisely, that th Audit Board should not be invested with any discretion as to the allowance disallowance of any item of expenditure which the Lords of the Admiralty, wh alone are fully acquainted with the circumstances which justify it, and who ar responsible for the efficient administration of the naval service, may think expedient to incur.

Power of the auditors to report to Parliament.

99.—But while the Act laid the auditors under this restraint as to expenditu incurred on the ministerial responsibility of the Board of Admiralty, it ga them the power to call for such explanations in reference to the objections take at the Audit Office to the items of the naval account, as they might thir requisite; and to strengthen this power, and to show the desire of Parliame to support the auditors in the legitimate exercise of their control, the Act co tained a direction that all objections not answered by the Admiralty, or, accor ing to the judgment of the auditors, not satisfactorily answered, should be la before the House of Commons.

100.—It appears to us, therefore, that while Parliament designed to establish salutary check on the expenditure of the executive departments, they thoug it prudent at the same time to provide a security that such check should not so exercised as to impede the course of the public service.

The auditors object to the interpretation of the Act by the Admiralty.

101.—The objections which have been stated from time to time by the auditors the Act 2 Will. 4, c. 40, appear, however, to have reference, not so much to t terms of the Act itself, as to the construction put upon them by the Admiralt which construction, the auditors have represented, renders the sphere of the investigations too limited to enable them to exersise an efficient control. T practical question which immediately illustrates the point at issue is, wheth the Commissioners of Audit are justified in calling the attention of Parliame to the excesses or savings on each subdivision of a vote, or only to the result on the general vote.

The causes of variation between estimate and expenditure can only be satisfactorily explained by a comparison of details.

102.—It seems perfectly clear, that if Parliament is to be furnished with an expl nation of the *causes* of excess or saving on the general amount of a vote, it c only be done satisfactorily by contrasting the estimate and expenditure und all the subdivisions of the vote. If, on the other hand, it be considered suf cient to report to Parliament the mere fact of an excess or saving on the gene vote for a class of services, without showing how it has arisen, the comparis of details may be dispensed with. But we are of opinion that the intention Parliament, in requiring all the vouchers to be laid before the auditors, w that they might have an opportunity of directing the attention of the House Commons to every deviation from the intended appropriation of the votes, communicated to the House of Commons in the annual Estimates; and th cannot be done without instituting a comparison between the sums expend and those estimated under the several heads into which the general vote divided in those Estimates.

103.—Th

Parliament should be informed of every variation from the estimates on which the votes may have been granted.

—There may be no impropriety in the Admiralty making a different distriution of the grant from that which was submitted to Parliament in their nnual estimates, provided it be done under competent authority, and be endered necessary by an alteration of circumstances subsequently to the passng of the estimates; but in all such cases we hold it to be essential that there hould be no concealment of the fact, and that the naval account should be aid before Parliament in such a shape as to show the extent of such deviations, hat the House of Commons may know how far the money has been applied to he objects specified under each head of the Estimates, and that it may have an pportunity of calling for such explanations as the facts of each case may seem o them to require.

Misappropriations may take place without exceeding the aggregate of a vote.

—A misappropriation of the grants of Parliament, or, in other words, a different ppropriation from that which Parliament has sanctioned on the annual Estinates, whether as to services or amounts, may take place without exceeding he aggregate of a vote. Let us take as an example the first vote on the Navy Estimates, for the wages of seamen and marines. If Parliament had voted, say ,000,000 *l.* for the wages of 20,000 seamen and 10,000 marines, we consider hat it would be practically a misappropriation of the grant to apply it to the ayment of a force composed of 10,000 seamen and 20,000 marines, although here might be no larger sum expended on the whole vote than that which was uthorised by the Appropriation Act. Again, if the vote for naval stores were hown on the Estimates as amounting to 1,000,000 *l.*, of which 200,000 *l.* were pecially assigned to the purchase of steam machinery, we should consider, that f a sum of 300,000 *l.* out of the vote were expended for that object, it would be a different application of the sum voted from that which Parliament had sancioned; and that although the whole vote might not be exceeded, there would xist a necessity for preparing the account for Parliament in such a shape as to show that the proportions of the vote assigned to particular objects in the Estimates, had not been so applied.

.—We do not mean to contend that the executive departments should not be empowered, under proper sanction, to adapt the proportions of each general vote to the actual demands of the service; but we submit, that it is essential, that in the accounts of the appropriation of the votes, all variations from the distribution submitted to, and sanctioned by Parliament, should be shown, in order that Parliament may judge whether the degree of variation be such as to render inquiry necessary.

The changes in the Appropriation Act for 1845-6 have removed many of the auditors' objections.

.—Amongst the objections raised at the Audit Office to the naval balance sheets laid before Parliament since 1832, those relating to the different principles adopted by the Admiralty in charging the naval expediture against the grants, have, with the exception referred to at the commencement of this Report, been removed by the changes which have been introduced in the Appropriation Act since our Fourth Report was prepared.

The Commissioners of Audit consider their powers too limited, and that the naval audit has not worked satisfactorily.

.—The Commissioners of Audit refer in their secretary's letter, addressed to your Lordships on the 5th February 1844, to the difficulties they experience in the audit of the naval balance sheet, from the limitation of their powers; and they express their opinion that the provisions of the 30th section of the Act 2 Will. 4, c. 40, have not been found to work satisfactorily.

.—We have already explained why we cannot agree with the Board of Admiralty in the interpretation given by them to the spirit of the Act, and upon which interpretation the Commissioners of Audit have founded their complaint of not being invested with adequate powers; and as we shall have occasion to refer again to this point in discussing the measures which it will be our duty to submit for your Lordships' consideration, we shall conclude our notice of the auditors' objections by offering a few remarks on the opinion recorded by them, that the provisions of the Act which established the audit of the naval balance sheet "have not been found to work satisfactorily."

Beneficial changes in the naval accounts since 1832.

.—In the references which we have made, in a former part of this Report, to the discussions in Parliament which preceded the passing of the Act 2 Will. 4, c. 40, we have shown how imperfectly the estimates of the Naval Department had been framed up to that time, and how constantly the provisions of the Appropriation Act had been disregarded. Since 1832, a new order of things has been established; the estimates have been improved in their classification and details, and a nearer conformity has been introduced between the sums expended and those granted by the Appropriation Act; the surplus of the aggregate grants of the navy unapplied at the close of each year's service ha been surrendered to the Treasury; publicity has been given to the nava accounts; and a steady course of improvement has been going on. Lookin therefore at the beneficial changes which have taken place in the nava estimates and accounts since the passing of the Act 2 Will. 4, c. 40, and considering that some latitude must always be allowed in a service like the navy we feel bound to state that the provisions of the audit clause of the Act hav been useful in their operation: that they might, however, have been more sc is proved by the single fact that the Admiralty has been permitted to expen in the purchase of naval stores, since the Act referred to, about 360,000 *l.* beyon the sums appropriated by Parliament to that service, and that this sum ha been taken, without the sanction of Parliament, from the surpluses on othe votes which have been greater than the services for which they were demande required. Thus, while we admit that the regulations originated by that Ac have been useful in lessening the misapplication of the naval grants, they have not yet been successful in establishing a control which can be said to be altogether satisfactory.

Under what control should the future audit be conducted.

110.—In submitting for your Lordships' consideration our proposal to extend to the military departments the superintendence established by the Act 2 Will. 4 c. 40, over the application of the votes for naval services, the first question to be considered by your Lordships is, the authority under which that superintendence should be exercised. The Act quoted requires the Audit Board to superintend the naval accounts, and to report to Parliament, without the intervention of the Treasury; but the admission made by the auditors, after an experience of 12 years, that the provisions of that Act have not been found to work satisfactorily, has led us to inquire into the causes which have impeded the efficient execution of the duty intrusted to them by Parliament.

The control established by the Act 2 Will. 4, c. 40, is ineffective.

111.—We have already explained the nature of the powers vested in the Audit Board by the Act, and have endeavoured to show that, according to our interpretation of the spirit of its provisions, they are sufficiently stringent, considered in connexion with the duty which the House of Commons has marked out for itself. Parliament has assigned the duty of investigation and report to the Commissioners of Audit, and has reserved to itself a revision, to be founded on their report. The auditors have performed their task, and have submitted their objections, from time to time, on the naval accounts laid before the House of Commons, apparently without any result. This can only be explained by the fact of there being no special Committee of the House, whose duty it is to examine the accounts laid before it; and this circumstance leads us to the consideration of the question, whether a control of this nature would not be more beneficially exercised by that department of the Government which is charged with the regulation of the public finances.

112.—In assigning to the Commissioners of Audit the duty of superintending the naval accounts, without reference to the Treasury, the intention may have been to secure to Parliament the impartial reports of an independent Board, not responsible for any of the transactions which it might have to comment upon, and to place them beyond the influence of the Government; but these advantages might, we conceive, have been secured without dispensing with the intervention of the Treasury.

Treasury control advocated.

113.—The Treasury is the authority under whose direction all public grants are issued to the executive departments, and no exceeding of a grant, nor deviation from the estimates approved by the Treasury, is supposed to take place without its sanction. This alone would seem sufficient to show the necessity of the audit being conducted under the general control of the Treasury, and of al disputed questions being submitted for its decision. Many of the auditors objections might have reference to the very questions which had previousl engaged the attention of the Treasury, and obtained its sanction; others might be acquiesced in by the Treasury, and the authority it possesses over the departments would be sufficient to procure a correction of any irregularity without the intervention of Parliament. The ordinary duties of the Commissioners of Audit relate to the examination of the accounts of individua accountants; but those imposed upon them by the Act 2 Will. 4, c. 40, are of a very different and peculiar character, requiring them to watch the execution of the laws annually passed for the appropriation of the public money, and to verify the authorities for payment issued by high public functionaries

aries. The position of that Board, as compared with that which the Naval Military departments occupy in the public service, seems to point out expediency of their receiving support from the weight and influence of the asury.

The control of the Lords of the Treasury, assisted by the investigations of the tors, would be immediate, and constant in its operation, and the Treasury ld always command a greater knowledge of facts to guide its decisions.

The control exercised through the Paymaster-general is imperfect.

Another reason which induces us to recommend that the auditors' reports on Parliamentary Balance Sheets of the Naval and Military Departments should ubmitted to the Treasury, is, that the regulations established by your Lordships' utes of the 19th August and 19th November 1836, under which the Paymaster-eral was required to keep a check on those departments, as to the application heir votes, and to report to your Lordships any payments which might be red by them in excess of the Parliamentary grants, have not been found to mplish the object desired by your Lordships. A large sum is annually paid he Paymaster-general in the shape of imprests or advances for each of those artments, but more particularly for the Navy and Ordnance, which cannot be rately charged against the votes at the time the money is issued. These artments also receive and pay away money through their sub-accountants, ch never passes through the hands of the Paymaster-general. Moreover, the master-general never sees a single voucher upon which the orders for payment issued, and cannot therefore detect any improper charge against the Parliatary grants which may be made in the books of those departments.

The control to be exercised through the Audit Office will be more satisfactory.

As it has been determined by your Lordships to extend the Audit Office superon, which has hitherto been confined to the Naval Accounts, to those of the r Office and Ordnance, it would seem to be less necessary that your Lordships uld rely solely on the imperfect check which the Paymaster-general is required keep on the application of the Parliamentary votes. This duty will be more sfactorily performed by the Commissioners of Audit, who will have access to the original documents upon which the orders for payment may be issued, and the books in which the original entries of all the pecuniary transactions of the artments may be recorded; and they will thus be enabled to conduct, on behalf the Government and of Parliament, an efficient supervision over the appropria-n of the Naval and Military grants.

The Admiralty has considered the Act 2 Will. 4, c. 40, as withdrawing that department from the control of the Treasury.

The separate jurisdiction of the Audit Board, created by the Act 2 Will. 4, 40, would seem to have been understood by the Admiralty as withdrawing the val Department, in regard to the appropriation of its votes, from the controlling erintendence of the Treasury; in proof of which we may state, that when the ymaster-general reported to your Lordships (on the 26th March 1840) an excess xpenditure beyond the Vote for Naval Stores, and your Lordships called upon Admiralty for explanation, the answer returned by that Board was, "that the counts relating to the Naval Expenditure for 1839-40 were in course of preation for examination by the Audit Board, in conformity with the Act 2 Will. 4, 40, s. 30; and that the Accounts, when so made up and completed, would be nsmitted to that Board, accompanied, as usual, with such explanations and tements as the subject might, in the opinion of the Lords of the Admiralty, ear to require;" thus indirectly intimating to the Lords of the Treasury (who, nay be observed, share the responsibility of having issued beyond the amount he vote) that they did not admit their right to call upon them for an explana-n of an excess of expenditure amounting, on one single vote, to more than 000 *l.* The change we have proposed would appear, therefore, to be necessary the purpose of replacing the Treasury in that position of authority which, in Treasury Minute of the 13th March 1818 (founded on the Sixth Report of Committee of Finance of 1817), is claimed as vested in it by the constitution.

The Audit established in 1832 was only a partial measure.

It may be stated, however, in explanation of the arrangement sanctioned by the t 2 Will. 4, c. 40, that it was only a first and a partial change, introduced more an experiment than as a final regulation to be extended on the same basis; t it proceeded from a subordinate branch of the Government, desirous of reform-itself, but unwilling, probably, to submit to a restraint on the part of the asury which it might have considered inconvenient. But the extension of the val regulation to other departments gives additional importance to the subject, l makes it necessary that the error which, in our humble opinion, was committed

by

by the Act referred to, in dispensing with the control of the Treasury in
important a matter, should now be corrected.*

The responsibity of the Treasury involved in that of the subordinate departments.

119.—It may be urged, moreover, in opposition to the course of proceeding adopt
under the provisions of the Act 2 Will. 4, c. 40, that the difficulty of separati
the responsibility to Parliament of a subordinate department of the Governme
in questions of finance, from that of the Treasury itself, might make it ve
inconvenient that the Audit Board should submit a Report to the House
Commons, affecting the conduct of such department, without any communicati
with the Treasury on the subject.

Control should be vested in the Treasury.

120.—The careful consideration we have given to this subject has confirmed
opinion, that it would be more advantageous to the public service if the intend
control over the application of the grants made by Parliament to the Naval a
Military departments were exercised under the general supervision of your Lo
ships, who have the power of controlling the authority of those by whom t
expenditure is incurred; that the Audit Board should conduct the examination
the books of each department; and that in case the objections raised at the Au
Office to the accounts should not be satisfactorily answered by the departmen
the auditors should be required to submit them to your Lordships, by whom furth
explanations should, if necessary, be called for; and, finally, that the three depa
ments should transmit their yearly balance sheets to the Commissioners of Aud
who should be required to submit copies of the same to the Treasury, togeth
with a Report on each, to be laid before the House of Commons by your Lordshi
This course will give the House of Commons an additional guarantee for t
correctness of the accounts presented to it.

The auditors should investigate on behalf of the Treasury.

The Commissioners of Audit suggest that the Treasury should determine the principles of the audit.

121.—The next point connected with the establishment of an uniform system
auditing the balance sheets of the Naval and Military departments to which
are desirous of soliciting your Lordships' attention, is that referred to in the lett
of the Commissioners of Audit, dated the 5th of February 1844, in which th
remark, that "Your Lordships will have to determine the principle upon whi
this Parliamentary check is to be established."

Fixed principles of appropriation advocated.

122.—The preparation, in the different departments, of the Parliamentary accounts
their receipt and expenditure, as well as the examination of them at the Au
Office, and the decision of your Lordships upon disputed points, would be so mu
facilitated if certain fixed principles of appropriation could be laid down, and if t
restrictions under which deviations from the votes might be sanctioned were clea
defined by Parliament, that we venture to submit the following rules for yo
Lordships' consideration:—

Regulations submitted for consideration,

1st. As to deficient Votes.

123.—1st. That any expected deficiency of the grant of Parliament for any gene
head of the Appropriation Act, shall be submitted to your Lordships to determi
whether it shall be defrayed out of the surpluses on other votes, or whether
supplemental estimate shall be presented for it; and that it shall be deem
unlawful for any department to incur such excess of expenditure beyond the Parli
menta

---

* The importance of the controlling functions of the Treasury in this country is properly appreciat
in the following extract from a recent work published in France ("La Comptabilité Publique en Fran
par Mons. de Montcioux, 1840"). After discussing the necessity of establishing in France a Treasu
Department, presided over by the head of the Government, he says:—

"I might find a precedent for it in the past history of my own country, but I prefer supporting
views by citing an example which has all the authority of an existing institution. It is genera
admitted that the system of public accounts in England is very far from having reached the state
perfection which ours has attained. This idea is a just one; but there is a machinery in the Engl
system which is much to be envied. I know that it is encumbered with a little rust, and that it d
not work as smoothly as it ought; but its utility is nevertheless very apparent. England has und
stood, as did also our ancient monarchy, that all State questions, all administrative questions, the small
as well as the greatest, end by resolving themselves into questions of money. She has therefore creat
a Treasury above the other ministerial departments, with the understanding that the First Lord of
Treasury should always be the head of the Cabinet." "This system is much more rational than o
which alternately gives the first rank to every department. It is at the same time more satisfactory
the nation to know that he on whom the chief responsibility of the acts of Government rests, is a
charged more than any other with the pecuniary responsibility connected with them." "It is the F
Lord of the Treasury who, in concert with the other members of the Treasury Board, discusses the wa
of his colleagues, approves the amount of their estimates, and watches over the application of their vo
The Government being thus subject to an internal control, Parliament decides with a more compl
knowledge of facts." "I firmly believe that this supremacy of the Treasury over the departments
expenditure is the surest guarantee for the financial prosperity of a country. Condemn, if you plea
the details of the system of public accounts in England, its adherence to antiquated usages, the inco
pleteness of the budget, the want of unity and of method in the accounts, the scattered state of
financial returns, the impediments of privileged or local departments, the various and inconsistent mod
of book-keeping; but I must claim exemption for one institution, that of the Treasury."

ıtary grant without the previous sanction of the Lords of the Treasury, who uld be acknowledged by Parliament as authorised, upon their responsibility, to ction any payment of absolute necessity out of the surpluses on other votes of same Estimates. That all such excesses of expenditure, defrayed under the ction of the Treasury, shall be submitted to the House of Commons in the ual accounts of receipt and expenditure of the respective departments; and in event of the surpluses on other votes not having been found sufficient to cover excesses of expenditure, that the net deficiency shall be covered by an addi-al grant.

2. As to surplus Votes.

ndly. That no balance of a Parliamentary grant which may remain unappro-ted at the close of the year for which it is voted, shall be carried forward to ıbsequent year; but that such unappropriated balances shall revert to the ısury, and be applied as "Ways and Means."

hese two regulations appear to us to be in strict conformity with the prin-es of the existing Appropriation Act; but they are in several respects so h at variance with the practice of the several Departments, that we beg to nit our reasons for recommending them to the earnest consideration of your dships.

Excesses of expenditure are defrayed without the sanction of the Treasury.

he principle of the first regulation is already partially recognised by the rent departments; supplemental Estimates are occasionally brought forward ng the sitting of Parliament; but it is by no means understood, in some of departments, that any authority but their own is required to justify them ıcurring an excess of expenditure beyond the grant for any service, while iament is not sitting. In proof of which we beg to refer your Lordships he Naval Balance Sheets for the last 12 years, in which excesses of ex-liture beyond the grants, under various heads of service, have annually n place, and have been defrayed out of the surpluses on other votes, without sanction from, or communication with, your Lordships, or any other superior ıority.

The audit clause in the Act 2 Will. 4, c. 40, not a sufficient sanction.

t may possibly be represented that the 30th clause of the Act 2 Will. 4, c. 40, s an indirect sanction to the course pursued by the Admiralty. The direc-s of the Act are, that an account of the naval receipt and expenditure, sed under the heads of the Appropriation Act, shall be annually prepared he Admiralty, and that the Commissioners of Audit shall compare the same the vouchers, and lay a copy of it before Parliament, "noting under each l whether the expenditure has exceeded or fallen short of the sums voted Parliament for the naval service of that year for which the account is so le up."

It assigns no funds for the payment of excesses.

his clause undoubtedly would appear to contain an admission that excesses ond the grants may take place, but it gives no power to incur them, inas-h as it assigns no funds for the liquidation of them.

The Treasury Minute of 13th March 1818, applicable only to certain services.

The Treasury Minute of the 13th March 1818, to which we have before ded, is not sufficiently comprehensive in its directions to meet this question. oints out certain cases in which the sanction of the Treasury is to be obtained the Admiralty and Ordnance Departments before they incur expenses; but as reference chiefly to the expense of works and to new salaries, and leaves ouched all the other great heads of naval and ordnance expenditure. The ciple of that Minute is as applicable now as it was in 1818; and we are con ed that the serious violations of the provisions of the Appropriation Act, ch were stated to the House of Commons in 1831, and which were so well ulated to shake the confidence reposed by Parliament in those who are usted with the expenditure of the public money, would never have occurred, e regulations enjoined by that Minute had not been set aside.

Difficulty of calculating expenditure incurred abroad considered.

But it may be urged by the different departments, that as a large proportion their expenses under some of their heads of service is incurred abroad, they e not the means, in all cases, of knowing beforehand that an excess of ex-diture beyond the vote is likely to take place, and that they can only over that the vote is insufficient after the accounts have been received from oad, and the expenditure has been actually defrayed. This might occur, for ance, in the case of a ship or a fleet being severely damaged in action, or in a m, and the commanding officers being compelled to draw largely for stores repairs. But such cases speak for themselves, and they may be considered as eptions which rarely occur; and when they do take place, the circumstances ıld be reported to the Treasury at the earliest moment after the departments have received the information, in order, in order that the covering authority your Lordships might be then given. In most cases, however, the expendit incurred abroad is either defrayed by specific directions issued by the home aut rities, or, if not, it is of that uniform character, that there is no difficulty estimating the sum which will be required to meet it.

Two recent cases of misappropriation noticed.

131.—Before we close our remarks on this branch of the subject, we think it right notice two of the most recent cases, in which the Admiralty has applied balance of unexpended grants to cover the deficiency of sums voted for na stores. In referring specially to these cases, it is our object to show that th exists an imperative necessity for some such regulations as we have suggested, enforce a more strict observance of the provisions of the Appropriation Act.

132.—In the account of naval receipt and expenditure for the year 1843–4, before Parliament in February last, there appeared an excess of expendit beyond the vote for naval stores for that year, of more than 72,000*l*. The wh of this excess may be considered as having occurred during the last ten day the year, during which unusually large orders for payment of stores, exceed 100,000 *l*. in amount, were issued by the Admiralty.

133.—Again, in the naval account for the following year, 1844–5, a similar ex appears, attended by a still greater influx of payments during the last few d of the year. The sums ordered for payment on account of naval stores betw the 25th and 31st March amounted to the unusually large sum of 172,000*l*. which sum 100,000*l*. was ordered on the last two days of the year. It should remarked that these payments, when ordered, were known to be in excess of grant of Parliament, that Parliament was sitting at the time, and therefore a le provision for them might have been made; but owing to there being an appar surplus of grants under "Wages and Victuals for Seamen," and other heads of account, it was probably thought to be a more convenient though a less const tional course, to appropriate those surpluses in the manner we have described, t to apply to Parliament for an additional grant.

The proposed regulation as to surplus Votes considered.

134.—The second rule submitted for your Lordships' consideration is, that no bala of a grant which may remain unexpended at the close of the year for which voted shall be carried to the funds of the next year; and, as is frequently case, onward to future years; but that such unappropriated balances shall re to the Treasury, and be appropriated in aid of Ways and Means.

135.—In our Fourth Report we detailed the inconsistent modes adopted by different departments in charging their expenditure against the grants; department closing the account of a vote on the last day of the year; and dea with the balance on that day as an unappropriated surplus; another carry forward the balance to the account of the next year, and expending it under same head of service, but not in the period for which the sum was granted; w in their annual balance sheets these inconsistencies are kept out of view, the p ments made after the expiration of the year being carried back to the accoun the year for which the money was voted. To remedy this defect, we propo one consistent mode of voting and applying the annual grants. When recommendation shall have been fully carried into effect, the surplus balance be given up to the Treasury will be ascertained with much greater facility expedition, and one uniform rule will supersede the different principles wh have hitherto been recognised in stating the amount of the balance to be given as surplus.

Restrictions attached to Parliamentary grants.

136.—The grants for naval and military services are restricted to amounts, servi and periods.

137.—The restrictions as to amounts and services are generally admitted, though always observed; it is well understood that the expenditure for each service ou not to exceed the particular sum voted for it; but the limit to the sum gran has been, in many cases, without effect, because the limit of time has not b adhered to. To illustrate our meaning, we will describe the practice of Admiralty and Ordnance Departments, in expending their respective grants the "Purchase of Stores."

138.—The principle adopted by the Admiralty is this: the grant for naval store considered to be limited to the purchases to be made, and paid for, within period prescribed by the vote; and the amount of the grant remaining un pended when the year terminates, is understood to be so much surplus unap priated, and is surrendered in the general balance to the Treasury, to be applic aid of "Ways and Means."

139.–

.—In the Ordnance Department, the period to which the vote is limited is altogether disregarded; therefore the balance of the vote for ordnance stores which remains when the year terminates, is carried onward from year to year, until the vote is finally exhausted.

.—We have already pointed out that there remains now but one vote in the naval accounts to which the principle of carrying forward the unexpended balances applies. The Admiralty has stated in the letter of the 14th August 1844, to which we have referred at page 1, that it is necessary to make the vote for "Works and Repairs" an exception to the rule of applying the vote to the payments within the year.

.—The Board of Ordnance has also stated reasons why it should be left to expend the votes for "Works and Repairs," free from any restriction as to time.

.—Having already replied to the statements made by these two departments in a former part of this Report, we shall confine ourselves here to a notice of the legal objection which, in our opinion, applies to the practice pursued by them in reserving and carrying forward, from year to year, the unexpended balances for "Works and Repairs."

.—The annual Appropriation Act grants certain sums for the performance of certain works during a particular year; the restrictions as to the service to which the money is to be appropriated, the amount to which the expenses are to be limited, and the period during which the authority to apply the grant continues, are all equally binding on those departments.

The authority to apply the grant ceases when the period for which it is granted expires.

.—If the year for which the grant is made expires before the undertaking is commenced, or before it is completed, we consider that the vote, or so much of it as remains unexpended, lapses, and that a renewed application to Parliament is requisite to authorise the Government legally to apply such unexpended balances to the service of a succeeding year. This construction of the Appropriation Act is, we submit, consistent with the practice which has been followed by the naval department for many years under the greater proportion of the naval votes. If a larger sum is granted for labour, or for materials, than the Admiralty has an opportunity of applying to those objects within the year, the balance of the grant in each case falls into the general surplus given up, and all payments ordered for materials supplied, or work performed after the termination of the year, are provided for and defrayed out of the grants for the subsequent year.

Inconsistency arising out of a contrary practice.

—The present practice leads to this anomaly, that works and repairs performed by the Admiralty with Government materials and labour voted under Nos. 8 and 10 of the Navy Estimates are charged on one principle, while contract works provided for under Vote No. 11 are regulated by another.

The practice of antedating expenditure arises from the absence of defined regulations as to the date when the authority to expend the grant ceases.

6.—The objectionable practice of antedating expenditure in the annual balance sheets, or, in other words, of carrying back payments made in one year to the account of a prior year, arises entirely from the absence of a clear and definite regulation declaring the period when the balances of the annual votes shall be struck. The unexpended balances of the Ordnance votes have been left in the hands of the Ordnance Department for years after the termination of the period for which they were voted, and have been made available for the payment of expenses which had no reference to the service of the years for which the money was voted, and which ought to have been provided for in the Estimates of subsequent years. The rule we have submitted to your Lordships, namely, that all balances of grants unexpended at the expiration of the period for which they were voted shall revert to the Treasury, appears to us, therefore, an indispensable security against the misappropriation of such balances.

7.—The foregoing rules once recognised, and generally understood and enforced, the duties of the auditors would be very much simplified. We beg to offer a few remarks on the subject of these duties.

The duties of the auditors under the proposed audit.

8.—In the first place, we consider that as the War, Admiralty, and Ordnance Offices investigate all claims made upon them, and examine the accounts of all subaccountants intrusted by them with money for public disbursements, and as they alone can judge what sum it may be proper to allow or reject in a contractor's claim, or in the charges of a sub-accountant, it would be a waste of time to require the auditors to direct their examination to those points which must necessarily be fully investigated by the departments in question before they can admit the claim. It may be safely left to those departments to keep a proper check upon those whom they employ in the business of receipt and payment, or in the execution of any service involving an expenditure chargeable on their respective funds.

funds. The duty of the auditors in their examination of the vouchers for payments charged against the votes in the books of account, should, we think, be confined to the following points:

Final payments.

149.—In payments made to contractors and others for supplies, works, or other services, and which appear as final payments in the first record of them in the registers of payments, it appears to us that it will not be necessary that the examiner should do more than satisfy himself that the voucher on which a payment may be made is that usually required in support of such payments; that it bears on the face of it those evidences of examination and allowance by the proper authorities which the regulations of the department require before it can pass into the form of an order for payment. We take, as an example, a payment for stores; the voucher would be the contractor's invoice, setting forth quantities, rates, and value, proof of delivery, certificates of examination on each of these points, from the respective branches of the office charged therewith, and the form of sanction or allowance recognised by the custom of office. The voucher being found regular in all these particulars, the original record of the payment in the register, or first book of entry, should be compared therewith; and an essential point to be attended to in this comparison should be the description of the service.

150.—A different course of examination may apply to other services, different proofs being required; but every office acts, in the recognition of claims, upon settled forms, with which the examiner would find no difficulty in making himself acquainted; and after a short experience, an intelligent and practical accountant would soon detect any deviation from the established course of examination, or any deficient authority for the payment.

Delaying charges against the Votes.

151.—For instance, if a payment for an article supplied, or for a service performed, supported by a voucher in every respect sufficient to warrant its being carried to account as a final payment against the vote, were, notwithstanding, charged as an imprest or advance to be carried to the vote at some future date, this deviation from the usual official practice would at once suggest the necessity of inquiry, as the object of it might be to exclude that payment from the account of the year to which it legitimately belonged, thereby concealing what might be practically an excess of expenditure beyond the vote if properly charged, and to introduce it into the account of a subsequent year.

Anticipating charges against the Votes.

152.—Again, it might happen that a document deficient in the usual proofs required to justify a final payment, might, nevertheless, be passed as complete, and be charged against the vote in the books of account. An advance in anticipation of a supply, or of the completion of a service, not warranted by the terms of the contract or agreement, would be a case in point. Such a payment would become a subject of inquiry, and render a call for further papers necessary, to prove that this anticipation of the usual period of payment was not resorted to with the intention of misappropriating an ascertained surplus.

Advances to sub-accountants.

153.—Another class of payments, called "imprests," or advances to sub-accountants for the payment of public services, should be noticed. Little more would be required than to trace such payments into the registers, and thence to the personal accounts of the parties in the ledger. As no charge is ever made against a vote from a payment passed as *imprest*, the examiner would only find it necessary to satisfy himself that it was placed to account in such a form as to be kept in view as an advance to be accounted for at a subsequent date.

Outstanding advances should be examined before closing the annual accounts.

154.—The revision of all outstanding advances before the closing of the annual account would, however, be a necessary duty; for a large excess of expenditure beyond the grants might be kept back to be charged in the account of a subsequent year, if these outstanding imprests, or advances, were not examined with a view to ascertain whether accounts of the application of such advances had not been rendered in time to admit of their being charged in the account of the year. We think it would be desirable that the auditor should prepare every year, as part of his annual report on the accounts, statements of outstanding imprests, with such explanations against each as might satisfy your Lordships that no portion of the annual expenditure had been unnecessarily kept back.

Cash accounts of sub-accountants.

155.—The cash accounts and vouchers sent in by the sub-accountants of the Army, Navy, and Ordnance Departments are finally examined, and allowed by those departments. The auditor would examine such accounts only to the extent of satisfying himself that the proper sanction had been obtained for crediting the sub-accountants with the amount of their admitted disbursements, and that the classification of the payments was correct. As the cash account itself would be

the

the voucher from which the entries in the books of account would be made, the auditor would only have occasion to refer to the sub-vouchers in those cases in which he might require to ascertain that the payments had been properly described, and charged against the proper votes.

Examination of account books.

.—The examination of the registers, abstract books, journals, ledgers, and other books of account, should be complete; the original entry of every payment charged against a vote, in whatever book it may be recorded, should be carefully compared with the voucher. Every transfer from the books in which the details are collected, to those in which periodical results only are entered, should be carefully examined at every step, to secure a perfect accordance between the ledgers in which the final charges against the votes appear, and the books in which the details of those charges are registered. The ledger itself should be fully examined, and the accuracy of the general balance should be proved by an examination of the trial balance sheet.

Instructions should be prepared.

7.—It would be impossible to detail within the limits we have prescribed for our remarks on this subject all the points to which an investigation of such extensive accounts should be directed. It will be desirable that a complete set of instructions should be prepared for the guidance of the examiners as soon as sufficient practical experience of the new audit shall have been obtained.

Form of annual balance sheets.

.—There are a few remaining points connected with the form in which the annual balance sheets should be prepared for the Treasury and for Parliament, on which we are desirous of offering some suggestions.

.—The form of the naval account, hitherto laid before Parliament, has been a simple debtor and creditor statement, in which the disbursements have been classed under the few general heads mentioned in the Appropriation Act. The Act 2 Will. 4, c. 40, requires no more, it is true; but such an account is far too general to be of much practical value. It exhibits results in too condensed a form, and affords no information as to the details of the naval expenditure. We do not think that it is necessary to lay before Parliament an account of actual expenditure in the very detailed form adopted for the annual Estimates; but the account might easily be prepared under the heads of service into which the votes are divided in the Admiralty Ledger. This has already been done in the army account, and we recommend the form adopted at the War Office as one which might be advantageously followed by the Admiralty and Ordnance Departments. In the War Office Account, a statement (Paper E) explanatory of the balance of the account of receipt and expenditure has been introduced.

A balance sheet, in addition to the account of receipt and expenditure, is essentially necessary.

0.—It should be recollected that the naval and military expenditure is conducted in every part of the world, through the agency of little short of 2,000 different sub-accountants, and that the accounts are so intermixed with those of other public departments that no statement of such extended transactions can be considered complete which is not supported by a balance sheet. A few remarks on one or two items of the army balance sheet for 1843-4 will clearly explain how essential such a document is, as a corroboration of the accuracy of the balance declared on the annual account, and of the legitimate employment of the army funds.

Army balance sheet.

1.—On reference to the document in question (page 3), it will be seen that the expenditure in the year 1843-4 for land forces amounted to 3,556,018 *l.* 4 *s.* 9 *d.* Of this sum the proportion defrayed in the colonies, out of advances on credit to paymasters and others, from the commissariat chests, amounted to 1,043,395 *l.* 7 *s.* 4 *d.*, as shown at page 14 of the same document. In the absence of any statement explanatory of the balance of the account, there would be nothing to show whether these temporary loans or advances out of other funds for army services abroad, the expenditure of which had been included in the account, had been repaid or not. The whole might remain an unliquidated debt in the War Office books, and thus facilities might be afforded of employing the balance of army monies for purposes not sanctioned by Parliament. Another item of the balances shown in Paper E. (at page 12 of that account), will completely exemplify this. The "balance unappropriated" out of the army grants for the year 1843-4, as shown at page 3 of the account, was 512,011 *l.* 17 *s.* 6 *d.* It might be considered that this amount, being a surplus of grants after defraying all charges for the year 1843-4, could at once be given up to the Treasury; but the explanatory statement of the balances, at page 12, shows that a sum of 513,700 *l.* 15 *s.* 1 *d.* had been advanced out of army grants to pay services on account of the East India Company, to the 31st March 1844, and that the Company remained indebted to the army funds in a balance exceeding the surplus for

Advances out of Commissariat chests, for Army services.

Advances out of Army funds, for the East India Company.

for which the War Office was accountable to the Treasury; and, consequently, that the unappropriated balance of the account for the year 1843-4 could not be given up to the Treasury until the East India Company had liquidated their debt to the army funds.

162.—These, it will be admitted, are very important elements in the composition of any account which aims at showing the state of the finances of a public department; we recommend, therefore, that a balance sheet, properly so called, be prepared in each department, as an appendix to the account of receipt and expenditure, as it is clear that no such account can, in the absence of a statement of balances, or balance sheet, explain the actual state of their finances.

Under what authority should the proposed audit be established.

163.—The next point for consideration is, under what authority the proposed system of auditing the books of account and balance sheets of the War Office, Admiralty, and Ordnance should be established.

The Commissioners of Audit consider an Act of Parliament necessary.

164.—The audit of the naval accounts is provided for in the 30th and 31st clauses of the Act for the consolidation of the naval departments (2 W. 4, c. 40). The Commissioners of Audit state, in their letter to your Lordships, dated the 5th February 1844, "The case of the War Office accounts offers less difficulty, and the proposed check would be more easily attainable, even under the restricted powers of similar provisions to those of the Navy Act; but the duties intended to be exercised under the superintendence of this Board, in regard to those accounts are, nevertheless, of so peculiar a character, that we do not think we could undertake them satisfactorily to ourselves, or beneficially for the public interests, otherwise than under the authority of a legislative provision for that purpose."

The Appropriation Act should contain the necessary provisions.

165.—We concur with the Commissioners of Audit in the opinion that the audit check of the accounts of the three great departments of the Army, Navy, and Ordnance, to secure the legal appropriation of the Parliamentary grants for those services, ought to be established under the authority of an Act of Parliament; but the annual Appropriation Act appears to us the proper place in which to make the necessary provision for that duty. That Act already contains various clauses defining the rules and restrictions under which certain services included therein are to be applied, and we think that it would be found more convenient to introduce the required provisions into that Act than to obtain one specially for the regulation of the contemplated audit. An opportunity would be afforded every year of correcting any regulation which might be found defective in its operation; besides which, it might prove necessary, in cases of emergency, to depart from the usual mode of voting the money specially; in the case of a sudden expedition, for instance, when a vote of credit might be passed in a gross sum, and it might be wished that special provisions should be made in regard to the accounts to be laid before Parliament, showing the application of such sums. The annual Appropriation Act appears to us, therefore, the proper authority under which all regulations affecting the application of the annual grants should be enacted.

Nature and extent of the establishment required for the proposed duty.

166.—The third point upon which we are directed to report, by your Lordships' Minute of the 29th March 1844, is the nature and extent of the establishment which we consider most suitable for the purpose of auditing the accounts of the three departments of the Navy, Ordnance, and War Office.

It should be conducted under the superintendence of one officer, assisted by three junior clerks.

167.—The Commissioners of Audit, in their letter to your Lordships of the 5th February 1844, refer to the advantages which would result from a general superintendence, to be exercised by one and the same officer over the accounts of the three departments, with subordinate examiners acting under his directions. We concur in the opinion expressed by the Commissioners of Audit, that the examination of the balance sheets of the three departments should be one duty, conducted under the superintendence of the same person, and regulated by the same instructions. A divided superintendence would lead to increased labour and expense, to a want of uniformity in the system of examination, and probably to conflicting decisions. We believe that one officer could efficiently superintend the accounts of the three departments, allowing him, at the outset, a junior clerk in each department to assist in the examination of details. These junior clerks might be employed in the more simple portions of the duty, the examination of those vouchers on which few questions are likely to arise, the tracing of such documents into the registers, or other routine but necessary duties; leaving all doubtful and difficult points, whether arising from irregular vouchers or obscure entries in the books, to the investigation of their superior. The latter should direct

Their duties.

direct his particular attention to the principles upon which the annual accounts are prepared, and call the attention of the Board of Audit to any deviation from the provisions of the Appropriation Act, and to any variation in the principles acted upon by the different departments in the application of their grants. He should, moreover, prepare the annual reports on the accounts and balance sheets of the three departments, for the consideration of the Audit Board, prior to the Commissioners making their report to the Treasury for presentation to Parliament with the annual accounts.

Selection of the superintending officer.

3.—The value of an examination of this kind, in which so much must be left to the judgment and discretion of the superintending officer, will depend much upon the person selected for conducting it, more especially at the outset, when he will have to originate every question requiring consideration, without precedents or defined regulations for his government, and to frame detailed instructions for the guidance of his assistants. A general practical knowledge of accounts, experience in auditing accounts, and (as the application of the audit to the War Office and Ordnance accounts will be new) some knowledge of military expenditure will be necessary. It is obvious that duties of this description could only be satisfactorily performed by a person of tried experience and discretion.

Qualifications required.

Remuneration.

9.—With respect to emolument, we think that, considering the responsibility of his duties as auditor of the accounts of three great departments, he ought to be placed at least on a footing of equality with the principal clerks of the first class in the departments in which his duties are to be conducted. The rate of remuneration for the junior clerks, if placed on the regular establishment of the Audit Office, need not, in our opinion, be higher than that usually allowed to other junior clerks in that office, as the whole responsibility would rest on the principal.

One junior clerk may be reduced hereafter.

0.—We have proposed that *three* junior clerks be allowed at the outset, as the labour of the proposed duty will be greater during the first year or two than in after years, when its chief difficulties will have been overcome. Moreover, the Ordnance accounts not being yet kept on the same plan as those of the War Office and Admiralty, some additional labour will necessarily for a time be imposed on the examiners; but we are inclined to believe that when the whole of the accounts shall be kept on one plan, and the arrangements for conducting the appropriation audit placed on one uniform footing, one chief and two assistants will be found sufficient for the examination of the books and accounts of the three departments.

Recapitulation.

1.—Before we conclude our remarks, we beg to recapitulate the several points to which we have directed the attention of your Lordships in this Report, commencing with the questions discussed in our Fourth Report, which still remain unsettled.

1st. As to the Admiralty.

Suggestions contained in Fourth Report.

2.—In paragraphs 34 to 44 we have again recommended that the vote for naval works and repairs should in future be taken for the payments to be ordered within the financial year, and have replied to the objections offered by the Admiralty to our former recommendations on this subject.

2d. As to the Ordnance.

3.—In paragraphs 20 to 23 we have recommended the adoption of the form of estimate submitted in our Fourth Report for Ordnance works and repairs, and for surveys.

4.—In paragraph 24 we have repeated our suggestion that the "number of men" to be employed in the Ordnance military corps should be voted according to the practice adopted in voting the Army and Navy Estimates.

5.—In paragraphs 25 and 26 we have directed attention to the suggestion contained in our Fourth Report, that the votes for Ordnance services should be passed for the payments to be ordered within the financial year.

6.—And in paragraphs 45 to 55 we have replied to the objections urged by the Ordnance against the adoption of that principle in the votes for Ordnance works and repairs.

3d. As to the War Office.

177.—In paragraphs 29 to 33 we have noticed the following points referred to in o Fourth Report, which remain unsettled.

178.—The preparation of the Estimates on the principle of providing only for th payments to be ordered in the financial year;

179.—The appropriation of actual instead of estimated receipts in aid of the grants and

180.—The insertion of the number of men to be employed in Ordnance military cor in the annual Mutiny Act.

4th. As to the three Departments.

181.—In paragraphs 56 and 57 we have recommended that the provisions of th Appropriation Act, regulating the application of the vote for the half-pay of th Army, should be extended to the Navy and Ordnance.

182.—We have proposed, moreover, in paragraphs 50 to 54, additional suggestions t facilitate the application of the votes for works and repairs.

Suggestions contained in this Report.

183.—In reference to the question of auditing the balance sheets of the three departments, we have submitted,—

184.—1st. That the Treasury should exercise an efficient control over the department in the application of the grants of Parliament, through the agency of the Commissioners of Audit, who should conduct the examination of the accounts on behalf o the Treasury and of Parliament.

185.—2d. That all objections which may arise at the Audit Office to such accounts, t which satisfactory answers may not be returned, should be submitted to the Treasury, and that all further explanations required from the departments in referenc to such objections, should be called for by the Treasury.

186.—3d. That the annual accounts of receipt and expenditure for the Army, Nav and Ordnance, to be delivered by the three departments to the Commissioners o Audit for examination, should be accompanied by statements explanatory of th particulars of the general heads of expenditure, and of the balances, according t the form adopted by the War Office.

187.—4th. That copies of such accounts and statements should be transmitted by th Commissioners of Audit to the Treasury, accompanied by a report on each accoun in which the Commissioners of Audit should refer to any remaining objection to the items of the accounts which may not have been answered to their satisfaction.

188.—5th. That with a view to preserve the independence of the Audit Board, th Treasury should be required to lay such accounts and reports before Parliament.

189.—6th. That each of the three departments of Army, Navy, and Ordnance shoul be required on all occasions to report to the Treasury any necessity which ma arise for defraying expenditure in excess of the grants for any general head of th Appropriation Act, in order that the Lords of the Treasury may determine whethe a supplemental Estimate shall be presented for it, if the Committee of Supply b not closed, or that they may, upon their responsibility, as having the control ove the public expenditure, authorise the department to defray it out of the surpluse on other votes.

190.—7th. That all such excesses of expenditure beyond the grants, defrayed unde the sanction of the Treasury, should be clearly specified in the annual accounts o the respective departments laid before Parliament, and that explanations shoul be given therein of the circumstances which may have rendered such excesse necessary.

191.—8th. That no expenditure defrayed after the 31st March, when the year terminates, should be introduced into the expenditure of a prior year, but that it shoul be carried to the account of the year in which it may be defrayed.

192.—9th. That all unexpended balances of the grants which may appear on th annual accounts of the Army, Navy, and Ordnance Departments, when closed

shoul

hould be placed at the disposal of Parliament, to be appropriated in aid of "Ways nd Means."

—10th. That if the aggregate amount of the annual votes for Army, Navy, or)rdnance services be exceeded, the net deficiency should be made good by a pecial vote of Parliament.

—11th. That these regulations should be established under the authority of Par-iament, and that the necessary clauses for that purpose should be introduced nnually into the Appropriation Act.

—While these regulations appear to us calculated to strengthen the control of 'arliament and of the Treasury over the appropriation of the public money, we lo not entertain the least apprehension that they will prove inconvenient in their ractical application. They will impose some restraint, we admit, whenever an llegal application of the grants of Parliament may be attempted; but such ttempts, we believe, will entirely cease when fixed principles of appropriation hall have been laid down, and defined regulations for the guidance of the depart-ients in matters of finance shall have been established under the authority of 'arliament. And we look forward with confidence to the period when, under the nfluence of these or similar regulations, the annual reports of the auditors will ecome testimonials of the regularity with which the public money has been pplied, and of the accuracy with which the accounts of the naval and military xpenditure of the country have been prepared.

Allowance for preparation of the Ordnance Estimates.

—Before we conclude this Report, it is proper that we should advert to the com-iunication addressed to your Lordships by the Board of Ordnance on the 21st 'ebruary 1845, which was referred to us in Mr. Trevelyan's letter of the 3d Iarch 1845. In the communication referred to, the Master-general and Board f Ordnance have proposed to your Lordships that a special allowance of 200*l.* er annum be granted for distribution among those officers who are immediately oncerned in the preparation of the Ordnance Estimates. Special allowances ave been granted in the War Office and Admiralty for similar duties; and we oncur in the opinion expressed by the Board of Ordnance, that the labour and ifficulty of preparing the Ordnance Estimates justify the grant of the allowance licited. The duty of preparing the annual estimates is one which requires the reatest care and accuracy, and it involves, moreover, much extra labour and esponsibility. It is usually assigned to persons who, from their more extensive nowledge of the business of the department, and from their zeal and application, re best fitted for it; and we submit to your Lordships that, considering the areful manner in which the new estimates have been prepared, and the clearness ith which the extensive and complicated details under the several heads have een arranged, the officers who have so satisfactorily carried out the directions ontained in your Lordships' Minute of the 26th March 1844, are deserving of the llowance solicited for them by the Master-general and Board; and we take the berty of recommending that the allowance, to which your Lordships have recog-ised their claim, should be awarded to them from the date when the new form of stimate submitted in our Fourth Report was adopted.

APPENDIX.

Statement prepared by the Audit Office Examiner of Naval Accounts, explaining the mode of audit of the Admiralty Annual Account of Naval Expenditure.

STATEMENT prepared by the Audit Office Examiner of Naval Accounts, explaining the Mode of Audit of the Admiralty Annual Account of Naval Expenditure.

The Admiralty Parliamentary Account is examined preparatively: it is not, properly speaking, audited until it is made up, eight months after its concluding date; but it is daily examined upon some of its elements. The whole examination is made at the Admiralty, Somerset House, and much of it immediately upon the entry of the expenditure in the several office books. Other parts of it are made at different times as there is opportunity, the convenience of the department being always consulted, and the audit confined to one individual.

The examination extends to all claims, accounts, and gratuities, presented and allowed, or *ordered* for payment; in short, to every official decision by which a charge against the public is appointed to be raised within the period of the account.

The claims of contractors and other persons performing a service, or delivering supplies, are taken up *in original*, after first undergoing the usual examination of the Admiralty Office, and after a bill has been issued in payment of the amount found to be due. In examining these claims, it is observed that there is placed upon them a subscription of the particular head of service to which they belong, and that this subscription is correct; then, that they are the "usual or regular vouchers," as expressed in the Act of Parliament, and bear upon them the prescribed, or at least the usual authority or statement establishing the claim to payment. The object of the subscription upon the voucher is, that the bill shall be issued for the service thus pointed out.

These vouchers are not entered in any book, but are afterwards brought by the auditor to the book in which the bill made out in payment of any one of them has been entered,—for comparison with this entry or "registry" of the bill, by which it is ascertained, with respect to every bill, whether it has been issued upon "regular" grounds—for the service directed upon the voucher (to which it is ultimately to be charged)—and for the correct amount. Observation is also taken of the year to which, in a marginal column in this book, the particular service is adjudged to be charged.

But the bills being entered (although in their respective "registers"), yet daily and promiscuously with respect to their amounts and particular subsidiary heads of service, the posting into the journal and ledger, which is monthly, could not be made from these first registers, of which there are four of this promiscuous character. The bills are therefore transferred, singly, from them into one book for the whole, called the "Abstract Register of Bills," where they are ranged under their various subsidiary heads, amounting to **162**; two of these heads, (viz., for Naval and Victualling Stores,) being further distinguished into 86 more, the entire transfer being still in the order of the daily dates, and traced in the course of this audit, bill by bill. There are also two registers for the daily entry of bills issued for the service of "Pilotage," and that of "Distressed Seamen," which are transferred, in like manner, into the Abstract Register in their monthly amounts. These are examined upon the original vouchers, and traced as before stated.

The "Abstract Register" is then added up under each subsidiary head for every month; and the amounts being taken out upon lists for other official objects, are posted from those lists into the journal, bearing date upon the last day of each month respectively. These additions of the Abstract Register are verified, and the correct transfer of them into the journal traced, in this audit.

The ledger is posted directly from the monthly amounts of the "Abstract Register," under these 162 heads, and is examined in this first instance by having the entries made in it called over against those in the journal, the auditor marking against each entry the page in the journal at which it may be found, as the proof of the ledger examination.

The above statement, however, has reference only to the audit of that portion of the expenditure which is defrayed by Admiralty bill, payable by the Paymaster-general.

Another portion of it arises upon the accounts or claims of naval officers, pursers, agents, and consuls, which are examined (audited) upon the vouchers transmitted with those accounts, as to the sums to be charged to each head of service. These are traced into the account current, if there be one, at the close of the account; and, in all cases, into an abstract of services and total amounts placed officially on the account for allowance and posting, and thence into a book called "Abstract of Accounts, No. 1 or 2," in which, as in the "Abstract Register of Bills," the expenditure is recorded under subsidiary heads. The transfer of the expenditure from this book into the journal is in monthly portions, which are verified and traced, the transfer being that of such accounts as have been passed in any month.

The accounts of storekeepers and paymasters at home and abroad are not audited upon the vouchers belonging to them, (the vouchers not accompanying the accounts when sent to the auditor,) but merely upon that revision of the account and official report upon it which have previously taken place,—in which every service and sum have been referred, in an account current at the close of it, to the particular subsidiary head under which they are to be posted. The transfer of this expenditure into another book, also called "Abstract of Accounts," (No. 1,) and thence into the journal, is then traced, as in the other officers' accounts abovementioned.

The

he accounts of the Paymaster-general for the office at Whitehall, and his establishments he outports, called "Cash, Town," and "Cash, Ports," are audited upon his own statet for the town accounts, and for the ports (viz., Chatham, Sheerness, Portsmouth, and mouth), on that of his clerks at those stations, verified by a resident clerk of the niralty, and approved by the Superintendent of the port, and upon the admission and wance of these accounts at the Admiralty. There are two accounts for each outport, one the payment on books, pension lists, &c.; the other for contingencies. In neither are vouchers sent to the auditor, but the charges in both are traced into abstracts of heads ervice and aggregate sums made upon the accounts, thence into official accounts-current he two accounts incorporated, made at the Admiralty for the use of the department, and nce into separate subsidiary books kept distinctly for these accounts of the Paymastereral. But it is to be observed, that the sums charged in the Paymaster-general's own ount are *verified as paid* in the particular audit it undergoes in the *Audit Office*, so far hat portion of the expenditure is concerned, which is defrayed by bills issued by the miralty, but in which the *services* stated receive no verification.

he Admiralty receipts (called "Extra Receipts" in the Parliamentary account) consists efly of repayments for stores supplied and services rendered to, or performed for other artments of Government or private individuals, or of the proceeds of old stores or ships l, and form a prominent feature in the accounts of storekeepers at home and abroad, and ecially in those of the Paymaster-general. They are audited by being traced into subsidiary ks for receipts only, containing, first, the heads of receipt, the total annual amounts of ich are placed upon a future estimate, as "Appropriations in Aid" of the Parliamentary nt for their particular class of service; and containing, secondly, the ordinary *heads* of enditure. In the storekeeper's accounts, every receipt is traced from the account-current the close of it to its entry into these subsidiary books, either under a head of "Approation in Aid," (and then it is traced further, not only into the journal, but into the annual ount, and into the estimates), or it is seen to have been entered in this receipts book der its proper head of the expenditure, and then it is traced into the journal as a credit, ning in abatement *under that head*, of the amount to be charged against the public. In Paymaster-general's accounts, the receipts in town are checked upon his weekly lists mitted by the Admiralty.

The Paymaster-general, however, being understood never to receive money on the naval count, but upon an application from the Lords of the Admiralty, a further audit of his eipts is made through the Admiralty book, in which is entered every sum which is the bject of such application, the entry thus becoming a sort of voucher (to the extent of its n validity) to the sums acknowledged to be received, and the service upon which they e founded. This book is traced from the earliest date not marked in the preceding Audit, d every sum therein noted to have been received by the Paymaster-general is taken out der the head of service to which it has been assigned. This abstract of the Admiralty ok is then compared with the Paymaster-general's weekly lists of receipts for the period der examination, by which the ledger entries (for these receipts only) are again confirmed.

The journal is further audited than has been hitherto expressed, by an occasional perusal its contents and examination of its "cross" or adjusting entries, to see how far the expenture once recorded under any head of service, may have been maintained in its full debit, modified by transfer entries to or from other heads, from whatever cause arising. To just the charges strictly belonging to the naval, victualling, and other several departments spectively, declarations respecting the auxiliary supplies from department to department or om head to head, for each quarter, are made by the "principal officer" of each; and these e traced into a subsidiary abstract book for these declarations, and thence into the journal, e auditor considering his duty with respect to them to cease when this is done, and taking as a certainty, that although new works are sometimes placed upon the Estimates under her heads of service, without its being manifest, yet that the aid thus lent from these other rvices to that of new works, cannot possibly be charged, first, as "New Works," from the ementary voucher (which *is* for "New Works"), and then, secondly, from the transfer stated these declarations. At the close of the period for making up the account, both the journal d the ledger are again carefully examined.*

It has been stated already, that it is noted in this audit, that the vouchers bear upon them ther the prescribed or the usual sanction for payment. The clause in the Act by which this dit is appointed, requires that they shall be the "usual and regular vouchers," by which has en understood, "vouchers authorised for payment according to the custom of the office;" d upon this interpretation the audit has been conducted, so far as relates to the validity of ch. Vouchers sustained by the quotation of a contract, or where the payments are reguted by Act of Parliament, and all *orders* for payment bearing the signatures of two Lords the Admiralty, and stating the particular service and the amount, have been regarded as e "usual and regular vouchers," whether those payments or even services have been conmplated by the Estimates and Votes or not. Thus the purchase of an invention or patent, rge gratuities for scientific discoveries, advances or gratuities to contractors, varying from the

---

* The account being ordered by Parliament to be presented, "distinguished under the heads of the ppropriation Act," which are only 19; and the ledger being prepared upon both these 19 heads and pon the subsidiary services included under them, the net expenditure of all the *minor* heads is compared ith that recorded under each *principal* head to which they belong (being that named in the Approriation Act), and the total amount is then traced into the columns of the annual account.

the strict conditions for payment, and other expenditure not appearing to exceed the intenti of the Act, have not been made the subject of objective observation by the auditor; whi the undertaking of works, or their expansion or suspension irrespective of the votes, th placing of sums paid for services performed for other departments under a mere transitio head, whereby so much *bonâ fide* expenditure is withheld from the account presented t Parliament, the charging under certain heads of the Appropriation Acts, services apparentl belonging to other heads therein voted, the omission upon the account of sums advance from foreign sources, although the services defrayed with them have formed part of th charge of the same year, or the transfer of the payments of one year to another, inconsist ently with the ordinary course of the account, have been formally pointed out, as involvin a misstatement of the transactions, the outlay, or the balance of the year, and occasionall of all these at once. But when queries have been raised upon these objections, and th explanation afforded has prevented its being laid before Parliament in the account, th auditor has considered this to amount to an acquiescence in the principle, on the groun of the equivocal nature of the powers at present committed to the Commissioners of Audi as by them expressed upon some of the accounts laid before the House, and has not felt i his duty to renew the objection, except in cases of magnitude. And when objections hav been once distinctly placed upon one of those accounts, so going before Parliament, th mention only of the recurrence of the same grounds of objection has been deemed by th auditor to be sufficient, the Commissioners in their certificate upon the copy of the accoun that is presented annually, invariably referring to their notes and observations on the forme accounts.

At the commencement of this audit, the 30th clause of the Act, 2d Will. 4, cap. 40 having prescribed that the account should be made up "under the several heads expresse in the Appropriation Act," went on to require that it should be "certified, as to its *correctness*, by a comparison of the expenditure with the vouchers, as well as how far it migh fall short of or exceed the sums voted;" involving the necessity that the amount of ever voucher should be seen to be placed under the head of service therein named. This objec of the audit was particularly defined in a letter from Mr. Barrow (now Sir John Barrow) of the 6th July 1832, to the Lords of the Treasury, upon the duties to be performed; bu as many of the heads of the Appropriation Act included many services distinct from each other, some of which might be wholly at rest while others should be greatly exceeded, a difficulty would have remained respecting the examination (audit) of the account, and the limiting of the Report to the amount charged to the general head of the Appropriation Act or the extending that Report to the expenditure for each distinct and exclusive service therein provided for, had it not been stated in another letter of Sir John Barrow to the Commissioners of Audit, dated 5th August 1832, that it was the *Estimates* that were *vote* under the heads to be charged in the annual account.

It was indeed understood at the time that the express object of the audit was, that Parliament should be made acquainted with the expenditure on certain distinct public works, and other particular subjects of its votes, and not merely with the aggregate and undefined expenses for a class of services; and this principle had been clearly stated in a preliminary paper of the Accountant-general of the Navy, in which he observed, "It is essential, as a rule, in regulating the mode of posting the expenditure into the ledger, to keep in view the purposes for which, *according to the Estimates laid before the House, the respective sums have avowedly been voted.*"

It was therefore upon a persuasion that the account ought to be examined and reported on according to the deliberated vote of Parliament upon the Estimates laid before them, that this audit was commenced, no other instructions having at any time been given, but the whole proceeding upon the discretion of the auditor, subject, as far as possible, to the letter of the Act of Parliament, to the authority of the Commissioners of Audit, and the arrangements o the department under whose orders the account is prepared.

The arrangements were private. It was stated in a letter from the Lords of the Admiralty to the Commissioners, dated 2 July 1833, after queries had been transmitted upon the "Provisional Account" for the year 1832–33, founded upon the principle of an investigation of and report upon, the subsidiary items included under the general heads, that "arrangements had been made with the chairman of the Audit Board at the Admiralty, on the 25th June 1833, as to the course of proceeding;" but no directions were given to the auditor arising therefrom; and it was only from the observations of Mr. Larpent upon this and all occasions when the several reports upon the account were under consideration, that he could form an opinion of any understanding that had then been come to. The first printed account however, bears sufficient testimony, in the appeal therein made to Parliament, that the question of an examination, according to the Estimates for the subsidiary heads, had no been conceded by the chairman; at the same time that these subsidiary heads had bee introduced by their Lordships upon the face of this first account, in their explanation respecting excess of expenditure, thus rendering it impossible they should escape the report inasmuch as the Act required it to be stated whether those explanations were satisfactory The principle also is clearly asserted in the second account, in the objection of the Commissioners of Audit against one of these subsidiary heads altogether, that of "Incidental Works;" nor have the Admiralty hesitated to acquiesce in it in their replies to the queries that have arisen on the several accounts.

(signed) *Geo. D. Whiting.*

Audit Room, Admiralty, 16 July 1845.

TREASURY MINUTE, dated 13th January 1846.

Review of the Sixth Report of the Committee, and previous correspondence.

My Lords have before them the Sixth Report of the Committee, consisting of ir William Herries, Chairman of the Audit Board; Mr. Brooksbank, Chief lerk of the Financial Department of the Treasury; Mr. Anderson, Assistant aymaster-general; and Mr. Thomas, the Chief Officer of the Account Department of the Ordnance, who have been engaged since the year 1840, during uch intervals of leisure as their other laborious official avocations have left hem, in inquiring into the system of account and audit in the War Office and Ordnance, and, so far as is necessary for the establishment of an uniform ystem of account based upon the results of actual experience, in the Naval Department.

Their Lordships have also reviewed the previous correspondence connected ith this subject, and have particularly adverted to the reports and letters noted elow.*

Unfixed expenditure in the Naval and Military departments.

The great bulk of that portion of the public expenditure of this country hich is unfixed, and therefore particularly requires to be regulated and hecked by a system of account based upon sound practical principles, is conucted by the great Naval and Military Departments.

Revision of the Naval Accounts in 1832.

The most important step towards the establishment of such a system was aken on the occasion of the revision of the Naval Accounts in 1832, when the ooks in which the details of the Naval Expenditure are recorded, were re-cast n a connected plan on the principle of double entry, and a balance-sheet, rranged under the heads specified in the Appropriation Act, has since that year een annually laid before Parliament, certified by the Commissioners of Audit, ho examine the accounts and vouchers so far as may be necessary to satisfy hemselves that the Naval grants have been expended in conformity with the otes of Parliament.

Revision of War Office Accounts.

The War Office accounts have been re-organized on the same principle, at he recommendation of the Committee appointed in 1840, and under the immediate superintendence of Mr. Anderson: a balance-sheet showing the result of ach year's expenditure, in greater detail than the Naval Balance-Sheet, has een laid before Parliament in every year since the 1st April 1841; and it has een arranged that an uniform system shall be adopted of auditing the appropriation of the Parliamentary grants for the Navy, Army, Ordnance, and Commissariat Services, by means of a single establishment in communication with ll four departments.

Preparatory arrangements in the Ordnance

In the Ordnance Department, the form in which the annual estimate is laid efore Parliament has been revised, as a preparatory step to the introduction nto that department of a system of account and audit similar to that in use in he Navy.

and Commissariat.

The same has been done in regard to the Commissariat.

Other improvements made, and experience acquired.

Many other improvements have from time to time been made in the mode of reparing the estimates and accounts of the different departments, all tending o the same result of establishing, under the general superintendence of the Treasury, an uniform system of accounting to Parliament for the annual grants or Naval and Military services. The investigations of the Committee of Inquiry ave also led to the collection of a large body of information on the subject, nd to a strong light being thrown on some of the more difficult parts of it, and much actual experience has been gained of the practical working of each part of the new system of account, as compared with that which it is intended to supersede.

Under

---

* Report of the Committee appointed by their Lordships' Minute, dated 4th February 1840, to nvestigate and report whether the existing system of audit at the War Office was or was not such as o afford sufficient security to the public interests, and whether that system would be rendered more fficacious by the adoption of checks, similar to those which had lately been introduced at the Admiralty.

Treasury Minute thereon, dated 27th November 1840.

Treasury Minute, dated 3d December 1841, directing that Mr. Thomas should be added to the Committee of Inquiry, and that the Committee should extend their investigations to the system of ccount and audit in use in the Ordnance Department.

Fourth Report of the Committee of Inquiry, dated 7th March 1844.

Treasury Minute thereon, dated 28th March 1844.

Treasury Minute, dated 29th March 1844, directing the Committee of Inquiry to report on the most convenient mode of extending to the Accounts of the War Office and Ordnance the system of uditing the Naval Accounts prescribed by the Act 2 Will. 4, c. 40.

Uniform principles of account ought to be established.

Under these circumstances, their Lordships are of opinion that the time has arrived for applying to the Naval and Military Departments, in an uniform and consistent manner, those principles of account which have been recommended by the highest authorities on the subject, and have stood the test of a practical trial, and for giving them the force of positive rule; and my Lords will proceed to state, as briefly as possible, what those principles are, and in what manner they should be applied.

1. Estimates laid before Parliament to be approved by the Treasury.

1. According to the immemorial practice of this Government, as explained and enforced by the Treasury Minute of 13th March 1818, only such services are to be included in the estimates to be laid before Parliament by the Executive Departments, as have been approved by the Treasury or Financial Department, either as the result of previous correspondence, or on a consideration of the estimates themselves, which are laid before the Chancellor of the Exchequer previously to their being submitted to Parliament.

2. Parliamentary appropriations not to be departed from without the sanction of the Treasury.

2. No Executive Department is authorised to exceed the sum appropriated by Parliament under each general head or vote in their respective estimates, or to apply any surplus which may exist under one vote to supply the deficiency on others, without the express previous sanction of the Treasury, to be given on a written representation of the circumstances which render the adoption of such a course indispensable for the public service.

3. The Votes to be for sums expended during the year; a balance to be struck at the end of the year, and any unappropriated balance to be surrendered to Parliament.

3. All the votes, including that for works and repairs, are in future to be taken for sums to be expended during the year; and on the last day of the financial year, the annual account is to be closed and the balance is to be struck at all the stations at home and abroad; and any unappropriated balance that may appear, when the accounts shall have been made up to that day, to have remained on the aggregate of the votes of any department, shall revert to the Exchequer, to be reported to Parliament for the purpose of being applied as ways and means.

4. The aggregates of the Votes for Works may be applied within the respective estimates for the Works.

4. Provided the expenditure for each work included in the Admiralty and Ordnance Estimates is confined within the amount of the total estimate for its completion, submitted to Parliament in the first column of the form applicable to this vote, the Lords Commissioners of the Admiralty and the Master-general and Board of Ordnance, will, after the new form of estimate for works and repairs shall have been fully adopted, be at liberty to apply the aggregate of their respective votes for works, in such proportions for each work as the exigencies of the public service may require.

5. The War Office and Ordnance Accounts should be closed as soon as possible.

5. The annual account having been closed as above described, on the last day of the financial year, eight months are allowed, according to the existing Naval system, for the arrival from the different stations abroad of the accounts of the preceding financial year, and for making them up previously to the general account being delivered to the Commissioners of Audit. Whatever period may be necessary for receiving and consolidating the subordinate accounts, must in like manner be allowed to the War Office and Ordnance Departments, but it is very desirable that the period fixed should not be longer than is indispensably required for the object in view. The cause of the great delay which has hitherto taken place in closing the Ordnance Accounts, which renders the accounts, when furnished, of little avail for any practical purpose, and the proper means of remedying it have been already pointed out in their Lordships' Minute, dated 3d December 1841, as one of the most important points for the consideration of the Commissioners of Inquiry.

6. Appropriations in aid to be the sums actually realised during the preceding year.

6. The appropriations credited on the estimates in aid of the votes are to be the sums actually realized and brought to account, during the year preceding the estimate, instead of the prospective receipts expected to be realized in the year for which the estimate is voted.

The "credits in aid" have already been placed on this footing in the Navy, Ordnance, and Commissariat Estimates, and when a similar change shall have been made in the War Office Estimates, there will be nothing left to be desired on this point.[*]

7. That

---

[*] It was nevertheless, after this, considered desirable to make a further change, by paying the contingent receipts into the Exchequer as they accrued, thereby relieving the Annual Estimates of this foreign element, and securing that the contingent receipts should be promptly carried to account.—*See* Treasury Minute, 2 March 1848, page 113.

7. That detailed audit, the object of which is to allow or disallow the different ems of expenditure, according as they are or are not conformable with depart- nental rules, or are or are not supported by proper authorities and vouchers, ill continue to be conducted by and on the responsibility of each department; ut that higher and more general description of audit, the object of which is ascertain and report whether the grants of Parliament have been duly pplied to the purposes to which they have been appropriated by the annual ppropriation Act, as explained by the annual estimate upon which that Act s founded, will be conducted in future by the Commissioners of Audit under he superintendence of the Treasury.

7. The detailed audit to be conducted by the department; and the appropriation audit by the Commissioners of Audit, under the superintendence of the Treasury.

8. A detailed account will be annually prepared by each department for the nformation of the Treasury, according to the form in which the annual Army ccount is now prepared, including, in addition to a comparison of the expen- iture with the grants under each of the general heads stated in the Appro- riation Act, a statement of the result of the actual expenditure, as compared ith the estimates, under the subordinate heads into which the votes are divided n the departmental ledgers; and also an explanation, similar to that given in ne War Office account, showing what the balances consist of. This account ill be transmitted by each department to the Commissioners of Audit on or efore a date hereafter to be fixed.

In making their Report on this account, the Commissioners of Audit will ll the attention of the Treasury to every considerable deviation between the stimated amount and the actual expenditure under the several subordinate eads into which the votes are divided in the estimates, submitting at the same me any explanations that may have been furnished to them of the circum- ances which rendered such deviations necessary.

8. A detailed account according to the estimate and a statement of balances to be rendered by each department, and reported on by the Commissioners of Audit to the Treasury.

9. An abstract account will be annually prepared by each department for the nformation of Parliament, according to the form in which the annual Navy ccount is now prepared, showing the results under the general votes or heads nto which the expenditure is divided in the Appropriation Act, which account ill be transmitted by each department to the Commissioners of Audit at the ame time with the more detailed account adverted to in the two preceding aragraphs.

In their Report on the Parliamentary account of each department, the Com- nissioners of Audit will call attention to every considerable deviation between ne estimated amount and the actual expenditure under the general heads ated in the Appropriation Act, and will submit the explanations with which ey may have been furnished of the circumstances which rendered such eviations necessary.

The Commissioners of Audit will transmit the last-mentioned account to the reasury, with their report upon it, in sufficient time to admit of its being laid efore Parliament on a day to be hereafter fixed.

My Lords are desirous that the accounts of the financial year, ended on the 1st March preceding, should be presented before the close of the succeeding nancial year, or as soon after as practicable.

9. An abstract account, according to votes, to be rendered by each department, and reported upon by the Commissioners of Audit to the Treasury for the information of Parliament.

10. The Commissioners of Audit will refer to the Treasury any question that ay arise in the course of the examination of the accounts, which may appear require their Lordships' authority or decision.

Their Lordships concur in the opinion expressed by the members of the Com- nittee of Inquiry, and by the Commissioners of Audit, that the audit check of the ccounts of the four departments of the Army, Navy, Ordnance, and Commis- ariat, the object of which is to secure the legal appropriation of the Parliamen- ary grants for those services, ought to be established under the authority of an ct of Parliament; and as the annual Appropriation Act appears to be the roper place in which to make the necessary provision for this duty, it is equested that the Committee of Inquiry will prepare and submit to this Board draft of such clauses as they may consider best calculated to accomplish the bject in view, in order that they may be submitted to Parliament as part of ne next Appropriation Act.

10. Questions connected with the examination of the accounts to be referred to the Treasury.
The appropriation audit should be established by Act of Parliament.

The members of the Committee state their opinion that one officer could fficiently superintend the accounts of the three departments, allowing him at ne outset a junior clerk in each department to assist in the examination of the

Establishment required.

details, and they justly remark that the value of the examination will depend so much upon the qualifications of the person conducting it, as to make a careful selection particularly necessary. They also recommend that the superior officer should be placed, with respect to emolument at least, on a footing of equality with the principal clerks of the first class in the departments in which his duties are to be conducted. Their Lordships will hereafter consider the rates of salary proper to be allowed to the Naval and Military Auditor and his assistants, and they will select for these appointments the persons who may appear to them to be best qualified for them.

Precise instructions to be prepared for the Naval and Military Auditor.

It is their Lordships' wish that precise instructions should be prepared by the Commissioners of Audit, in concert with the Committee of Inquiry, for the guidance of the Naval and Military Auditor in the important and delicate duty which will be confided to him.

The usual special allowance to be granted for the preparation of the revised Ordnance Estimates.

Their Lordships concur in opinion with the Committee of Inquiry, that, considering the extra labour and responsibility which the preparation of the Ordnance Estimates, in their revised form, involves, and the satisfactory manner in which this duty has hitherto been executed, a special allowance may with propriety be granted to the officers who are charged with the preparation of the Ordnance Estimates, similar to that which is granted for the performance of the same duty at the War Office and Admiralty; and my Lords are accordingly pleased to authorise the grant of a special allowance of 200 *l.* per annum, for distribution among those officers who are immediately concerned in the preparation of the Ordnance Estimates, to commence from the date when the new form of estimate recommended in the Fourth Report of the Committee of Inquiry was adopted.

Minute to be promulgated.

Transmit a copy of this Minute to the—

Committee of Inquiry,
Commissioners of Audit,
Lords Commissioners of the Admiralty,
Master-General and Board of Ordnance,
The Secretary at War, and
The Paymaster-General,

for their information and guidance.

Ordnance accounts for previous years to be closed on the principles now laid down.

Also state to the Secretary to the Ordnance with reference to his letter, dated the 1st December 1845, and the previous correspondence on the subject of the accounts of the Ordnance Department for the years 1843-4, 1844-5 and 1845-6, that their Lordships are of opinion that, under all the peculiar circumstances of the case, the most advisable course will be to make up and close the accounts of the years in question upon the principles laid down in the preceding part of this Minute, it being understood that the Estimates for 1846-7 and future years will be prepared, and that the accounts will be kept strictly in accordance with those principles.

Treasury Minute, dated 17th February 1846.

Letter from the Ordnance respecting the expenditure of the money provided for works at Davenport, in 1845-6.

Read letter from the Secretary to the Board of Ordnance, dated the 12th instant, together with Reports from the Department of the Inspector-general of Fortifications and from that of the Clerk of the Ordnance, on the subject of the expenditure of the money provided in the Ordnance Estimates for 1845-6 for works at Devonport.

Proposal to reserve the unexpended balance of the vote to be applied during the ensuing six months.

From these Reports it appears that a vote for 10,000 *l.* was obtained in the Ordnance grants for 1845-6 for the works in question, of which only 2,700 *l.* can be expended within the year, owing to four of the most favourable months of the spring and summer of 1845 having been allowed to pass over before the works were commenced; and it is proposed, for the sanction of their Lordships, that the balance of the vote for this and other works included in the Estimates for 1845-6, which

hich may remain unexpended on the 31st March next, shall be reserved for six onths after the termination of the year, to be applied during that time to any yments which may be made for such works.

The attention of their Lordships has already been directed to this subject by the ommittee on Ordnance Accounts, who have recommended, paragraphs 45 to 54 their Sixth Report, certain regulations with a view to remedy the inconvenience ising from the practice hitherto pursued by the Board of Ordnance of delaying e execution of the works provided for in the Ordnance Estimates till after the ssing of the annual votes of Parliament.

Regulations recommended by the Committee.

My Lords concur in the recommendations of the Committee on this subject, and ey are pleased to direct—

The Treasury agrees with the Committee.

1st. That no new works nor extensive reconstructions shall be commenced until ey shall have received the sanction of Parliament.

1. No new works to be commenced without the sanction of Parliament.

2d. That such works having been approved by Parliament, and the total estimated st of them having been inserted in the Estimates on which the first instalment the aggregate sum required for their execution has been granted, the Lords ommissioners of the Admiralty and the Board of Ordnance, after obtaining the ncurrence of the Treasury to the insertion, in their respective Estimates, of the ms required for the payments to be made within the year, may direct the execution of such works to be proceeded with, without waiting until the Estimates shall ve been confirmed by the vote of Parliament.

2. When Parliament has approved of works, and of their total estimated cost, the sums authorised by the Treasury to be inserted in the Estimates of subsequent years, may be employed in carrying them on, although those Estimates may not have been confirmed by vote of Parliament.

3d. All ordinary repairs, the estimated provision for which may have been sanconed by the Treasury, may also be proceeded with, without waiting until the vote Parliament shall have been obtained.

3. Sums authorised by the Treasury to be provided in the Estimates for ordinary repairs may be similarly applied.

With respect to the proposal made by the Board of Ordnance that the lances of the Votes for Works for 1845-6 which may be unexpended on the 31st arch next may be reserved for expenditure after that date, my Lords are eased, in accordance with the suggestions contained in the Report from the partment of the Clerk of the Ordnance, to authorise the reservation of such lances until the 30th September next, on the distinct understanding that they all be strictly applied to the works for which they may have been granted; that e balances which may have been unapplied on that day shall be given up for the urpose of being submitted to Parliament as savings to be applied in aid of ays and means; and that, in future, the balances which may remain unexpended the close of the financial year are to revert to the Exchequer, in accordance ith the third regulation in the Treasury Minute, dated the 13th January 1846.

Unexpended balances on the vote for works for 1845-6, authorised to be applied until the 30th September; but in all future years balances which remain unexpended at the close of the financial year are to revert to the Exchequer.

Transmit copy to the Master-general and Board of Ordnance, to the Lords ommissioners of the Admiralty, and to the Commissioners of Audit, for their formation and guidance.

Copy to the Ordnance, Admiralty, and Board of Audit.

EVENTH REPORT of the Committee on Ordnance Accounts, composed of Sir *William Herries*, Mr. *Brooksbank*, Mr. *Thomas*, and Mr. *Anderson*.

Treasury Chambers, 25 June 1846.

We have the honour to submit, in obedience to the directions to your Lordships' minute of the 13th January 1846, founded on the recommendations contained in our Sixth Report, a draft of the clauses proposed to be introduced into the next Appropriation Act, and which appears to us calculated to effect the object of securing the due application of the Parliamentary grants for Army, Commissariat, Navy, and Ordnance Services, to the purposes to which they shall be appropriated by the Annual Appropriation Act. We propose the addition of four clauses.

Draft of clauses submitted, as directed by the Minute of 13 January 1846, page 103, par. 10.

The first clause binds the Army, Navy, and Ordnance Departments not to exceed the Votes of Parliament without sanction, and gives your Lordships the power of authorising the application of surpluses on one or more heads of the Estimates

1st clause.

Estimates to meet the deficiences on others, in those cases where the exigencies of the public service render such a course expedient.

2d clause.

The second clause repeals the 30th and 31st clauses of the Act 2 Will. 4, c. 40, under which the annual account of naval receipt and expenditure has hitherto been laid before Parliament by the Commissioners of Audit.

3d clause.

The third clause provides for the preparation of annual accounts of receipt and expenditure for Navy, Army, Commissariat, and Ordnance Services respectively, and for their examination by the Commissioners of Audit, who are to transmit them to your Lordships for presentation to Parliament.

4th clause.

The fourth and last clause prescribes the course to be adopted when objections may have been taken by the auditors to any of the items of the accounts.

Dates at which the accounts should be rendered.

We beg to direct the attention of your Lordships to the dates inserted in the third clause prescribing the days on which the accounts must be rendered by the departments to the Audit Office, and be laid before Parliament by your Lordships.

The Naval accounts within eight months.

The Naval Account is at present rendered to the auditors within eight months after the termination of the year. The War Office Account is not completed till between 13 and 14 months after the expiration of the year to which it refers. The Commissariat Account has usually been prepared within 11 or 12 months after the close of the financial year. The Ordnance Department has not yet prepared an account for Parliament, but it is considered by that department that the required account could not be completed in less time than two years after the termination of the year to which the account may relate. One of the causes which have hitherto prevented an earlier closing of the annual accounts of the Ordnance, has been the practice of applying the vote for works and repairs to expenses incurred two, three, or more years after that for which the grant was made. This cause of delay having ceased in consequence of that vote being now taken on the principle of providing only for the charges to be defrayed within the year, we see no reason why the Ordnance Department should not close its accounts as rapidly as the War Office. We have therefore proposed, that the several departments, with the exception of the Navy, in respect to which a change does not appear desirable, shall render their annual accounts to the Commissioners of Audit within 13 months after the expiration of the year, and that these accounts shall be laid before Parliament within one month after.

As the votes will now be taken on the principle of providing only for the charges to be defrayed within the year, the War Office and Ordnance accounts may be rendered within thirteen months;

Your Lordships have expressed a desire in your minute of the 13th January 1846, that the accounts of the financial year, ended on the 31st March preceding, should be presented to Parliament before the close of the succeeding financial year, or as soon after as practicable. Under the provisions of the proposed clauses, the Naval Accounts will be completed within eight months after the close of the year, and will be presented, as heretofore, at the commencement of the Session; and the other accounts will be presented within 14 months after the expiration of the financial year: we trust, however, that in the course of a short period, when the new arrangements shall have been brought into full practical operation, it will not be found inconvenient to present the latter accounts as early as the Naval Account. It is proper, however, that we should inform your Lordships, that Mr. Thomas is of opinion that under the present system of examining and passing accounts in the Ordnance Department, it will be impossible to prepare a complete account of the receipt and expenditure for Ordnance Services within the period specified in the proposed clauses.

And it is hoped that they may ultimately be presented as early as the Naval account.

The prompt rendering of the annual account obstructed by the arrears in the examination of the Ordnance expenditure.

We are aware that the examination of accounts is in arrear in the Ordnance Department; but we do not consider that we should, on that account, be justified in proposing a more remote date for the preparation of the Ordnance Account than we have suggested for the completion of the extensive account of the army expenditure.

Additional Appropriation Clauses.

After the 22d Clause of the Appropriaton Act for 1845, which is as follows:—

And it is hereby also enacted, that the said aids and supplies provided as afore- iid shall not be issued or applied to any use, interest, or purpose whatsoever ther than the uses, interests, and purposes before mentioned, or for the other ayments directed to be satisfied thereout by any Act or Acts, or any particular ause or clauses for that purpose contained in any Act or Acts of this Session of arliament."

t is proposed to introduce the following additional clauses, viz.:

23d. And it is hereby further enacted, that the respective departments charged ith the detailed application or the sums granted by this Act for Navy, Army, nd Ordnance Services, shall confine the expenditure of their respective depart- ents within the particular amounts appropriated to each of the separate services omprised in the sum of £.   for Navy Services; in the sum of £.   r Army Services; and in the sum of £.   for Ordnance Services; pro- ided always, that if in the application of the monies granted for the separate ervices comprised in any of the aggregate sums aforesaid, the exigencies of the ublic service shall render it indispensably necessary to provide for any extraordi- ary or unforeseen expenditure, the department in which such necessity shall ave arisen shall represent the circumstances which may have led to it in riting to the Lords Commissioners of Her Majesty's Treasury; and it shall be wful for such department, on Her Majesty's pleasure, to that effect being ignified by the Lords Commissioners of Her Majesty's Treasury, or any three or nore of them, for the time being to apply in aid of the deficient grant a further imited sum out of any surplus or surpluses under other heads of service in the ame department; Provided, however, that the aggregate sum of £.   ranted by this Act for Navy Services, of £.   for Army Services, and of   for Ordnance Services, shall not be exceeded.

24th. And whereas it is expedient to repeal so much of an Act passed in the econd year of the reign of his late Majesty King William the Fourth, intituled, An Act to amend the laws relating to the business of the Civil Departments of the avy, and to make other regulations for more effectually carrying on the duties f the said departments," as relates to the making up, and the laying before arliament of an account of naval receipts and expenditure, examined and ertified by the Commissioners for Auditing the Public Accounts, and to make ther provisions in lieu thereof: Be it therefore enacted, that so much of the said ecited Act as relates to the said accounts shall be, and is hereby repealed: Pro- vided always, that nothing in this Act contained shall be construed to affect the reparation, and the laying before Parliament of the said account for the year nded the 31st day of March 1846, in accordance with the provisions of the before recited Act.

25th. And whereas it is necessary to provide for the preparation and rendering to Parliament of accounts of the application of the sums granted by this Act for Navy, Army, Commissariat, and Ordnance Services, examined and certified by the Commissioners for Auditing the Public Accounts; it is therefore further enacted, that on or before the 30th day of November 1847, an account of the receipt and expenditure of the sums granted by this Act for Naval Services, and on or before the 30th day of April 1848, similar accounts of the receipt and expenditure of the sums granted for Army Services, for Commissariat Services, and for Ordnance Services, classed under the several heads into which the grants for each service are divided in this Act, shall be transmitted by each department charged with the preparation of the said accounts, to the Commissioners for Auditing the Public Accounts; who shall examine the said accounts, and certify thereon as to the correctness of the sums therein charged, as compared with the books and vouchers of the several departments; and the said Commissioners are hereby required to transmit copies of the said accounts so examined and certified, to the Lords Commissioners of Her Majesty's Treasury; who shall, on or before the 31st day of January 1848, in the case of the navy, and on or before the 1st day of June 1848, in the case of the other accounts, if Parliament be then sitting, or, if not, then in each case within one week after Parliament shall be next assembled, lay the said accounts before the House of Commons: Provided always, that no sum shall be charged in the said accounts which may be of the nature of an imprest, or advance, of the expenditure, or application of which an account is to be subsequently rendered; and provided also, that if the Commissioners for Auditing the Public Accounts shall discover any inaccuracies in the said accounts of receipt and expenditure, they shall, on receiving authority so to do from the Lords Commissioners of Her Majesty's Treasury, return the said accounts, accompanied by statements of the errors discovered therein, to the respective departments concerned for correction, and amended accounts shall be made up and sent to the Commissioners of Audit by the said departments in lieu of the accounts returned for correction; and the said Commissioners shall transmit copies of such amended accounts, examined and certified as aforesaid, to the Lords Commissioners of Her Majesty's Treasury, to be by them laid before the House of Commons as hereinbefore directed.

26th. And it is hereby further enacted, that the Commissioners for Auditing the Public Accounts shall be allowed access to all books, orders, and other papers to which they may desire to make reference in the progress of their examination of the account-books and vouchers of the several departments intrusted with the detailed application of the sums granted by this Act for Navy, Army, Commissariat, and Ordnance services. And if any objections which may arise in the Audit Office to any item of charge or credit in the accounts of receipt and expenditure to be rendered by the said departments, shall not be answered to the satisfaction of the said Commissioners of Audit by the officers in the said departments to whom such objections shall be addressed, the same shall be referred by the said Commissioners to the Lords Commissioners of Her Majesty's Treasury, who shall determine in what manner the item objected to shall be presented to Parliament; and the Commissioners for Auditing the Public Accounts shall append to each account to be submitted to the Lords Commissioners of Her Majesty's Treasury as aforesaid, a Report, in which they shall recapitulate the several heads of the account under which the sums expended shall have exceeded the sums voted, giving under each head the explanations with which they may have been furnished of the causes of excess, and certifying that such excesses have been sanctioned according to the provisions of this Act; and the said Commissioners shall revert, moreover, in their report to any items in respect of which, although admitted under the provisions of this Act, their objections shall remain unsatisfied.

ANNO NONO & DECIMO VICTORIÆ REGINÆ.

Cap. XCII.—An Act to provide for the Preparation, Audit, and Presentation to Parliament of Annual Accounts of the Receipt and Expenditure of the Naval and Military Departments. 26 August 1846.

2 & 3 Will. 4, c. 40.

Whereas by an Act passed in the second year of the reign of his late Majesty King William the Fourth, intituled "An Act to amend the Laws relating to the Business of the Civil Departments of the Navy, and to make other Regulations for more effectually carrying on the Duties of the said Departments," provision was made for the making up, and the laying before Parliament, of an annual account of naval receipt and expenditure, examined and certified by the Commissioners for Auditing the Public Accounts: And whereas it is expedient to amend the provisions of the said Act, and to provide for the preparation, audit, and presentation to Parliament of accounts of the appropriation of the monies annually granted for the naval and military services; be it therefore enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, that so much of the said recited Act as relates to the account of naval receipt and expenditure shall be repealed: Provided always, that nothing in this Act contained shall be construed to affect the preparation, and the laying before Parliament, of the said account for the year ended

So much of recited Act as relates to account of naval receipt, &c. repealed.

Proviso.

nded the 31st day of March 1846, in accordance with the provisions of the efore-recited Act.

2. And be it enacted, that on or before the 30th day of November in each ear an account of the receipt and expenditure of the sums granted for naval ervices for the year ended on the 31st day of March preceding, and on or before e 30th day of April in each year similar accounts of the receipt and expendiure of the sums granted for Army, Commissariat, and Ordnance services for the ear ended on the 31st day of March of the preceding year, classed under the everal heads of service as expressed in the Appropriation Act or Acts for the ear, shall be transmitted by each department charged with the preparation of the aid accounts to the Commissioners for Auditing the Public Accounts, who shall xamine the said accounts, and certify thereon as to the correctness of the sums erein charged, as compared with the books and vouchers of the several departents; and the said Commissioners are hereby required to transmit copies of the aid accounts, so examined and certified, to the Commissioners of Her Majesty's reasury: Provided always, that if the Commissioners for Auditing the Public ccounts shall discover any inaccuracies in the said accounts of receipt and expeniture, they shall, if required so to do by the Commissioners of Her Majesty's reasury, return the said accounts, accompanied by statements of the errors iscovered therein, to the respective departments concerned, for correction; and mended accounts shall be prepared, and sent to the Commissioners of Audit by he said departments, in lieu of the accounts returned for correction; and the aid Commissioners shall transmit copies of such amended accounts, examined and ertified as aforesaid, to the Commissioners of Her Majesty's Treasury.

Accounts of receipt and expenditure for Navy, Army, Commissariat, and Ordnance services to be annually audited by Commissioners for auditing Public Accounts, and transmitted to the Treasury.

If errors discovered, accounts to be returned to the respective offices for correction.

3. And be it enacted, that no sum shall be charged in the said accounts which ay be of the nature of an imprest or advance of the expenditure or application f which an account is to be subsequently rendered.

No imprests to be charged in the said accounts.

4. And be it enacted, that the Commissioners for Auditing the Public Accounts hall be allowed access to all books, orders, and other papers to which they may esire to make reference in the progress of their examination of the accountooks and vouchers of the several departments intrusted with the detailed pplication of the sums granted for Navy, Army, Commissariat, and Ordnance ervices.

Commissioners of Audit to have access to books, orders, and papers.

5. And be it enacted, that if during the progress of the examination by the udit Office of the books and vouchers of the said departments any objections hall arise to any item to be introduced into the accounts of receipt and expendiure to be transmitted to the Commissioners of Audit as aforesaid, such objections hall, notwithstanding the said accounts shall not have been so transmitted, be mmediately communicated by the said Commissioners to the departments to which they may relate, and if the same shall not be answered to the satisfaction of the Commissioners of Audit by the officers in the said departments to whom uch objections shall be addressed, the same shall be referred by the said Commisioners of Audit to the Commissioners of Her Majesty's Treasury, who shall etermine in what manner the item or items objected to shall be presented to Parliament.

Objections made to items of account from time to time, when not satisfactorily answered, to be referred by Commissioners of Audit to the Treasury.

6. And be it enacted, that the Commissioners for Auditing the Public Accounts hall append to each account to be transmitted to the Commissioners of Her Majesty's Treasury as aforesaid a report in which they shall recapitulate the several heads of the account under which the sums expended shall have exceeded the sums voted, giving under each head the explanations with which they may have been furnished of the causes of excess, and certifying that such excesses have been sanctioned by the Commissioners of Her Majesty's Treasury, according to the provisions of the annual Appropriation Act; and the said Commissioners of Audit shall moreover advert in their report to any items in respect of which, lthough admitted under the provisions of this Act, their objections shall remain unsatisfied.

Auditors to append to each account a report to be transmitted to the Treasury.

7. And be it enacted, that the accounts of receipt and expenditure, together with the reports of the Commissioners of Audit thereon, transmitted to the Commissioners of Her Majesty's Treasury as aforesaid, shall be laid before the House of Commons by the said Commissioners of Her Majesty's Treasury on the days after mentioned, if Parliament be then sitting, or if not, then in each case within one week after Parliament shall be next assembled (*videlicet*), the naval

Accounts, and auditors' reports thereon, to be laid before the House of Commons by the Treasury.

account of receipt and expenditure on or before the 31st day of January next following the 30th day of November hereinbefore mentioned, and the Army, Commissariat, and Ordnance accounts of receipt and expenditure on or before the 1st day of June next following the 30th day of April hereinbefore mentioned.

Commencement of Act.

8. And be it enacted, that this Act shall commence and take effect as to the accounts to be rendered of the application of the grants for naval and military services for the year ending on the 31st day of March 1847.

XXIV. Clause of the Appropriation Act of 1846, 9 & 10 Vict. c. 116, which has been re-enacted without alteration in subsequent Appropriation Acts.

Expenditure for Navy, Army, and Ordnance services respectively to be confined to the separate services for which granted.

Treasury may on application alter the proportionate amounts for such separate services, provided the total grant to each department be not exceeded.

XXIV. And it is hereby also enacted, that the respective departments charged with the detailed application of the sums granted by this Act for Navy, Army, and Ordnance services, shall confine the expenditure of their respective departments within the particular amounts appropriated to each of the separate services comprised in the sum of Seven millions four hundred eighty-four thousand four hundred and fifty-three pounds for Naval services, in the sum of Six millions six hundred thirty-five thousand and forty-four pounds for army services, and in the sum of Two millions five hundred forty-three thousand five hundred and sixty-nine pounds for Ordnance services: Provided always, that if the exigencies of the public service shall render it indispensably necessary to alter the proportions assigned to any of the separate services comprised in the aggregate sum granted by this Act for Naval services, for Army services, or for Ordnance services, the department in which such necessity shall have arisen shall represent the circumstances which may have led to it in writing to the Commissioners of Her Majesty's Treasury, and it shall be lawful for such department, on Her Majesty's pleasure to that effect being signified by the Commissioners of Her Majesty's Treasury, or any three or more of them, for the time being, to apply in aid of the deficient grant a further limited sum out of any surplus or surpluses under other heads of service in the same department: Provided always, that the aggregate sum of Seven millions four hundred eighty-four thousand four hundred and fifty-three pounds granted by this Act for Naval services, of Six millions six hundred thirty-five thousand and forty-four pounds for Army services, or of Two millions five hundred forty-three thousand five hundred and sixty-nine pounds for Ordnance services, shall not be exceeded.

TREASURY MINUTE, dated 8 September 1846.

Recapitulation of documents referred to.

My Lords have under their consideration the Act 9 & 10 Vict. c. 92, under which they are charged with the duty of presenting annually to Parliament accounts of the receipt and expenditure of the naval and military departments, examined and certified by the Commissioners of Audit.

My Lords have also under consideration the 24th clause of the Appropriation Act of the last session of Parliament (9 & 10 Vict. c. 116), by which the responsibility of sanctioning excesses of expenditure beyond the votes for the separate services in the naval and military departments, under the restrictions therein provided, is also imposed on this Board.

Read again the Minute of this Board, dated the 13th January 1846, on which the regulations prescribed by the two Acts above quoted are founded.

Read also the Seventh Report of the Committee of Inquiry into the system of Account and Audit in the Ordnance Department in which the committee proposed clauses to be submitted to Parliament on the above points.

My Lords proceed to complete the instructions necessary for giving full effect to the provisions of the two Acts referred to.

Attention called to the 24th clause of the Superannuation Act.

The Lords Commissioners of the Admiralty, the Secretary at War, and the Master-general and Board of Ordnance, are requested to attend strictly to the provisions of the 24th clause of the Appropriation Act, which requires them to confine the expenditure for the separate services included in their respective estimates within the amount of the Parliamentary vote for each of those services. They will, moreover, be careful to apply the votes to the payment of such charges only ly as they are clearly intended to provide for, as shown in the estimates sub-itted to and approved by the Treasury and Parliament.

Unforeseen and unprovided expenditure, and the means of providing for it to be submitted to the Treasury.

The cases of unforeseen and unprovided expenditure which, under the provisions the clause in question, the Lords of the Treasury are empowered to provide r, if necessary, out of surpluses on other votes of the same department, are to submitted to this Board, with such explanations as may satisfy their Lord-ips that the expenditure could not have been foreseen, and that delay in pro-ding for it would be detrimental to the interests of the public service. It will necessary also, in each case, where the expense cannot be defrayed out of the te to which such expenses are usually charged, that the amount to which it is be limited should be stated, and that the votes on which the saving available r meeting such expenditure may be expected to arise, should be specified.

No unprovided expenditure which can be delayed will be sanctioned by the Treasury.

Their Lordships desire to impress upon the Lords of the Admiralty, the cretary at War, and the Master-general and Board of Ordnance, that the thority to apply the surpluses on some votes to meet the deficiency on others the same department, is limited by the Appropriation Act to cases of indis-nsable necessity; and, consequently, that no extra expenditure which will lmit of the delay of providing for it by an estimate to be presented to Par-ment in the usual course, is to be submitted for their Lordships' sanction under e provisions of the clause referred to.

Excesses of expenditure not previously sanctioned by the Treasury to be reported.

With respect to those cases in which, from circumstances over which the partments could have no control, an excess of expenditure may have arisen efore the preliminary sanction of the Treasury could be obtained, my Lords quest that full reports of such excesses may be transmitted to them by the spective departments, in order that their Lordships may give such directions n the subject as the circumstances of each case may render necessary.

The annual estimates to be submitted to the Treasury in time to allow of their being properly revised.

Their Lordships refer to the regulations prescribed by the Treasury Minute f the 13th of March 1818, for bringing under the official cognizance of the reasury the estimates of the service of the year proposed to be submitted to arliament, and it is requested that they may be forwarded to the Treasury suffi-iently early to admit of their being properly revised by their Lordships pre-iously to their being laid before the House of Commons, in obedience to the esolution of The House, dated the 19th of February 1821, which requires that, Parliament be sitting, the estimates shall be brought forward before the 15th f January; and, if not sitting, then within 10 days after the meeting of the ommittee of Supply.

The classification of the estimates not to be altered without the sanction of the Treasury.

In order to afford to the House of Commons every facility for contrasting the stimates of the prospective year with the votes for the past year, it is very desir-ble that the classification of the expenses in the estimates should be subject to as ittle variation as possible. Their Lordships therefore direct that no alteration in he present classification of the services in the Army, Navy, and Ordnance Estimates hall be made, without having been previously submitted to and sanctioned by his Board; it being understood, however, that the head of "Unprovided," in the rmy Estimates, will be suppressed in future estimates, as suggested in a former ommunication to the Secretary at War, as it is not properly an estimate of pro-pective expenditure, and as the services which it has hitherto embraced will fall nder the regulations prescribed for unforeseen expenses.

Great delay in completing the Ordnance accounts.

Their Lordships advert to the concluding paragraph of the Seventh Report f the Committee of Ordnance Inquiry, in which the committee state that Mr. Thomas, the chief officer of the Account Department of the Ordnance, and vho is also a member of the committee, "is of opinion that under the present ystem of examining and passing accounts in the Ordnance Department, it will e impossible to prepare a complete account of the receipt and expenditure or Ordnance services within the period specified in the clauses proposed by he committee;" that is, within 13 months after the expiration of the financial ear.

Improved regulations required.

If the regulations for examining and passing the Ordnance cash accounts are of uch a nature as to make it impossible to prepare an account of the finally audited eceipt and expenditure of the year within 13 months after the expiration of that ear, my Lords are of opinion that no time should be lost in applying to the Ord-ance system of account and audit the improved regulations adopted in other reat public departments, where accounts quite as voluminous and intricate as hose of the Ordnance are accurately and regularly made up within the same, or ven a shorter period.

My Lords have before them a Return, laid before the House of Commons on the 17th ultimo, "showing the accounts rendered to the Secretary at War, and the progress made in the examination thereof."

Satisfactory result of the War Office accounts.

From that return it appears that more than 5,000 periodical accounts are rendered in each year to the department of the Secretary-at-War, from all parts of the world, for examination; and that on the 17th August last, being little more than four months after the expiration of the financial year, these accounts had been wholly examined, with the exception of a comparatively small number, up to the 31st March preceding, and some even to a later date. My Lords have much pleasure in referring to that return, not only because it exhibits the very satisfactory state of the War Office accounts, but also because it proves the perfect practicability, under equally efficient regulations, of attaining a similar result in the Ordnance Department.

Improved regulations in the Ordnance Department again insisted upon.

Their Lordships have had occasion to refer, in former minutes, to the delay which has taken place in finally settling the annual accounts of the Ordnance Department; but as they have reason to believe that the causes of delay arising out of the principle upon which the Ordnance Votes were taken, and which extended the application of certain votes over several years, have been entirely removed by the regulations prescribed by their Minute of the 13th January 1846, the remaining causes of delay arise probably from the want of proper internal regulations in the Ordnance Office for expediting the settlement of the accounts. It is to these regulations, therefore, that their Lordships are desirous of directing the immediate and earnest attention of the Master-General and Board.

Ordnance accountants should punctually render their quarterly accounts;

Their Lordships would particularly advert to the necessity of clear and precise instructions to all Ordnance cash accountants, more especially to those stationed abroad, in which they should be strictly enjoined to transmit their accounts and vouchers to the Ordnance Office, with as little delay as possible, after the expiration of the quarter or other period for which they are made up. To facilitate as much as possible the early transmission of such accounts, and to secure uniformity in the mode of making them up, every accountant should be furnished with explanatory directions as to the mode of keeping his accounts, and of classifying his receipts and payments; also with forms of cash books, abstracts, and accounts current. He should be required to keep his books posted up daily, so that, at the expiration of the period at which he is instructed to make them up, they may be completed within a few hours. Under regulations of this kind, and with the aid of printed forms, no accountant would require more than a few days for the preparation and transmission of his quarterly accounts and vouchers.

Every account should be examined and passed before the account for the succeeding period is due.

Another point to which their Lordships would direct particular attention is that immediately on the receipt of such periodical accounts at the Ordnance Office, the examination of them should be proceeded with, and that no delay should take place in communicating with the accountant upon those points respecting which a reference to him may be necessary. It should be laid down as a rule, that every account should be passed before the account for the succeeding period is due; and their Lordships entertain no doubt that when a better system of examination, with efficient supervision, shall have been introduced into the Ordnance Department, there will be no difficulty in accomplishing that result.

Objectionable items should be reserved for separate consideration.

The delay in the passing of accounts, arising from the necessity of calling for explanation respecting doubtful charges, should be obviated by suspending the allowance of the objectionable items only. The practice of delaying the allowance of a whole account, because a few items in it may require further explanation, should be immediately discontinued; and all items objected to should be reserved for separate consideration, on receipt of proper explanations from the accountant.

Arrangements for subduing unexamined accounts.

My Lords deem it indispensably necessary, with a view to secure the completion of the annual accounts of the Ordnance receipt and expenditure within the period prescribed by the Act 9 & 10 Vict. c. 92, sect. 7, that immediate steps should be taken for subduing the present arrear of unexamined accounts in the Ordnance Department. They therefore suggest to the Master-General and Board the expediency of dividing the establishment of clerks employed in the examination of those accounts into two branches; one to be charged solely with the arrear accounts, and to continue so employed until the arrears shall have been finally cleared off; the other branch to be employed exclusively on the current accounts, in which no arrear should be suffered to arise in future. My Lords will be prepared

·pared to sanction the employment of such a number of temporary clerks as y be necessary for accomplishing the object in view; but they desire that it y be understood that they decidedly object to the practice of granting extra : for extra attendance in bringing up arrears, to any clerks belonging to the ablishment in which the arrears have arisen.

Necessity for cordial co-operation with the Commissioners of Audit and their officers.

As the Act 9 & 10 Vict., c. 92, appears to their Lordships to be sufficiently olicit, it will not be necessary for them to give any further instructions ito the mode of giving effect to its provisions. My Lords have only to oress their confidence that the Lords Commissioners of the Admiralty, the cretary-at-War, and the Master-General and Board of Ordnance will afford ery assistance in their power to the Commissioners of Audit and their Officers conducting the important duty intrusted to them by Parliament; and my rds will be ready to co-operate with the several departments in promoting the ccessful application of the provisions of the Act.

Mr. Hoffay appointed naval and military auditor.

It only remains for their Lordships to appoint, in accordance with the intention oressed in their minute of the 13th January 1846, the naval and military litor, who will be employed, under the direction and control of the Commisners of Audit, in conducting the audit of the accounts of the receipt and oenditure of the Naval and Military Departments, prescribed by the Act 9 & 10 ct., c. 92, and by their Lordships' minute of the 13th January 1846.

The qualifications of Assistant Commissary-General Hoffay for this appointnt have been brought under the consideration of their Lordships.

It appears, that in addition to Mr. Hoffay's services in the Commissariat epartment, and under the Comptrollers of Army Accounts, commencing in 12, he was employed six years under the Commission appointed by Parliament 1821, to inquire into the collection and management of the revenue; he also ved four years and a half under the Commission appointed in 1830, by the Act Will. 4, c. 58, for determining the value of the different offices in the courts of mmon law. He also conducted a difficult and important inquiry in 1843, der the immediate directions of their Lordships, into the accounts of the payıster of foreign half-pay and pensions in Hanover. Mr. Hoffay has also served ie years under the Commissioners for auditing the public accounts; making gether 30 years of active service.

In these various employments, Mr. Hoffay has availed himself of the opporities they afforded him of making himself acquainted with various branches the public accounts; and the discretion, zeal, and talent with which he has scharged these several duties have been repeatedly brought under the notice their Lordships. My Lords are therefore pleased to select Assistant Commisry-General Hoffay for the appointment of naval and military auditor.

Salary of naval and military auditor.

My Lords advert to the recommendation of the Committee on Ordnance ccounts, in their Sixth Report, that the auditor should be placed, with respect emolument, on a footing of equality with the principal clerks of the first ss in the departments in which his duties are to be conducted; and they are eased to direct that Mr. Hoffay's salary shall commence at 600 *l.* per annum, ing to 800 *l.*, by an annual progressive increase of 20 *l.*

As the duties of the auditor are to commence with the accounts of the current ar, viz., from the 1st of April last, my Lords are pleased to sanction the payent of the above salary from that date. Mr. Hoffay's half-pay, as an Assistant ommissary-General, payable by the Paymaster-General, and the difference tween full and half-pay, payable by the Commissioners of Audit, are to cease om the above date accordingly.

Naval and military auditor to be appointed by selection in or out of the Audit Office.

In any future vacancy, my Lords will appoint to the office of naval and ilitary auditor, by selection, in or out of the Audit Office, as they shall think ost for the advantage of the public service.

Junior clerks.

The two additional clerks to be employed under the naval and military auditor ill be selected for that duty by the Commissioners of Audit, from time to time, om the junior clerks on the establishment of their office; and if it should be ecessary to supply the place of the present examiner of naval accounts, on his tiring from the service, a third junior clerk may be appointed in the same anner: their Lordships, however, concur in opinion with the Committee of quiry, that when these arrangements shall have been carried into full effect, a duction in the number of clerks to be employed on this duty may probably be fected.

Minute to be promulgated.

Transmit a copy of this Minute to the—
Commissioners of Audit,
Lords Commissioners of the Admiralty,
The Secretary-at-War,
Master-General and Board of Ordnance,
The Paymaster-General, and
Committee of Ordnance Inquiry,
for their information and guidance.

Treasury Minute, dated 30 October 1846.

Letter from the Ordnance, proposing a revision of the mode of providing for emergent services.

My Lords have under consideration a letter from the Master-General and Boar of Ordnance, dated 12th October 1846, suggesting a revision of the mode making provision for works requiring to be executed before a Vote of Parliamen for them can be obtained.

Authorities given before the passing of the 9 & 10 Vict. c. 116, must be reconsidered.

My Lords concur with the Master-General and Board, that the passing of th Act 9 & 10 Vict., c. 116, renders it necessary that the authorities given by thei Lordships during the present year, before the passing of the said Act, for th execution of works not provided for in the Ordnance Estimates for 1846-7 should now be reconsidered, with a view to their being sanctioned by their Lordships with strict reference to the provisions of the 24th clause of the said Act.

All payments made within the year, whether for provided or unprovided services, should be charged as expenditure applicable to the year in which they are made.

The votes for works and repairs being now taken for the payments to be mad within the year, it seems to be more consistent with that principle that all payments made within the year, whether for services provided for in the Estimate of the year, or for unprovided services defrayed under the authority of thei Lordships, should be charged as expenditure applicable to the year in whic they may be made; and that the practice which has hitherto prevailed of payin unprovided services out of the votes of the current year, and subsequentl making provision for them in the Estimates of the succeeding year submitted t Parliament, should be discontinued.

Application of this rule to the expense of unprovided works authorised in 1846–7.

Under this view of the case it will be necessary that all claims for works no provided for in the Ordnance Estimates for 1846–7, which, under former authorities, have been directed to be paid out of Ordnance Funds for 1846–7, an which have been charged, in anticipation, against the Ordnance grants for th ensuing year, 1847–8, should be considered as payable out of the vote for Ordnance Works for the year 1846–7; or, if that vote should be insufficient, out c surpluses on other votes in accordance with the regulations laid down in thei Lordships' Minutes of the 13th January and 12th September 1846.

Suggestion of the Ordnance that provisional charges for unprovided works should be made against the Votes.

My Lords have given full consideration to the suggestion made by the Master-General and Board of Ordnance, that it should "be laid down as a genera
" rule, that all authorised extra expenditure that may occur during the year, bu
" is not voted in the Estimates for that year, may be provisionally charged to th
" corresponding vote of the current year in which such expenditure takes plac
" until the final state of the vote account is ascertained, when these provisiona
" charges could be permanently arranged according to the rule laid down in th
" Minute."

Nature of the authority conferred on the Treasury by the 22d clause of the Appropriation Act.

My Lords desire again to call the attention of the Master-General and Boar to the nature of the authority conferred on them by the 24th clause of the Appropriation Act, by which they are empowered, under certain restrictions, to authoris the payment of expenses not provided for in the annual Estimates. The claus states, that if the exigencies of the public service shall render it indispensabl necessary to alter the proportions assigned to any of the separate services comprised in the aggregate sums voted for Army, Navy, or Ordnance Services, th Department in which such necessity shall have arisen shall represent the circumstances which may have led to it, in writing, to the Board of Treasury; and tha it shall be lawful for such Department, on Her Majesty's pleasure to that effe being signified by that Board, to apply in aid of the deficient grant a furthe limited sum out of any surpluses on other heads of service in the same Departmen

The Treasury may alter the proportions of, but cannot add to the fund provided by Parliament.

Under this clause it appears clear, that their Lordships have no authority to ad to the funds voted for the annual service of the several Departments, but th their power is confined to an alteration of the proportionate amount assigned t particular services; and that there might be no misconception as to the extent

tl

e power conferred on their Lordships by the clause, it is expressly provided erein, that the aggregate amount of the grants for each Department shall not exceeded.

Therefore, in order to obtain the consent of the Treasury to an unprovided service, an equivalent surplus must be shown on other items of the same Vote, or on other Votes.

It appears to their Lordships, therefore, to be necessary when a proposal is rought under their consideration for the purpose of obtaining their approval of e execution of works not provided for in the annual Estimates, that they should be tisfied of the probability of there being a sufficient surplus on other items of the me vote, or on other votes, to cover the additional expenditure submitted for their nction; otherwise they would run the risk of acting in contravention of the xpress provisions of the clause under which they derive their authority, by thorising expenditure in excess of the total grants of the year.

Where there is no available surplus, other service of a less urgent nature must be postponed.

The Master-General and Board state, that "they greatly fear it may not, in most cases, be possible from the state of the vote account at the time, to specify any available surplus on other votes;" upon which my Lords have to remark hat in such cases, when a department finds it necessary to undertake an indisensable work which will not admit of delay, and for which no provision has been ade in the Estimates, and to meet which no surplus on the grants for other rvices appears available, it will be their duty, in submitting the expense for the pproval of the Treasury, to propose to their Lordships to sanction the postponeent of some other work or service of a less urgent nature, in order that the oney voted for it may be made available for the more pressing emergencies of e public service. If this course be followed my Lords do not apprehend that necessity will arise, unless under extraordinary circumstances, for exceeding the tal grants of Parliament for the year.

Statement to be furnished of unprovided works which have been sanctioned during the present year, and of the manner in which it is proposed to secure a provision for them out of the grants of the current year.

With respect to the Ordnance Works which have been sanctioned by their ordships during the present year, and for which no special provision has been ade by Parliament, my Lords request that a statement may be submitted to is Board, showing the manner in which the Master-General and Board of Ordance propose to secure a provision for them out of the grants of the current year, accordance with the terms of this Minute, when my Lords will cause a warrant be prepared as a covering authority for them, as required by the 24th clause f the Appropriation Act of the current year.

Copy to the Ordnance.

Transmit a copy of this Minute to the Secretary of the Board of Ordnance in eply to his letter of the 12th October.

TREASURY MINUTE, dated 2 May 1848.

Credits in aid.

MY Lords have under consideration the subject of the appropriations credited n the annual Estimates of the Naval and Military Departments, in aid of the ums to be voted for the service of those departments.

Variety of practice respecting them.

It appears that these receipts have been applied for many years, under different egulations, by the different departments.

Old store fund in the Navy applied to payments by Sign Manual for salaries, pensions, &c.

In the Naval Department, previously to the year 1811, the old store fund was pplied to payments, by Sign Manual, for salaries, pensions, and other services. This course having been objected to by the Select Committee on Public Expenditure, in 1808, in their Third Report, a clause was introduced into the Act 50 Geo. 3, c. 117, making it unlawful to charge the fund arising from the sale f old naval stores with any pension, payment, or allowance, and requiring that redit should be given for the total produce of such sales in the annual Estimates f the Navy laid before Parliament.

From 1810 to 1822 its produce was recorded in the face of the Estimate, and an equivalent sum withheld out of the Naval grants.

In pursuance of this enactment, the produce of the sale of old naval and victualling stores received in the year 1810, was recorded on the face of the Navy Estimates for 1811, for the information of Parliament, but the amount was not abated from the sums to be voted. The several services were voted in full, and the Exchequer withheld, out of the naval grants, the amount of old naval and victualling stores included in the ways and means of the Appropriation Act of the year. This practice continued until the year 1822.

The corresponding receipts in the Ordnance deducted in the Estimate from the sums required to be voted.

In that year the Select Committee appointed to consider the best mode of simplifying the accounts annually laid before Parliament, directed the attention of the House of Commons to the difference in the practice of the Navy and Ordnance Departments with respect to the appropriation of the monies received from the sale of old stores, the produce of such sales having been deducted, in the Ordnance Estimates, from the sums required to be voted; whilst, in the Navy, the full amount of the estimate was voted, without any deduction for old stores the produce of which was appropriated by Parliament as part of the ways and means of the year. The Committee, considering that the practice of the Ordnance was the most conformable with the provisions of the Act 50 Geo. 3, c. 117, s. 6, recommended that the Naval Department should be required to follow the Ordnance practice of deducting such receipts from the Estimates submitted to Parliament.

This practice extended to the Navy in 1823.

In consequence of this recommendation of the Select Committee of 1822, the old store receipts in the Naval Department were deducted from special votes of the Navy Estimates, and ceased to be appropriated as ways and means from the year 1823, and that practice has been continued up to the present year.

The Commissioners of Public Accounts in 1832 recommended that all incidental receipts should be paid into the Exchequer.

The subject of these appropriations was also considered by the Commissioners of Public Accounts in 1832, who recommended that they should be paid into the Exchequer; and my Lords, in their Minute of the 26th September 1834, founded on the Exchequer Regulation Act (4 Will. 4, c. 15), admitted the propriety of the course recommended; but as the authority of an Act of Parliament was supposed to be necessary to enable their Lordships to carry the recommendation of the Commissioners into effect, the measure was postponed. It appears, however, that the Act 50 Geo. 3, c. 117, was repealed in 1834 by the Act 4 & 5 Will. 4, c. 24, in which no provision was made for the appropriation of old store monies; consequently no such obstacle to a change of practice now exists.

Since 1811 the Admiralty has appropriated the actual receipts of the past year in aid of the expenses of the succeeding year; whereas the War Office and Ordnance credited the estimated receipts of the coming year, until otherwise directed by the Treasury Minute of 13 January 1846.

Page 102, Para. 6.

It appears, moreover, that the principle adopted in the naval department has been, since the year 1811, to appropriate the actual receipts for old stores, collected during the past year, ending 31 December, in aid of the expenses of the succeeding year; while, in the Army and Ordnance Departments, it was the practice, until recently, to credit on their estimates the estimated receipts of the prospective year for which the votes were taken. The latter practice led to serious inconveniences, the vote of Parliament for Ordnance stores having been unavoidably exceeded in one year (1837–38) to the extent of upwards of 60,000*l.*, owing to the appropriations in aid of the vote having fallen short of the estimated receipts by that amount. My Lords are aware that since their Minute of the 13th January 1846, a nearer approach to uniformity in the practice of the several departments has been made, but they believe nevertheless that differences still exist which it is desirable to correct.

For the future the Estimates are to be submitted to Parliament in full, and the incidental receipts are to be paid quarterly to the Exchequer.

After a careful consideration of the recommendations of the several Committees of the House of Commons before referred to, respecting the mode of carrying these appropriations to the credit of the public, and of the effects of the various principles hitherto adopted, my Lords are of opinion that henceforward the great departments of public expenditure should submit their annual estimates to Parliament, without any deduction on account of appropriations in aid, and that the full sums required for naval and military services should be voted. They are, therefore, pleased to direct that no further appropriations shall be credited in aid of the Army, Commissariat, Navy and Ordnance Votes, but that the receipts in question shall, commencing from the present time, be paid over quarterly to Her Majesty's Exchequer, to be appropriated as ways and means.

The incidental receipts will be collected and controlled by the several departments as before.

It is not the intention of my Lords that any alteration should be made in the regulations under which these receipts are now collected and controlled by the several departments; the sums should continue to be received by their local officers, and be accounted for, as at present. The different departments should examine the same, as heretofore, and pass them to account in their books, giving authority to the Paymaster-general to pay over the amount quarterly to the Exchequer.

The amount paid to the Exchequer to be annually stated at the foot of the departmental Estimates.

Although the sums in question will no longer appear as deductions from the annual votes, it will nevertheless be desirable that the amount paid over to the Exchequer by each department should be stated every year in an account to be laid before Parliament with the Estimates of the year.

Communications directed to be made to the different departments accordingly.

Transmit copies of this Minute to the Lords of the Admiralty, to the Master-General and Board of Ordnance, and Secretary-at-War, and request that they will give authority to the Paymaster-general to pay over to the Exchequer such sums as may be payable, according to the terms of this Minute, up to the close of the last quarter, and that they will pursue a similar course in future, after the expiration of every quarter.

Transmit copies to the Comptroller-general of the Exchequer, to the Commis-

sioners

ıers of Audit, and to the Paymaster-general, for their information and dance, requesting in the letter to the Comptroller-general of the Exchequer, t the receipts on this account may be carried to the credit of the Consolidated ıd.

Treasury Minute, dated 24 February 1852.

Read letter from the Commissioners of Audit, dated the 18th February 1852, which they bring under the notice of this Board the mode adopted by the Ord- ıce, Army, and Navy respectively, in dealing with the increased expenditure asioned by the Kafir war at the Cape of Good Hope in the years 1850–51 and ı1–52, and in which they suggest that a uniform and correct principle should laid down for the guidance of the Naval and Military Departments in charging ıinst the grants of Parliament the sums expended for that service.

The Commissioners of Audit suggest that an uniform and correct principle should be adopted in the appropriation of the grants for extraordinary military expenditure.

My Lords refer to the following extracts from their Minute of the 27th Novem- 1840:

Minute of the 27th November 1840, *see* page 16.

‘ Cases, however, may be expected to occur from to time in which, owing to he sudden breaking out of hostilities, to hurricanes, or unforeseen causes, it nay be necessary to incur expenses for military purposes, which it is impossible o estimate with any degree of accuracy beforehand. The sums required for his purpose are advanced in the first instance from the military chests; and lthough the expenditure may not differ much in regard to its details from that which ordinarily comes under the control of the military departments, yet, as t is not provided for in their estimates, it is considered to belong to the special lepartment of the Lords of the Treasury."

‘ But when cases occur, like the Kafir war, the state of military preparation consequent on the insurrection in Canada, or the China expedition, in which, lthough it may be certainly known beforehand that it will be necessary to ncur a considerable expense, yet it is impossible to form anything like an ccurate estimate of the probable amount of that expense, my Lords are of pinion that the constitutional course is for the Treasury to lay before Parliament the best estimate that can be made, and to apply for a vote of credit to neet the probable demands."

‘ It appears to my Lords that the estimate should be made, and the vote should e taken in such cases by the Treasury, as the organ of the Government. The propriety of applying to Parliament for such a vote, and the amount to be asked for, may depend upon information of a confidential nature which each separate department cannot be supposed to possess. It may also be impossible to determine beforehand in what proportion the fund ought to be divided between the different military departments."

My Lords have also before them their Minute of the 27th March 1849, in which s stated, "It appears to my Lords that the practice hitherto pursued, of this Board submitting to Parliament an estimate of the total sum required for the special purposes adverted to, is, on the whole, the most satisfactory. That estimate will be founded upon the advances already made from the Commissariat Chest at the station, and upon such information as may be furnished by the Commissariat officer in charge in regard to the future expected expenditure. The accounts will be examined and audited upon the responsibility of the Government department charged with the examination and audit of expenditure of an analogous description, and the portion of the sum voted for this service, applicable to each department, will be transferred to the proper account in the books of the Paymaster-general."

Minute of 27 March 1849.

My Lords refer also to the vote of 300,000 *l.*, taken in the last Session of Parment, "towards defraying the expenses of the Kafir war, beyond the ordinary grants for Army, Navy, Ordnance, and Commissariat Services for the years 1850–51 and 1851–52."

The doubt which appears to have arisen is, whether my Lords intended by eir Minutes of the 27th November 1840 and 27th March 1849, that the total penditure caused by the Kafir war should be charged to the special vote, or ch portion only as is not covered by the ordinary departmental grants.

Whether the whole of the extraordinary expenditure should be charged to the special vote, or only such portion of it as is not covered by the ordinary departmental grants.

The object of the special vote, as the words of the grant clearly imply, is to ace in the hands of Government the means of defraying a larger expenditure services, not novel in their kind, but merely increased in their amount,—such expenditure by the Ordnance for military defences, clothing, and arms,—by the War Office, for pay, allowances, purchase of horses, recruiting, &c.,—by th Navy, for the conveyance of troops and stores,—and by the Commissariat, fo provisions, forage, transport, &c. The grant of Parliament is restricted to th liquidation of expenses incurred "*beyond the ordinary grants.*" My Lords ar therefore of opinion that those grants must first be exhausted before the specia vote can be applied to the expenses incurred in each department on account o the Kafir war. The several departments should consequently include the whol of the extraordinary expenditure, whether for regular forces or for provisiona levies, with the ordinary expenditure under the several votes, adding to thei annual accounts for Parliament a supplementary statement showing the increase expenditure included under each vote which may have arisen in consequence o the Kafir war. Any sums which may be issued to the departments out of th special vote for the Kafir war should be charged in their annual accounts a receipts out of that vote in aid of their ordinary grants.

The ordinary grants should be exhausted before the special vote is applied. The whole of the expenditure, ordinary and extraordinary, should be included in the annual departmental accounts; and any sums issued from the special vote should be charged as receipts out of that vote in aid of the ordinary grants.

Under this arrangement it will be necessary that the several department should, in conformity with the established practice, apply to this Board for authority to appropriate the surpluses which may have arisen on any of their votes t meet the increased expenditure beyond other votes ; and if the aggregate expenditure of any department should exceed the total of the ordinary grants, and i can be clearly shown to this Board that such excess of expense has arisen in consequence of the increased expenditure on account of the Kafir war, my Lords wi authorise the deficiency to be made good out of the special vote of credit place at their disposal by Parliament for that purpose.

The several departments will apply, as usual, for authority to apply the surpluses on particular votes to supply the deficiencies on others; and any aggregate excess which may be shown to have arisen from the war will be made good out of the special vote of credit.

Transmit copies of this Minute to the Secretary-at-War, the Lords of th Admiralty, the Master General and Board of Ordnance, and to the Paymaste General, for their information and guidance

Transmit copy also to the Commissioners for Auditing the Public Accoun with reference to their letter of the 18th instant.

of all APPLICATIONS made by the First Lord of the Treasury and the Chancellor of the Exchequer, to the Governor and y-Governor of the Bank of England, for ADVANCES to Government authorised by Parliament, from the 5th January 1855 to h January 1856; with a Copy of the MINUTES of the Court of Directors thereon, and the ANSWERS of the said Court thereto;— nt to Act 59 Geo. 3, c. 76.

ourt of Directors, at the Bank, on Thursday the 15th March 1855, the following Letter from the Chancellor of the Exchequer been read, viz.,—

ntlemen, "Treasury Chambers, 9 March 1855.

g leave to acquaint you, that it will be an accommodation to the public service if your Court will consent to make advances xchequer Bills, under the authority of the Act of the 18 Vict. c. 5, as they may be required from time to time, during the quarter, ending 31st March, to the extent of One Million pounds (1,000,000*l.*), to be defrayed from the growing produce of solidated Fund in the ensuing quarter; the said Bills to bear an interest of 2¼*d.* per cent. per diem, the present current rate st of Supply Exchequer Bills.

quest, therefore, you will have the goodness to move your Court to make such advances accordingly.

"I have, &c.
(signed) "*G. Cornewall Lewis.*"

Governor and Deputy-Governor
of the Bank of England."

e recommendation of the Committee of Treasury the Court agreed to the above proposition.

Court of Directors, at the Bank, on Thursday the 29th March 1855, the following Letter from the Chancellor of the Exchequer been read, viz.,—

entlemen, "Downing-street, 26 March 1855.

it is probable that the growing Revenue in the ensuing month may not equal the demands which will probably be made on asury for Supply Services, I beg to acquaint you, that it will be a great convenience to the public service, if, under those tances, your Court will consent to make advances under the authority of the Act 18 Vict. c. 6, upon Exchequer Bills interest at the rate of 2¼*d.* per cent. per diem, to the amount of £. 1,500,000.

"I am, &c.
(signed) "*G. Cornewall Lewis.*"

Governor and Deputy-Governor
of the Bank of England."

e recommendation of the Committee of Treasury the Court complied with the above proposition.

Court of Directors, at the Bank, on Thursday the 12th April 1855, the following Letter from the Chancellor of the Exchequer been read, viz.,—

Gentlemen, "Downing-street, 7 April 1855.

it is probable that a further advance in aid of the growing Revenue in the current month may be required for Supply es, I beg to acquaint you, that it will be a great convenience to the public service if, under these circumstances, your Court will

will consent to make advances, under the authority of the Act 18 Vict. c. 6, upon Exchequer Bills, bearing interest at th of 2¼*d.* per cent. per diem, to the amount of £. 1,000,000.

"I am, &c.
(signed) "*G. Cornewall Lew*

"The Governor and Deputy-Governor
of the Bank of England."

At the recommendation of the Committee of Treasury the Court complied with the above proposition.

At a Court of Directors, at the Bank, on Thursday the 12th July 1855, the following Letter from the Chancellor of the Exch having been read, viz.,—

"Gentlemen, "Downing-street, 4 July 18

"As the growing Revenue in the present month may not be sufficient to meet the demands which will probably be ma the Treasury for Supply Services, I beg to acquaint you, that it will be a great convenience to the public service, if, under circumstances, your Court will consent to make advances, under the authority of the Act 18 Vict. c. 6, upon Exchequer Bills, b interest at the rate of 2 *d.* per cent. per diem, to the amount of £. 1,000,000.

BANK NOTES.

RETURN to an Order of the Honourable The House of Commons,
dated 12 February 1856;—*for*,

COPIES "of the CORRESPONDENCE between the Chancellor of the Exchequer and the Governor and Deputy Governor of the Bank of England, on the subject of issuing additional BANK NOTES within the limit of the Act 7 & 8 Vict., c. 32:"

"And, of the ORDER in COUNCIL authorising the Issue in question."

Treasury Chambers,
14 February 1856.

JAMES WILSON.

CORRESPONDENCE between the Chancellor of the Exchequer and the Governor and Deputy Governor of the Bank of England, on the subject of issuing additional Bank Notes within the limit of the Act 7 & 8 Vict., c. 32.

Sir, Downing-street, 22 November 1855.

I AM desirous of calling your attention, and that of the other Directors of the Bank of England, to the provision contained in the 5th section of the Act 7 & 8 years of Her Majesty, c.32, respecting the issue of additional bank notes within the limits therein prescribed.

Without expressing any opinion that the Bank ought to adopt a course different from that which it has recently followed, with respect to the regulation of its circulation, I think it advisable that steps should be taken for calling into operation the power contemplated by this section; and I therefore wish to communicate to you that, in the event of the proper application being made, Her Majesty's Government will be prepared to advise the issue of an Order in Council to the effect provided for in the Act.

(signed) *G. Cornewall Lewis.*

To the Governor of the Bank of England.

Sir, Bank of England, 26 November 1855.

IN compliance with the suggestion contained in your letter of the 22d instant we have brought under the notice of the Court of Directors, that you deem it advisable that steps should be taken for calling into operation the powers contemplated by the 5th section of the Act of the 7th & 8th years of Her Majesty, c. 32; and we have now the honour to enclose the formal application to Her Majesty in Council required by the said Act, to be made by the Bank for that purpose.

(signed) *T. M. Weguelin*, Governor,
S. Neave, Deputy Governor.

To the Right Hon. Geo. Cornewall Lewis, Bart., M. P.,
Chancellor of the Exchequer.

Gentlemen, Downing-street, 27 November 1855.

I HAVE the honour to acknowledge the receipt of your letter of the 26th instant, enclosing an application of the Governor and Company of the Bank of England to Her Majesty in Council, under the 5th section of the Bank Act of

1844, and to inform you that Her Majesty's Government will take the necessary steps for complying with this application.

(signed) *G. Cornewall Lewis.*

To the Governor and Deputy Governor
of the Bank of England.

Sir, Downing-street, 30 November 1855.

I HAVE the honour to enclose an application of the Governor and Company of the Bank of England to Her Majesty in Council, under the 5th section of the Act 7 & 8 Vict., c. 32, which has been transmitted to me by the Governor and Deputy Governor of the Bank, together with the draft of an Order in Council for giving effect to such application; and I have to request that steps may be taken for obtaining the consent of Her Majesty to the Order at the next Council.

(signed) *G. Cornewall Lewis.*

C. C. Greville, Esq., Clerk of the Council.

To Her Most Gracious MAJESTY the QUEEN in Council,

The humble MEMORIAL of the Governor and Company of the Bank of England,

Showeth,

THAT by an Act passed in the seventh and eighth years of your Majesty's reign, intituled "An Act to regulate the Issue of Bank Notes, and for giving to the Governor and Company of the Bank of England certain Privileges for a limited Period," it was, amongst other things, enacted, that upon the 31st day of August 1844, there should be transferred, appropriated, and set apart by your Memorialists to the Issue Department of the Bank of England, securities to the value of 14,000,000*l.* as therein mentioned, and there should also at the same time be transferred, appropriated, and set apart by your memorialists to the said Issue Department, so much of the gold coin, and gold and silver bullion, then held by the Bank of England, as should not be required by the Banking Department thereof; and that thereupon there should be delivered out of the said Issue Department into the said Banking Department of the Bank of England such an amount of Bank of England notes, as together with the Bank of England notes then in circulation, should be equal to the aggregate amount of the securities, coin, and bullion, so transferred to the said Issue Department of the Bank of England; and the whole amount of Bank of England notes then in circulation, including those delivered to the Banking Department of the Bank of England as aforesaid, should be deemed to be issued on the credit of such securities, coin, and bullion, so appropriated and set apart to the said Issue Department; and from thenceforth it should not be lawful for your Memorialists to increase the amount of securities for the time being in the said Issue Department, save as thereinafter was mentioned; and from and after such transfer and appropriation to the said Issue Department as aforesaid, it should not be lawful for your Memorialists to issue Bank of England notes either into the Banking Department of the Bank of England, or to any persons or person whatsoever, save in exchange for other Bank of England notes, or for gold coin, or for gold or silver bullion, received or purchased for the said Issue Department under the provisions of the said Act, or in exchange for securities acquired and taken in the said Issue Department under the provisions therein mentioned: And it was further enacted, that if any banker who on the 6th day of May 1844, was issuing his own bank notes should cease to issue his own bank notes, it should be lawful for your Majesty in Council at any time after the cessation of such issue, upon the application of your Memorialists, to authorise and empower your Memorialists to increase the amount of securities in the said Issue Department beyond the total sum or value of 14,000,000*l.*, and thereupon to issue additional Bank of England notes to an amount not exceeding such increased amount of securities specified in such Order in Council, and so from time to time: Provided always, that such increased amount of securities specified in such Order in Council should in no case exceed the proportion of two-thirds the amount of bank-notes, which

which the banker so ceasing to issue might have been authorised to issue under the provisions of the now reciting Act; and every such Order in Council should be published in the then next succeeding London Gazette.

That, since the passing of the said Act, the following bankers, who were on the 6th May 1844, issuing their own bank notes, and who under the provisions of the said recited Act were authorised to continue such issue to the extent of the sums hereinafter mentioned, have discontinued the issue of their own notes; that is to say,

Your Memorialists therefore humbly make application to Your Majesty, that under the provisions of the said Act they may be authorised and empowered to increase the amount of securities in the Issue Department of the Bank of England to the extent of 475,000 *l.* beyond the total sum or value of 14,000,000 *l.* in the said Act mentioned, being a sum not exceeding two-thirds of the amount which the aforesaid bankers were authorised to issue under the provisions of the said Act, and that your Memorialists may be authorised and empowered to issue their own bank notes to the extent of the said sum of 475,000 *l.*, in addition to the amount or sum which they are by the said Act authorised to issue.

(L. S.)

Bank of England, 26 November 1855.

ORDER in COUNCIL, authorising the ISSUE of BANK NOTES.

At the Court at Windsor, the 7th day of December 1855.

Present:—The QUEEN'S Most Excellent MAJESTY in Council.

IT having been represented to Her Majesty in Council by the Governor and Company of the Bank of England, by a memorial sealed with the seal of the said Governor and Company, and dated the 26th day of November 1855, that certain bankers in the said memorial named, who on the 6th day of May 1844 were issuing their own bank notes to the extent of sums amounting in the aggregate to the sum of 712,623 *l.*, have ceased to issue their own bank notes, and the said Governor and Company thereupon humbly made application to be authorised, under the provisions of the Act passed in the 7th & 8th years of the reign of Her Majesty, c. 32, intituled "An Act to regulate the Issue of Bank Notes, and for giving to the Governor and Company of the Bank of England certain Privileges for a limited Period," to increase the amount of securities in the Issue Department of the Bank of England, and to extend the issue of their own bank notes to an amount not exceeding two-thirds of the amount which the bankers so ceasing to issue were authorised to issue under the provisions of that Act: Now it is this day ordered by Her Majesty, by and with the advice of Her Privy Council, that the said Governor and Company shall be, and they are hereby authorised and empowered to increase the amount of securities in the Issue Department of the Bank of England to the extent of 475,000 *l.* beyond the total sum or value of 14,000,000 *l.* in the said Act mentioned, and thereupon to issue additional Bank of England notes from the said Issue Department, in manner in the said Act mentioned, to the amount of 475,000 *l.*

(signed) *C. C. Greville.*

BANK NOTES.

RETURN to an Order of the Honourable The House of Commons,
dated 1 April 1856;—*for*,

A COPY "of Treasury Minute, dated the 18th day of March 1856, respecting the Payment to the Public of the Net Profits of the additional Issue of Bank Notes under Her Majesty's Order in Council, dated the 7th day of December 1855."

Treasury Chambers, Whitehall,
2 April 1856.

JAMES WILSON.

COPY of Treasury Minute, dated the 18th day of March 1856, respecting the Payment to the Public of the Net Profits of the additional Issue of Bank Notes, under Her Majesty's Order in Council, dated the 7th day of December 1855.

The Chancellor of the Exchequer directs the attention of the Board to the provisions of the 5th section of the Bank Charter Act of 1844 (7 & 8 Vict. c. 32) which provides —

" That if any banker who on the 6th day of May 1844 was issuing his own " bank notes, shall cease to issue his own bank notes, it shall be lawful for Her " Majesty in Council at any time after the cessation of such issue, upon the appli- " cation of the said Governor and Company, to authorise and empower the said " Governor and Company to increase the amount of securities in the said Issue " Department beyond the total sum or value of Fourteen Million Pounds, and " thereupon to issue additional Bank of England Notes to an amount not exceed- " ing such increased amount of securities specified in such Order in Council, " and so from time to time; provided always, that such increased amount of " securities specified in such Order in Council shall in no case exceed the pro- " portion of two-thirds the amount of bank notes, which the banker so ceasing " to issue may have been authorised to issue under the provisions of this Act, " and every such Order in Council shall be published in the next succeeding " 'London Gazette.'"

The Chancellor of the Exchequer being of opinion that the time had arrived when the power of making the additional issue of notes against securities, contemplated by the above clause, might properly be applied for, acquainted the Governor and Deputy Governor of the Bank of England, on the 22d November last, that Her Majesty's Government would be prepared to advise the issue of an Order in Council to sanction the issue of additional bank notes, in the event of the Bank making the proper application for that purpose. The Governor and Company of the Bank of England having made such application on the 27th November 1855, it was submitted for the consent of the Queen in Council; and on the 7th December 1855, an Order in Council was passed authorising an additional issue of bank notes to the extent of 475,000 *l.*

As

As the consequence of this Order in Council, it became necessary to consider in what way the provisions of the 9th section of the Act (7 & 8 Vict. c. 32.) as to the payment to the public of the net profits of the additional issue, should be brought into operation.

The Chancellor of the Exchequer states to the Board that he has been in communication with the Governor and Deputy Governor of the Bank on this subject. It appeared to him that as many of the charges connected with the Issue Department were common to the general business of the Bank, and could, therefore, only be calculated by approximation, it would be more convenient to follow the precedent of 1844, and to agree upon a fixed sum to be paid annually to the public, which might be added to the annual allowance of 180,000 *l.* made by the Bank under the provisions of the Act of 1844 in diminution of the charge for managing the Public Debt. The principle upon which the Chancellor of the Exchequer proposed to the Bank that this additional allowance to the public should be calculated, is as follows:

The average net annual profit of the Issue Department, before any payment is made to the public, being, on an average of years, 2 per cent. on the issue of 14,000,000 *l.*, the public is entitled to that rate of profit on the full amount of the additional issue of 475,000 *l.*

	£.
Namely - - - - - - -	9,500 per annum.
Subject to a deduction, in accordance with the provisions of the 24th section of the Act 7 & 8 Vict., c. 32, for composition now paid by the Bank to bankers who have discontinued their circulation since the passing of that Act, amounting to - - -	1,422
Leaving a net profit payable to the public of	£.8,078

The Governor and Deputy Governor of the Bank having signified the entire concurrence of the Court of Directors in this arrangement, the Chancellor of the Exchequer suggests to the Board that the necessary steps be taken for giving effect to it from the 5th January 1856.

The Board concur in this suggestion, and desire that the Comptroller-General of the National Debt be directed to deduct in his certificate of the annual charge payable to the Bank for the management of the Public Debt, the sum of 188,078 *l.* from the 5th April 1856, instead of 180,000 *l.*, the amount of the deduction fixed by the 8th section of the Act 7 & 8 Vict. c. 32; and that he be further informed that the deduction of 2,019 *l.* 10 *s.* for the quarter from the 5th January to the 5th April 1856, will be made from the claim now in office for management for the year ending on the 5th April next.

BANK NOTES.

Number of Visits made to the Reading Rooms, for the purpose of Study or Research, about 1,950 in 1810; 4,300 in 1815; 8,820 in 1820; 22,800 in 1825; 31,200 in 1830; 63,466 in 1835; 67,542 in 1840; 69,303 in 1841; 71,706 in 1842; 70,931 in 1843; 67,511 in 1844; 64,427 in 1845; 66,784 in 1846; 67,525 in 1847; 65,867 in 1848; 70,371 in 1849; 78,533 in 1850; 78,211 in 1851; 72,226 in 1852; 67,794 in 1853; 56,132 in 1854; and 53,567 in 1855.

Number of Visits made by Artists and Students to the Galleries of Sculpture, for the purpose of Study, about 4,938 in 1831; 6,081 in 1835; 6,354 in 1840; 5,655 in 1841; 5,627 in 1842; 4,907 in 1843; 5,436 in 1844; 4,256 in 1845; 4,124 in 1846; 3,508 in 1847; 3,694 in 1848; 6,804 in 1849; 6,611 in 1850; 6,086 in 1851; 6,983 in 1852; 6,518 in 1853; 3,652 in 1854; and 3,594 in 1855.

Number of Visits made to the Print Room, about 4,400 in 1832; 1,065 in 1835; 6,717 in 1840; 7,744 in 1841; 8,781 in 1842; 8,162 in 1843; 8,998 in 1844; 5,904 in 1845; 4,390 in 1846; 4,572 in 1847; 5,813 in 1848; 5,970 in 1849; 3,745 in 1850; 3,867 in 1851; 3,702 in 1852; 3,928 in 1853; 3,401 in 1854; and 2,868 in 1855.

Number of visits made to the Coin and Medal Room, 1,310 in 1854; and 1,446 in 1855.

Mem.—The Public are admitted to the British Museum on *Mondays*, *Wednesdays* and *Fridays*, between the hours of Ten and Four, during the Months of November, December, January and February; from Ten till Five during the Months of September, October, March and April; and from Ten till Six from the 7th of May to the 1st of September.

Persons applying for the purposes of Study or Research are admitted to the Reading Rooms every day, except on the Holidays as specified below, from Nine till Four in the Months of November, December, January and February; from Nine till Five in the Months of September, October, March and April; and from Nine till Six in the Months of May, June, July and August, with the exception that on Saturdays in these latter months it closes at Five.

Artists are admitted to study in the Galleries of Sculpture from Nine o'clock to the hour of closing, every day on which the Museum is open.

The Museum is closed from the 1st to the 7th of January, the 1st to the 7th of May, and the 1st to the 7th of September inclusive, on Ash Wednesday, Good Friday and Christmas-day, and also on any Special Fast or Thanksgiving Days ordered by Authority.

British Museum,
5 April 1856.

A. Panizzi,
Principal Librarian.

VIII.—PROGRESS made in the CATALOGUING and ARRANGEMENT of the COLLECTIONS and Account of OBJECTS ADDED, in the Year ending 25th December 1855.

DEPARTMENT OF PRINTED BOOKS.

I. Works added to the Collection during the year have been placed on the shelves of the Library as soon as catalogued. The press-marks, indicating their respective localities, have been affixed to each volume, title, and entry in the Catalogue. The total number of these items amounts to 63,684.

II. *Cataloguing*:—(a.) *New General Catalogue.*—The number of titles written for this Catalogue amounts to 40,645. The number of titles transcribed fourfold for this Catalogue is 51,982. 76,776 titles have been laid down in one copy of this Catalogue, and 46,398 in a second.

(b.) *Supplementary Catalogue.*—1. The number of titles written for this Catalogue amounts to 24,755, besides 893 Chinese; in all, 25,648.

2. The number of titles transcribed fourfold for the Supplementary Catalogue is 22,451; besides 678 index slips. The number of title slips inserted is 80,374; viz., 79,674 in three copies of the Supplementary Catalogue, and 700 index slips in four copies of indexes to various long headings. This insertion has rendered it necessary, in order to preserve the alphabetical order of the names and headings, to take up and re-insert 26,675 titles in each of the three copies of the Supplementary Catalogue, and 202 slips in each of four copies of the indexes; and to add to each copy of the Supplementary Catalogue 247 leaves. All the indexes to the long headings in the Catalogue have been kept up.

3. The number of entries made in the Hand Catalogue of the periodical publications is 268.

(c.) *Maps.*—1. The new titles and cross-references for maps amount to 6,243.

2. The number of titles for the Map Catalogue transcribed fourfold is 5,324.

The number of title-slips inserted in each of two copies of the Map Catalogue is 7,271. This insertion has rendered it necessary (for the purpose of maintaining the strict alphabetical arrangement) to take up and re-insert in each of the two copies 4,230 title-slips, and to add to each copy 113 leaves.

(d.) *Music.*—1. The titles and cross-references written for this collection are 3,351.

2. 3,300 title-slips have been transcribed fourfold. The number of titles inserted in each of three copies of this Catalogue is 3,636. This insertion has rendered it necessary to take up and re-insert 2,430 title-slips in each copy, and to add to each copy 165 leaves.

III. *Interleaved General Catalogue.*—7,128 entries in the small paper copy of this Catalogue have been re-written, in consequence of the necessary repairs to the volumes having rendered it necessary to remove the lower portion of a great number of the original leaves.

IV. *Binding.*—The number of volumes bound is 21,683 in 18,763, including 7,018 Pamphlets. The number of volumes repaired is 1,775. 136 Maps have been mounted.

V. *Reading Room Service.*—1. The number of books returned to the shelves of the General Library from the Reading Rooms is 110,476; to those of the Royal Library, 9,321; to those of the Grenville Library, 688; to the Closets in which books are kept from day to day for the use of the Readers, 81,198; making a total of 201,683, or 695 per diem. Adding the number of volumes returned to the shelves of the Reading Rooms, about 146,000, the whole amounts to 347,683, or 1,198 per diem.

2. The number of Readers has been 53,567; on an average, 184 per diem, the Reading Rooms having been kept open 290 days; each Reader has therefore consulted, on an average, nearly seven volumes per diem.

VI. *Additions.*—1. The number of volumes added to the Library (comprising 160 received under the International Copyright Act) amounts to 10,404 (including Music, Maps, and Newspapers), of which 836 were presented, 3,936 purchased, and 5,632 acquired by copyright.

2. The number of parts of volumes, comprising 122 received under the International Copyright Act, is 28,241 (including Maps and Music), of which 281 were presented, 10,161 purchased, and 17,677 (including 8,611 specifications of patents) acquired by copyright. The total number of Newspapers acquired is 3,277. Of these, 510 (viz., 201 published in London, and 309 in the country) have been received from the Inland Revenue Office in England, 2,024 (for the period from 1818 to 1850) from the branch of that

that Office in Ireland; 73 from the branch of that Office in Scotland. 479 numbers of 200 London and provincial Newspapers were presented, and the remainder (470 French Newspapers) were purchased. The English, Scotch, and French Newspapers have been bound in 452 volumes. The Irish are not yet bound.

3. The Maps, Charts, and Plans amount to 461 in 647 sheets; the Atlases to 28 complete, and 44 in course of publication. Of the Maps and Charts, 306 were presented, 17 purchased, and 137 acquired by copyright. Two of the Atlases were purchased; the remainder, and the 44 parts of Atlases were obtained under the Copyright Act.

4. The number of pieces of Music, each comprising a complete work (including 314 received under the International Copyright Act), is 2,617, of which 43 were purchased, and 2,304 acquired by copyright. 1,595 parts and numbers of works in progress (including 113 received under the International Copyright Act) have been acquired by copyright.

5. The total number of articles received (including 879 Broadsides, Ballads, &c., 303 Playbills of Drury-lane Theatre, 308 Appeal Cases, 41 Engravings, 78 Prints, and 45 Tables of Cab Fares) amounts to 47,420 (of which 620 were received under the International Copyright Act). Of these, 12,362 (comprising 429 received under the International Copyright Act) are complete works. Of the complete works, 584 were presented, 3,862 purchased, and 7,916 were acquired under the Copyright Acts.

6. Each article acquired has been stamped. The number of stamps impressed is 158,103.

A. Panizzi.

DEPARTMENT OF MANUSCRIPTS.

1. The sheets completing the Catalogue of Additions for 1846, from T to CC inclusive, have been sent to press; a portion of the Catalogue for 1847 has been revised; and the copy for 1852 is in a state of great forwardness.

2. The Egerton Manuscripts from No. 1,571 to No. 1,622 inclusive, acquired in 1853, have been described in detail.

3. Many additional slips have been written for the completion of the Catalogue of Maps and Topographical Drawings.

4. The brief Catalogue or Register of the Additional Manuscripts placed in the Reading Room has been continued from July 1854 to June 1855 inclusive.

5. The Cottonian Charters and Papers damaged in the fire of 1731, and hitherto undescribed, have been entered in the Charter Catalogue, forming about 150 articles.

6. The Additional Charters and Rolls have been described, with indexes of names and places, from No. 2,690 to No. 2,986 inclusive.

7. Twenty-three volumes in Arabic, and 84 in Sanscrit, Hindi and Bengali, have been described in detail for the General Catalogues of these classes of Manuscripts; and the Index to the Second Part and Supplement of the Arabic Catalogue has been continued.

8. The General Catalogue of the Persian Manuscripts has been classified, and Indexes of the authors' names and titles of works completed. This Catalogue, forming four volumes in folio, is placed in the Reading Room.

9. One hundred and one volumes in Syriac have been described in detail for the General Catalogue of this class, and three others re-collated.

10. The General Catalogue of Hebrew Manuscripts is approaching to its completion.

11. The general classed Inventory of the Oriental Manuscripts has been kept up to the present time.

12. Indexes and Tables of Contents have been made to the Harleian Manuscripts 6,986, 7,002 to 7,006, 7,011 and 7,012; and transcribed fair into the Cottonian Julius D. III.; Harleian 7,007; and Additional 15,918, 15,919.

13. The arrangement of the Lowe Papers has been completed in 134 volumes; and also of the Gualterio Papers, in 446 volumes.

14. The Additional Manuscripts (including the acquisitions up to December 1855) have been, with few exceptions, arranged, numbered, prepared for the binder, and registered, from No. 20,006 to No. 21,209, inclusive; bound, repaired and lettered, from No. 19,948 to No. 20,164, No. 20,241 to No. 20,279, and No. 20,687 to No. 21,139; and stamped from No. 19,948 to No. 20,155, No. 20,241 to No. 20,279, and No. 20,687 to No. 21,027.

15. The Additional Charters and Rolls have been numbered from No. 8,793 to No. 10,116, inclusive; registered from No. 1,263 to No. 1,585, and from No. 8,666 to No. 9,059; and stamped from No. 8,666 to No. 9,462.

16. The

16. The Egerton Manuscripts have been arranged, numbered, prepared for the binder, and registered, from No. 1,656 to No. 1,663; bound and lettered, from No. 1,337 to No. 1,498, and from No. 1,647 to No. 1,655; and stamped, from No. 1,337 to No 1,422.

17. Four hundred and eighty-six of the Additional Manuscripts have been folio'd, as also 3 Cottonian, 16 Harleian, 2 Old Royal, and 3 Egerton Manuscripts.

18. Stamps have been placed upon every tract, letter, or separate document, in 16 volumes of the Cottonian Collection, 1,101 of the Sloane, 2 of the Harleian, 94 of the Egerton, and 717 of the Additional Manuscripts, with 95 Books of Reference. The Charters and Rolls stamped are 81 Cottonian, 569 Harleian, and 822 Additional. The total number of stamps affixed amounts to 44,155.

19. Considerable portions of the Cottonian Manuscripts on vellum, marked Tiberius A. XII. and XV., Galba A. XIV., XV. and XX., Otho B. IV. and D. I., and Vitellius A. V., D. XV., E. I., II., III., VIII., XII., and F. I. (injured in the fire of 1731), have been identified and inlaid. The whole number of loose vellum leaves and fragments inlaid during the year amounts to 2,629. Two Old Royal Manuscripts (damaged in the same fire) have also been flattened, inlaid, and rebound.

20. Twenty-three Cottonian, 16 Sloane, 90 Harleian, 28 Old Royal, 1 Lansdowne, 140 Egerton, and 814 Additional Manuscripts, with 90 Books of Reference, have been bound, repaired, or lettered. Upwards of 1,600 volumes of various collections have been press-marked, or have had the press-marks altered.

21. The Additional Charters and Rolls have been cleaned, repaired, and marked, from No. 8,666 to No. 9,561, inclusive; together with 194 Cottonian, and 1,549 Harleian Charters; and boxes have been made for them.

22. During the progress of the workmen in glazing the presses of the Gallery in the Middle Room of the Department, about 4,500 Oriental Manuscripts have been moved, and are now restored to their places. The whole of the various collections have been twice dusted and cleaned, and portions of them three and four times.

23. The Additions made to the Department in the course of the year are as follows:—

To the General Collection—	
Manuscripts	523
Original Charters and Rolls	2,460
Seals and Impressions	8
To the Egerton Collection—	
Manuscripts	8

Among the Acquisitions more worthy of notice may be mentioned:—

The Diplomatic Correspondence and Papers of Sebastiaõ Joze Carvalho e Mello (Portuguese Ambassador at London and Vienna, and subsequently known as the Marquis de Pombal), from 1738 to 1747; with above sixty volumes relating to the history of the Portuguese possessions in India and Brazil, during the 16th, 17th, and 18th centuries; and an equal number of volumes concerning the history and commerce of Portugal, England, France, and Spain, during the same period, and earlier: all acquired at the sale of the library of the late Lord Stuart de Rothesay.

Six volumes of the Collections of T. F. Dukes, for the Parochial and Ecclesiastical History of Shropshire; and eleven volumes of Drawings of Churches and Antiquities, with Copies of Monumental Inscriptions, &c., by D. Parkes, relating to the same county. Many volumes of Original Rentals, Extents, Assessments, Court-Books, &c., of lands in the county of Suffolk, from the 15th to the 18th century; with about 1,130 Original Suffolk Charters, from the 13th to the 17th century.

An extremely fine copy, in two volumes folio, of the Shah Jehan Nama, containing the history of part of the reign of the Mogul Emperor, Shah Jehan, composed by Adul Hamid Lahori, who died in 1654; with many very beautiful miniatures. This copy was in the library of the King of Delhi, in 1815.

A very early and well-written copy of the Shah Nama of Firdausi, written A. H. 675 = A. D. 1276.

A Poem written in Oordoo (Hindustani), by His Majesty the King of Oude, entitled, "A Tale of Love," and lithographed at the royal press of Lucknow; presented by H. M. the King of Oude.

A fine Copy, on vellum, of the beginning of the 14th century, of the Fuero or Code of Laws, compiled by order of Alphonso *el Sabio*, King of Castile, in the years 1256–1265; with small but valuable miniatures, executed in Spain.

A beautiful volume, containing the Spanish translation of the Ethics of Aristotle, made by Don Carlos, Prince of Viana, in 1457, for his uncle, Alphonso V., King of Aragon and Sicily; and, apparently, the copy intended for presentation. It is written on the finest vellum, with illuminated borders, initial letters, and shields of arms.

A remarkably fine copy of the "Grandes Chroniques de Saint Denis," ending with the accession of Charles VI. in 1380, and written not many years afterwards; on vellum, large folio.

A volume containing the Hours of the Virgin, and other Offices, adorned with exquisite miniatures, executed by the celebrated Giulio Clovio, about the year 1535, for his patron

Cardinal Marino Grimani, whose arms are on the second leaf; in the original binding, with silver-gilt clasps.

A copy, on vellum, of the 10th century, of a Lexicon in Tironian characters, with Latin interpretations; formerly in the library of P. Pithou, and latterly in the De Rosny collection.

A valuable historical volume, containing the lives of Dagobert, Charlemagne, and Louis the Pious, by various authors; with the Annals ascribed to Eginhard, and the "Res gestæ Saxonicæ" of Witikind of Corby; on vellum, of the eleventh century.

Original Book of Indentures on vellum, between Henry VII. and John Islippe, Abbot of Westminster, for the performance of certain religious services in the Abbey, dated 16 July 1504.

Twelve volumes of original documents relating to the Fiefs, &c., of St. Maurille, Villechien, l'Epinay, N. D. de Ronceray, and La Leu, in the vicinity of Angers; from the year 1200 to 1684.

An additional portion of the series of Transcripts from the Archives at the Hague, of papers relating to English history, from 1615 to 1632; in five volumes.

A large collection of Maps and Plans of France, particularly of Picardy and Dauphiny, beautifully executed with the pen, and coloured, between the years 1602 and 1609; in a large folio volume.

A series of Letters of State, above 400 in number, signed by Louis XIV. and Louis XV., between the years 1673 and 1717.

A considerable number of Autographs, among which are Letters of Melanchthon and Bucer, Charles I., Queen Mary (1692–4), Sarah Duchess of Marlborough, Frederick Prince of Wales and the Princess Augusta (1745), Davenant, Akenside, Sterne, and others; the Petition of Remonstrance from the Irish House of Parliament to Charles I. (1640), signed by the Members; the original Petition of Simon Pendrill to Charles II.; the original Assignment of one-half part of the "Spectator," by Addison and Steele, in 1712; some Poems of Burns, including "The Cotter's Saturday Night," and his biographical Letter to Dr. Moore, 2d Aug. 1787; the holograph Manuscript of "Kenilworth," by Sir Walter Scott, and two Letters of the same writer, of much interest, addressed to Dr. Dibdin, 1 May 1823, and to Mr. Terry, 2 May 1823.

24. The number of deliveries of Manuscripts to Readers in the Reading Rooms, during the twelvemonth, amounts to 20,984, and to Artists and others, in the rooms of the Department, to 4,355, exclusive of the numerous volumes examined by visitors.

Frederic Madden.

Department of Antiquities.

In the course of the last year, the mode of lighting in the North Assyrian Side-Gallery has been altered.

The fixing of the Egyptian Sculptures upon granite pedestals is proceeding as rapidly as the supply of the material admits.

The arrangement of the Græco-Roman and Roman Portrait Sculpture in the new Gallery and Basement has been completed.

The Egyptian framed Papyri have been arranged for public exhibition against the walls of the North-west Staircase.

A large Collection of Mexican Antiquities purchased from Mr. Young, and the New Zealand objects presented by Sir George Grey, are exhibited in the Ethnographical Room.

All the objects purchased at the Bernal Sale are exhibited, and great progress has been made in the systematical arrangement of the new cases lately provided in the British Room.

The following are the principal acquisitions of the last year:—

Egyptian.—Two Bronze Hawks of unusual size.

Assyrian.—An Inscribed Cylinder, supposed to contain the annals of the first eight years of the reign of Sennacherib.

A collection of Assyrian objects excavated at Nimrud and Koyunjik, and in Southern Babylonia, by Messrs. Rassam, Loftus, and Taylor, under the direction of Sir H. C. Rawlinson, K.C.B., consisting of an Obelisk, portions of two others, a Statue, thirty-four Bas-reliefs, and many smaller objects of interest and value.

Greek.—A collection of Marbles and Inscriptions from the Greek Islands, procured by Charles Newton, Esq., Her Majesty's Vice-consul, Mytilene.

A collection of Votive Figures in stone, found near Larnaka, in Cyprus, on the site of a temple of Venus, presented (through Charles Newton, Esq.,) by M. Demetrius Pierides.

Etruscan and Italo-Greek.—A Bronze Shield, ornamented with embossed patterns of very early character, and resembling those found at Cervetri which are preserved in the Vatican.

A very fine Bronze Vase, resting on a tripod foot, and ornamented at the top by a group, regarded as Peleus and Thetis, surrounded by four mounted figures of Amazons: round the body is engraved a series of combats between men and animals. It was discovered in the South of Italy.

Painted Terracotta Vase, in the form of the head of the Indian Bacchus.

Five

Five Painted Terracotta Vases of unusual character and execution, and eight Figures in the same material, presented by the late Chambers Hall, Esq.

Roman.—A Marble Bas-relief, and two Fresco Paintings, presented by the late Chambers Hall, Esq.
Fourteen Glass Vases, found on the borders of the Rhine.

British Collection.—A very fine Greenstone Celt, found near Pendle, Lancashire, presented by Ralph Holden, Esq.
A Stone Hammer-head, found on Swanton Moor, Derbyshire, presented by Evelyn P. Shirley, Esq., M. P.
A Stone Bead, locally known as a Pixsey's Grindstone, found near Liskeard, Cornwall, presented by H. Pollard, Esq.
A collection of Bronze Celts, Broken Metal, and remains of Castings, found near Croydon, Surrey, presented by Lewis Loyd, Esq.
Three Bronze Celts, found near Goudhurst, Kent, presented by Stringer Stringer, Esq.
A Bronze Celt-Mould, found in South Wiltshire.
An Iron Celt, at present considered unique, with remains of its original handle, found in North Wales, presented by Frederick R. West, Esq., M. P.
A collection of enamelled Horse-Trappings of the latest Celtic period, found at Westhall, in Norfolk.
Silver Ingots (some inscribed) and Ornaments of the Roman Period, found with coins of various Emperors from Constans to Eugenius, at Coleraine, in Ireland.
Two Porcelain Beads, found in Scotland, probably of Egyptian manufacture and of the Roman period, presented by Sir James Ramsay, Bart.
A Roman Tile, stamped with the name of the XXth Legion, found at Chester, presented by the Rev. W. Massie.
A Saxon Brooch, found at Mentmore, Buckinghamshire, presented by Frederic Ouvry, Esq.
A Saxon Sword and other Weapons, found on the site of the battle of Ashdown, in Berkshire, presented by the Earl of Craven.
A Saxon Gold Ring inlaid with niello, found near Peterborough.
A Gold Hawk's-ring, found at Biggleswade, bearing the name of the King of England, from the Bernal Collection.
An ancient Gaelic Brooch, which appears to have belonged to the family of M'Lean of Lochbuy, from the Bernal Collection.
The Garter Plate of Sir William Parr, Marquis of Northampton, and brother to Queen Katherine Parr, which was removed from his stall at Windsor on his attainder in 1553.
Several Encaustic Tiles, presented by Sir Henry Ellis, K. H., and Mrs. Stackhouse Acton.
Numerous specimens of ancient English Earthenware.

Medieval.—The additions to this branch of the collection have been very considerable, owing to the purchases made by special grant at the Bernal sale. These purchases consist of Ivory Carvings, Enamels, Italian Majolica, Venetian Glass and Metal Work, amounting to 227 objects.

The most remarkable are the following:

An engraved Crystal, made by order of Lothaire, King of France, and representing the History of Susannah. It belonged to the Abbey of Vasor on the Meuse.
A Majolica Bowl, ornamented with the badges, arms, and devices of Pope Leo X. and his family.
A Case of Knives which belonged to Jaqueline, Countess of Holland, as wife of Jean, Duc de Touraine, son of Charles VI., and which appear to have been given to her by Isabella, Duchess of Orleans, widow of Richard II., King of England.
An Enamel, representing the Marriage of Louis XII. and Anne of Austria.
The Majolica and Enamels purchased at this sale are chiefly remarkable for their documentary and historical value.

The other additions to the Medieval Collection are as follows:—

An Astrolabe, made for the Sultan of Damascus, in the year 1237, and brought to Europe shortly afterwards, and two other Astronomical Instruments of later date.
An Engraved Crystal, of the 9th century, and of Carlovingian or Saxon workmanship.
An Ivory Carving of the 10th century, presented by the Very Rev. the Dean of Llandaff.
An Ivory Tablet, of Carlovingian workmanship, executed on the back of a Roman Consular Diptych.
A large Metal Gilt Figure of the 13th century, under a canopy.
A collection of Pilgrims' Signs.
Twenty-four specimens of Italian Majolica, presented by A. W. Franks, Esq.
A fine Dish of Palissy ware.
An Enamelled Casket by Jean Court dit Vigier.

Ethnographical.—An extensive collection of Mexican Antiquities.
A small collection of Peruvian Antiquities.
Several objects from New Granada, presented by Edward Mark, Esq., Her Majesty's Vice-Consul, Bogota.

An

An extensive collection of Ethnographical objects, which formed the Museum of Haslar Hospital, presented by the Lords of the Admiralty.

Several Gold Ornaments and Beads from the Ashantee country, presented by Mrs. Lee.

A Jade Ear-ring, one of the heirlooms of the Ngatitoa Tribe, in New Zealand. It is known by the name of Kaitangata, and has descended through several generations from Te-Ngahue, one of the Polynesian discoverers of New Zealand; presented by His Excellency Sir George Grey, K. C. B.

A collection of Spears from the South Sea Islands, presented by Henry Latham, Esq.

The acquisitions of Antiquities have been registered, marked, and incorporated, with the exception of the large Assyrian and Ethnographical collections.

COINS and MEDALS acquired during the Year 1855:

	Gold.	Silver.	Copper.
Greek	16	63	51
Roman	16	48	19
Byzantine	6	3	1
Oriental	22	19	93
Medieval and Modern	173	681	808
	233	814	972 = 2,019

Of these, 836 remain unregistered.

In the Greek series the following may be mentioned as among the most valuable acquisitions:—A very early Didrachm of Corinth; two rare Copper Coins of the same city; a Coin of Gortyna, in Arcadia, (a town no coins of which were previously known to numismatists,) another of Orchomenus, indicating the existence of a Bœotian League, a Copper Coin of Nineveh, under the Romans (Niniva Claudiopolis), a very rare Coin of Termessus, and early pieces struck at Gnossus and Cyrene.

The Roman series has been enriched by the acquisition of several fine Medallions, among which, one of Antoninus Pius may be specified on account of its beauty, and another of Probus, for its rarity.

Important coins have been also added to the Roman Family series, and to the Roman Gold.

To the collection of Medieval and Modern Coins large additions have been made, particularly by the purchase of a series of 535 Italian Coins, comprising many of great rarity, for example, those of the Kings of Italy, and of the Lombard Dukes of Benevento. A considerable number of Spanish Coins has been acquired, among which may be noticed, two Gold Pieces of the kind known as Dobla de la Vanda, struck by John I. or II., of Castile. Two Coins of Offa, King of Mercia, one of which was presented by the Rev. J. Ouvry North, have been added to the Saxon series; while several English Gold Coins have been purchased, and the collection of British and Colonial Tokens has been rendered almost complete by acquisitions made at Mr. Conder's sale.

1,446 Visitors have been admitted to examine the Coins, &c. in the Medal Room in the course of the year.

3,594 Visits by Students in the Galleries.

Edward Hawkins.

DEPARTMENT OF NATURAL HISTORY.

Zoological Branch.

The Collection of Mammalia, Birds, Reptiles, Fish, Shells, Corals, &c., which are exhibited in the Public Rooms have been cleaned and have been re-arranged according to the modern discoveries in science. This has also been done with the specimens of Vertebrated, Molluscous, Annulose and Radiated animals preserved in spirits, and the large collection of Skeletons of vertebrated animals.

The General Collections of Insects and Crustacea have received considerable additions, which have been arranged in their appropriate systematic places. In the course of last year several parts of these Collections, namely, the Nocturnal Lepidoptera, Hymenoptera, Diptera, Neuroptera, and certain families of Coleoptera and Crustacea, have been entirely re-arranged, catalogued, and described.

During the year 1855, there have been added to the several parts of the Zoological Collection 24,378 specimens of the different classes of animals; viz.: Vertebrated Animals, 4,865; Annulose Animals, 15,173; Molluscous and Radiated Animals, 4,340; and in this number

number there is a very considerable proportion of specimens which are the types of the species described in various collections, such as those of the Zoological Society, of Haslar Hospital, and of other Museums.

These 24,378 specimens have been regularly marked and described in the Manuscript Register of accessions, with an account from whom, and whence, and how they were derived, and have all been arranged in their systematic places in the General Collection, and properly labelled.

The following Catalogues have been published during the year 1855, viz.:

1. Catalogue of the Genera and Subgenera of Birds, by G. R. Gray, F. L. S.
2. List of Birds—Part Ramphastidæ, by G. R. Gray, F. L. S.
3. List of Lepidoptera Heterocera—Parts 2, 3, 4, 5, 6, by Francis Walker, F. L. S.
4. List of Diptera—Parts 6 and 7, by Francis Walker, F. L. S.
5. Catalogue of Hymenopterous Insects—Part 3, Mutillidæ, by F. Smith, M. E. S.
6. Catalogue of British Hymenoptera—Part 1, Apidæ, by Frederick Smith, M. E. S.
7. List of British Anoplura, Euplexoptera, and Orthoptera, by A. White, M. E. S.
8. Catalogue of Crustacea—Part 1, Leucosiadæ, by Thomas Bell, F. R. S., Pres. L. S.
9. Catalogue of Conchifera—Part 2, Petricoladæ and Corbiculadæ, by M. Deshayes.
10. Catalogue of Pulmonata—Part 1, by Dr. L. Pfeiffer and Dr. J. E. Gray, F. R. S.
11. Catalogue of the Mollusca and Shells collected and described by Messrs. Eydoux and Souleyet.
12. Catalogue of Mollusca—Part 1, Volutidæ, by Dr. J. E. Gray, F. R. S.
13. Catalogue of recent Echinidæ, or Sea Eggs, by Dr. J. E. Gray, F. R. S.

The following Catalogues are in preparation, and will very shortly be issued:

Catalogue of Testudinata, with figures of all the new species, by Dr. J. E. Gray, F. R. S.
Catalogue of the non-parasitic Worms of the British Islands, by the late Dr. George Johnston, of Berwick.
Catalogue of Longicorn Coleoptera—Part 2, by A. White, M. E. S.

In addition to the several thousand Fish, Reptiles, Mollusca, Insects, Crustacea, and other smaller Animals, prepared in the Museum, there have been set up, or re-set by the Animal Preservers—

Mammalia	44
Birds	88
Reptiles	25
Fish	38
Skeletons	80
Animals in Spirits	1,072
Insects	2,000

Among the acquisitions the following may be specially noticed:

The Zoological specimens, stuffed and in spirits of the Museum of the Naval Hospital of Haslar, presented by the Lords of the Admiralty.

The Type specimens which had been presented to the Zoological Society, and described in the Transactions and Proceedings of the Society; presented by the Council of the Zoological Society.

Numerous specimens of Mammalia, Birds, Reptiles, Fish, and Mollusca, selected from the Collections of the Zoological Society, as those most desirable for the completion of the Museum Collection.

A series of Mammalia, Birds, Reptiles, Shells, Insects, and Crustacea, collected during the voyage of H. M. S. "Herald," presented by John Macgillivray, Esq.

Specimens of Mammalia from Nepaul, presented by his Highness Maharajah Dhuleep Singh.

Specimens of Musk Oxen, Reindeer, and other animals, and their skeletons, from Arctic America, collected by Dr. Rae, of the Hudson's Bay Company.

A fine specimen of the Wild Yak, from Thibet, shot and presented by Captain Smyth, 13th Bengal Light Infantry.

Insects of Arctic America, collected and presented by Dr. Rae and Captain Collinson, R. N.

A Collection of specimens of European Trichoptera, determined and presented by Dr. Haagen, of Königsberg.

The Collection of Coleopterous Insects of Madeira, made, described, and figured by T. Vernon Wollaston, Esq., in the "Insecta Maderensia."

Insects of St. Domingo, collected by Mr. Tweedie, the late Consul.

Insects of Celebes, Ceram, and Amboyna, collected by Madame Ida Pfeiffer.

Insects of Northern China, collected by Mr. Fortune.

Insects of Singapore and Borneo, collected by Mr. Wallace.

Insects of the Banks of the Amazon, collected by Mr. Bates.

The Coleoptera of Guatemala and Venezuela, collected by Dr. Scherzer and Mr. Birschell, and the Insects of Port Natal, collected by Mr. Gueinzius.

John Edward Gray.

Mineralogical and Geological Branch.

The principal acquisitions to the Department during the year are—

The well-known Palæontological Collection of the Marchioness of Hastings: it consists of between 2,000 and 3,000 specimens of remains of Vertebrate Animals of the Older Tertiary periods; viz.:—About 350 specimens from the Gypsum beds of Montmartre, near Paris; upwards of 1,500 specimens, chiefly remains of Mammalia and Reptilia, from the Eocene strata of Hordwell, on the coast of Hampshire, and from the Isle of Wight; about 800 specimens from Mayence; and several casts of rare specimens in the Paris Museum.

The second portion of M. Barrahde's Silurian Collection, from Bohemia, consisting of 913 specimens of Gasteropoda and Cephalopoda.

An extensive series of Fossils from the Upper Green Sand of Warminster.

A series of Ammonites from Yeovil, Somersetshire.

Numerous Fossils from the Oolitic formations of the Ardennes.

A series of Fossils from the Bradford Clay, including several very perfect specimens of the Apiocrinite.

A collection of Carboniferous Fossils from Derbyshire.

An extensive series of Fossil Shells, &c., from various parts of France; and portions of the Jaws, with the entire series of Teeth, of the Mastodon Simorrense.

To the Mineralogical Collection have been added several new species, and many very choice specimens; amongst which the following may be particularized:

A series of rare Minerals from the west coast of Greenland, comprising specimens of Fergusonite, Allanite, and some fine Crystals of Columbite, together with several varieties of Cryolite; presented by W. J. Tayler, Esq.

Various Minerals from New Zealand, presented by Sir George Grey, Bart., including specimens of Nephrite and Siliceous Sinter.

Cut and polished specimens of Onyx, showing varieties of colour produced by artificial means; presented by H. Weigall, Esq.

A portion of a mass of Meteoric Iron, found on the desert of Tarapaca, in Chile. This specimen forms the subject of a Memoir by R. P. Greg, Esq., in the Philosophical Magazine for July 1855, and is remarkable for containing native lead: the lead was found in small cavities within the Meteorite, sometimes in masses equal to a pea in size.

Part of a mass of Meteoric Iron, discovered in 1851 at Seneca Falls, New York.

Crystals of Ruby in the matrix, from Orange County, New York; and some fine Crystals of the Sulphate, Carbonate, and Phosphate of Lead, from Phœnixville, Philadelphia.

A fine specimen of the Red Oxide of Copper, crystallized in cubes, from the Burra-Burra Mines, Australia.

Some very large crystals of Gothite, Vitreous Copper, and Childrenite; and various other Minerals from Cornwall.

A series of silver Ores,—Bromides, Chlorides, Sulphurets, &c., from Chile.

The following Mineral substances added during the year are new to the Collection; viz., Eudnophite, Cryptolite, Tyrrhite, Polycrase, and Aspidelite, from Norway; Stratopeite, Paisbergite, &c., from Sweden; Carolathine from Silesia; Eusynchite from Baden; Chalcodite, Houghite, Enargite, and others, from America.

The arrangement of the Fossil Reptilian remains has been completed, the additional specimens forming part of Lady Hastings' Collection having been incorporated in the general series. All the specimens of Minerals received during the year have been entered in the Inventory, and displayed in the Table Cases, some of which have been re-arranged. The Nautilidæ and large Ammonites have been arranged in the Wall Cases of the New Room. Two new Tables of Fossils (one of Oolitic Shells, and one of Cretaceous Shells) have been added to the Collection, and large additions have been made to the cases of Tertiary Shells, Echinodermata, Spongiadæ, and Cephalopoda. Of Fossil remains of Invertebrate Animals, about 3,400 specimens have been catalogued; and of Vertebrate, upwards of 2,000.

George Robert Waterhouse.

Botanical Branch.

The Keeper has added to the arranged Herbarium a continuation of Mr. Thwaites' Collection of Ceylon Plants, and of Mr. Spruce's Collection from Northern Brazil. He has also been occupied in selecting for the Museum a complete set of specimens from Dr. Horsfield's Javanese Herbarium; and in examining extensive Collections received under the instructions of the Board of Admiralty, from the Museum of the Royal Naval Hospital at Haslar, consisting chiefly of Sir John Richardson's Collections in North America, of Collections made on the south-west coast of New Holland, in New Zealand, in the islands of the South Pacific, and in North and South America, by various Collectors; and in preparing and arranging specimens for the Botanical Exhibition.

Since the Keeper's last Annual Report, he has received as presents, or by purchase,—

425 species of Plants of Asia Minor, collected by M. Balansa.

720 species of Indian Plants, collected and presented by Drs. Hooker and Thomson.

1,392 species of Plants of Ceylon, collected by Mr. Thwaites.

18 specimens of Plants, and 30 of Fruits and Seeds, of Western Africa, collected and presented by Dr. W. F. Daniell.

242 specimens of Sea-weeds, collected in South Australia by Mr. Ray.

496 species of Plants, collected in the islands of the South Pacific by Mr. M'Gillivray.

546 species of Plants of Mexico, collected by M. Bottéri.

46 species of *Fungi*, &c., collected at Vera Cruz by M. Sallé.

405 species of Plants of Northern Brazil, collected by Mr. Spruce.

42 specimens of Vegetable Fossils, presented by the Right honourable the Earl of Enniskillen.

9 specimens of Fossil-wood from the Island of Antigua, presented by Peter Robertson, Esq.

25 specimens of Fossil-wood, including numerous large specimens of Psarolites, from Muskingum, Ohio, presented by the late Charles Stokes, Esq.

Robert Brown.

DEPARTMENT OF PRINTS AND DRAWINGS.

Eight volumes of the works of Hollar have been arranged, completing the collection, which is now contained in 19 volumes.

A fourth volume of the works of Henry Goltzius has been arranged, and references to the Peintre Graveur of Bartsch attached to each Print.

A collection of the works of Marc de Bye has been formed during the present year, many of them in rare and undescribed states; they have been arranged in two volumes, and the reference to Bartsch attached to each Print.

The Etchings of C. W. E. Dietrich have been placed in three volumes: the arrangement of Linck, in his recently published Catalogue of this Master's works, having been adopted, the reference to that work is attached to each Print.

Catalogues have been written out of the works of Henry Goltzius, John Muller, and Marc de Bye.

One hundred and thirty-five Drawings have been mounted.

Slips have been written out and arranged for an Alphabetical Catalogue of the Drawings of the Artists of the several Italian Schools; attached to each name is a reference where the Drawings of these Artists may be found in the several Collections.

Four thousand two hundred and forty-nine articles have been entered in the Register of Purchases and Presentations, the whole of which have been stamped, and the register mark attached to each.

The most important additions to the Collections have been—

Italian School.—Two fine Illuminations of the fourteenth century.

A Volume of Designs and Studies by Jacopo Bellino, the father of Giovanni and Gentile Bellino. It is mentioned as being in the Casa Vendramino, in Venice, in 1530, in a 4to. volume, published at Bassano in 1800, by the learned Jacopo Morelli, Keeper of the Library of St. Mark, under the title of "Notizia d'Opere di Disegno nella prima metà del secolo XVI. in Padova, Cremona, Milano, Pavia, Bergamo, Crema, e Venezia. Scritta da un Anonimo di quel tempo." In the Kunstblatt for 1840 are also some interesting papers, together with a list of the greater portion of the subjects delineated in this curious volume.

Drawings also by Taddeo Gaddi, Raffaelle Sanzio, and Salvator Rosa.

A Sulphur impression from a Niello Plate, an Engraving from which will be found in "Duchesne, Essai sur les Nielles." It is described at page 205, No. 193, as "Trois Religieux."

An undescribed Print of the fifteenth century, representing the Virgin seated on a throne with the Infant Christ on her lap: two Angels are soaring above, supporting a crown over her head; she is surrounded by the principal Saints of the order of St. Dominick.

A Print by the Master of 1515.

An Ornament on a dark ground, on which is inscribed, "Academia Lionardo Vinci."

The Presentation in the Temple, not known to the elder M. Bartsch, but described by his son in the recently printed Catalogue of the Imperial Collection at Vienna, at page 38, number 368, where he states, that only three impressions are known. The Print is attributed to Lorenzo Costa of Ferrara by M. Passavant, in the Kunstblatt of 1850.

Books of Prints illustrating early Italian Art, by Ciampini, Bellermann, Quandt, Ternite, Dr. E. Forster and Ramboux.

A large number of Engravings from the works of the great masters of the several schools of Italy.

German School.—Drawings by Israel von Meckenen, Hollar, and Dietrich.

Etchings and Engravings by the Master of 1466, B. Schoen, A. Durer, Lautensack, and Brentel. Wood-cuts by Hans Holbein and Urse Graf.

An impression of Hollar's Engraving of Greenwich, of singular interest, having a Dedication to Henrietta Maria, Queen of Charles I., dated 1637, inserted in the Tablet where the Latin lines by H. Peacham are found in the known states. It is presumed to be unique.

Dutch and Flemish Schools.—Drawings by Rembrandt, Cornelius Visscher, Berghem, De Beyer, Jelgers, J. Van de Vinne, and F. Xavery.

Etchings by Rembrandt, A. Ostade, Waterloo, J. Both, Berghem, Everdingen, De Bye, Ossenbeck, Fruytiers, Vander Hoecke, Schultz, Van Dyck, Van Uden, &c., being for the most part in the rarest and finest states. Choice specimens of the Engravings of Henry Goltzius, Bolswert, Suyderhoef, Houbraken, &c.

French School.—A curious undescribed Print by Jean Duvet.

The rare series of Forty Prints by Jean Tortorel and Jacques Perrisson, entitled "Tableaux des Guerres, Massacres, Troubles et autres Evénemens remarquables advenus en France de 1559 à 1570."

Etchings by Flamen and Boisseaux. Engravings by Audran, Poilly, Larmessin, Tardieu, Masquelier, &c.

A collection of the works of Charlet.

English School.—Drawings by Isaac Oliver, Barlow, Gainsborough, and Stothard. A most interesting Collection of the Sketches and Finished Drawings of Thomas Girtin. —Prints: an unique impression of Hogarth's "Midnight Modern Conversation."

Engravings from the works of Hayman, Blakey, Lawrence, Shee, Phillips, Hilton, Callcot, Mulready, Landseer, E. W. Cooke, E. M. Ward, Webster, &c., by Willmore, Greatbach, Allen, C. Rolls, Stocks, Holl, &c.

Considerable additions have been made to the series of English Portraits, and to the Satirical Prints connected with the history of this country.

The following are the most important Presentations to the Department during the year:

A munificent donation, presented prior to his death, by the late Chambers Hall, Esq., consisting of—

A Study by Raffaelle, for the Entombment of Christ, consisting of nine figures, the picture of which is in the Borghese Palace. Formerly in the Crozat, Legoy, Dimsdale, and Lawrence Collections.

Sixty-six Drawings by Girtin, consisting of Studies from Nature, and some of his most important finished works.

Five rare states of the Etchings of Van Dyck, two presumed to be unique. Twenty-one Etchings by Parmigianino, Andrea Meldolla, the Carracci, Schidone, and Guido. A Volume containing 60 Etchings by Salvator Rosa, and an impression of the "Mocking of Christ," engraved by Bolswert, from Van Dyck, in the first state.

By the Bannatyne Club,—a Volume of Etchings by John Clerk, of Eldin.

By J. H. Robinson, Esq., Petworth,—nine fine and curious Proofs of the Engravings of J. H. Robinson, from the works of Van Dyck, Murillo, Leslie, and Landseer.

By Thomas Lupton, Esq., of Keppel-street,—six of the Ports of England, engraved from the Drawings of W. M. Turner, R. A., by Thomas Lupton; proofs before letters. Portrait of Thomas Girtin, engraved by S. W. Reynolds, from a Picture by Opie.

W. H. Carpenter.

British Museum,
5 April 1856.

A. Panizzi,
Principal Librarian.

BRITISH MUSEUM.

ACCOUNTS of the Income and Expenditure of the British Museum, for the Financial Year ended 31st March 1856; of the Estimated Charges and Expenses for the Year ending 31st March 1857, and Sum necessary to Discharge the same; Number of Persons admitted, and Progress of Arrangement.

(Lord John Russell.)

Note.—The Address of the House of Commons of the 26th July 1856 requires that this Account should be made in continuation of Parliamentary Paper, No. 173, Session 1854-5. No such account, however, was given with that Paper, and the present account has therefore been made in continuation of the last similar account, which was contained in the Parliamentary Paper, No. 953, Session 1853.

Bank of England, 25 July 1856.

J. R. Elsey, Deputy Cashier.

itehall, Treasury Chambers,
25 July 1856.

(signed) *James Wilson.*

No. 1.

FRENCH CLAIMS COMMISSION.

The expenses stated in this Return have reference to a period nearly approaching 5½ years, namely, from the 7th August 1850, the date to which the next previous Return (contained in Parliamentary Paper, No. 720, of Session 1850) extended, to the 22d January 1856, when the business of the Commission was finally closed, and the whole remainder of the archives removed from the office in Whitehall Place into the custody of the Master of the Rolls.

The said expenses, which were paid out of the Indemnity Fund, received from France, amounted to 1,706 *l.* 17 *s.* 9 *d.*

1 July 1856.

B. R. Aston.

No. 2.

FINE ARTS COMMISSION.

The Commission was appointed on the 22d November 1841.

The names of the Commissioners and Secretary appear in the Return dated 18 April 1848.

The Commissioners usually sit in the New Palace at Westminster.

The Commission has met 119 times to the present date, exclusive of meetings at first in Westminster Hall, for the purpose of inspecting Works of Art, and exclusive of meetings of Committees.

The expenses of the Commission, to the 22d November 1855, amount to 11,225 *l.**

The Commissioners are unpaid.

The Secretary's salary, out of which he pays clerks, is 750 *l.* per annum.

An office-keeper, who also attends on other Commissions, was appointed in April 1848. The portion of salary which he receives for attendance on the Fine Arts Commission is 30 *l.* per annum. There is no salary to any other officer or person.

It is uncertain at what period the Commission will close its labours.

Westminster, 13 May 1856.

C. L. Eastlake,
Secretary.

* £. 6,345 of this amount was stated as expended in former Return, dated 18 June 1850, making the

Expenditure since that period - - - - 4,880

FEES ON BARONETCIES, &c.

RETURN to an Address of the Honourable The House of Commons,
dated 12 February 1856;—*for*,

" RETURN of all FEES chargeable upon BARONETCIES, ORDERS OF THE BATH, or other Honourable Distinctions conferred by Her Majesty in Reward of Distinguished Services; and of any EXPENSES incident to such Creations or Distinctions."

RETURN of FEES chargeable upon BARONETCIES, ORDERS OF THE BATH, or other Honourable Distinctions, in the HERALDS' OFFICE.

As regards the Order of the Bath, there are no fees chargeable by or payable to the erald's College. When the honour of knighthood is conferred upon a member of that der, the officers of arms are entitled by law and usage to those hereafter mentioned.

Upon conferring the dignity of Baronet (whether that dignity be given for distinguished rvices or not), the following fees, amounting to 21 *l.* 2 *s.* 3 *d.*, are paid to this College by e Clerk of the Crown, and form part of the sum total of fees payable upon the Patent, as ll appear by his account:—

	£.	*s.*	*d.*
To the King's Heralds and Pursuivants of the Heralds' Office, divisible amongst them as Household Servants of the Crown -	8	17	3
To the Registrar for record of the Patent - - - - - -	2	10	–
To the Heralds' Office, under the Royal Warrant of the 29th February 1820, towards the sustentation and repair of the building	9	15	–
£.	21	2	3
Incidental to the creation of a Baronet, the sum of 15 *l.* 2 *s.* 4 *d.* is payable by the person so created for the necessary Certificate of his Arms and Pedigree registered in this College, such record of Arms and Pedigree being in pursuance of the tenor of a Royal Warrant, including trouble and general attendances - - -	15	2	4
£.	36	4	7

Respecting the sum 15 *l.* 2 *s.* 4 *d.* above stated, I have to observe, that it is payable in rsuance of a warrant of his Majesty King George the Third, bearing date the 3d of Decem-r 1783, reciting the Original Institution of the Order of Baronets by King James the First, iereby it was ordained that the person created a Baronet should bear Arms, and directing at certain fees should be paid to this College for " preparing a Certificate that the family ms of the person so intended to be advanced, together with so much of his Pedigree at st as may be necessary to ascertain the descent of the Title, have been duly registered," uch Certificate is to be forwarded to the Secretary of State before preparing any Warrant pass under the Royal Signet and Sign Manual for the purpose of advancing any person aforesaid.

The following fees are payable upon conferring the dignity of a Knight Bachelor, divisible ongst the King's Heralds and Pursuivants as Servants of the Crown, and form part of e fees and emoluments from the receipt of which they derive their support:—

	£.	*s.*	*d.*
On the honour of Knighthood conferred by the Sovereign, paid by the Receiver of Household Fees, and which is a part of the whole amount of fees on Knighthood charged in his account by ancient law and usage - - - - - - - - -	9	8	3
When Knighthood is conferred by Patent, the fee which forms part of the whole amount of Patent fees charged in the account of the Clerk of the Crown, and paid by that officer, is - - -	9	13	6
When the Knighthood conferred is previous to the admission into the Order of the Bath as a Grand Cross of that Order, the fee payable also by the Receiver of Household Fees, is - - -	18	15	2

Heralds' College, 1 March 1856. *Chas. Geo. Young,* Garter.

HEREDITARY PENSIONS REDEMPTION.

RETURN to an Order of the Honourable The House of Commons,
dated 27 May 1856;—*for*,

N ACCOUNT " showing the PARTICULARS of the HEREDITARY PENSIONS which have been Redeemed in the Year ending the 31st day of March 1856, by an Issue of £. 213,177. 1. 2.; the Principle on which such REDEMPTION MONEY was calculated:"

And, COPIES of any MINUTES by which the Issue of PUBLIC MONEY has been directed for the REDEMPTION of HEREDITARY PENSIONS."

Treasury Chambers,
30 May 1856.

JAMES WILSON.

CCOUNT showing the PARTICULARS of the HEREDITARY PENSIONS which have been Redeemed in the Year ending 31st March 1856, by an Issue of £. 213,177. 1. 2.

ow and when Granted.	Original Grantees.	Present Recipient.	On what Revenue charged.	Pension per Annum.	Amount at which Redeemed. £.	s.	d.
tters Patent of King Charles the Second, dated 22d October 1673.	The Earl of Southampton, the Earl of Euston, and the Earl of Northumberland, with cross remainders.	Duke of Grafton.	Excise -	£. 9,000, reduced by Land Tax, Exchequer Fees, &c. to £. 7,191. 12. net.	193,777	13	2
tters Patent of King George the First, dated 29th June 1715, under the authority of the Act 1 Geo. 1, No. 78, confirming Letters Patent of William and Mary.	Duke of Schomberg.	C. Eyre, Esq.	Post Office	£. 1,000, reduced, as above, to £. 720 net.*	19,399	8	–
					213,177	1	2

* *Note.*—This is that proportion of the pension granted to the Duke of Schomberg which was ested in Mr. Eyre, viz., one-fourth part. The entire pension was 4,000 *l.* gross, and was redeemable f right by the Crown on payment of 100,000 *l.* The sum of 25,000 *l.* would, therefore, according this condition of the Patent, have been required to redeem the one-fourth part, but it has been ctually redeemed by agreement for 19,399 *l.* 8 *s.*, or 5,600 *l.* 12 *s.* less.

The PRINCIPLE on which such REDEMPTION MONEY was calculated.

The redemption money was calculated at 26·945 years' purchase of the net ensions, that being the rate at which Earl Cowper's pension charged on the xcise revenue was purchased in 1853.

COPIES of any MINUTES by which the Issue of PUBLIC MONEY has been directed for the REDEMPTION of HEREDITARY PENSIONS.

COPY of TREASURY MINUTE, dated 11th October 1825.

THE Chancellor of the Exchequer states to the Board that proposals have been made on the part of Lord Melbourne to enter into a negotiation for the redemption of the annuity of 1,500 *l.* per annum payable to his Lordship out o the Hereditary Revenue of Excise.

My Lords are of opinion, that it is very desirable that every opportunity should be taken for the redemption of grants of this description when the surrender can be obtained upon fair terms for the public, and they are pleased to direct a letter to be written to the solicitor desiring him to confer with the person who may be appointed on the part of Lord Melbourne, and to state to my Lords the result of the conference upon what terms it may appear practicable for their Lordships to effect the purchase of the annuity in question.

COPY of TREASURY MINUTE, dated 21st April 1826.

MY Lords resume the consideration of their Minute of 11th October 1825 upon the subject of the purchase of the perpetual annuity held by Lord Melbourne chargeable upon the Revenues of Excise.

Lord Melbourne having signified his readiness to accept the terms upon which it has appeared to my Lords to be expedient to redeem such an annuity, viz., 25 years' purchase of the net annual sum received, which amount, after deducting the land tax of 300 *l.* per annum, is 1,200 *l.* a year, their Lordships desire that the Commissioners of Excise may be instructed to take immediate measures for the redemption of this annuity from Lord Melbourne for the sum of 30,000 *l.*, and report to my Lords when the measures are completed, in order that my Lords may issue a warrant for the application of that sum accordingly.

COPY of TREASURY MINUTE, dated 5th April 1853.

6,848. READ letter from Mr. Charles Gore, Commissioner of Woods, dated the 2d instant, transmitting copy of a letter from the Earl Cowper, referring to an annual payment of 1,600 *l.* now made to his Lordship (subject to the customary deductions) out of the Hereditary Revenues of North and South Wales, and offering to accept 40,000 *l.* for the purchase of the same by the Crown.

Mr. Gore considers this to be an advantageous offer, and requests my Lords to issue their warrant authorizing him (on behalf of Her Majesty) to purchase from the Earl Cowper or others, the owner or owners thereof, the yearly rent, payment, or sum of 1,200 *l.* issuing and payable out of the Hereditary Revenues of the Crown in North Wales, and also one moiety of the yearly rent or payment of 800 *l.* issuing and payable out of the Hereditary Revenues of the Crown in South Wales, for the sum of 40,000 *l.*, to be paid from the capital of the Land Revenue, which said several pensions of 1,200 and 800 *l.* were granted by Letters Patent, bearing date the 9th day of June, in the sixth year of the reign of William and Mary, to Henry De Nassau Seignor Dauverquerque, his heirs and assigns for ever.

Prepare warrant accordingly.

TREASURY MINUTE :—13th May 1853.

6,251. 7,381. 10,013. MY Lords have before them the correspondence which passed with the Commissioners of Excise in 1826, relating to the purchase of Viscount Melbourne's hereditary pension of 1,500 *l.* per annum, payable out of the Excise Revenue.

Their

Their Lordships also read again the report from Mr. Gore, Commissioner of Woods, dated 2d ultimo, upon which a warrant of this Board was issued for the purchase of the pension of 1,600 *l.* per annum (1,503 *l.* 4 *s.* net), payable to Earl Cowper from the Hereditary Revenues of North and South Wales.

And also a report and subsequent memorandum from Mr. Greenwood, assistant solicitor to this Board, dated respectively 24th March and 9th April last; the former containing a statement of the several pensions still payable (including that of Lord Cowper, above mentioned), out of the Inland Revenue, the Land Revenues of the Crown, and the Post-office Revenue, showing the origin of each pension, the transfers of title since made, the present recipients, the deductions from the gross amount on account of land tax, &c., and the power of redemption which exists on the part of Her Majesty's Government, and of sale by the party entitled; and the memorandum comparing the terms on which the pension of Lord Melbourne was purchased in 1826 with those at which it was intended to purchase that of Lord Cowper on the Land Revenue.

The following is an abstract of the statement of the remaining pensions:—

Original Grantees.	Present Recipients.	Gross Pension.	Net Pension (subject to Income Tax).	How redeemable.	———
I.—Charged on the Inland Revenue.					
		£. s. d.	£. s. d.		
1. The Earl of Southampton, the Earl of Euston, and the Earl of Northumberland, with cross remainders	Duke of Grafton -	9,000 – –	7,191 12 –	By agreement.	
2. Earl of Bath -	J. Fullerton - T. Garth -	1,500 – –	1,200 – –	ditto	*N.B.*—This is a moiety of the original pension. The other half was sold by Lord Melbourne.
3. Earl Grantham - (Dauverquerque.)	Earl Cowper - -	2,000 – –	1,595 16 –	ditto.	
II.—Charged on the Land Revenues.					
4. Earl Grantham - (Dauverquerque.)	Earl Cowper - -	1,200 – –	1,127 8 –	ditto	£. 1,503. 4 *s.* net recently agreed to be purchased from Lord Cowper.
	ditto - -	800 – –	375 16 –		
	F. Schröder -		375 16 –	ditto.	
III.—Charged on the Post-office Revenue.					
5. Duke of Marlborough -	Duke of Marlborough	5,000 – –	4,000 – –	Inalienable, except by Act of Parliament.	
6. Lady Castlemaine -	Duke of Grafton -	4,700 – –	3,384 – –	By agreement.	
7. Duke of Schomberg -	Duke of Leeds -	4,000 – –	1,080 – –	Redeemable of right by the Crown, on payment of 100,000 *l.*	
	C. Ayre - -		720 – –		
	P. Powys -		360 – –		
	R. Gosling -		360 – –		
	Colonel Macleod		288 – –		
	Henra. Macleod		72 – –		
	TOTALS - - £.	28,200 – –	22,130 8 –		

My Lords are now informed, by a letter addressed to their Assistant Secretary by Mr. Gore, that Earl Cowper is willing to sell to Her Majesty's Government his pension of 2,000. *l* a year (net value 1,595 *l.* 16 *s.*), payable from the Inland Revenue, for a present payment of 43,000 *l.*

It is shown by Mr. Greenwood's memorandum, that the commutation of Earl Cowper's pension on the Land Revenue, recently sanctioned, is upon terms more favourable to the public by the amount of several years' purchase than that effected in Lord Melbourne's case in 1826, the prices of the public funds at each period being duly considered. The sum about to be paid to Lord Cowper is 26·613 years' purchase of the net amount of his pension, while the commutation proposed by his Lordship of his pension on the Inland Revenue (viz., 1,595*l.* 16*s.* net per annum for 43,000 *l.*), is at the rate 26·945 years' purchase; and as the

price

price of stock has not materially varied since the commencement of the past month, the present offer is somewhat less to the advantage of the public than that recently accepted. Nevertheless, my Lords consider that it will be advisable to conclude the purchase on the terms proposed.

Their Lordships also deem it for the public interest that overtures should be made to the other parties entitled to pensions included in the foregoing list, for the commutation of their annual claims, on the same terms as are now offered by Earl Cowper in respect of his pension on the Inland Revenue; and they desire that communications may be made to them severally, proposing that the necessary legal measures should be concerted by their respective solicitors with the assistant solicitor to this Board, provision being made for the fulfilment of the objects of any trusts or Parliamentary appropriations by which any of the pensions may be affected.

Transmit a copy of this Minute to Mr. Greenwood, who will enter into communication with the persons entitled to pensions, as directed therein.

Transmit a copy to the Postmaster-general and to the Commissioners of Inland Revenue, and request that they will instruct their respective solicitors to give to Mr. Greenwood any assistance which he may require to enable him to carry into effect the instructions of this Board.

To the Lords Commissioners of Her Majesty's Treasury.

May it please your Lordships,

We beg leave to represent, that, in pursuance of instructions received by the solicitor of this department, by letter of the 21st August last from Mr. Reynolds, the solicitor to your Lordships' Board, the necessary arrangements have been made, under the authority of the Treasury Minute of the 13th May 1853, for purchasing the net pension of 7,191 *l.* 12 *s.* per annum, payable to the Duke of Grafton out of this revenue, at a valuation of 26 years' purchase and 945 parts of a year.

The title to the pension has been fully investigated and established; and the power of the present Duke to alienate it in the manner proposed has been confirmed by the opinion of the Attorney and Solicitor-general.

In order to complete the purchase, therefore, we have now to request that your Lordships will favour us with the necessary authority for paying the purchase-money agreed upon, amounting to 193,777 *l.* 13 *s.* 2 *d.*

We are, &c.

(signed) *John Wood,*
C. J. Herries,
Henry Roberts.

Inland Revenue, 21 January 1856.

Treasury Minute:—22d January 1856.

Acquaint the Commissioners of Inland Revenue, that my Lords authorise the purchase of the Duke of Grafton's annuity chargeable on the Excise Revenue for the sum of 193,777 *l.* 13 *s.* 2 *d.*, and that they sanction the payment of that sum out of the Excise Revenue in completion of the purchase.

Request that they will inform this Board when the payment shall have been completed, in order to enable their Lordships to give credit to the Excise Revenue for the amount appropriated to this purchase in the public accounts of revenue and expenditure for the year.

To

To the Right Honourable the Lords Commissioners of Her Majesty's Treasury.

My Lords,

With reference to Sir Charles Trevelyan's letter of the 21st May 1853, conveying the request of your Lordships that the solicitor of the Post-office should render to the assistant solicitor of the Treasury such assistance as might be necessary for carrying into effect the provisions of the Treasury Minute of the 13th May 1853, on the subject of the commutation of certain pensions payable out of the public revenue, I have the honour to state, that the solicitor of this department has received a letter from Mr. Greenwood, stating that Mr. Eyre, one of the proprietors under the grant of the Duke of Schomberg, is willing to sell his portion of such pension, and that the solicitor of Mr. Eyre had been required to transmit to the Post-office an abstract of title, to be laid before counsel, on behalf of the Postmaster-general, who, Mr. Greenwood presumes, will be the nominal purchaser.

It appears, however, from another communication which has been addressed by the solicitor of Mr. Eyre to this department, that, prior to his furnishing such an abstract, it is requisite, as a preliminary measure, that a contract for purchase should be entered into.

Before any steps, therefore, can be taken in the matter by Mr. Peacock, it is necessary that I should receive your Lordships' instructions, first, as to whether it is your intention that the Postmaster-general should be the nominal purchaser, and the contract made in his name; and, secondly, from what fund it is intended that the purchase-money shall be paid.

I have, &c.

General Post-office, 4 August 1855. (signed) *Canning.*

TREASURY MINUTE :—7th August 1855.

Write to the Postmaster-general, that my Lords are of opinion that his Lordship must be the nominal purchaser, and that the money must be paid from the revenue of the department.

[A letter from the Post-office, dated 17th March 1856, reported that the purchase-money had been that day paid.]

HEREDITARY PENSIONS REDEMPTION.

ACCOUNT showing the Particulars of the Hereditary Pensions which have been Redeemed in the Year ending 31 March 1856, by an Issue of £.213,177. 1. 2.; the Principle on which such Redemption Money was calculated:—and, Copies of Minutes by which the Issue of Public Money has been directed for the Redemption of Hereditary Pensions.

COPIES

OF

PAPERS ON THE SUBJECT OF A SITE FOR A NEW NATIONAL GALLERY.

Presented to both Houses of Parliament by Her Majesty's Command.

No. 1.

Treasury Minute :—April 25, 1856.

My Lords have under their consideration the subject of providing a site for a new National Gallery, and they have before them the reports which have been made, and the correspondence which has passed on the subject.

They particularly advert to the proceedings which led to the grant by Parliament in 1852 of the sum of 150,000*l.* towards defraying the purchase of land at Kensington Gore for institutions connected with science and art, and to the proceedings relating to the further Parliamentary Grant in 1854 of 27,500*l.* to enable the Commissioners for the Exhibition of 1851 to complete the purchase of the Gore Lane Estate.

They also read the Minute of this Board of the 15th February 1853,* defining the conditions on which lands at Kensington Gore should be held by those Commissioners, in which it was prescribed that in order to secure unity of action over the lands purchased partly out of the funds at the disposal of the Commissioners, and partly out of money granted by Parliament, the legal title in those lands should be vested in those Commissioners, but that those lands should at the same time be held by them "subject to such directions of appropriation as shall from time " to time be issued by this Board in respect to such part thereof, not exceeding one " moiety, as shall, by agreement between this Board and the Royal Commis- " sioners, be set apart for such institutions connected with science and art as are " more immediately dependent upon and supported by the Government from " funds voted by Parliament." On the other hand, the Minute contained the reservation that before any such buildings shall be erected at the public expense the Royal Commissioners shall have afforded to them an opportunity of submitting to this Board their objections, if any should occur to them, to what may be proposed in respect to such buildings, by which arrangement it was observed a joint superintendence of a beneficial character would be secured to the public over the whole.

In pursuance of the arrangement provided in that Minute an Act of Parliament was passed in 1854 continuing the Commissioners as a corporate body for the purposes of the Act, and giving them certain powers for acquiring lands, constructing roads, and for other purposes.

My Lords advert to that part of the Report of the Select Committee of the House of Commons on the National Gallery in 1853 which relates to the selection of a site for that institution.

The Committee, after adverting to four plans which had been proposed for building a National Gallery on sites in Kensington Gardens or Hyde Park, or their neighbourhood, observed, with respect to the proposal which had been made by the Royal Commissioners for appropriating to that object the upper or northern extremity of the ground purchased by them in Kensington Gore, that if objection to the appropriation of any portion of the parks to these purposes should be found to be insuperable, an alternative remained in the offer of the estate in Kensington Gore; and the Report concluded with the resolution " that " under these circumstances your Committee are prepared to recommend the " acceptance of this offer as the site of a new National Gallery."

Viscount Palmerston states to the Board, that after full consideration of the subject Her Majesty's Government have come to the conclusion that the proposed site at Kensington Gore will on the whole be the most advantageous that can be selected for the National Gallery, and Her Majesty's Government will therefore be prepared to take the necessary measures for carrying that arrangement into effect. It appears however to Her Majesty's Government to be essential that, before proceedings are taken with a view to the erection of a public building for this purpose, the site should be vested in the Government, under whose immediate control all matters connected with the National Gallery are placed.

missioners for
Exhibition of
1851 to the R
Hon. Sir Geo
Grey.

6

Lord Palmerston therefore suggests to the Board that, referring to the previous correspondence, and especially to the arrangement sanctioned by the Minute of the 15th February 1853, a letter should be addressed to the Royal Commissioners for the purpose of ascertaining whether they will be prepared to convey to the Government a site at Kensington Gore sufficient for the erection of a National Gallery, with suitable approaches, and with a sufficient surrounding space; requesting that if the Commissioners are prepared to do so, they will report to this Board the precise boundaries of the space which they will agree to give up for this object; and that the Commissioners should be informed that Her Majesty's Government, on receiving satisfactory assurances on this point from them, will cause a Bill to be introduced into Parliament vesting such site in the Commissioners of Public Works in trust for the proposed object, and subject to such conditions as may be considered advisable.

No. 2.

COPY of a LETTER from JAMES WILSON, Esq., to the ROYAL COMMISSIONERS for the EXHIBITION of 1851.

Treasury Chambers,
April 30, 1856.

SIR, MY LORDS AND GENTLEMEN,

I AM commanded by the Lords Commissioners of Her Majesty's Treasury to request, with reference to the previous correspondence relative to the selection of a site for a new National Gallery, and especially to the arrangement sanctioned by the Minute of this Board, dated 15th February 1853, defining the conditions on which lands at Kensington Gore should be held by you, that you will inform their Lordships whether you will be prepared to convey to the Government a site at Kensington Gore sufficient for the erection of a National Gallery, with suitable approaches and a sufficient surrounding space, and that if so, you will report to this department the precise boundaries of the space which you will be prepared to give up for this object. I have to acquaint you that on receiving satisfactory assurance on this point from you, Her Majesty's Government will cause a Bill to be prepared with a view to its introduction into Parliament, vesting such site in the Commissioners of Public Works in trust for the proposed object, and subject to such conditions as may be considered advisable.

I am, &c.
(Signed) JAS. WILSON.

The Royal Commissioners for the
Exhibition of 1851.

No. 3.

COPY of a LETTER from EDGAR A. BOWRING, Esq., to the SECRETARY to the TREASURY.

SIR, Palace of Westminster, May 5, 1856.

I AM directed by Her Majesty's Commissioners for the Exhibition of 1851 to acknowledge the receipt of your letter of the 30th ultimo, requesting to be informed, with reference to previous correspondence relative to the selection of a site for a new National Gallery, and especially to the arrangement sanctioned by the Treasury Minute of the 15th February 1853, defining the conditions upon which the lands at Kensington Gore should be held by Her Majesty's Commissioners, whether the Commissioners will be prepared to convey to the Government a site at Kensington Gore sufficient for the erection of a National Gallery, with suitable approaches and a sufficient surrounding space, and if so, what are the precise boundaries of the space which they will be prepared to give up for this object, and adding, that on receiving satisfactory assurances on this point Her Majesty's Government will cause a Bill to be prepared with a view to its introduction into Parliament vesting such site in the Commissioners of Public Works in trust for the proposed object, and subject to such conditions as may be considered advisable.

In reply, I am directed to acquaint you, for the information of the Lords of the Treasury, that Her Majesty's Commissioners are prepared, in conformity with their Lordships proposal, to give up so much of the Kensington Gore Estate as may be required for the site of the new National Gallery, with suitable approaches and a sufficient surrounding space, to the intent that it may be vested in the Commissioners of Public Works in trust for the proposed object, such portion of the estate to be taken from the main block lying within the great boundary roads, as shown in the accompanying map of the estate.

With reference to their Lordships request to be informed as to the precise boundaries of the space which Her Majesty's Commissioners will be prepared to give up for the purpose, I am to add that in the absence of more precise information as to the nature and extent of the building intended to be erected, they can only declare their readiness to place at the disposal of Her Majesty's Government so much of the main block above referred to as may be needed for the full and complete execution of any plan for the erection of the National Gallery that may be subsequently decided upon by Her Majesty's Government.

I have, &c.

The Secretary to the Treasury. (Signed) Edgar A. Bowring.

OF

PAPERS on the SUBJECT of a SITE for a new NATIONAL GALLERY.

* Before the 1st January 1849 the abatements on account of superannuation allowances were paid into the Bank of England to the credit of the Paymaster-general, on account of retired allowances. After that period the amount was charged by the Treasury, in the yearly account current, against receipts on the College account, paid over to Her Majesty's Exchequer.

† Retired allowance of 50 *l.* to Mr. Baskett in 1846; but it is understood that he received it only for a short time, having been soon appointed to the Audit Office.

SUPERANNUATIONS.

RETURN to an Order of the Honourable The House of Commons,
dated 10 March 1856;—*for*,

A RETURN "of the SALARIES and EMOLUMENTS, on the 1st day of January 1835 and on the 1st day of January 1856, in the several Branches of the Civil Service now subject to Superannuation Deductions; distinguishing, in separate Columns, the Rate of Salary per Head, and the Numbers in each Class in which either Increase or Decrease of Salary has taken place:"

"Similar RETURN for all such POLITICAL OFFICES as are usually held by Members of either House of Parliament:"

"Similar RETURN for the DIPLOMATIC and CONSULAR DEPARTMENTS:"

"And, RETURN of any general Alterations of PAY that have taken place since the 1st day of January 1830, in those Classes of the Post Office, Ordnance, and Navy Departments receiving Weekly Pay."

(*Mr. Rich.*)

Ordered, by The House of Commons, *to be Printed,*
26 *July* 1856.

---

* The only persons subject to abatements for Superannuation Allowances in both columns are those marked *, the appointments of all the others having taken place before the 4th August 1829. The salaries of the Professors, Masters and Clerks have been and are periodically increased for length of service, according to regulation; any decrease therein arising merely from deaths and resignations, when of course the addition for length of service is saved to the public. The Emoluments are Quarters, Fuel and Medical Attendance gratis, the money value of which cannot exactly be stated; but, in determining former superannuation allowances, has been estimated at 70 *l.* a year. Should the proposed scale of Retired Allowances be adopted, and extended to the Civil Servants who received their appointments before August 1829, these persons would be placed in a more disadvantageous position than they were in before.

† Officer in the Military Service, exempt from contribution.

‡ Salary decreased by 35 *l.* 12 *s.* 6 *d.* per annum.

§ Salary decreased by 50 *l.* per annum.

G. Scovell, Governor.

	Book-keeper	-	-	-	100	–	–	100	–	–
	Assistant Book-keeper	-	-	-	63	–	–	63	–	–
Created since 1 January 1835.	1 Additional Clerk	160	–	–	36	13	1	196	13	1
	1 Ditto	160	–	–	31	19	–	191	19	–
	1 Ditto	130	–	–	-	-	-	130	–	–
	1 Ditto	100	–	–	31	19	–	131	19	–
	1 Ditto	100	–	–	31	19	–	131	19	–
	2 Criers and Ushers, at 80 *l.*	160	–	–	-	-	-	160	–	–
	House Porter, 34, Lincoln's Inn Fields	80	–	–	-	-	-	80	–	–
	Housekeeper - ditto	50	–	–	-	-	-	50	–	–
	Fixed Allowance for Servants, ditto	60	–	–	-	-	-	60	–	–

N.B.—The necessity for these offices arose in 1847, by reason of changes in jurisdiction, and the addition of new Courts, under 10 & 11 Vict. c. 102, at which time the house, 34, Lincoln's Inn Fields, was purchased. See Letter from Commissioners to Mr. Parker, 24th December 1847.

	Government Salaries.			Emoluments.			TOTAL.		
8 Service Messengers:									
4 Senior receive	-	-	-	1,004	18	2	1,004	18	2
4 Junior receive	-	-	-	564	17	7	564	17	7

N.B.—The cause of difference is that in 1844 their profits being affected by legal changes were guaranteed at certain amounts by Government, under Statute 7 & 8 Vict. c. 96; 4 of the present 8 are still paid in part by that compensation.

	Government Salaries.			Emoluments.			TOTAL.		
3 Appraisers, at 493 *l.* 16 *s.*	-	-	-	1,481	8	–	1,481	8	–

N.B.—These offices have been improved by the legislation of 1847, which damaged the messengers.

H. Simpson, Chief Clerk.

Office of Woods, &c.
19 March 1856.

Charles Gore,
James Howard, Commissioners of Her Majesty's Woods, Forests, and Land Revenues.

In the year 1832 the Office of the Surveyor-general of Works and Public Buildings was united with that of the Commissioners of Woods, Forests, and Land Revenues, which offices were again separated in 1851 by the Act 14 & 15 Vict. c. 42; by this Act, the office of the Commissioners of Her Majesty's Works and Public Buildings was constituted on its present footing. A comparison cannot consequently be instituted between the Establishment on the 1st January 1835 and 1st January 1856, as regards this Department.

The present Establishment of the Office of Works, &c. may be seen by reference to the Estimates for the years 1856-57.

Office of Her Majesty's Works and Public Buildings,
18 March 1856.

B. Hall,
First Commissioner of Her Majesty's Works and Public Buildings.

Accountant-General's Office,
24 April 1856.

H. S.

NAVY.

In reference to any alterations of Pay that have taken place since 1 January 1840 in those classes of the Navy Departments receiving weekly pay, there are no classes of persons so situated, as the persons in receipt of day pay chiefly consist of artificers and labourers at the outports.

Admiralty,
14 April 1856.

R. Osborne.

SUPPLY.

RETURN to an Order of the Honourable The House of Commons,
dated 9 June 1856;—*for*,

AN ACCOUNT "of the Sums voted in Supply during the Years 1854 and 1855, under the several Heads of Army, Navy, Ordnance and Miscellaneous Services; and also, Abstract of Grants for Miscellaneous Services during the Years 1854 and 1855, in the same Form as the Abstract now printed with the Annual Estimates, under the several Heads of—1. Public Works and Buildings; 2. Salaries, &c., Public Departments; 3. Law and Justice; 4. Education, Science and Art; 5. Colonial and Consular Services; 6. Superannuations and Charities; 7. Special and Temporary Objects; with the Sum Total under each Head in each Year."

Treasury Chambers, Whitehall,
10 June 1856.

JAMES WILSON.
